The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1. Nature of operations and going concern

Scotch Creek Ventures Inc. (the "Company") was incorporated on January 9, 2017 under the laws of the Province of British Columbia, Canada. The Company's head office and records office is located at 1140 – 625 Howe Street, Vancouver, British Columbia, Canada, V6C 2T6. Its main business activity is the acquisition, exploration and evaluation of mineral property interests located in the United States. These condensed interim consolidated financial statements (the "financial statements") of the Company as at September 30, 2024 and December 31, 2023 and for the three and nine months ended September 30, 2024 and September 30, 2023 comprise the Company and its subsidiaries (note 4). The Company's common shares trade on the Canadian Securities Exchange ("CSE").

The Company is in the process of exploring its mineral property interests and has not yet determined whether they contain mineral reserves that are economically recoverable. The Company's continuing operations and the underlying value and recoverability of the amounts shown for mineral property interests are entirely dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of the mineral property interests, obtaining the necessary permits to mine, and on future profitable production or proceeds from the disposition of the mineral property interests.

These financial statements are prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. There are conditions and events which constitute material uncertainties that may cast significant doubt on the validity of this assumption.

The ability of the Company to continue as a going concern is dependent on the Company obtaining adequate capital to fund operating losses until it becomes profitable. If the Company is unable to obtain adequate capital, it could be forced to cease operations. These factors challenge the Company's ability to continue as a going concern for a year from the date these financial statements were approved.

As at September 30, 2024, the Company had not achieved profitable operations, has a working capital deficit of $356,466 (December 31, 2023 – working capital surplus of $171,353), has a history of losses and has an accumulated deficit of $9,784,621 (December 31, 2023 - $6,860,684). There is a material uncertainty which may cast significant doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent upon its ability to successfully accomplish the plans described in the preceding paragraph and eventually secure other sources of financing and attain profitable operations. These financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern. These adjustments could be material.

2. Basis of preparation

(a) Statement of compliance

These financial statements have been prepared in conformity with International Accounting Standard ("IAS") 34, Interim Financial Reporting, using the same accounting policies as detailed in the Company's annual audited consolidated financial statements for the year ended December 31, 2023, and do not include all the information required for full annual financial statements in accordance with IFRS Accounting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). It is suggested that these financial statements be read in conjunction with the annual audited financial statements.

Further, these financial statements have been prepared on an historical cost basis, except for financial instruments which are measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

All amounts on the financial statements are presented in Canadian dollars which is the functional currency of the Company and its subsidiaries.

(Expressed in Canadian Dollars)

2. Basis of preparation (continued)

(b) Principles of consolidation

These financial statements include the balances and results of the Company and those entities over which the Company exercises control. Control is achieved where the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain the benefits from its operations.

These financial statements include the assets, liabilities, income and expenses of the Company and its wholly-owned subsidiaries (note 4). All intercompany transactions and balances have been eliminated on consolidation.

(c) Material accounting policies

The accounting policies, estimates and critical judgments, methods of computation and presentation applied in these financial statements are consistent with those of the most recent annual audited consolidated financial statements and are those the Company expects to adopt in its annual consolidated financial statements for the year ended December 31, 2024. Accordingly, these financial statements should be read in conjunction with the Company's most recent annual audited consolidated financial statements.

(d) New accounting standards

Certain pronouncements have been issued by the IASB or IFRIC that are effective for accounting periods beginning on or after January 1, 2024. The Company has reviewed these updates and determined that many of these updates are not applicable to or consequential to the Company and have been excluded from discussion within these material accounting policies.

12. Financial risk management

Capital management

The Company is a junior exploration company and considers items included in shareholders' equity as capital. The Company has no debt and does not expect to enter into debt financing. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of underlying assets. In order to maintain or adjust its capital structure, the Company may issue new shares or other equity instruments. The Company is not subject to any externally imposed capital requirements and does not presently utilize any quantitative measures to monitor its capital. The Company's capital structure as at September 30, 2024 is comprised of shareholders' equity of $5,601,121 (December 31, 2023 - $9,136,318). There were no changes to the Company's approach to capital management during the nine months ended September 30, 2024.

The Company currently has no source of revenue. In order to fund future projects and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company's ability to continue as a going concern on a long-term basis and realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation is primarily dependent upon its ability to sell or option its mineral properties and its ability to borrow or raise additional funds from equity markets.

Financial instruments - fair value

The Company's financial instruments consist of cash, reclamation bonds, accounts payable and accrued liabilities, and promissory notes payable.

The carrying value of accounts payable and accrued liabilities, and promissory notes payable approximate their fair value because of the short-term nature of these instruments.

Financial instruments measured at fair value on the condensed interim consolidated statements of financial position are summarized into the following fair value hierarchy levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Level 1 $	Level 2 $	Level 3 $	Total $

Cash	18,729	-	-	18,729
Reclamation bonds	56,341	-	-	56,341

Financial instruments - risk

The Company's financial instruments can be exposed to certain financial risks, including credit risk, interest rate risk, liquidity risk and currency risk.

(a) Credit risk

The Company is exposed to credit risk by holding cash. This risk is minimized by holding the funds in Canadian banks and credit unions or with Canadian governments. The Company has minimal receivables exposure as its refundable credits are due from the Canadian Government.

12. Financial risk management (continued)

Financial instruments – risk (continued)

(b) Interest rate risk

The Company is exposed to interest rate risk because of fluctuating interest rates. For the nine months ended September 30, 2024, and September 30, 2023, every 1% fluctuation in interest rates up or down would have an insignificant impact on loss for the period.

(c) Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its financial obligations as they come due. The Company manages this risk by careful management of its working capital to ensure its expenditures will not exceed available resources.

(d) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the foreign exchange rates. Management does not believe the Company has a significant level of exposure to currency risk.

13. Events after the reporting period

Subsequent to the nine months ended September 30, 2024, the Company announced that its Board of Directors has approved a consolidation of the Company's issued and outstanding common shares on the basis of four (4) pre-consolidated shares to one (1) post-consolidation share.

The proposed consolidation is subject to the approval of the CSE.
