Condensed Interim Financial Statements November 30, 2018 (Expressed in Canadian Dollars) (Unaudited)

NOTICE OF NO AUDITOR REVIEW OF CONDENSED INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection, 4.3 (3)(a), if an auditor has not performed a review of the condensed interim financial statements, they must be accompanied by a notice indicating that the condensed interim financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim financial statements of Radial Research Corp. (the "Company") have been prepared by and are the responsibility of the Company's management. The unaudited condensed interim financial statements are prepared in accordance with International Financial Reporting Standards and reflect management's best estimate and judgements based on information currently available.

The Company's independent auditor has not performed a review of these condensed interim financial statements in accordance with the standards established by the Canadian Institute of Chartered Professional Accountants for a review on interim financial statements by an entity's auditor.

1. NATURE OF OPERATIONS AND GOING CONCERN

Radial Research Corp. (the "Company") was incorporated under the laws of the Province of British Columbia on June 26, 2017. On October 29, 2018, the Company completed its initial public offering ("IPO") (Note 4) and is now publicly traded on the Canadian Securities Exchange ("CSE") under the ticker RAD. The Company's business is developing a language learning technology application for smartphones.

The Company's registered and records office is 1090 West Georgia Street, Suite 600, Vancouver, British Columbia, V6E 3V7.

These condensed interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. There are material uncertainties that may cast significant doubt about the appropriateness of the going concern assumption as the Company is in the development stage and has not generated any revenues. The Company's continuing operations as intended are dependent upon the Company's ability obtain necessary financing to commercialize its technology. Should the Company fail to commercialize its technology, its ability to raise sufficient financing to maintain operations may be impaired and, accordingly, the Company may be unable to realize the carrying value of its net assets. These condensed interim financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. BASIS OF PRESENTATION

(a) Statement of compliance

These condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (IAS 34) as issued by the International Accounting Standards Board. Condensed interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the annual financial statements of the Company for the year ended May 31, 2018. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Company's financial position and performance since the last annual financial statements as at and for the year ended May 31, 2018.

(b) Basis of presentation

These condensed interim financial statements have been prepared on a historical cost basis, except for certain financial instruments classified as financial instruments at fair value through profit or loss, which are stated at fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

(c) Approval of the financial statements

These condensed interim financial statements were authorized for issue by the Audit Committee and Board of Directors on January 29, 2019.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Cash

Cash is comprised of cash held in bank and cash held in trust.

- (b) Financial instruments
 - (i) Financial assets

Initial recognition and measurement

A financial asset is measured initially at fair value plus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue. On initial recognition, a financial asset is classified as measured at amortized cost or fair value through profit or loss. A financial asset is measured at amortized cost if it meets the conditions that i) the asset is held within a business model whose objective is to hold assets to collect contractual cash flows, ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, and iii) is not designated as fair value through profit or loss.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit or loss

Financial assets measured at fair value through profit and loss are carried in the statement of financial position at fair value with changes in fair value therein, recognized in the statement of comprehensive loss. The Company classifies cash as fair value through profit and loss.

Financial assets measured at amortized cost

A financial asset is subsequently measured at amortized cost, using the effective interest method and net of any impairment allowance, if:

- the asset is held within a business whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest.

There are no financial assets classified as measured as amortized cost.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

- (a) Financial instruments (Continued)
 - (ii) Derecognition

A financial asset or, where applicable a part of a financial asset or part of a group of similar financial assets is derecognized when:

- the contractual rights to receive cash flows from the asset have expired; or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.
- (iii) Financial liabilities

Financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument. A financial liability is derecognized when it is extinguished, discharged, cancelled or when it expires. Financial liabilities are classified as either financial liabilities at fair value through profit or loss or financial liabilities subsequently measured at amortized cost. All interest-related charges are reported in profit or loss within interest expense, if applicable. The Company's financial liabilities included accounts payable and accrued liabilities.

(iv) Fair value hierarchy

Fair value measurements of financial instruments are required to be classified using a fair value hierarchy that reflects the significance of inputs used in making the measurements. The levels of the fair value hierarchy are defined as follows:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 Inputs for assets or liabilities that are not based on observable market data.

The carrying value of cash approximates its fair value due to the short-term maturity of these instruments.

(b) Common shares

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(c) Earnings (loss) per share

The Company presents basic and diluted earnings (loss) per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of shares outstanding during the period. Diluted earnings (loss) per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

Shares held in escrow, other than where their release is subject to the passage of time, are not included in the calculation of the weighted average number of common shares outstanding.

(d) Income taxes

Tax provisions are recognized when it is considered probable that there will be a future outflow of funds to a taxing authority. In such cases, a provision is made for the amount that is expected to be settled, where this can be reasonably estimated. This requires the application of judgment as to the ultimate outcome, which can change over time depending on facts and circumstances. A change in estimate of the likelihood of a future outflow and/or in the expected amount to be settled would be recognized in income in the period in which the change occurs.

