

**GlobeX Data Cyber Security Solution DigitalSafe Joins Keller Williams Realty's Keller Cloud Innovation Program – Offering DigitalSafe to KW Agents and Offices via KW MarketPlace**

**December 13, 2019 – New York, NY. And Toronto, Ontario and GlobeX Data Ltd. (“GlobeX” or the “Company”) (OTCQB: SWISF) (CSE: SWIS, SWIS.WT)**

GlobeX Data Ltd. And its subsidiary GlobeX Data, Inc., the leader in Swiss hosted secure document management and secure communications was announced today as a partner in the Keller Cloud Innovation Program. GlobeX has integrated DigitalSafe, its Swiss hosted security, document management, password management and encrypted email solution, in the KW MarketPlace already.

The Company is working with its marketing team in order to complete some marketing materials for the DigitalSafe application in the KW MarketPlace. GlobeX anticipates that all updates to its marketing materials and information for the KW MarketPlace will be completed by January 2020. Some of the updates are newer documentation for Real Estate use case, bigger data storage capacity and a new look and feel for its application, as well as a synchronized back up feature new to DigitalSafe. As the application releases new features, KW agents will benefit greatly from these complimentary upgrades to the application.

Businesses are often the targets of hacking attempts making financial and other data vulnerable to cyber threats. The potential consequence in breaches of security places the institution and clients at high risk of exposing valuable information. DigitalSafe allows each institution and clients to manage personal data in a secure Swiss cloud. DigitalSafe allows users full control of their data, minimizing the risks of data attacks. KW agents can use DigitalSafe to securely communicate information such as contracts, banking statements, legal documents, PIN codes and Passwords and other types of sensitive data. KW agents will be able to communicate securely by preloading sensitive documents and share those documents with their clients and co-workers. All these advantages come with Swiss data privacy laws, among the highest data privacy in the world, the highest encryption standards, and GlobeX Data's proprietary VirtualVaults technology.

VirtualVaults technology uses multiple layers of encryption requiring more computing processing power than the products available in the market. It is a process that is too costly for mass cloud services and other large service providers. In the unlikely event of a breach of data, VirtualVaults protects each individual account holder by segregating each user from the other users, creating an individual barrier of protection. VirtualVaults exceeds all National Institute Standards of Technology NIST-approved cryptographic standards.

The KW MarketPlace is an app store for KW agents to browse top software integrations made by third-party developers. Additionally, GlobeX Data is exploring way to integrate its DigitalSafe application later in 2020 into Command, a smart CRM-plus suite of applications hosted on the Keller Cloud.

Alain Ghiai, CEO of GlobeX Data Ltd. Added: “We are very pleased and excited to join the KW MarketPlace. Keller Williams has been a pioneer in the real estate industry by embracing technology to maximize efficiency and profitability for its agents, and to provide its agents the best tools to run their business. As partners in the KW MarketPlace, and later on as integrator of Command, the smart CRM-plus suite of applications hosted on the Keller Cloud, we look

forward to providing KW agents the security and privacy DigitalSafe will provide them and their clients when sharing documents, generating passwords, sending encrypted emails and backing up their data in DigitalSafe's Swiss hosted secure cloud. KW is a symbol of quality and excellence, and GlobeX is honored to have been chosen as a partner for its KW Marketplace. We look forward to working very closely with Keller Williams and their team in order to spread the word to all of Keller Williams 160,000+ agents in the United States."

In the KCIP role, GlobeX Data will work closely with Keller Williams, the world's largest real estate technology franchise by agent count, as KW expands on the Keller Cloud platform.

### **About the Keller Cloud Innovator Program**

Through the Keller Cloud Innovator Program ("KCIP"), KW collaborates with leading technology companies, such as GlobeX Data, to enhance the operations of real estate businesses via the Keller Cloud, a proprietary, AI-fueled real estate cloud for Keller Williams agents.

Using a Keller Cloud application programming interface, or API, available for outside technology developers, KCIP enables the integration of additional top technology tools within an agent's Keller Cloud solutions.

Through benefits resulting from the KCIP, KW agents can now further customize Command. In February 2019, KW made Command available for all associates. Command now has more than 100,000 active users.

More information on the Keller Cloud Innovator Program is available at [go.kw.com/innovators](http://go.kw.com/innovators).
