

## **GlobeX Data Completes First SekurMessenger Government Sale**

**TORONTO, ON and NEW YORK, NY / ACCESSWIRE / November 8, 2021** / GlobeX Data Ltd. (OTCQB:SWISF)(CSE:SWIS)(FRA:GDT) ("GlobeX" or the "Company"), the leader in Swiss hosted secure communications and secure data management, is pleased to announce that it has completed its first Government sale of its [SekurMessenger](#) solution, to a Latin American government entity. The Company expects more licenses to be sold in 2022 and beyond and sell a mix of [Sekur](#), [SekurMessenger](#) and when they come out in 2022, the SekurPro video conferencing solutions and SekurVoice encrypted voice solutions.

Alain Ghiai, CEO of GlobeX Data said: "We are very excited to have completed our very first Government license sales of [SekurMessenger](#) in Latin America, and we expect more to come in 2022. Once one organization enjoys our solution, others are expected to join. As a matter of privacy, we will keep the name of the client confidential as part of the terms of the sale. We expect many more licenses to be sold in Latin America and other regions, such as South Asia, in the coming years. The sale was completed fast, as the client recognized immediately the benefits of [SekurMessenger](#) over using any other messaging application. We look forward to have them get to know the many unique and critical features provided by [Sekur](#) and [SekurMessenger](#) such as, Swiss hosted data privacy and security, and the right for government organizations not to have their data mined by third party service providers, Big Tech companies, or rogue governments stealing valuable information and confidential data transiting during communications. As we are not connected, and never have been connected, to AWS, Microsoft Azure or Google Cloud platforms, commonly referred to as "Big Tech", we can offer a truly independent, private and secure means of communications such as secure and private emails and instant messaging. We are looking forward to protect everyone, consumers, businesses and now governments from malicious hackers, and offer them true data privacy and no data mining."

[Sekur](#), which includes [SekurMessenger](#) as part of a bundle of email, messaging and file transfer into one app solutions, includes the Company's latest SekurMail technology, which includes proprietary anti-phishing and privacy feature called SekurSend ®. SekurSend ® lets a user send an email to any other recipient, whether they have [Sekur](#) or not, in full privacy and security as the email never leaves [Sekur](#)'s encrypted email servers based in Switzerland. The recipient can then click on the notification and reply in the same manner using SekurReply ®, without the recipient having to register for a [Sekur](#) account. The sender can also decide to protect any email sent by adding a password to open it, a read-limit and a self-destruct timer as well. Sending an email with the SekurSend ® feature allows the senders and recipients to add limitless size attachments to the emails without crowding the recipients' email box. This also eliminates BEC attacks for businesses and email phishing attacks. Additionally, SekurMail includes full control of email delivery, automatic data export for large Enterprises and an automatic Data Loss Prevention technology ("DLP") with real time continuous archiving.

Recent data breaches in messaging applications and in particular in the WhatsApp application have created a certain urgency for businesses and data privacy advocates to protect their communications from cyber-attacks and identity theft via mobile and desktop devices.

[SekurMessenger](#) eliminates many of the privacy and security risks by not only not requiring a phone number, which would divulge a user's phone device ID, but also by not social engineering a user's phone or computer contact list and infecting the contacts by default as well, eliminating a huge loophole in security and privacy. [SekurMessenger](#) issues each user a username and a SM number. The SM number is the contact ID a user would disclose in order for other SM users to be added. The service comes with a self-destruct timer and other features as well, including GlobeX's proprietary VirtualVaults and HeliX technologies with all data stored in Swiss hosted encrypted servers.

Additionally, [SekurMessenger](#) now comes with a proprietary feature and technology called Chat by Invites. This feature allows a [SekurMessenger](#) user ("SM user") invite a non-SM user, or a group of non-SM users, to chat in a fully private and secure way, without the recipient ever having to register to [SekurMessenger](#) or download the app. At the end of the chat, the initiator of the conversation can remotely terminate the conversation and all traces of the conversation are deleted from all users, including the recipient. This unique feature is now fully deployed and functional on all iOS and Android devices and web platforms. The target sectors are numerous, including but not limited to real estate, legal, financial, government, energy, mining, manufacturing, trade and medical sectors.

GlobeX's Data privacy solutions are all hosted in Switzerland, protecting users' data from any outside data intrusion requests. In Switzerland, the right to privacy is guaranteed in article 13 of the Swiss Federal Constitution. The Federal Act on Data Protection ("FADP") of 19 June 1992 (in force since 1993) has set up a strict protection of privacy by prohibiting virtually any processing of personal data which is not expressly authorized by the data subjects. The protection is subject to the authority of the Federal Data Protection and Information Commissioner.

Under Swiss federal law, it is a crime to publish information based on leaked "secret official discussions." In 2010 the Federal Supreme Court of Switzerland found that IP addresses are personal information and that under Swiss privacy laws they may not be used to track Internet usage without the knowledge of the individuals involved.

#### **About GlobeX Data Ltd.**

GlobeX Data Ltd. is a Cybersecurity and Internet privacy provider of Swiss hosted solutions for secure communications and secure data management. The Company distributes a suite of encrypted e-mails, and secure communication tools, secure cloud-based storage, disaster recovery and document management. GlobeX Data Ltd. sells its products directly through its websites, through its approved wholesalers and distributors, and telecommunications companies worldwide. GlobeX Data Ltd. serves consumers, businesses and governments worldwide.
