Result of Operations

Three months ended July 31, 2023 ("2024 Q2") compared to the three months ended July 31, 2022 ("2023 Q2")

The loss for the three months ended July 31, 2023 was \$166,171 compared to \$585,820 for the three months ended April 30, 2023. The increase in the loss was mainly due to decrease in exploration activities. Major differences are explained as follows:

- Exploration and evaluation costs decreased from \$347,421 in 2023 Q2 to \$Nil in 2024 Q2. The decrease was due to decreased activities in exploration and evaluation activities;
- Investor relations decreased from \$56,742 in 2023 Q2 to \$175 in 2024 Q2. The decrease was due to reduced investor relations and news release dissemination services; and
- Other income decreased from \$69,710 in 2023 Q2 to \$Nil in 2024 Q2. The decrease was due to the fact that the Company has fully incurred all qualified flow-through exploration expenditure as at January 31, 2023. All flow through liability has been fully recognized in other income in prior year.

Going Concern

The recoverability of amounts shown as mineral exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the Company's ability to obtain financing to develop the properties and the ultimate realization of profits through future production or sale of the mineral property interests. Realized values may be substantially different than carrying values as recorded in these financial statements.

The Company's consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to continue its operation as a going concern for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. At April 30, 2023, the Company had not achieved profitable operations, had an accumulated deficit of \$9,967,762.

The Company's business financial condition and results of operations may be negatively affected by economic and other consequences from Russia's military action against Ukraine and the sanctions imposed in response to that action in late February 2022. While the Company expects any direct impacts of the pandemic and the conflict in the Ukraine to the business to be limited, the indirect impacts on the economy and on the mining industry and other industries in general could negatively affect the business and may make it more difficult for it to raise equity or debt financing. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about on its business, results of operations, financial position and cash flows in the future.

Requirement of Additional Equity Financing

The Company has no source of revenue, income or cash flow. It is wholly dependent upon raising monies through the sale of its Common Shares to finance its business operations. There can be no assurances that this capital will be available in amounts or on terms acceptable to the Company, or at all.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this MD&A may constitute forward-looking statements. These statements relate to future events or the Company's future performance. All statements, other than statements of historical fact, may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "propose", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes that the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this MD&A should not be unduly relied upon by investors as actual results may vary. These statements speak only as of the date of this MD&A and are expressly qualified, in their entirety, by this cautionary statement.

In particular, this MD&A contains forward-looking statements, pertaining to the following: capital expenditure programs, development of resources, treatment under governmental regulatory and taxation regimes, expectations regarding the Company's ability to raise capital, expenditures to be made by the Company to meet certain work commitments, and work plans to be conducted by the Company.

With respect to forward-looking statements listed above and contained in this MD&A, the Company has made assumptions regarding, among other things: the legislative and regulatory environment, the impact of increasing competition, unpredictable changes to the market prices for minerals, that costs related to development of mineral properties will remain consistent with historical experiences, anticipated results of exploration activities, and the Company's ability to obtain additional financing on satisfactory terms.

The Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth in this MD&A: volatility in the market prices of minerals, uncertainties associated with estimating resources, geological problems, technical problems, exploration problems, processing problems, liabilities and risks including environmental liabilities and risks inherent in the exploration and mining, fluctuations in currency and interest rates, incorrect assessments of the value of acquisitions, unanticipated results of exploration activities, competition for capital, competition for acquisitions of reserves, competition for undeveloped lands, competition for skilled personnel, political risks and unpredictable weather conditions.
