

GlobeX Data in Talks with Major Canadian IT Software Distributor To Distribute Globex's Security and Privacy Solutions Nationwide

TORONTO, ONTARIO / ACCESSWIRE / October 19, 2020 / GlobeX Data Ltd.

(OTCQB:SWISF)(CSE:SWIS) ("GlobeX" or the "Company"), the leader in Swiss hosted secure data management and secure communications, is pleased to report that it is in the final stages of signing a distribution deal in Canada for its [SekurSafe](#) and [Sekur](#) solutions. The deal should be completed as soon as all parties have signed the Distribution Agreement. The Agreement is with a NYSE listed company's Canada division, and for this reason, the name of the distributor will remain confidential until the agreement has been executed by both parties. The terms of the Agreement will be disclosed once the Agreement has been signed by all parties. GlobeX expects the Agreement to be completed in the next two weeks.

GlobeX Data has been working in the past several months to launch its cybersecurity and Internet privacy solutions with several distributors in Canada and the USA. The distribution agreement being completed at the moment will cover all of Canada, and will expose GlobeX's security solutions to over 11,000 resellers in Canada alone. GlobeX has been working with its Toronto reseller, Darn IT Group, in order to facilitate this distribution Agreement. Darn IT Group will be involved in the implementation and training of the resellers nationwide.

[Sekur](#) is the Company's Swiss hosted secure communications suite, which includes encrypted messaging and voice recording transfer with self-destruct timer, an encrypted email account and a secure file transfer solution. All data is secured using GlobeX's proprietary encryption technology and is hosted exclusively in Switzerland for ultimate privacy.

[Sekur](#) includes the Company's latest SekurMail technology, which includes proprietary anti-phishing and privacy feature called SekurSend®. SekurSend® lets a user send an email to any other recipient, whether they have Sekur or not, in full privacy and security as the email never leaves Sekur's encrypted email servers based in Switzerland. The recipient can then click on the notification and reply in the same manner using SekurReply®, without the recipient having to register for a Sekur account. The sender can also decide to protect any email sent by adding a password to open it, a read-limit and a self-destruct timer as well. Sending an email with the SekurSend® feature allows the senders and recipients to add limitless size attachments to the emails without crowding the recipients' email box. This also guarantees to eliminate BEC attacks for businesses and email phishing attacks. Additionally, SekurMail includes full control of email delivery, automatic data export for large Enterprises and an automatic Data Loss Prevention technology ("DLP") with real time continuous archiving.

One of the many Privacy and security features of [Sekur](#) is that the user does not register with their phone number, eliminating a huge loophole in security and privacy. Just recently, according to an article written by Lindsey O'Donnell and posted on the website threatpost.com on June 5 2020, it was disclosed that WhatsApp phone numbers and users were searchable on Google, creating a massive security and privacy breach. Earlier in the year, an article was written about a similar flaw affecting all businesses, NGOs, UN and non-profit organizations, where WhatsApp Group members were also compromised and searchable in a reverse engineering trick done on Google.

Recent data breaches in messaging applications and in particular in the WhatsApp application have created a certain urgency for businesses and data privacy advocates to protect their communications from cyber-attacks and identity theft via mobile and desktop devices.

[Sekur](#) eliminates many of the privacy and security risks by not only not requiring a phone number, which would divulge a user's phone device ID, but also by not social engineering a user's phone or computer contact list and infecting the contacts by default as well. Sekur issues each user a username and a SM number. The SM number is the contact ID a user would disclose in order for other SM users to be added. The service comes with a self-destruct timer and other features as well, including GlobeX's proprietary VirtualVaults and HeliX technologies with all data stored in Swiss hosted encrypted servers.

[SekurSafe](#) is GlobeX's Swiss hosted secure document management, virtual secure data room, secure email, password manager and collaboration cloud suite all in one, and includes the Company's latest SekurMail and SekurShare technologies.

GlobeX's Data privacy solutions are all hosted in Switzerland, protecting users' data from any outside data intrusion requests. In Switzerland, the right to privacy is guaranteed in article 13 of the Swiss Federal Constitution. The Federal Act on Data Protection ("FADP") of 19 June 1992 (in force since 1993) has set up a strict protection of privacy by prohibiting virtually any processing of personal data which is not expressly authorized by the data subjects. The protection is subject to the authority of the Federal Data Protection and Information Commissioner.

Under Swiss federal law, it is a crime to publish information based on leaked "secret official discussions." In 2010 the Federal Supreme Court of Switzerland found that IP addresses are personal information and that under Swiss privacy laws they may not be used to track Internet usage without the knowledge of the individuals involved.

About GlobeX Data Ltd.

GlobeX Data Ltd. is a Cybersecurity and Internet privacy provider of Swiss hosted solutions for secure data management and secure communications. The Company distributes a suite of secure cloud-based storage, disaster recovery, document management, encrypted e-mails, and secure communication tools. GlobeX Data Ltd. sells its products through its approved wholesalers and distributors, and telecommunications companies worldwide. GlobeX Data Ltd. serves consumers, businesses and governments worldwide.
