Dr. Arthur Halleran, Ph.D.  
**Park Place Energy Inc.**  
 Suite 700 – 838 West Hastings Street  
 Vancouver, British Columbia V6C 0A6

Dear Sir:

**Re: Park Place Energy Inc.  
 Corporate Evaluation  
Effective December 31, 2017**

GLJ Petroleum Consultants (GLJ) has completed an independent reserves assessment and evaluation of the oil and gas properties located in Turkey of Park Place Energy Inc. (the “Company”). The effective date of this evaluation is December 31, 2017.

This report has been prepared for the Company for the purpose of annual disclosure and other financial requirements. This evaluation has been prepared in accordance with reserves definitions, standards and procedures contained in the Canadian Oil and Gas Evaluation Handbook.

It was GLJ’s primary mandate in this evaluation to provide an independent evaluation of the oil and gas reserves of the Company in aggregate. Accordingly it may not be appropriate to extract individual property or entity estimates for other purposes. Our engagement letter notes these limitations on the use of this report.

All values reported herein are in U.S. Dollars.

It is trusted that this evaluation meets your current requirements. Should you have any questions regarding this analysis, please contact the undersigned.

Yours very truly,

**GLJ PETROLEUM CONSULTANTS LTD.**

## INDEPENDENT PETROLEUM CONSULTANTS' CONSENT

The undersigned firm of Independent Petroleum Consultants of Calgary, Alberta, Canada has prepared an independent evaluation of the **Park Place Energy Inc.** (the "Company") Turkish oil and gas properties and hereby gives consent to the use of its name and to the said estimates. The effective date of the evaluation is **December 31, 2017**.

In the course of the evaluation, the Company provided GLJ Petroleum Consultants Ltd. personnel with basic information which included land data, well information, geological information, reservoir studies, estimates of on-stream dates, contract information, current hydrocarbon product prices, operating cost data, capital budget forecasts, financial data and future operating plans. Other engineering, geological or economic data required to conduct the evaluation and upon which this report is based, were obtained from public records, other operators and from GLJ Petroleum Consultants Ltd. nonconfidential files. The Company has provided a representation letter confirming that all information provided to GLJ Petroleum Consultants Ltd. is correct and complete to the best of its knowledge. Procedures recommended in the Canadian Oil and Gas Evaluation (COGE) Handbook to verify certain interests and financial information were applied in this evaluation. In applying these procedures and tests, nothing came to GLJ Petroleum Consultants Ltd.'s attention that would suggest that information provided by the Company was not complete and accurate. GLJ Petroleum Consultants Ltd. reserves the right to review all calculations referred to or included in this report and to revise the estimates in light of erroneous data supplied or information existing but not made available which becomes known subsequent to the preparation of this report.

The accuracy of any reserves and production estimate is a function of the quality and quantity of available data and of engineering interpretation and judgment. While reserves and production estimates presented herein are considered reasonable, the estimates should be accepted with the understanding that reservoir performance subsequent to the date of the estimate may justify revision, either upward or downward.

Revenue projections presented in this report are based in part on forecasts of market prices, currency exchange rates, inflation, market demand and government policy which are subject to many uncertainties and may, in future, differ materially from the forecasts utilized herein. Present values of revenues documented in this report do not necessarily represent the fair market value of the reserves evaluated herein.

<b>PERMIT TO PRACTICE</b> GLJ PETROLEUM CONSULTANTS LTD.

Date: _____ April 10, 2018
<b>PERMIT NUMBER: P 2066</b> The Association of Professional Engineers and Geoscientists of Alberta

## INTRODUCTION

GLJ Petroleum Consultants (GLJ) was commissioned by Park Place Energy Inc. (the “Company”) to prepare an independent evaluation of its oil and gas reserves effective December 31, 2017. The locations of the most significant reserves properties are indicated on the attached index map.

The evaluation was initiated in February 2018 and completed by April 2018. Estimates of reserves and projections of production were generally prepared using well information and production data provided by the Company to approximately December 31, 2017. The Company also provided land, accounting data and other technical information not available in the public domain to approximately December 31, 2017. In certain instances, the Company also provided recent engineering, geological and other information up to December 31, 2017. The Company has confirmed that, to the best of its knowledge, all information provided to GLJ is correct and complete as of the effective date.

