

## **Sekur Private Data Ltd. Announces Record Sales for Q2 2022 Sales Up 1140% Compared to Q2 2021 - Increases Active Paid Users by 800% in Same Period**

**TORONTO, ON and NEW YORK, NY / ACCESSWIRE / August 16, 2022** / Sekur Private Data Ltd. (OTCQX:SWISF)(CSE:SKUR)(FRA:GDT0) ("Sekur" or the "Company"), the leader in Swiss hosted secure communications and secure data management, is pleased announce that it has released its Q2 2022 financial results on SEDAR and on the CSE and OTC Markets websites. Results and all other filings can be viewed on this link: [Sekur Private Data Ltd SEDAR filings](#).

The Company is pleased to announce that it has recorded an increase of 1,140% in sales for Q2 2022 as compared to Q2 2021. This result confirms the Company's post COVID-19 pandemic sales momentum with sales increasing as Sekur gains subscriber's traction. Sekur plans to increase the rate of subscriptions in Q4 2022 and beyond with the introduction of marketing to SMBs in the USA and the introduction of new solutions for consumers, SMBs and enterprises. As of August 2022, Sekur has over 4,000 active recurring paid users. The Company has increased its active recurring paid users by 800% year-to-date 2022 as compared to year-to-date in the same period in 2021.

Additionally, the Company completed a global launch of its [Sekur](#) privacy and security communications solutions. On July 13 2022, it announced in a [News Release](#) that it has expanded its "Chat-by-Invites" on SMS in 23 countries, covering 1.18 billion people and as part of this preparation, the Company announced on July 20 2022 in a [News Release](#) that it has started offering subscriptions in 8 local currencies to facilitate and increase subscription signups.

Alain Ghiai, CEO of Sekur Private Data said: "We are very pleased with our Q2 2022 results and our subscriber growth to date. Even though April was a slower month, we managed to track by now over 4,000 recurring paid active subscribers and recorded sales up 1,140% as compared to Q2 2021. We are continuing to see increased sales and subscriber growth both for July and August of this year, and we are looking forward to offer a full suite of solutions for the SMB market in the fall of this year, which will help in the incremental increase in net new paid subscribers. We also are seeing the benefits of our local currency platform as we are seeing subscribers from Europe, Switzerland, New Zealand and Canada signing up and paying in their local currency. The average revenue per user ("ARPU") has also been increasing lately as we are seeing more yearly and more licenses per being bought per account. We are seeing a clear continuation of the sales momentum, post COVID-19 pandemic, which proves to us that the business is actually accelerating now that the pandemic is receding. As we are not connected to any Big Tech platform, we offer a truly independent, private and secure means of communications without any data mining, through our proprietary technology and our secure servers based in Switzerland. We look forward to continue to offer true data privacy to all individuals and their businesses and protect their intellectual property, and their privacy, from data miners and malicious hackers."

Sekur, which includes [SekurMessenger](#) and [SekurMail](#), is part of a bundle of email, messaging

and file transfer into one application, includes the Company's latest SekurMail technology, which includes proprietary anti-phishing and privacy feature called SekurSend®. SekurSend® lets a user send an email to any other recipient, whether they have [Sekur](#) or not, in full privacy and security as the email never leaves [Sekur](#)'s encrypted email servers based in Switzerland. The recipient can then click on the notification and reply in the same manner using SekurReply®, without the recipient having to register for a [Sekur](#) account. The sender can also decide to protect any email sent by adding a password to open it, a read-limit and a self-destruct timer as well. Sending an email with the SekurSend® feature allows the senders and recipients to add limitless size attachments to the emails without crowding the recipients' email box. This also eliminates BEC attacks for businesses and email phishing attacks. Additionally, SekurMail includes full control of email delivery, automatic data export for large Enterprises and an automatic Data Loss Prevention technology ("DLP") with real time continuous archiving.

Recent data breaches in messaging applications have created a certain urgency for businesses and data privacy advocates to protect their communications from cyber-attacks and identity theft via mobile and desktop devices.

[SekurMessenger](#) now comes with a proprietary feature and technology called "Chat-By-Invites". This feature allows a [SekurMessenger](#) user ("SM user") invite a non-SM user, or a group of non-SM users, to chat in a fully private and secure way, without the recipient ever having to register to [SekurMessenger](#) or download the app. At the end of the chat, the initiator of the conversation can remotely terminate the conversation and all traces of the conversation are deleted from all users, including the recipient. This unique feature is now fully deployed and functional on all iOS and Android devices and web platforms. The target sectors are numerous, including but not limited to real estate, legal, finance, insurance, medical, government, energy, manufacturing, trade and pharmaceutical sectors.

[SekurMessenger](#) also eliminates many of the privacy and security risks by not only not requiring a phone number, which would divulge a user's phone device ID, but also by not social engineering a user's phone or computer contact list and infecting the contacts by default as well, eliminating a huge loophole in security and privacy. [SekurMessenger](#) issues each user a username and a Sekur number. The Sekur number is the contact ID a user would disclose in order for other Sekur users to be added. The service comes with a self-destruct timer and other features as well, including Sekur's proprietary VirtualVaults and HeliX technologies with all data stored in Swiss hosted encrypted servers.

Sekur's Data privacy solutions are all hosted in Switzerland, protecting users' data from any outside data intrusion requests. In Switzerland, the right to privacy is guaranteed in article 13 of the Swiss Federal Constitution. The Federal Act on Data Protection ("FADP") of 19 June 1992 (in force since 1993) has set up a strict protection of privacy by prohibiting virtually any processing of personal data which is not expressly authorized by the data subjects. The protection is subject to the authority of the Federal Data Protection and Information Commissioner.

Under Swiss federal law, it is a crime to publish information based on leaked "secret official discussions." In 2010 the Federal Supreme Court of Switzerland found that IP addresses are personal information and that under Swiss privacy laws they may not be used to track Internet usage without the knowledge of the individuals involved.

### **About Sekur Private Data Ltd.**

Sekur Private Data Ltd. is a Cybersecurity and Internet privacy provider of Swiss hosted solutions for secure communications and secure data management. The Company distributes a suite of encrypted e-mails, secure messengers, secure communication tools, and secure cloud-based storage, disaster recovery and document management. Sekur Private Data Ltd. sells its products through its approved wholesalers and distributors, and telecommunications companies worldwide.
