

## **TRILLION ENERGY INTERNATIONAL ANNOUNCES SEPTEMBER 8<sup>TH</sup> AS URANUS RIG DEPARTURE DATE**

**The Uranus Rig is nearing the end of its preventative maintenance before mobilization**

**Septembre 6, 2022 - Vancouver, B.C. - Trillion Energy International Inc. (“Trillion” or the “Company”)** (CSE: TCF) (OTCQB: TRLEF) (Frankfurt: Z62) provides an update on the status of the Uranus Rig mobilization to the SASB gas field. The Uranus Rig is slated to depart for SASB on September 8<sup>th</sup> and to arrive on September 11<sup>th</sup>. A detailed daily schedule is as follows:

- September 5 – NDT (Non-Destructive Testing) operations in ballast Tank #2
- September 6 – Estimated completion of welding operations in ballast Tank #1, start NDT and painting
- September 8 – Rig departure date
- September 9 – PSU Altair ship arrives for loading of all equipment and materials from shore base to Akcakoca offshore platform
- September 11 – Rig arrives at SASB

Arthur Halleran CEO stated:

“As investors have been eagerly anticipating and requesting daily updates on the rig mobilization for our drilling program; I have been personally keeping on top of the rig status on a daily basis. I am confident the September 8<sup>th</sup> departure date will allow us the time to have the necessary rig repairs identified and completed.”

“As Trillion is now able to sell its natural gas production for US\$30.68/mcf; and with the news today of Russia shutting off all natural gas supply from the Nord-Stream pipeline until sanctions are lifted, we expect further upward price pressure on natural gas to occur over the winter.”

“With the drilling rig arriving September 11<sup>th</sup>, the first new gas production is expected around the end of October, 2022 which will capture the high gas prices.”

The Company’s multi-well development program initially includes seven natural gas production wells set to come online during a time when acute natural gas shortages are menacing Europe and Turkey. Natural gas prices continue to spike, breaking historical records; the prospect of a cold winter looms with the worst shortages expected yet to come.

### **About the Company**

Trillion is an oil and gas producing company with multiple assets throughout Turkey and Bulgaria. The Company is 49% owner of the SASB natural gas field, one of the Black Sea’s first and largest-scale natural gas development projects; a 19.6% (except three wells with 9.8%) interest in the Cendere oil field; and in

Bulgaria, the Vranino 1-11 block, a prospective unconventional natural gas property. More information may be found on [www.sedar.com](http://www.sedar.com), and our website.
