1 Nature of operations and Going Concern

Cross River Ventures Corp. (the "Company"), of 1430 - 800 West Pender Street, Vancouver, BC, Canada V6C 2V6 was incorporated under the *Business Corporations Act* (British Columbia) on April 11, 2017. The Company's shares are listed on the Canadian Securities Exchange ("CSE") under the symbol CRVC. The principal business of the Company is the identification, evaluation and acquisition of mineral properties, as well as exploration of mineral properties once acquired.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. As at October 31, 2021, the Company had not achieved profitable operations and expects to incur further losses in the development of its business.

The Company is in the process of exploring and evaluating its mineral exploration and evaluation assets. On the basis of the information to date, it has not yet determined whether these assets contain economically recoverable ore reserves. The underlying value of the mineral exploration and evaluation assets and related deferred costs is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. The amounts shown as mineral exploration and evaluation assets represent net acquisition costs to date, less any amounts written off, and do not necessarily represent present or future values.

There is presently an ongoing global pandemic outbreak of COVID-19. The actual and threatened spread of the virus globally has had a material adverse effect on the global economy and, specifically, the regional economies in which the Company operates. The pandemic could continue to have a negative impact on the stock market, including trading prices of the Company's shares and its ability to raise new capital. These factors, amongst others, could have a significant impact on the Company's operations.

Although the Company has been successful in the past in obtaining financing, there can be no assurances that the Company will continue to obtain the additional financial resources necessary and/or achieve profitability or positive cash flows. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

Realization values may be substantially different from carrying values as shown. These consolidated financial statements do not include any adjustments that would be necessary to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

2 Basis of preparation

These condensed interim financial statements were prepared in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting. Accordingly, they do not include all of the information and disclosures required by IFRS for annual financial statements. These condensed interim financial statements should be read in conjunction with the Company's annual financial statements for the year ended January 31, 2020 which were prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB"). These condensed interim financial statements have been prepared using the same accounting policies and methods of application as the latest annual financial statements.

2 Basis of preparation (continued)

The financial statements are presented in Canadian dollars. The financial statements of the Company have been prepared on an accrual basis, except for cash flow information, and are based on historical costs, except for certain financial instruments, which are stated at their fair values.

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year include the Company's going concern assessment.

3 Significant Accounting Policies

The Company has reviewed new and revised accounting pronouncements that have been issued but are not yet effective. The Company has not early adopted any of these standards. There were no new accounting pronouncements relevant to the Company's operations issued subsequent to October 31, 2021. For further details please refer to Note 3 of the annual financial statements of the Company for the year ended January 31, 2021.

8 Financial Instrument

Determination of Fair Value

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

Fair Value Hierarchy:

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1 – Applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 – Applies to assets or liabilities for which there are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly such as quoted prices for similar assets or liabilities in active markets or indirectly such as quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions.

Level 3 – Applies to assets or liabilities for which there are unobservable market data.

The fair value hierarchy level at which a fair value measurement is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

Financial risk factors

The Company's risk exposures and the impact on the Company's consolidated financial statements are summarized below.

Credit risk

Financial instruments that potentially subject the Company to a significant concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with major financial institutions.

Interest rate risk

The Company is exposed to interest rate risk to the extent that the cash maintained at the financial institutions is subject to floating rate of interest. The interest rate risks on cash and on the Company's obligations are not considered significant.

8 Financial Instrument (continued)

Liquidity risk

All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. At October 31, 2021, the Company had \$1,180,599 working capital.

Price risk

The Company's ability to raise the capital required to fund exploration or development activities is subject to risk associated with the market price of gold and base metals and the outlook for these commodities.

9 Capital Management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Company manages its capital structure and makes adjustments to it in light of changes in economic and financial market conditions. The Company considers its capital structure to include shareholders' equity and working capital. In order to maintain or adjust the capital structure, the Company may issue shares and adjust its spending to manage current and projected cash levels.

There had been no change to the Company's approach to capital management during the nine months ended October 31, 2021. The Company is not subject to externally imposed capital requirements.

10 Subsequent Event

The Company completed a non-brokered private placement offering of flow-through ("FT") and non flow-through units ("NFT") of the Company on December 16, 2021. The Company issued 11,275,730 FT Units at a price of \$0.14 per FT Unit and 8,625,400 NFT Units at a price of \$0.125 per NFT Unit for aggregate gross proceeds of \$2,656,777. Each FT Unit and NFT Unit consists of one common share of the Company, and one-half-of-one common share purchase warrant (each, a "Warrant"). Each whole Warrant is exercisable to acquire an additional common share of the Company at a price of \$0.20 until December 15, 2024.