This evaluation has been prepared in accordance with procedures and standards contained in the Canadian Oil and Gas Evaluation (COGE) Handbook. The reserves definitions used in preparing this report (included herein under “Reserves Definitions”) are those contained in the COGE Handbook and the Canadian Securities Administrators National Instrument 51-101 (NI 51-101).

The evaluation was conducted on the basis of the GLJ January 1, 2018 Price Forecast which is summarized in the Product Price and Market Forecasts section of this report.

Tables summarizing production, royalties, costs, revenue projections, reserves and present value estimates for various reserves categories for individual properties and the Company total are provided in the tabbed sections of this Summary Report.

The Evaluation Procedure section outlines general procedures used in preparing this evaluation. The individual property reports, provided under separate cover, provide additional evaluation details. The following summarizes evaluation matters that have been included/excluded in cash flow projections:

- in accordance with NI 51-101, the effect on projected revenues of the Company’s financial hedging activity has not been included,

- provisions for the abandonment and reclamation of all of the Company's existing and future wells to which reserves have been attributed have been included; all other abandonment and reclamation costs have not been included,
- general and administrative (G&A) costs and overhead recovery have not been included,
- undeveloped land values have not been included.

The "Securities Reporting" section of this report provides reserves data in a format that is consistent with the disclosure requirements set out in NI 51-101.

Economic forecasts are provided on an after tax basis including tax pools provided by the Company in the "After Tax Analysis" section.

The preparation of an evaluation requires the use of judgment in applying the standards and definitions contained in the COGE Handbook and NI 51-101. GLJ has applied those standards and definitions based on its experience and knowledge of industry practice. While GLJ believes that the reserves data set forth in this evaluation have, in all material respects, been determined and are in accordance with the COGE Handbook, because the application of the standards and definitions contained in the COGE Handbook and NI 51-101 require the use of judgment there is no assurance that the applicable securities regulator(s) will not take a different view as to some of the determinations in the evaluation.

## RESERVES DEFINITIONS

Reserves estimates have been prepared by GLJ Petroleum Consultants (GLJ) in accordance with standards contained in the Canadian Oil and Gas Evaluation (COGE) Handbook. The following reserves definitions are set out by the Canadian Securities Administrators in National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities (NI 51-101; in Part 2 of the Glossary to NI 51-101) with reference to the COGE Handbook.

### **Reserves Categories**

Reserves are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations, as of a given date, based on:

- analysis of drilling, geological, geophysical, and engineering data;
- the use of established technology;
- specified economic conditions<sup>1</sup>, which are generally accepted as being reasonable, and shall be disclosed.

Reserves are classified according to the degree of certainty associated with the estimates.

#### **Proved Reserves**

Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.

#### **Probable Reserves**

Probable reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.

#### **Possible Reserves**

Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.

Other criteria that must also be met for the classification of reserves are provided in [Section 5.5 of the COGE Handbook].

---

<sup>1</sup> For securities reporting, the key economic assumptions will be the prices and costs used in the estimate. The required assumptions may vary by jurisdiction, for example:

- (a) **forecast prices and costs, in Canada under NI 51-101**
- (b) **constant prices and costs**, based on the average of the first day posted prices in each of the 12 months of the reporting issuer's financial year, under **US SEC rules** (this is optional disclosure under NI 51-101).

## **Development and Production Status**

Each of the reserves categories (proved, probable, and possible) may be divided into developed and undeveloped categories.

### ***Developed Reserves***

Developed reserves are those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g., when compared to the cost of drilling a well) to put the reserves on production. The developed category may be subdivided into producing and non-producing.

### ***Developed Producing Reserves***

Developed producing reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.

### ***Developed Non-Producing Reserves***

Developed non-producing reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.

### ***Undeveloped Reserves***

Undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (for example, when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves category (proved, probable, possible) to which they are assigned.

In multi-well pools, it may be appropriate to allocate total pool reserves between the developed and undeveloped categories or to subdivide the developed reserves for the pool between developed producing and developed non-producing. This allocation should be based on the estimator's assessment as to the reserves that will be recovered from specific wells, facilities, and completion intervals in the pool and their respective development and production status.

