

## **FIRST RESPONDER ANNOUNCES APPOINTMENT OF ROBERT C. DAMERON TO BOARD OF DIRECTORS**

*Not for distribution to U.S. news wire services or dissemination in the United States*

**Vancouver, British Columbia – November 26, 2020 – First Responder Technologies Inc. (“First Responder” or the “Company”)** (CSE: WPN | OTCQB: WPNNF | FWB: 3WK), a developer of WiFi-based technologies for detecting concealed weapons and for deterring mass shooting and terror attacks involving concealed weapons, is pleased to announce the appointment of Robert C. Dameron to the Company’s board of directors.

Mr. Dameron spent over 20 years in the financial services industry in senior/executive positions at the Toronto Stock Exchange and at one of Canada’s largest mutual fund companies. He also served as President/CEO/COO and Chief Compliance Officer of Ontario Teachers’ Group Investment Funds. For the past 12 years, Mr. Dameron has served as an advisor/executive/board member to several early stage technology companies in Canada and the United States. He continues to help technology companies with their planning, governance, go-to-market strategies and capital raising activities.

Mr. Dameron was one of the first advisors to join First Responder in early 2019, and commented, “When I first heard about the concept/vision for the Company, I was intrigued with its value proposition and its potential to make the world a less dangerous place. In the future, to be able deploy an inexpensive, safe and non-intrusive solution to weapon detection challenges, both inside and outside buildings of any size, anywhere, is a global opportunity. A great management team is in place and great strides have been made to develop the technology and ultimately deploy around the world. The initial end-user market response has been exciting for me to hear first-hand. I am thrilled to be joining the First Responder board of directors and now have the opportunity to work even more closely with the team to guide and support the next stages of its journey.”

The Company also announces the resignations of Christopher Moreau and Michael Charles Kelly from the Company’s board of directors.

“Speaking on behalf of the entire First Responder team, we appreciate the opportunity we had to benefit from Mr. Moreau and Mr. Kelly’s extensive professional backgrounds, thorough business acumen and the strategic insights that they brought to our board,” said Robert Delamar, CEO of the Company. “We thank Mr. Moreau and Mr. Kelly for their valuable contributions to the Company and wish them all the best in their future endeavors.”

**On behalf of the Board of Directors,**

*“Robert F. Delamar”*

**About First Responder Technologies Inc.**

First Responder Technologies Inc. (the “**Company**”) is a technology development company that commercializes academic and internally developed intellectual property for use in the public safety market. The Company is developing a WiFi-based technology, based in part, on academic research licensed from Rutgers, the State University of New Jersey (“**Rutgers**”) that can be used to detect concealed weapons. The Company’s threat detection technology line of business was created to capture a significant portion of the global weapons detection systems market, and in particular, the global perimeter security detection market. In the Company’s view, WiFi-based threat detection technology may be utilized by a wide range of facilities, including schools, places of worship, shopping centres and theatres, to not only make their premises secure, but also reduce their cost of security, from the interior of a facility to the perimeter.