Deferred tax assets or liabilities, arising from temporary differences between the tax and accounting values of assets and liabilities, are recorded based on tax rates expected to be enacted when these differences are reversed. Deferred tax assets are recognized only to the extent it is considered probable that those assets will be recovered. This involves an assessment of when those deferred tax assets are likely to be realized, and a judgment as to whether there will be sufficient taxable profits available to offset the tax assets when they do reverse. This requires assumptions regarding future profitability and is therefore inherently uncertain. To the extent assumptions regarding future profitability change, there can be an increase or decrease in the amounts recognized in respect of deferred tax assets, as well as in the amounts recognized in income in the period in which the change occurs.

Tax provisions are based on enacted or substantively enacted laws. Changes in those laws could affect amounts recognized in income both in the period of change, which would include any impact on cumulative provisions, and in future periods.

(e) Research and development

The Company incurs costs on activities that relate to research and development of new products. Research and development costs are expensed, except in cases where development costs meet certain identifiable criteria for deferral, including technical and economic feasibility. Development costs are capitalized only if the expenditures can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Company intends to, and has sufficient resources to, complete development and to use or sell the asset. Deferred development costs are amortized over the life of related commercial production, or in the case of serviceable property and equipment, are included in the appropriate property group and are

Notes to the Condensed Interim Financial Statements For the Period Ended November 30, 2018 (Unaudited - Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(e) Research and development (Continued)

depreciated over its estimated useful life. As at November 30, 2018, the Company has not capitalized any research and development costs.

(f) Intangible assets

Recognition and measurement

Intangible assets include technology acquired by the Company and have finite useful lives and measured at cost less accumulated amortization and any accumulated impairment losses.

Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures are recognized in the statement of comprehensive loss as incurred.

Amortization

Amortization is recorded using the straight-line method and is intended to amortize the cost of the assets over their estimated useful lives as follows:

Intellectual Property

5 years

(g) Impairment of non-financial assets

At the end of each reporting period, the Company reviews the carrying amounts of longlived assets to determine whether there is an indication that those assets have suffered an impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment charge (if any).

The recoverable amount used for this purpose is the higher of the fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset is estimated to be less than its recorded amount, the recorded amount of the asset is reduced to its recoverable amount. An impairment charge is recognized immediately in the statement of comprehensive loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, to a maximum amount equal to the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years.

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(h) Use of estimates and judgments (Continued)

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may vary from these estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Accounting estimates will, by definition, seldom equal the actual results. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future years affected.

Critical Judgments

Intangible assets

The application of the Company's accounting policy for intangible assets expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of expenditures is unlikely, the amount capitalized is written off in profit or loss in the period the new information becomes available.

Research and development expenditures

Costs to develop products that will be sold are capitalized to the extent that the criteria for recognition as intangible assets in IAS 38 *Intangible Assets* are met. Those criteria require that the product is technically and economically feasible, which management assessed based on the attributes of the development project, perceived user needs, industry trends and expected future economic conditions. Management considers these factors in aggregate and applies significant judgment to determine whether the product is feasible. The Company has not capitalized any product development costs as at November 30, 2018.

Going concern

The assessment of whether the concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period. The Company is aware that material uncertainties exist related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(h) Use of estimates and judgments (Continued)

Significant estimates and assumptions

Expected useful life of intangible asset

Following initial recognition, the Company carries the value of intangible assets at cost less accumulated amortization and any accumulated impairment losses. Amortization is recorded on a straight-line basis based upon management's estimate of the useful life and residual value. Management estimates that intangible assets acquired will have a useful life of 5 years. The estimates are reviewed at least annually and are updated if expectations change as a result of technical obsolescence or legal and other limits to use. A change in the useful life or residual value will impact the reported carrying value of the intangible assets resulting in a change in related amortization expense.

(i) Foreign currency translation

The functional and presentation currency of the Company is the Canadian dollar. Transactions denominated in a currency other than an entity's functional currency are translated as follows: unsettled monetary items denominated in a foreign currency are translated into Canadian dollars at exchange rates prevailing at the date of the statement of financial position and non-monetary items are translated at exchange rates prevailing when the assets were acquired or obligations incurred. Foreign currency denominated revenue and expense items are translated at exchange rates prevailing at the transaction date. Gains or losses arising from the translations are included in profit or loss.

4. SHARE CAPITAL

(a) Authorized

Unlimited number of common shares without par value.

(b) Issued and outstanding

As of November 30, 2018, the total issued and outstanding share capital consists of 23,232,564 common shares.

On October 29, 2018, the Company completed its IPO and issued 5,000,000 common shares of the Company at \$0.10 per common share for gross processed of \$500,000. In connection with this offering, the Company paid \$15,000 in cash and issued 400,000 agent warrants. Each agent warrant entitles the holder to purchase one common share of the Company at \$0.10 per share for a period of 24 months.

On December 29, 2017, the Company issued 4,324,636 common shares of the Company at \$0.05 per common share for total proceeds of \$216,232.

On December 22, 2017, the Company issued 12,000,000 common shares of the Company at \$0.02 per common share for total fair value of \$240,000 to acquire assets related to intangible assets (Note 7).