## **Levels of Certainty for Reported Reserves**

The qualitative certainty levels referred to in the definitions above are applicable to individual reserves entities (which refers to the lowest level at which reserves calculations are performed) and to Reported Reserves (which refers to the highest level sum of individual entity estimates for which reserves estimates are presented). Reported Reserves should target the following levels of certainty under a specific set of economic conditions:

- at least a 90 percent probability that the quantities actually recovered will equal or exceed the estimated proved reserves;
- at least a 50 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable reserves;
- at least a 10 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable plus possible reserves.

A quantitative measure of the certainty levels pertaining to estimates prepared for the various reserves categories is desirable to provide a clearer understanding of the

associated risks and uncertainties. However, the majority of reserves estimates are prepared using deterministic methods that do not provide a mathematically derived quantitative measure of probability. In principle, there should be no difference between estimates prepared using probabilistic or deterministic methods.

Additional clarification of certainty levels associated with reserves estimates and the effect of aggregation is provided in Section 5.5.3 [of the COGE Handbook].

## **DOCUMENTED RESERVES CATEGORIES**

Production and revenue projections are prepared for each of the following main reserves categories:

### **Reserves Category**

- Proved
- Proved Plus Probable
- Proved Plus Probable Plus Possible

### **Production and Development Status**

- Developed Producing\*
- Developed Non-Producing
- Undeveloped
- Total (sum of developed producing, developed non-producing and undeveloped)

\* as producing reserves are inherently developed, GLJ simply refers to “developed producing” reserves as “producing”

Reserves and revenue projections are available in GLJ’s evaluation database for any reserves and development subcategory including those determined by difference (e.g., probable producing).

The following reserves categories are documented in this Corporate Summary volume:

- Proved Producing
- Proved Developed Non-Producing
- Proved Undeveloped
- Total Proved
- Total Probable
- Total Proved Plus Probable
- Total Possible
- Total Proved Plus Probable Plus Possible

Documentation for the following additional reserves categories is provided in the “Expanded Corporate Summary Information”, which has been provided to the Company in electronic format only.

**Proved**

Developed Producing  
 Developed Non-Producing  
 Undeveloped  
 Total

**Probable**

Developed Producing  
 Developed Non-Producing  
 Undeveloped  
 Total

**Proved Plus Probable**

Developed Producing  
 Developed Non-Producing  
 Undeveloped  
 Total

**Possible**

Developed Producing  
 Developed Non-Producing  
 Undeveloped  
 Total

**Proved Plus Probable Plus Possible**

Developed Producing  
 Developed Non-Producing  
 Undeveloped  
 Total

Individual property evaluation reports contain detailed documentation of reserves estimation methodology and evaluation procedures.

When evaluating reserves, GLJ evaluators generally first identify the producing situation and assign proved, proved plus probable and proved plus probable plus possible reserves in recognition of the existing level of development and the existing depletion strategy. Incremental non-producing (developed non-producing or undeveloped) reserves are subsequently assigned recognizing future development opportunities and enhancements to the depletion mechanism. It should be recognized that future developments may result in accelerated recovery of producing reserves.

## EVALUATION PROCEDURE

### TABLE OF CONTENTS

**INTEREST DESCRIPTIONS**

**WELL DATA**

**ACCOUNTING SUMMARY**

**PRODUCTION FORECASTS**

**ECONOMIC PARAMETERS**

**OIL EQUIVALENT OR GAS EQUIVALENT**

**LIST OF ABBREVIATIONS**

## EVALUATION PROCEDURE

The following outlines the methodology employed by GLJ Petroleum Consultants (GLJ) in conducting the evaluation of the Company's oil and gas properties. GLJ evaluation procedures are in compliance with standards contained in the Canadian Oil and Gas Evaluation (COGE) Handbook.

### **INTEREST DESCRIPTIONS**

The Company provided GLJ with current land interest information. The Company provided a representation letter confirming accuracy of land information. Certain cross-checks of land and accounting information were undertaken by GLJ as recommended in the COGE Handbook. In this process, nothing came to GLJ's attention that indicated that information provided by the Company was incomplete or unreliable.

In GLJ's reports, "Company Interest" reserves and values refer to the sum of royalty interest\* and working interest reserves before deduction of royalty burdens payable. "Working Interest" reserves equate to those reserves that are referred to as "Company Gross" reserves by the Canadian Securities Administrators (CSA) in NI 51-101.

In the Securities Reporting section, working interest (or Company Gross) volumes are presented in tables to correspond to NI 51-101 disclosure requirements.

