Technology Officer and Vice President of Amazon) made a bold statement about 3D models and the future of e-commerce. “Static 2D product images on the internet will become a thing of the past, replaced by 3D models that you can pick up, rotate, and place in your living room as seamlessly as you can see them in a web browser today.”

Nextech3D.ai is making it possible to create photo-realistic 3D models as digital replicas of real-world products at scale for large enterprise customers and e-commerce giants like Amazon in the global \$5.5 trillion dollar e-commerce market
