

NEWS RELEASE

YMI and World Mental Health Day

Calgary, Alberta – October 7, 2022

For Immediate Release – nDatalyze Corp. (“NDAT” or the “Corporation”) (CSE:NDAT)(OTCQB:NDATF) is pleased to announce YMI's formal public launch will be coincident with World Mental Health Day on Monday, October 10, 2022. World Mental Health Day has been organized by the World Health Organization (“WHO”) since 2013 and this years theme is "Make mental health for all a global priority". According to the WHO "The COVID-19 pandemic alone caused a 25% increase in the prevalence of anxiety and depression worldwide. It created “a global crisis for mental health,” while services, skills and funding for mental health “remain in short supply, and fall far below what is needed...”

The public launch includes META (“Facebook”), Search (Google), YouTube, GDN and Native Ads.

The Corporation's Reference Database was populated during the period of April-November, 2021, a time frame in the middle of the Covid pandemic (see below), and the Corporation believes this provides YMI a unique aspect when measuring mental condition probabilities at both the current time and into the future.

COVID-19 POSITIVITY RATE ACROSS TMC HOSPITAL SYSTEMS (WEEKLY AVG)

NDAT's President Jim Durward states: "YMI was designed to address the high mental condition misdiagnosis rates that we believe are a root cause of the mental health crisis. As we add post-Covid data records we expect to be able to quantify the differential between a Covid-influenced population and a normal population. This differential holds the potential of further increasing YMI's value as a tool to support objective mental condition diagnosis for individuals and therapists alike."

YMI is available now at <https://ymihealth.ca/>

About nDatalyze Corp.:

nDatalyze Corp. generates technology-based, health-related solutions. The YMI division is developing a machine-learning based, online consumer mental health application with its database licensing division focusing on providing a specialized health-related Reference Database to application developers and researchers. YMI is based on the Corporation's proprietary Reference Database consisting of >1200 biometric records complete with associated electroencephalogram ("EEG") data. With installations worldwide, its Medextractor division currently manufactures small-scale bio-extractors that are used to extract compounds from a variety of botanical biomasses. While the Medextractor division is currently generating cash flow, YMI is not and accordingly the Corporation cannot accurately predict if or when YMI or its underlying Reference Database will become cash flow generators.
