Notes to Condensed Interim Consolidated Financial Statements Six Months Ended August 31, 2022 and August 31, 2021 (Expressed in Canadian Dollars) (Unaudited)

1. Nature of operations and going concern

FenixOro Gold Corp. (formerly American Battery Metals Corp.) (the "Company"), was incorporated on March 2, 2017 under the laws of the province of British Columbia. The Company's principal business activity is the exploration for mineral resources, in Colombia.

Effective November 29, 2018, the Company's shares traded on the Canadian Securities Exchange (the "CSE") under the trading symbol "FDIV". Effective March 11, 2019, the Company changed its name from First Division Ventures Inc. to American Battery Metals Corp. and was traded under the symbol "ABC" on the CSE. Effective May 21, 2020, the Company changed its name to FenixOro Gold Corp and is traded under the symbol "FENX" on the CSE.

The Company's registered office is located at The Canadian Venture Building, 82 Richmond Street East, Toronto, Ontario, M5C 1P1, Canada.

These unaudited condensed interim consolidated financial statements have been prepared in accordance with accounting principles applicable to a going concern. The Company has incurred losses and negative cash flows from operations since inception that has been funded through financing activities. The Company has no current source of revenues from operations. These factors indicate the existence of a material uncertainty that may cast significant doubt as to the Company's ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with cash on hand and through financing activities. These unaudited condensed interim consolidated financial statements do not reflect the adjustments to the carrying value of assets and liabilities that would be necessary if the Company is unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Such adjustments could be material.

The outbreak of the novel strain of coronavirus, specifically identified as COVID-19, has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and physical distancing, have caused material disruption to business globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Corporation in future periods.

2. Basis of preparation

The unaudited condensed interim consolidated financial statements were authorized for issuance on October 31, 2022, by the directors of the Company.

(a) Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting". They do not include all of the information required for full annual financial statements and should be read in conjunction with the Company's audited annual financial statements for the year ended February 28, 2022, which have been prepared in accordance with International Financial Reporting Standards ("IFRS"). These unaudited condensed interim consolidated financial statements follow the same accounting policies and methods of application as the annual financial statements of the Company for the year ended February 28, 2022.

(b) Basis of measurement

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these unaudited condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information. These unaudited condensed interim consolidated financial statements are presented in Canadian dollars, unless otherwise noted, which is also the Company's functional currency.

Notes to Condensed Interim Consolidated Financial Statements Six Months Ended August 31, 2022 and August 31, 2021 (Expressed in Canadian Dollars) (Unaudited)

2. Basis of preparation (continued)

(c) Significant estimates and assumptions

The preparation of these unaudited condensed interim consolidated financial statements requires the Company to use judgment in applying its accounting policies and make estimates and assumptions about reported amounts at the date of the unaudited condensed interim consolidated financial statements and in the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions exist where there are significant risks of material adjustments to assets and liabilities in future accounting period, these include the recoverability of the carrying value of the exploration and evaluation assets, the measurements for financial instruments, measurement of shares issued for non-cash considerations, valuation of stock options and agents' warrants and the recoverability of deferred tax assets.

The preparation of these unaudited condensed interim consolidated financial statements in accordance with IFRS required the Company to make judgements, apart from those involving estimates, in applying accounting policies. The following are the most significant judgements that management has made in applying the Company's financial statements: the assessment of the Company's ability to continue as a going concern and whether there are indicators of impairment of the Company's exploration and evaluation assets.

3. Significant accounting policies

These unaudited condensed interim consolidated financial statements have been prepared based on accounting poliices and methods of computation consistent with those applied in the Company's audited annual financial statements for the fiscal year ended February 28, 2022.

Certain new accounting standards and interpretations have been published that are not mandatory for the current period and have not been early adopted. These standards are not expected to have a material impact on the Company in the current and future reporting periods.

Abriaqui project, Colombia

On May 19, 2020, through the acquisition of Fenix Gold Inc., a private company ("Fenix") the Company acquired the Abriaqui project which consists of four mining claims. Two claims are 100% owned by Fenix and two are held through its subsidiaries, pursuant to a joint venture agreement with a local mining co-operative whereby Fenix, through its subsidiaries, has indirectly acquired a 35% ownership interest and has the right to earn-in up to a 90% interest in the claim (50% ownership upon completion of a USD\$50,000 subtraction report and production facility, and USD\$100,000 payment; 90% ownership upon USD\$900,000 exploration expenses and USD\$100,000 payment).

Polo Resources Ltd., Colombia

On August 25, 2020, the Company acquired the rights to certain mineral claims from Polo Resources Ltd. The 848ha package of four claims is contiguous with and west and northwest adjacent to FenixOro's Abriaqui Project. The Company has acquired the mining claims by issuance of 1,000,000 common shares at \$0.295 Canadian plus legal fees. These shares were issued on July 21, 2021 (note 6).

Fifty percent of the Escrowed Shares held pursuant to the Voluntary Escrow Agreement will be released in four months following the Listing Date, and ten percent of the Escrowed Shares will be released every thirty days thereafter. As at August 31, 2022, 5,278,964 common shares remain held in escrow.

7. Capital disclosure

The Company defines its capital as shareholders' equity. The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the acquisition and exploration and development of mineral properties. The Board of Directors do not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest are in the exploration stage. As such, the Company has historically relied on the equity markets to fund its activities. In addition, the Company is dependent upon external financings to fund activities.

In order to carry out planned exploration and pay for administrative costs, the Company will need to raise additional funds. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

8. Related party transactions

Related parties include the Board of Directors, officers, key management personnel, close family members and enterprises that are controlled by these individuals. Key management personnel are those having authority and directors (executive and non-executive) of the Company. 9. Financial instruments

The Company is exposed in varying degrees to a variety of financial instrument related risks by virtue of its activities. The overall financial risk management program focuses on preservation of capital, and protecting current and future Company assets and cash flows by reducing exposure to risks posed by the uncertainties and volatilities of financial markets. The types of risk exposure and the way in which such exposures are managed are as follows:

- Credit Risk The Company's credit risk is primarily attributable to its liquid financial assets. The Company's primary exposure to credit risk is on its cash. Cash are held with the same financial institution giving rise to a concentration of credit risk. This risk is managed by using a major Canadian bank that is a high credit quality financial institution.
- Liquidity Risk Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves to meet its liquidity requirements. Historically, the Company's sole source of funding has been the issuance of equity securities, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding. All of the Company's financial liabilities are due within a year.
- Interest rate risk Interest rate risk refers to the risk that fair values of future cash flows of a financial instrument
 will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk as cash earns
 interest income at variable rates. The fair value of cash is minimally affected by changes in short term interest
 rates.
- Foreign currency risk Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is exposed to foreign currency risk to the extent that certain monetary financial instruments and other assets are denominated in United States dollars. The Company has not entered any foreign currency contracts to mitigate this risk, as it believes this risk is minimized by the minimal amount of cash held in United States funds.

9. Financial instruments (continued)

- Commodity price risk The value of the Company's mineral resource properties is related to the price of various commodities and the outlook for them. Commodity prices have historically fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, industrial retail demand, central bank lending, forward sales by producers and speculators, level of worldwide production and short-term changes in supply and demand.
- Fair Value The Company has various financial instruments comprised of cash, receivables and accounts payable and accrued liabilities.
