Item 5: Full Description of Material Change

The Company announced the 2021 summer exploration program has begun on its 100% owned, 206.58 square kilometre Thane property in north central British Columbia.

The 2,400-metre drill program in eight drill holes has been designed to test high-priority targets at the Cathedral area, which were defined during last year's surface sampling and IP program. In addition to drilling, the Company will also be undertaking geological mapping, sampling and IP surveying in other areas of the property to advance known areas of copper-gold mineralization.

There are currently team members on the ground preparing for the arrival of additional staff on July 1, 2021. The team will begin immediately to build the seven pads required for the initial drill program with drilling scheduled to commence on or before July 15, 2021. This initial drill program is expected to take approximately 40 days to complete. Concurrently, additional ground geophysics, mapping and sampling will take place in other areas of the property and these programs are expected to be complete in early September.
