

Scotch Creek Commences Geophysical Exploration on its Highlands West Lithium Project, Clayton Valley

VANCOUVER, BC – May 11th, 2022 – Scotch Creek Ventures Inc. (the “**Company**”) (CSE: SCV) (FSE: 7S2) (OTC: SCVFF) (“**Scotch Creek**” or the “**Company**”), is pleased to announce that the proposed reflection seismic survey, [announced on April 20th, 2022](#), has now commenced on its Highlands West (“**Highlands**”) lithium project in Clayton Valley, Nevada.

The reflection seismic survey is being executed by Hasbrouck Geophysics Inc. (“**Hasbrouck**”) on the company’s 5,960-acre Highlands property. The results of the survey will provide a more detailed understanding of the geological formation on the property, including:

- Basin lows
- Bedrock topography
- Volcanic basin sediments
- Defining shapes and boundaries of the infilled basins
- Identifying structures & formations that are present within the infill sediments

The reflection seismic survey is an important step in generating a detailed map of the property’s sub-terranean floor. In turn, the company can utilize these results to determine a list of potential drill targets.

Scotch Creek CEO, David Ryan, commented, “We expect this survey to provide us with the necessary information to model the sub-surface layers of our Highlands property. These models will assist in identifying high priority drill targets.”
