NEWS RELEASE

nDatalyze Corp. ("NDAT" or the "Corporation") (CSE:NDAT) (OTC:NDATF) begins a Clinical Study process.

Calgary, Alberta - July 10, 2023

For Immediate Release – nDatalyze Corp. ("NDAT" or the "Corporation") (CSE:NDAT) (OTC:NDATF) announces that it has filed a Clinical Study application with Mitacs, a national not-for-profit organization that empowers partnerships that deliver solutions to the world's most pressing problems, and assists organizations in reaching their goals, funds cutting-edge innovation and creates job opportunities for students and postdoctoral fellows. The Clinical Study is being undertaken to test and validate the Corporation's YMI predictive mental health clinical decision support system ("CDSS"), is expected to take between 6-12 months and be funded by existing cash reserves. Mitacs typically shares costs but the ratio cannot be known until a Principal Investigator is contracted and sets out the process and protocols. The posting can be seen at:

About Mitacs: Mitacs empowers Canadian innovation through effective partnerships that deliver solutions to our most pressing problems. For over 20 years, Mitacs has assisted organizations in reaching their goals, has funded cutting-edge innovation, and has created job opportunities for students and postdocs. We are committed to driving economic growth and productivity and to creating meaningful change to improve quality of life for all Canadians. Our mission is to build a world-class, diverse community of innovators through our collaborative model, attracting and deploying top talent to industry, and matching need with expertise to create ambitious solutions to real-world challenges. We believe that increasing Canada's productivity and prosperity will be driven by successful innovation and we're passionate about developing the next generation of researchers who will work to fuel Canada's knowledge-based economy. Discover us at mitacs.ca

About YMI: YMI uses evidence-based, objective data from whole life experiences to predict individual mental states over time and applies this knowledge towards a fuller understanding of how mental health develops and to improve mental wellbeing. After registering at ymihealth.ca (https://ymihealth.ca) users gain access to a private, in-depth survey that applies machine-learning using a person's genetic expressions, childhood environment, habits, phobias, lived experiences and lifestyle. Upon completion of the questionnaire YMI generates a personalized graphic report predicting a person's predisposition toward a variety of common mental conditions including anxiety, depression, post-traumatic stress disorder, obsessive compulsive disorder, alcoholism, and personality disorders, both current and forward in time.
