

TRILLION ENERGY SPUDS FIFTH WELL AT SASB GAS FIELD DEVELOPMENT

Bayhanli-2 gas well spudded at East Ayazli targeting significant Proved Reserves

April 11, 2023 - Vancouver, B.C. - Trillion Energy International Inc. (“Trillion” or the “Company”) (CSE: TCF) (OTCQB: TRLEF) (Frankfurt: Z62) is pleased to announce the spudding of the Bayhanli-2 well at the SASB Gas field, Black Sea Turkiye.

Bayhanli-2 is the fifth gas well in our multi-well drilling program at the SASB gas field development. The well targets a previously discovered gas pool, which was never previously produced, through a long reach directional well bore to enable production. The Bayhanli gas pool is a significant target and may likely require additional wells in the future to fully produce the economic reserves.

Upon completion, the Bayhanli-2 well is expected to reach a total measured depth of 3,400 metres and true vertical depth of about 1,200 metres, extending horizontally over 2 kilometers from the East Ayazli offshore tripod. The well was spud on April 5th, 2023 and is currently drilled to a depth of 496 metres. We anticipate that drilling, casing, perforation and testing will take a total of about 45 days.

About the Company

Trillion Energy is focused on natural gas production for Europe and Turkey with natural gas assets in Turkiye and Bulgaria. The Company is 49% owner of the SASB natural gas field, one of the Black Sea’s first and largest-scale natural gas development projects; a 19.6% (except three wells with 9.8%) interest in the Cendere oil field; and in Bulgaria, the Vranino 1-11 block, a prospective unconventional natural gas property.