4. SHARE CAPITAL (Continued)

On December 21, 2017, the Company issued 1,907,928 common shares of the Company at \$0.02 per common share for total proceeds of \$38,158.

On June 26, 2017, the Company issued 1 incorporation common share for \$0.01 and subsequently cancelled the common share on December 21, 2017.

Stock Options

The Company has adopted a stock option plan (the "Plan") pursuant to which it may from time to time, in its discretion, and in accordance with CSE requirements, grant to directors, officers, and consultants to the Company, non-transferable options to purchase common shares of the Company and is the basis for the Company's long term incentive scheme. The Plan is administered by the Board, or if appointed, by a special committee of directors appointed from time to time by the Board. The maximum number of common shares issuable under the Plan shall not exceed 10% of the number of common shares of the Company issued and outstanding as of each award date, inclusive of all common shares reserved for issuance pursuant to previously granted stock options. The exercise price of options granted under the Plan will not be less than the closing market price of the Company's common shares on the exchange. The options have a maximum term of 5 years from date of issue.

The following is a summary of the changes in the Company's stock option plan for the six months ended November 30, 2018:

| | 6 months ended November 30, | | |
|----------------------------------|-----------------------------|----------------|--|
| | | 2018 | |
| | | Weighted | |
| | Number of | average | |
| | options | exercise price | |
| | | \$ | |
| Outstanding, beginning of period | 500,000 | 0.10 | |
| Expired | - | - | |
| Granted | - | - | |
| Outstanding, end of period | 500,000 | 0.10 | |
| Exercisable, end of period | 500,000 | 0.10 | |

On June 1, 2018 the Company granted stock options to purchase an aggregate of 500,000 common shares to management, directors and consultants at an exercise price of \$0.10 for a term of 5 years.

Notes to the Condensed Interim Financial Statements For the Period Ended November 30, 2018 (Unaudited - Expressed in Canadian Dollars)

4. SHARE CAPITAL (Continued)

Share Warrants

| | 6 months ende | d November 30, 2018 | Year ended N | /lay 31, 2018 |
|----------------------------------|--|--|--|--|
| | Number of share purchase warrants | Weighted average exercise price \$ | Number of share purchase warrants | Weighted average exercise price \$ |
| Outstanding, beginning of period | - | - | - | - |
| Issued - finders' warrants | 400,000 | 0.10 | - | - |
| Outstanding, end of period | 400,000 | 0.10 | - | - |

The weighted average fair value of the finders' warrants granted during the period ended November 30, 2018 was estimated at \$0.05 (March 31, 2017 - \$nil) per warrant at the grant date using the Black-Scholes Pricing Model using the following assumptions: no expected dividends to be paid; volatility of 100% based on industry standard for comparable companies without a historical volatility; risk-free interest rate of 2%; and expected life of 2 years.

| Number of | Weighted | Expiry dates | Weighted average |
|-------------|----------------|------------------|------------------|
| warrants | average | | remaining life |
| outstanding | exercise price | | (years) |
| 400,000 | \$0.10 | October 29, 2020 | 1.92 |

5. RISK MANAGEMENT

(a) Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk for the Company is associated with its cash. The Company is not exposed to significant credit risk as its cash is held in trust.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. As at November 30, 2018, the Company has sufficient funds to meet its obligations of \$104,527 (\$44,485 – May 31, 2018). The Company's accounts payable and accrued liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

5. **RISK MANAGEMENT** (Continued)

(c) Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and other price risk. The Company is not exposed to significant market risk.

6. CAPITAL MANAGEMENT

The Company's primary source of funds comes from the issuance of common shares. The Company does not use other sources of financing that require fixed payments of interest and principal due to lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern and to further develop its language learning technology.

The Company defines its capital as shareholders' equity. Capital requirements are driven by the Company's general operations. To effectively manage the Company's capital requirements, the Company monitors expenses and overhead to ensure costs and commitments are being paid.

7. INTANGIBLE ASSET

| | \$ |
|----------------------------|---------|
| COST | |
| Balance, May 31, 2018 | 240,000 |
| Additions | - |
| Balance, November 30, 2018 | 240,000 |
| AMORTIZATION | |
| Balance, May 31, 2018 | 24,000 |
| Charge for the period | 24,000 |
| Balance, November 30, 2018 | 48,000 |
| NET BOOK VALUE | |
| Balance, May 31, 2018 | 216,000 |
| Balance, November 30, 2018 | 192,000 |

The intangible asset consists of intellectual property for the language learning technology application acquired from a third party (Note 4).

8. RELATED PARTY TRANSACTIONS

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and Corporate Officers.

The remuneration of key management for the periods ended November 30, 2018 and May 30, 2018 are as follows:

| | For the 6 months ended November 30, 2018 \$ | For the year ended May 30, 2018 \$ |
|---------------------|--|---|
| Legal Consulting | 29,866 8,650 | - |
| | 38,516 | - |

As at November 30, 2018, the Company had \$784 (May 30, 2018 - \$nil) in amounts due to related parties.

9. SEGMENTED INFORMATION

The Company's business consists of one reportable segment and all of the Company's assets are located in Canada. The Company is currently developing a language learning technology application for smartphones.
