

MEDXtractor

Corp.

PRESS RELEASE

Calgary, Alberta – May 19, 2021.

For Immediate Release - Medxtractor Corp. (“**MedX**” or the “**Corporation**”) (CSE: **MXT, OTC:MXTTF**) launches a mobile health (“mHealth”) initiative to apply machine-learning to predict personal health trajectories over time.

MedX reports: Where SHAMAN is a business-to-business predictive product expecting to derive revenues from researchers, practitioners and application developers, the mHealth application is envisioned as an online, consumer application that derives subscription revenues from individuals interested in their future health development. These individuals are of the same demographic that currently purchase mHealth products such as FitBit, Apple EKG and DNA test kits. Both SHAMAN and the consumer application use the Reference Database and share some predictive logic.

Jim Durward, President, states: "While developing the SHAMAN platform it became apparent that other disruptive health applications may benefit from our proprietary Reference Database. Based on our SHAMAN work, I have reason to believe there may be causal relationships that influence both mental and physical illness development, and that these relationships may allow us to predict not only the probability *if* an illness may develop, but also the probability of *when* it may develop. This mHealth initiative is called "YMI" (why-am-I). A primary goal is to provide individual health trajectories as well as allowing the individual to see how lifestyle changes may affect future health conditions. Mobile Health ("mHealth") is predicted to grow from approximately US\$50 billion this year to greater than US\$160 billion over the next seven years.*"

A related video interview can be seen on the SHAMAN-AI website under "Investors/CEO Interview" OR, www.shaman-ai.com/ceo-interview (copy/paste link)

Or a slightly different one at <https://youtu.be/-iOe-y-fVf8> (copy/paste link)

Both SHAMAN and YMI are expected to generate revenue in late 2021.

Readers are advised that both SHAMAN and the YMI mHealth application require further development and accordingly the Corporation is not currently making any express or implied claims that the applications can, or will be able to, generate accurate results or profits.
