

## NEWS RELEASE

### **nDatalyze Announces All Seven Conditions Are Functional In It's YMI Mental Health Diagnostic Tool.**

Calgary, Alberta – April 12, 2022

*For Immediate Release* – nDatalyze Corp. (“NDAT” or the “Corporation”) (CSE:NDAT)(OTCQB:NDATF) is pleased to announce that it's YMI mental health diagnostic tool is now capable of predicting current and "time forward" probabilities of seven mental conditions. The Conditions include Anxiety, Depression, OCD, PTSD, BiPolar, Alcoholism and Personality disorders. YMI is modeled as a machine-human hybrid "mind" designed to assist and accelerate mental health diagnosis using a foundation of objective, evidence-based data rather than traditional subjective "self-reported" data.

NDAT's President Jim Durward states: "Mental health disorders are being amplified by extraordinary world events, causing elevated stress on the overall mental health system. YMI's overall objectives are to lower misdiagnosis rates, accelerate mental condition diagnosis, lower diagnosis costs and lessen the load on the overall mental health system."

The Corporation reports that during the past year the following has been achieved:

1. Established a data collection centre to gather over 1200 biometric records, complete with "same-time-of day" electroencephalogram ("EEG") data. These records comprise the Corporation's Reference Database that forms the "memories" of the YMI human-machine predictive mental health "mind". With the data collection completed the collection centre is now closed and associated expenses eliminated;
2. Development and testing of clinician-guided formulas and algorithms that provide supervision to YMI's predictive machine-learning processing engine;
3. Development of a consumer-friendly front-end input website and "easy-read" back-end reports;
4. Contracted an experienced product marketing team to develop and refine a comprehensive marketing plan targeting the fast-growing consumer "mHealth" market. The mHealth market consists of products like FitBit, Apple watches, heart and blood monitors, DNA tests and tele-health applications;
5. Tight cash management and a "tiger team" approach to software development has resulted in minimized build costs and a remaining cash balance in excess of \$1.6 million with no debt.

NDAT's President Jim Durward states: "I am extremely pleased with the accomplishments our team has made over the past year. In my experience, advanced products like YMI typically take much longer and cost far more to build. We are now moving to the marketing development phase and will be widening our beta testing to further refine our predictive ability, interface and reports in advance of commercial launch. "

#### **About nDatalyze Corp.:**

nDatalyze Corp. generates technology-based, health-related solutions. The YMI division is developing a machine-learning based, online consumer mental health application and the database sales division is focusing on providing a specialized health-related Reference Database to application developers and researchers. YMI is based on the Corporation's proprietary Reference Database consisting of >1200 biometric records complete with electroencephalogram ("EEG") "same-time-of-day" data. With installations worldwide, it's Medxtractor division manufactures small-scale bio-extractors that are used to extract compounds from a variety of botanical biomasses. While the Medxtractor division is currently generating cash flow, YMI is in development and accordingly the Corporation cannot accurately predict if or when this application will become a cash flow generator.