*\*Royalty interest reserves include royalty volumes derived only from other working interest owners.*

### **WELL DATA**

Pertinent interest and offset well data such as drill stem tests, workovers, pressure surveys, production tests, etc., were provided by the Company or were obtained from other operators, public records or GLJ nonconfidential files.

### **ACCOUNTING SUMMARY**

The Company provided GLJ with available accounting data on a property basis and for the corporate total for the period February 1, 2017, to December 31, 2017. In some circumstances this information was also provided on a cost centre basis to address major reserves entities that are a subset of a Company property.

## **PRODUCTION FORECASTS**

In establishing all production forecasts, consideration was given to existing gas contracts and the possibility of contract revisions, to the operator's plans for development drilling and to reserves and well capability. Generally, development drilling in an area was not considered unless there was some indication from the operator that drilling could be expected.

The on-stream date for currently shut-in reserves was estimated with consideration given to the following:

- proximity to existing facilities
- plans of the operator
- economics

## **ECONOMIC PARAMETERS**

Pertinent economic parameters are listed as follows:

- a) The effective date is December 31, 2017.
- b) Operating and capital costs were estimated in 2018 dollars and then escalated as summarized in the Product Price and Market Forecasts section of this report.
- c) Economic forecasts were prepared for each property on a before income tax basis. Detailed discounting of future cash flow was performed using a discount factor of 10.0 percent with all values discounted annually to December 31, 2017, on a mid-calendar-year basis.
- d) Oil and gas production is subject to a 12.5 percent royalty.
- e) Field level overhead charges have been included; recovery of overhead expenses has not been included.
- f) The Company's office G&A costs have not been included.
- g) Abandonment and reclamation costs for all existing and future wells to which reserves have been assigned have been included at the property level. Costs have been scheduled five years after the last year of production for each well. Additional abandonment and reclamation costs associated with pipelines and facilities have not been included in this analysis.

## OIL EQUIVALENT OR GAS EQUIVALENT

In this report, quantities of hydrocarbons have been converted to barrels of oil equivalent (boe); or to sales gas equivalent (sge) using factors of 6 Mcf/boe for gas, 1 bbl/boe for all liquids, and 0 boe for sulphur. Users of oil equivalent values are cautioned that while boe based metrics are useful for comparative purposes, they may be misleading when used in isolation.

## LIST OF ABBREVIATIONS

AOF	absolute open flow
bbl	barrels
Bcf	billion cubic feet of gas at standard conditions
BIIP	bitumen initially-in-place
boe	barrel of oil equivalent, in this evaluation determined using 6 Mcf/boe for gas, 1 bbl/boe for all liquids, and 0 boe for sulphur
bopd	barrels of oil per day
Btu	British thermal units
bwpd	barrels of water per day
DSU	drilling spacing unit
GCA	gas cost allowance
GIIP	gas initially-in-place
GOC	gas-oil contact
GOR	gas-oil ratio
GORR	gross overriding royalty
GWC	gas-water contact
Mbbl	thousand barrels
Mboe	thousand boe
Mcf	thousand cubic feet of gas at standard conditions
Mcfe	thousand cubic feet of gas equivalent
Mlt	thousand long tons
M\$	thousand dollars
MM\$	million dollars
MMbbl	million barrels
MMboe	million boe
MMBtu	million British thermal units
MMcf	million cubic feet of gas at standard conditions
MRL	maximum rate limitation
Mstb	thousand stock tank barrels
MMstb	million stock tank barrels
NGL	natural gas liquids (ethane, propane, butane and condensate)
NPI	net profits interest
OIIP	oil initially-in-place
ORRI	overriding royalty interest
OWC	oil-water contact
P&NG	petroleum and natural gas
PIIP	petroleum initially-in-place

psia	pounds per square inch absolute
psig	pounds per square inch gauge
PVT	pressure-volume-temperature
RLI	reserves life index, calculated by dividing reserves by the forecast of first year production
scf	standard cubic feet
sge	sales gas equivalent – if presented in this evaluation, determined using 1 barrel of oil or natural gas liquid = 6 Mcfe; 0 for sulphur
stb	stock tank barrel
WI	working interest
WTI	West Texas Intermediate

**PRODUCT PRICE AND MARKET FORECASTS**  
**January 1, 2018**

GLJ Petroleum Consultants has prepared its January 1, 2018 price and market forecasts, as summarized in the attached Tables 1, 2, 3 and 4, after a comprehensive review of information. Information sources include numerous government agencies, industry publications, Canadian oil refiners and natural gas marketers. The forecasts presented herein are based on an informed interpretation of currently available data. While these forecasts are considered reasonable at this time, users of these forecasts should understand the inherent high uncertainty in forecasting any commodity or market. These forecasts will be revised periodically as market, economic and political conditions change. These future revisions may be significant.

