### 1. NATURE OF OPERATIONS AND GOING CONCERN

Alerio Gold Corp. (the “Company”) was incorporated under the *Business Corporations Act* (British Columbia) on March 22, 2018. On June 11, 2019, the Company completed its initial public offering (“IPO”). On October 28, 2021, the Company changed its name to Alerio Gold Corp. from Project One Resources Ltd. and is now publicly traded on the Canadian Securities Exchange (“CSE”) under the ticker ALE. The principal business of the Company is the acquisition, exploration and evaluation of resource properties with its main focus in Guyana, South America. On November 22, 2021, the Company was accepted for listing and commenced trading on the Frankfurt Stock Exchange under the symbol “3FRO” with a WKN number of A3C6XZ.

The Company's head office address is Suite 459 – 409 Granville Street, Vancouver, British Columbia, V6C 1T2, and its registered office address is Suite 1710 – 1177 West Hastings Street, Vancouver, British Columbia, V6E 2L3.

These financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. At present, the Company has no operating income. The Company incurred a net loss of \$153,813 during the three months ended November 30, 2022 and, as of that date, had a deficit of \$2,661,640 (August 31, 2022 - \$2,507,827). Without additional financing, the Company may not be able to fund its ongoing operations and complete exploration activities. The Company intends to finance its future requirements through a combination of debt and/or equity issuance. There is no assurance that the Company will be able to obtain such financings or obtain them on favorable terms. These uncertainties may cast significant doubt on the Company's ability to continue as a going concern. The Company will need to raise sufficient working capital to maintain operations. These financial statements do not include any adjustments related to the recoverability of assets and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

The Company's business may be affected by changes in political and market conditions, such as interest rates, availability of credit, inflation rates, changes in laws, and national and international circumstances. Recent geopolitical events, including, the outbreaks of the coronavirus (“COVID-19”) pandemic, relations between NATO and Russian Federation regarding the situation in Ukraine, and potential economic global challenges such as the risk of the higher inflation and energy crises, may create further uncertainty and risk with respect to the prospects of the Company's business.

**2. BASIS OF PRESENTATION**

(a) Statement of compliance

These condensed interim financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”) and in accordance with International Accounting Standard (“IAS”) 34 Interim Financial Reporting.

The condensed interim financial statements were authorized for issue by the Board of Directors on January 26, 2023.

(b) Basis of measurement

The condensed interim financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value, as explained in the accounting policies set out in Note 3. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The condensed interim financial statements of the Company are presented in Canadian dollars, which is the functional currency of the Company.

**3. SIGNIFICANT ACCOUNTING POLICIES**

The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the audited financial statements as at August 31, 2022.

**Recent accounting pronouncements and changes in accounting policies**

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for future accounting periods are as follows:

*Classification of Liabilities as Current or Non-current (Amendments to IAS 1)*

The amendments to IAS1 provide a more general approach to the classification of liabilities based on the contractual arrangements in place at the reporting date. These amendments are effective for reporting periods beginning on or after January 1, 2023 and are not expected to have a material impact on the Company.

**4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in net loss in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

### **4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (cont'd)**

#### **Critical judgments in applying accounting policies**

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

##### Going concern

The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period. See Note 1.

##### Recoverability of exploration and evaluation assets

The application of the Company's accounting policy for exploration and evaluation assets requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Assets or cash-generating units are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's exploration and evaluation assets. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit, including geologic and metallurgic information, economic assessments/studies, accessible facilities and existing permits.

##### Title to exploration and evaluation assets

Although the Company has taken steps to verify title to exploration and evaluation assets in which it has an interest, these procedures do not guarantee the Company's title or interest therein. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

#### **Significant estimates and assumptions**

##### Fair value of consideration in acquisitions

The fair value of consideration transferred in a asset acquisition requires management to make estimates regarding the valuation of equity issued. Valuations of the consideration transferred are highly dependent on the inputs used and assumptions made by management regarding share prices.

### 8. RISK MANAGEMENT

(a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk for the Company is associated with its cash and receivables. The Company is not exposed to significant credit risk as its cash is placed with a major Canadian financial institution and receivables consist entirely of GST receivable.

**8. RISK MANAGEMENT** (cont'd)

(b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to meet its liabilities when due.

The Company monitors its cash flows to meet the Company's normal operating requirements on an ongoing basis and its planned capital expenditures. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. As at November 30, 2022, the Company had a working capital deficiency of \$202,105 (August 31, 2022 – working capital deficiency of \$48,292). The Company plans to raise financing from private placements to meet its current and future obligations.

(c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and other price risk. The Company is not exposed to significant market risk at this time. The Company currently does not plan to enter into foreign currency future contracts to mitigate foreign currency risk.

**9. CAPITAL MANAGEMENT**

The Company has just commenced operations. It has not yet determined whether it will be successful in its endeavours and does not generate cash flows from operations. The Company's primary source of funds comes from the issuance of common shares. The Company does not use other sources of financing that require fixed payments of interest and principal due to lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern. The Company did not change its approach to capital management during the period ended November 30, 2022.

The Company defines its capital as shareholders' equity. Capital requirements are driven by the Company's general operations. To effectively manage the Company's capital requirements, the Company monitors expenses and overhead to ensure costs and commitments are being paid.

**10. SEGMENTED INFORMATION**

The Company has one operating segment, acquisition, exploration and evaluation of resource properties, and all long-term assets of the Company are located in Guyana.

**11. COMPARATIVE FIGURES**

The comparative figures have been restated to conform to the presentation adopted in the current period.
