All results are reported under International Financial Reporting Standards ("IFRS") and in Canadian dollars, unless otherwise specified.

Anthony Tennyson, Chief Executive Officer of Awakn Life Sciences, stated, "Awakn's fiscal year 2021 was a foundational year for the Company. We established our business model of researching, developing, and delivering combined therapeutics to treat addiction, with a near term focus on Alcohol Use Disorder (AUD) a condition affecting 400m people globally. This business model enables us to develop new and potentially more effective combined therapeutics for treating addiction and also to gather real world data to support interactions with regulatory agencies prior to commercializing our combined therapeutics at scale."

"We also acquired clinical stage assets with superior efficacy demonstrated against treatment as usual for our primary indication of AUD. We identified and patented several new chemical series which demonstrated appropriate pharmacological and drug like properties. And we opened three clinics in Europe.

"Looking forward to the rest of calendar year 2022, we plan to progress our AUD Phase II b trial into Phase III, we will complete our early stage basket study in humans for behavioral addictions, which affects several hundred million people globally, we will begin commercial activity in the US by licensing our AUD treatments to clinics in that territory, and we will continue to build and grow our clinics platform," concluded Anthony Tennyson.