Unless otherwise stated, the gas price reference point is the receipt point on the applicable provincial gas transmission system known as the plant gate.

The plant gate price represents the price before raw gathering and processing charges are deducted.

- 6.8 Production Estimates

## SECURITIES REPORTING DISCUSSION

The Canadian Securities Administrators (CSA) have set out disclosure standards for Canadian publicly traded oil and gas companies in National Instrument 51-101 (NI 51-101).

This section presents reserves data following the item numbering and formatting in CSA Form 51-101F1 and the sample tables contained in Appendix 1 to the NI 51-101 Companion Policy (51-101CP). This section has been provided to assist the Company in preparing the disclosure required by NI 51-101 and is not intended to be reproduced "as is" in order to satisfy those requirements. The information provided relates only to certain parts of the disclosure required by NI 51-101 and, as a whole, is not presented in a format suitable for compliance with those requirements. It is the Company's responsibility to prepare the format for its disclosure and to ensure compliance with the disclosure requirements of NI 51-101.

The Report on Reserves Data, Form 51-101F2, is provided separately.

***Note Regarding Nomenclature:***

Throughout this report, "Company Interest" reserves refers to the sum of royalty interest\* and working interest reserves before deduction of royalty burdens payable. "Working Interest" reserves equate to those reserves that are referred to as "Company Gross" reserves by the Canadian Securities Administrators (CSA) in NI 51-101.

In this Securities Reporting section, Company Gross (or working interest) volumes are presented in tables to correspond to NI 51-101 disclosure requirements.

*\*Royalty interest reserves include royalty volumes derived only from other working interest owners.*

### **PART 1        DATE OF STATEMENT**

#### **Item 1.1        Relevant Dates**

**1. Effective Date:**

The effective date of the reserves estimates and revenue projections in this report is December 31, 2017.

**2. Data Date:**

Estimates of reserves and projections of production were generally prepared using general well information and production data provided by the Company to

approximately December 31, 2017. In certain instances, the Company provided production and well information up to December 31, 2017. The Company has provided GLJ with a representation letter confirming that complete and correct information has been provided to GLJ.

**3. Preparation Date:**

The preparation date (the latest date of receipt of information relevant to this evaluation) of this report is March 22, 2018.

## **PART 2 DISCLOSURE OF RESERVES DATA**

### **Item 2.1 Reserves Data (Forecast Prices and Costs)**

**1. Breakdown of Reserves (Forecast Case)**

Refer to Table FP-1

**2. Net Present Value of Future Net Revenue (Forecast Case)**

Refer to Table FP-2

**3. Additional Information Concerning Future Net Revenue (Forecast Case)**

(a) and (b) Undiscounted Revenue and Costs  
Refer to Table FP-3

(c) Discounted Future Net Revenue by Product Type  
Refer to Table FP-4

## **PART 3 PRICING ASSUMPTIONS**

### **Item 3.2 Forecast Prices Used in Estimates**

**1. (a) The forecast reference prices used in preparing the Company's reserves data are provided in Table FP-5.**

This price forecast is GLJ's standard price forecast effective January 1, 2018.

## **PART 4 RECONCILIATION OF CHANGES IN RESERVES**

### **Item 4.1 Reserves Reconciliation**

Table FP-6 provides a reconciliation of Company Gross reserves based on forecast prices and costs for the current year-end evaluation.

## **PART 5 ADDITIONAL INFORMATION RELATING TO RESERVES DATA**

### **Item 5.1 Undeveloped Reserves**

#### **1.(a) and 2.(a) Year First Attributed**

Table FP-7 provides a summary of the undeveloped reserves first attributed during the current fiscal year and the Company total at the current year-end effective date.

#### **1.(b) and 2.(b) General Basis for Reserves and Timing of Development**

Proved and probable undeveloped reserves have been estimated in accordance with procedures and standards contained in the COGE Handbook.

