

**Scotch Creek Ventures Inc. contracts Geophysics Program for the Macallan and Highlands West Projects, in Clayton Valley, USA**

VANCOUVER, BC / ACCESSWIRE / July 26<sup>th</sup>, 2021 / Scotch Creek Ventures Inc. (the "Company") (CSE: SCV) (FSE: 7S2) (OTC: SCVFF) ("Scotch Creek" or the "Company") is pleased to announce that it has retained Hasbrouck Geophysics Inc. ("Hasbrouck") to commence work on its two Clayton Valley lithium brine projects. Hasbrouck will commence with a detailed HSAMT survey and the results from this survey will aid in identifying and selecting potential future drill targets.

The geophysical exploration program will consist of Hybrid-Source Audio-Magnetotellurics (HSAMT) where data will be acquired at intervals of 500 meters along four lines within each claim block with a nominal total of 31 and 41 stations within the Macallan and Highlands claims. The objectives of the HSAMT survey are to define:

1. The extent of conductors that may represent lithium-bearing brine units.
2. Map the continuity, thickness, dip, and extent of potential brine-hosting units.
3. Identify drill targets or additional data needed prior to drilling.

Scotch Creek CEO, Mr. David Ryan, Commented, "As the lithium market continues to grow, North America strives to become less reliant on foreign supply. We believe that exploration companies such as Scotch Creek can contribute to future potential lithium supply shortfalls. The commencement of the geophysics program is the initial step in identifying any lithium-bearing resources at our two fully-owned lithium projects in Clayton Valley, Nevada. We are fortunate to be working with such experienced geophysics professionals like Hasbrouck to complete this exploration program."

**About Scotch Creek Ventures**

Scotch Creek is a mineral exploration company, focused on the acquisition, exploration, and development of lithium projects located in tier-one North American mining jurisdictions. Scotch Creek's mission is to become a best-in-class lithium exploration company situated in one of the most promising lithium districts in the world, Clayton Valley, Nevada.
