

Sekur Private Data CEO Interviewed Live on Newsmax TV's American Agenda - Discusses how the U.S. Government & Everyday Americans Get Hacked

TORONTO, ON and NEW YORK, NY / ACCESSWIRE / June 29, 2022 / Sekur Private Data Ltd. (OTCQX:SWISF)(CSE:SKUR)(FRA:GDT0) ("Sekur" or the "Company"), the leader in Swiss hosted secure communications and secure data management, is pleased announce that its Founder and CEO, Alain Ghiai was interviewed on live television on Newsmax TV as part of the "American Agenda" segment. The segment aired live on June 23rd at at about 3pm EST.

Sekur's CEO, Alain Ghiai, discusses the many ways hackers get into government, business and consumer devices and steal they data and how to limit damages created by domestic or international hackers. Ghiai also discusses how Sekur can offer more privacy through is SekurMail and SekurMessenger solutions.

Sekur, which includes [SekurMessenger](#) and [SekurMail](#), is part of a bundle of email, messaging and file transfer into one application, includes the Company's latest SekurMail technology, which includes proprietary anti-phishing and privacy feature called SekurSend®. SekurSend® lets a user send an email to any other recipient, whether they have [Sekur](#) or not, in full privacy and security as the email never leaves [Sekur](#)'s encrypted email servers based in Switzerland. The recipient can then click on the notification and reply in the same manner using SekurReply®, without the recipient having to register for a [Sekur](#) account. The sender can also decide to protect any email sent by adding a password to open it, a read-limit and a self-destruct timer as well. Sending an email with the SekurSend® feature allows the senders and recipients to add limitless size attachments to the emails without crowding the recipients' email box. This also eliminates BEC attacks for businesses and email phishing attacks. Additionally, SekurMail includes full control of email delivery, automatic data export for large Enterprises and an automatic Data Loss Prevention technology ("DLP") with real time continuous archiving.

Recent data breaches in messaging applications have created a certain urgency for businesses and data privacy advocates to protect their communications form cyber-attacks and identity theft via mobile and desktop devices.

[SekurMessenger](#) now comes with a proprietary feature and technology called "Chat-By-Invites". This feature allows a [SekurMessenger](#) user ("SM user") invite a non-SM user, or a group of non-SM users, to chat in a fully private and secure way, without the recipient ever having to register to [SekurMessenger](#) or download the app. At the end of the chat, the initiator of the conversation can remotely terminate the conversation and all traces of the conversation are deleted from all users, including the recipient. This unique feature is now fully deployed and functional on all iOS and Android devices and web platforms. The target sectors are numerous, including but not limited to real estate, legal, finance, insurance, medical, government, energy, manufacturing, trade and pharmaceutical sectors.

[SekurMessenger](#) also eliminates many of the privacy and security risks by not only not requiring a phone number, which would divulge a user's phone device ID, but also by not social engineering a user's phone or computer contact list and infecting the contacts by default as well, eliminating a huge loophole in security and privacy. [SekurMessenger](#) issues each user a username and a Sekur number. The Sekur number is the contact ID a user would disclose in order for other Sekur users to be added. The service comes with a self-destruct timer and other features as well, including Sekur's proprietary VirtualVaults and HeliX technologies with all data stored in Swiss hosted encrypted servers.

Sekur's Data privacy solutions are all hosted in Switzerland, protecting users' data from any outside data intrusion requests. In Switzerland, the right to privacy is guaranteed in article 13 of the Swiss Federal Constitution. The Federal Act on Data Protection ("FADP") of 19 June 1992 (in force since 1993) has set up a strict protection of privacy by prohibiting virtually any processing of personal data which is not expressly authorized by the data subjects. The protection is subject to the authority of the Federal Data Protection and Information Commissioner.

Under Swiss federal law, it is a crime to publish information based on leaked "secret official discussions." In 2010 the Federal Supreme Court of Switzerland found that IP addresses are personal information and that under Swiss privacy laws they may not be used to track Internet usage without the knowledge of the individuals involved.

About Sekur Private Data Ltd.

Sekur Private Data Ltd. is a Cybersecurity and Internet privacy provider of Swiss hosted solutions for secure communications and secure data management. The Company distributes a suite of encrypted e-mails, secure messengers, secure communication tools, and secure cloud-based storage, disaster recovery and document management. Sekur Private Data Ltd. sells its products through its approved wholesalers and distributors, and telecommunications companies worldwide. Sekur Private Data Ltd. serves consumers, businesses and governments worldwide.
