VSBLTY & WIRELESS GUARDIAN TO PROVIDE SECURITY TECHNOLOGY FUNDED BY IN-STORE DIGITAL MEDIA MODEL IN UP TO 750 POPULAR QUICK SERVE RESTAURANTS

PHILADELPHIA, PA., July 4, 2022 (GLOBE NEWSWIRE)—VSBLTY Groupe Technologies Corp. (OTCQB: VSBGF) (CSE: VSBY) (Frankfurt 5VS) (“VSBLTY”), a leading software provider of security and retail analytics technology, today announced it and Wireless Guardian will begin installing security technology, subsidized by an in-store digital media program, in up to 750 leading quick serve restaurants (QSR) in 25 states.

The state-of-the-art technology will ensure the safety of the QSR customers and employees and at the same time add to the enjoyment of the restaurant experience for families. The in-store digital media program allows companies to offset the cost to update their security systems using new revenue raised from brand-generated media advertising on freezer doors and digital screens in their restaurants.

Using Intel® Smart Edge and VSBLTY/Wireless Guardian solutions, the participating QSRs will now enhance the guest experience with interactive brand messaging triggered by proximity and anonymized demographics. Sponsored content will be designed to advertise timely promotions with family-oriented brand partners. The technology will also enable the company-owned and franchised restaurants to receive an increased level of customer analytics and actionable business insights in addition to real-time, world-class security and monitoring.

Included in the planned installations will be Golden Record that uses free guest Wi-Fi to improve the customer experience by providing customized messages to inform, motivate and reward restaurant guests to engage in activities designed to generate rewards and increase purchases. Once diners opt in, they receive incentives for them and their children, customized to their individual interests and preferences, to use during their current and future visits.

The program will provide a new revenue stream for each restaurant from advertising dollars raised from marketing to customers based on their mobile data. Participating locations also gain increased traffic and higher sales generated by customized messages and brand incentives. Customers are more engaged with in-store digital messages personalized to them, while also receiving coupons and special value offers on their mobile phones.

The initial installations will be 55-inch screens in the dining areas. Starting in August, video screens will be attached to freezer doors, where popular take home packaged products are displayed. Both will allow content to play a rotation of high impact, full color graphics as well as run alternating transparent content to engage and inform customers and their families. Space is sold as a media buy, like other media channels, but with the advantage of influencing impulse purchase decisions right at point of sale.

Announcing the new agreement, VSBLTY Co-founder & CEO Jay Hutton said, “Our successful partnership with Wireless Guardian is enabling us to continue to expand our roster of in-store, digital media network customers to this popular restaurant group. We are pleased that our team has been chosen to supply this advanced, proprietary technology that will both improve security for customers and at the same time gain a new revenue stream from a new digital media network. By providing an enhanced family-oriented dining experience, these QSRs will be generating more repeat customers and that means higher sales per restaurant.”

VSBLTY projects that when the rollout of up to 750 stores is completed the annual gross revenue of the SaaM network to VSBLTY is projected to be in excess of \$7.5M. VSBLTY’s SaaM model will earn income from multiple revenue streams under the contract. With an expanded role in leading the SaaM model, in addition to traditional SaaS fees, the Company receives fees for media and content management. Additional revenue will be generated from Golden Record media and creative fees. Net margins will vary between SaaS, content/media fees and hardware but are expected to generally be consistent with VSBLTY’s historical norms. For more information on the risks and assumptions related to these projections, see “Forward-Looking Information” and “Future-Oriented Financial Information,” below.

As part of the scope of work, VSBLTY is responsible for the procurement of the hardware for the network restaurants. Each restaurant will have one freezer panel screen in addition to a 55-inch dining room screen.

“We are helping progressive companies fund the installation of the latest security technology, and that is a key advantage of our vigorous, strategically planned expansion of enhanced digital, in-store media communications programs. The initial deployment in this family oriented QSR chain will enable their diners, attracted by a reputation for quality products and personalized service, to experience a higher level of personal engagement while in the restaurant,” according to Jason Dumas, Wireless Guardian Founder/CEO.

Forward-Looking Information

This news release contains “forward-looking information” within the meaning of applicable Canadian securities laws. This information and these statements, referred to herein as “forward looking statements”, are made as of the date of this news release. Forward-looking statements in this news release include statements with respect to the installation of security technology in the quick serve stores referenced above and the Company’s expectations for revenue and operating costs relating to this line of business.

This forward-looking information is based on the opinions and estimates of management, and is based on a number of assumptions and is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward looking information, including without limitation: (i) the Company’s ability to obtain the necessary financing and the general impact of financial market conditions; (ii) the success of the Company’s current and future development efforts; (iii) deployment of the security technology in the quick serve stores referenced above may be slower than anticipated; (iv) operating expenses may exceed the Company’s expectations; (v) changes in laws regulations and guidelines which could adversely affect the Company’s business and financial performance; (vi) the Company may not be able to effectively manage its growth and operations; (vii) the effectiveness of Company’s technology cannot be assured; (viii) the Company may become subject to litigation, including possible product liability claims; and (ix) COVID-19 may impact the Company’s third-party suppliers, service providers and distributors.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended, including those set forth in the Company's continuous disclosure filings, which are available on the Company's SEDAR profile at www.sedar.com. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information contained in this news release. The Company and its directors, officers and employees each disclaim any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable law. All forward-looking information is expressly qualified in its entirety by this cautionary statement.

Future-Oriented Financial Information

This news release also contains future-oriented financial information and financial outlook (collectively, "FOFI") about the Company's projected revenue and margins from its agreement with Wireless Guardian, which is subject to the same assumptions, risk factors, limitations, and qualifications as set forth in the above paragraphs. Although the financial projections contained in this news release are based on reasonable expectations developed by the Company's management, the assumptions and estimates underlying the financial projections are subject to significant business, economic, and competitive uncertainties and contingencies, many of which will be beyond the control of the Company. The assumptions used by the Company's management to derive these financial projections include: (i) the Company's ability to successfully develop and deploy its products, in particular the completion of the rollout to 750 quick serve stores referenced above; (ii) the Company's pricing targets remaining in place and cost of sales and expenses being consistent with VSBLTY's historical performance; (iii) the Company's partners' timely delivery of all ancillary components and services; and (iv) the Company's ability to maintain performance and quality as projects advance and product volume increases. Accordingly, the financial projections are only estimates and are necessarily speculative in nature. It is expected that some – and perhaps all – of the assumptions in the financial projections will not be realized and that actual results will vary from the projections.

FOFI contained in this news release was prepared using the same accounting principles that the Company expects to use in preparing its financial statements for the applicable periods covered by such FOFI. FOFI contained in this news release was made by management as of the date of this news release and was provided for the purpose of providing readers with an understanding of the potential

significance of these business developments to the Company's business, and are not an estimate of profitability or any other measure of financial performance. In particular, revenue estimates do not take into account the cost of such estimated revenue, including the cost of goods and the cost of sales. In addition, and for greater certainty, revenue estimates do not take into account the operating costs of the Company. Readers are cautioned that the FOFI contained in this document should not be used for purposes other than for which it is disclosed herein.
