

FIRST RESPONDER TECHNOLOGIES COMPLETES ALPHA VERSION OF SENTINEL™ VISION CAMERA AND WEAPON DETECTION COMPUTER VISION MODEL

Vancouver, British Columbia – October 27, 2020 – First Responder Technologies Inc. (“First Responder” or the “Company”) (CSE: WPN | OTCQB: WPNNF | FWB: 3WK), a developer of WiFi-based technologies for detecting concealed weapons and for deterring mass shooting and terror attacks involving concealed weapons, is pleased to announce that it has completed development of the Alpha version of its Sentinel™ Vision Camera and the accompanying, proprietary computer vision model for weapon detection.

The Sentinel™ Vision Camera is an advanced security camera and computer vision platform that gives users access to innovative weapon detection technology. The camera, which is designed and manufactured by First Responder, interfaces directly with First Responder’s Threat Management System (cloud-based user application) on any connected device.

Sentinel™ Vision Camera features are expected to include:

- First Responder’s proprietary model for the detection of long guns, handguns, and knives
- Edge-based AI computing with a 384 GPU core/48 tensor core computing module
- High-end 4K Video with day and night operation
- Multi-path connectivity via Ethernet, WiFi or cellular
- 5G-ready cellular backup for robust and reliable performance
- Indoor and outdoor use

The use of edge-based AI technology enables the following key factors:

- Plug-and-play: does not require additional hardware on premise
- Eliminates recurring costs for cloud-based AI computing
- Maximum privacy: all data stays within the system by default, and no outside personnel will view or manage the system
- Minimal weapon detection latency due to detection occurring on the device
- Robust operation: connectivity is not needed to detect weapons

The Sentinel™ Vision Camera is designed to provide leading security camera and computer vision capabilities in a package that end-users should be able to independently install and operate. The system will not depend on third parties or integrators for installation.

Sales of the Sentinel™ Vision Camera alpha-version to key partners of First Responder are expected to begin in December 2020.

On behalf of the Board of Directors,

“Robert F. Delamar”

About First Responder Technologies Inc.

First Responder Technologies Inc. (the **“Company”**) is a technology development company that commercializes academic and internally developed intellectual property for use in the public safety market. The Company is developing a WiFi-based technology, based in part, on academic research licensed from Rutgers, the State University of New Jersey (**“Rutgers”**) that can be used to detect concealed weapons. The Company’s threat detection technology line of business was created to capture a significant portion of the global weapons detection systems market, and in particular, the global perimeter security detection market. In the Company’s view, WiFi-based threat detection technology may be utilized by a wide range of facilities, including schools, places of worship, shopping centres and theatres, to not only make their premises secure, but also reduce their cost of security, from the interior of a facility to the perimeter.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

Certain statements contained in this news release may constitute forward-looking information, including statements regarding revenue expected to be generated by First Responder. Forward-looking information is often, but not always, identified by the use of words such as “anticipate”, “plan”, “estimate”, “expect”, “may”, “will”, “intend”, “should”, and similar expressions. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. The Company’s actual results could differ materially from those anticipated in this forward-looking information as a result of regulatory decisions, competitive factors in the industries in which the Company operates, prevailing economic conditions, changes to the Company’s strategic growth plans, and other factors, many of which are beyond the control of the Company. The Company believes that the expectations reflected in the forward-looking information are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking information should not be unduly relied upon. Any forward-looking information contained in this news release represents the Company’s expectations as of the date hereof, and is subject to change after such date. The Company disclaims any intention or obligation to update or revise any forward-looking information whether as a result of new information, future events or otherwise, except as required by applicable securities legislation.

FINANCIAL OUTLOOK INFORMATION – This news release contains “financial outlook information” regarding future revenue expectations, which is subject to the same assumptions, risk factors, limitations, and qualifications as set forth in the above. Revenue and other estimates contained in this news release were made by First Responder’s management as of the date of this news release and are provided for the purpose of describing anticipated timing of revenue generation, and are not an estimate of profitability or any other measure of financial performance. Investors are cautioned that the financial outlook information contained in this news release should not be used for purposes other than for which it is disclosed herein.
