Alain Ghiai, CEO of GlobeX Data said: "We are very happy start the US mass market marketing of [Sekur](#), our leading Swiss hosted encrypted email, secure messaging and file transfer communications solution. As previously discussed, GlobeX is increasing its marketing budget and we plan to be pushing heavily in the US market in the next 24 months, through media advertising, podcast and TV awareness spots and radio shows sponsoring. As we are not connected, and never have been connected, to AWS, Microsoft Azure or Google Cloud platforms, commonly referred to as "Big Tech", we can offer a truly independent, private and secure means of communications through secure messaging, secure voice record transfer and secure email and secure video conferencing, through our proprietary technology and our secure servers based in Switzerland. With the latest SolarWinds hack of Microsoft Exchange platform and other platforms associated with it, and the new WhatsApp rules to share all users' data with Facebook, we have seen a surge in demand and inquiries for our secure and private communications solutions. The US market represents the largest consumer and business market in the world for us and we are happy to finally offer true privacy and no data mining to everyone in the US.

[Sekur](#), which includes [SekurMessenger](#) as part of a bundle of email, messaging and file transfer into one app solutions, includes the Company's latest SekurMail technology, which includes proprietary anti-phishing and privacy feature called SekurSend®. SekurSend® lets a user send an email to any other recipient, whether they have [Sekur](#) or not, in full privacy and security as the email never leaves [Sekur](#)'s encrypted email servers based in Switzerland. The recipient can then click on the notification and reply in the same manner using SekurReply®, without the recipient having to register for a [Sekur](#) account. The sender can also decide to protect any email sent by adding a password to open it, a read-limit and a self-destruct timer as well. Sending an email with the SekurSend® feature allows the senders and recipients to add limitless size attachments to the emails without crowding the recipients' email box. This also eliminates BEC attacks for businesses and email phishing attacks. Additionally, SekurMail includes full control of email delivery, automatic data export for large Enterprises and an automatic Data Loss Prevention technology ("DLP") with real time continuous archiving.

Recent data breaches in messaging applications and in particular in the WhatsApp application have created a certain urgency for businesses and data privacy advocates to protect their communications form cyber-attacks and identity theft via mobile and desktop devices.

[SekurMessenger](#) eliminates many of the privacy and security risks by not only not requiring a phone number, which would divulge a user's phone device ID, but also by not social engineering a user's phone or computer contact list and infecting the contacts by default as well, eliminating a huge loophole in security and privacy. [SekurMessenger](#) issues each user a

username and a SM number. The SM number is the contact ID a user would disclose in order for other SM users to be added. The service comes with a self-destruct timer and other features as well, including GlobeX's proprietary VirtualVaults and HeliX technologies with all data stored in Swiss hosted encrypted servers.

Additionally, [SekurMessenger](#) now comes with a proprietary feature and technology called Chat by Invites. This feature allows a [SekurMessenger](#) user ("SM user") invite a non-SM user, or a group of non-SM users, to chat in a fully private and secure way, without the recipient ever having to register to [SekurMessenger](#) or download the app. At the end of the chat, the initiator of the conversation can remotely terminate the conversation and all traces of the conversation are deleted from all users, including the recipient. This unique feature is now fully deployed and functional on all iOS and Android devices and web platforms. The target sectors are numerous, including but not limited to real estate, legal, financial, government, energy, mining, manufacturing, trade and medical sectors.

GlobeX's Data privacy solutions are all hosted in Switzerland, protecting users' data from any outside data intrusion requests. In Switzerland, the right to privacy is guaranteed in article 13 of the Swiss Federal Constitution. The Federal Act on Data Protection ("FADP") of 19 June 1992 (in force since 1993) has set up a strict protection of privacy by prohibiting virtually any processing of personal data which is not expressly authorized by the data subjects. The protection is subject to the authority of the Federal Data Protection and Information Commissioner.

Under Swiss federal law, it is a crime to publish information based on leaked "secret official discussions." In 2010 the Federal Supreme Court of Switzerland found that IP addresses are personal information and that under Swiss privacy laws they may not be used to track Internet usage without the knowledge of the individuals involved.

About GlobeX Data Ltd.

GlobeX Data Ltd. is a Cybersecurity and Internet privacy provider of Swiss hosted solutions for secure communications and secure data management. The Company distributes a suite of secure cloud-based storage, disaster recovery, document management, encrypted e-mails, and secure communication tools. GlobeX Data Ltd. sells its products through its approved wholesalers and distributors, and telecommunications companies worldwide. GlobeX Data Ltd. serves consumers, businesses and governments worldwide.

Forward-Looking Information

This news release contains certain forward-looking information within the meaning of applicable Canadian securities laws ("forward-looking statements"). All statements other than statements of present or historical fact are forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "anticipate", "achieve", "could", "believe", "plan", "intend", "objective", "continuous", "ongoing", "estimate", "outlook", "expect", "project" and similar words, including negatives thereof, suggesting future outcomes or that certain events or conditions "may" or "will" occur. These statements are only predictions. These statements reflect management's current estimates, beliefs, intentions and expectations; they are not guaranteeing future performance. GlobeX cautions that all forward-looking statements are inherently uncertain and that actual performance may be affected by a number of material factors, many of which are beyond GlobeX's control. Such factors include, among other things: risks and uncertainties relating to the future of the Company's business; the success of marketing and sales efforts of the Company; the projections prepared in house and projections delivered by channel partners; the Company's ability to complete the necessary software updates; increases in sales as a result of investments software development technology; consumer interest in the Products; future sales plans and strategies; reliance on large channel partners and expectations of renewals to ongoing agreements with these partners; anticipated events and trends; the economy and other future conditions; and other risks and uncertainties, including those described in GlobeX's prospectus dated May 8, 2019 filed with the Canadian Securities Administrators and available on www.sedar.com. Accordingly, actual and future events, conditions and results may differ materially from the estimates, beliefs, intentions and expectations expressed or implied in the forward-looking information. Except as required under applicable securities legislation, GlobeX undertakes no obligation to publicly update or revise forward-looking information.
