

IMC International Mining Corp. Receives Cathedral Area Drilling Permit

June 15, 2020

Vancouver, BC – IMC International Mining Corp. ([CSE:IMCX](#)) ([OTC:IMIMF](#)) ([FRA:3MX](#)) (the “Company” or “IMC”), is pleased to announce that it has received an amendment to its previously filed Mineral Exploration Permit for its Thane Property (the “Property”) located in north-central British Columbia. The amendment allows the Company to drill up to 40 holes within the Cathedral Area of the Property.

Work on the Property has identified six areas of significant gold ± copper ± silver mineralization. The Cathedral Area is the most advanced of these areas and exploration results to date have revealed copper and gold mineralization in a variety of styles over a 2 km long by 1.5 km wide zone, all consistent with alkali porphyry systems.

“Exploration results to date have shown the potential for a significant copper-gold alkalic porphyry system within the Cathedral Area,” stated Brian Thurston, Chief Executive Officer and President of IMC. “The Company is currently on schedule to begin its Phase-1 summer program. We have planned a detailed IP geophysical survey, geological mapping, and geochemical sampling programs to begin in early July. Our goal is to determine the best targets for diamond drilling this fall. We look forward to integrating results from this Phase 1 program with our current Cathedral Area database in order to establish the best potential sites for drilling.”

ON BEHALF OF THE BOARD OF DIRECTORS

Brian Thurston

Chief Executive Officer and President

ABOUT INTERNATIONAL MINING CORP.

IMC is a junior exploration and development company focused on creating shareholder value through the advancements of its current assets that include the Thane Property in north-central British Columbia, and the Bullard Pass Property in Arizona. Utilizing its heavily experienced management team, IMC continues to source and evaluate assets to further generate shareholder value.

The Thane property covers approximately 206km² (50,904 acres) and is located in the Quesnel Terrane of north-central British Columbia. The northern part of the Quesnel Terrane extends from south of the Mt. Milligan Mine northward to the Kemess Mine, with the Thane property located midway between these two copper-gold porphyry deposits. The Thane property includes several highly prospective mineralized areas identified to date, including the ‘Cathedral Area’ on which the Company’s exploration is currently focused.

The Bullard Pass Property is comprised of 171 unpatented federal lode claims totaling 3,420 acres and is located in west-central Arizona, northwest of Phoenix, within the Pierce Mining District of Yavapai County. The property has a regional setting typical of detachment fault gold deposits and has geological,

mining and metallurgical similarities to the Mesquite Mine in California. The claims are 100% owned by IMC International Mining Corp.