There are no undeveloped reserves associated with the Company's reserves assets.

### **Item 5.2 Significant Factors or Uncertainties**

The evaluated oil and gas properties of the Company have no material extraordinary risks or uncertainties beyond those which are inherent of an oil and gas producing company.

### **Item 5.3 Future Development Costs**

1. Table FP-8 summarizes capital development costs related to the recovery of the Company's reserves.

## **PART 6 OTHER OIL AND GAS INFORMATION**

### **Item 6.3 Forward Contracts**

In accordance with the provisions in NI 51-101, the impact of the Company's financial hedges has not been included in this report.

### **Item 6.5 Tax Horizon**

Based on after tax economic forecasts prepared by GLJ, income taxes are not payable by the Company in the total proved reserves category and are payable in 2029 in the total proved plus probable reserves category. After tax revenue projections are provided in the After Tax Analysis section of this report.

**Item 6.8      Production Estimates**

Table FP-9 presents a forecast of the Company's production by product type in the first year of forecast.

Production for properties which individually account for 20 percent or more of the Company's forecast production (total proved plus probable reserves, boe basis) in the first year of forecast has been identified separately in this table.

## AFTER TAX ANALYSIS

Turkish income taxes were calculated based on currently legislated tax rates, tax regulations and tax pool information provided by the Company. After tax values for reserves development status or production status subcategories (i.e. developed, undeveloped, producing, non-producing) are calculated by difference.

### ***Tax Pools***

The following tax pools as of the effective date were included in the income tax calculations:

<u>Tax Pool Classification</u>	<u>Write-Off Rate (%)</u>	<u>Tax Pool (M\$)</u>
Drilling and Facility Capital	STL*	8,388.0
Non-Capital Losses	100	0.0

*\*Straight line depreciation method for fixed assets*

### ***Tax Rates***

The corporate income tax rate in Turkey is 22 percent.

## **APPENDIX I**

### **CERTIFICATES OF QUALIFICATION**

Patrick A. Olenick  
Graham P. Simpson

## CERTIFICATION OF QUALIFICATION

I, Patrick A. Olenick, Professional Engineer, 4100, 400 - 3rd Avenue S.W., Calgary, Alberta, Canada hereby certify:

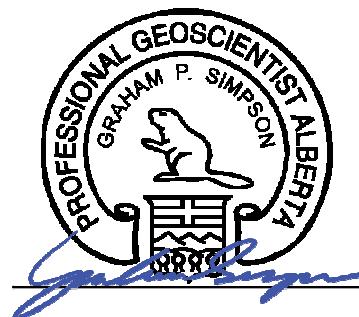

1. That I am an employee of GLJ Petroleum Consultants Ltd., which company did prepare a detailed analysis of Turkish oil and gas properties of Park Place Energy Inc. (the "Company"). The effective date of this evaluation is December 31, 2017.
2. That I do not have, nor do I expect to receive any direct or indirect interest in the securities of the Company or its affiliated companies.
3. That I attended the University of Calgary where I graduated with a Bachelor of Science Degree in Mechanical Engineering in 2003; that I am a Registered Professional Engineer in the Province of Alberta; and, that I have in excess of sixteen years experience in engineering studies relating to oil and gas fields.
4. That a personal field inspection of the properties was not made; however, such an inspection was not considered necessary in view of the information available from public information and records, the files of the Company, and the appropriate provincial regulatory authorities.

## CERTIFICATION OF QUALIFICATION

I, Graham P. Simpson, Professional Geoscientist, 4100, 400 - 3rd Avenue S.W., Calgary, Alberta, Canada hereby certify:

1. That I am an employee of GLJ Petroleum Consultants Ltd., which company did prepare a detailed analysis of Turkish oil and gas properties of Park Place Energy Inc. (the "Company"). The effective date of this evaluation is December 31, 2017.
2. That I do not have, nor do I expect to receive any direct or indirect interest in the securities of the Company or its affiliated companies.
3. That I attended the University of Calgary where I graduated with a Doctorate Degree in Geology in 1999; that I am a Registered Professional Geoscientist in the Province of Alberta; and, that I have in excess of twenty-five years experience in geological studies relating to oil and gas fields.
4. That a personal field inspection of the properties was not made; however, such an inspection was not considered necessary in view of the information available from public information and records, the files of the Company, and the appropriate provincial regulatory authorities.
