14. Capitalization

14.1 Prepare and file the following chart for each class of securities to be listed:

Issued Capital

	Number of Securities (non-diluted)	Number of Securities (fully-diluted)	% of Issued (non-diluted)	% of Issued (fully diluted)
<u>Public Float</u>				
Total outstanding (A)	10,520,541	10,765,541	100	100
Held by Related Persons or employees of the Issuer or Related Person of the Issuer, or by persons or companies who beneficially own or control, directly or indirectly, more than a 5% voting position in the Issuer (or who would beneficially own or control, directly or indirectly, more than a 5% voting position in the Issuer upon exercise or conversion of other securities held) (B)	7,600,541	7,600,541	72.24	70.60
Total Public Float (A-B)	2,920,000	3,165,000	27.76	29.40
<u>Freely-Tradeable Float</u>				
Number of outstanding securities subject to resale restrictions, including restrictions imposed by pooling or other arrangements or in a shareholder agreement and securities held by control block holders (C)	2,304,487	2,304,487	21.90	21.41
Total Tradeable Float (A-C)	8,216,054	8,461,054	78.10	78.59

Public Securityholders (Registered)

Instruction: For the purposes of this report, "public securityholders" are persons other than persons enumerated in section (B) of the previous chart. List registered holders only.

Class of Security

<u>Size of Holding</u>	<u>Number of holders</u>	<u>Total number of securities</u>
1 – 99 securities	-	-
100 – 499 securities	-	-
500 – 999 securities	-	-
1,000 – 1,999 securities	-	-
2,000 – 2,999 securities	-	-

5,000 or more securities	48	920,000
	<hr/> <hr/>	<hr/> <hr/>

Public Securityholders (Beneficial)

Instruction: Include (i) beneficial holders holding securities in their own name as registered shareholders; and (ii) beneficial holders holding securities through an intermediary where the Issuer has been given written confirmation of shareholdings. For the purposes of this section, it is sufficient if the intermediary provides a breakdown by number of beneficial holders for each line item below; names and holdings of specific beneficial holders do not have to be disclosed. If an intermediary or intermediaries will not provide details of beneficial holders, give the aggregate position of all such intermediaries in the last line.

Class of Security

<u>Size of Holding</u>	<u>Number of holders</u>	<u>Total number of securities</u>
1 – 99 securities	-	-
100 – 499 securities	-	-

14.2 Provide the following details for any securities convertible or exchangeable into any class of listed securities

Description of Security (include conversion / exercise terms, including conversion / exercise price)	Number of convertible / exchangeable securities outstanding	Number of listed securities issuable upon conversion / exercise
Agent's options exercisable for 24 months after listing on the CSE	245,000	245,000

14.3 Provide details of any listed securities reserved for issuance that are not included in section 14.2.

N/A

No securities regulatory authority has expressed an opinion about these securities and it is an offence to claim otherwise. This prospectus constitutes a public offering of these securities only in those jurisdictions where they may be lawfully offered for sale and only by persons authorized to sell such securities. These securities have not been and will not be registered under the United States Securities Act of 1933, as amended, (the “**U.S. Securities Act**”) and may not be offered or sold within the United States unless registered under the U.S. Securities Act and applicable state laws or an exemption from such registration is available. See “Plan of Distribution” below.

PROSPECTUS

INITIAL PUBLIC OFFERING

June 26, 2019

YUKOTERRE RESOURCES INC.

OFFERING

<u>Type of Securities</u>	<u>Number of Securities</u>	<u>Price per Security</u>
Common Shares	3,500,000	\$0.10

This prospectus (the “**Prospectus**”) qualifies the distribution (the “**Offering**”) by Yukoterre Resources Inc. (the “**Corporation**” or the “**Issuer**”) in the provinces of Ontario, Alberta and British Columbia, through PI Financial Corp. (the “**Agent**”), of 3,500,000 common shares (“**Common Shares**”) in the capital of the Corporation at a price of \$0.10 per Common Share (the “**Offering Price**”) for aggregate gross proceeds of \$350,000. See “Description of Securities Distributed” below. The Offering Price was determined by negotiation between the Corporation and the Agent.

The Common Shares are being offered pursuant to an agency agreement (the “**Agency Agreement**”) dated June 26, 2019 between the Corporation and the Agent.

	<u>Price to Public</u>	<u>Agent’s Commission⁽¹⁾</u>	<u>Proceeds to Issuer⁽²⁾</u>
Per Common Share	\$0.10	\$0.0075	\$0.0925
Total Offering	\$350,000	\$26,250	\$323,750

Notes:

- (1) Pursuant to the terms and conditions of the Agency Agreement between the Corporation and the Agent, the Corporation has agreed to pay the Agent upon closing of the Offering (the “**Closing**”), a cash commission (the “**Agent’s Fee**”) equal to 7.5% of the gross proceeds realized from the sale of the Common Shares under the Offering. The Corporation has further agreed to pay the Agent a corporate finance fee (the “**Corporate Finance Fee**”) of \$25,000 (plus HST) payable in cash.
- (2) Before deducting expenses of the Offering, to be borne by the Corporation, estimated to be \$60,000.

There is no market through which these securities may be sold and purchasers may not be able to resell securities purchased under this Prospectus. This may affect the pricing of the securities in the secondary market, the transparency and availability of trading prices, the liquidity of the securities and the extent of issuer regulation. The securities offered hereunder must be considered highly speculative due to the nature of the Corporation's business. See “Risk Factors”.

As at the date of this Prospectus, the Corporation does not have any of its securities listed or

quoted, has not applied to list or quote any of its securities and does not intend to apply to list or quote any of its securities, on the Toronto Stock Exchange, Aequitas NEO Exchange Inc., a U.S. marketplace, or a marketplace outside Canada and the United States of America (other than the Alternative Investment Market of the London Stock Exchange or the PLUS markets operated by PLUS Markets Group plc).

The Corporation has applied to list its Common Shares including the Agent's Option Shares on the Canadian Securities Exchange (the "CSE"). Listing will be subject to the Corporation fulfilling all of the requirements of the CSE.

The Agent's position is as follows:

Agent's Position	Number of Securities Available	Exercise Period or Acquisition Date	Exercise Price or Average Acquisition Price
Agent's Options ⁽¹⁾	245,000	24 months from the Listing Date	\$0.10
Total Securities Issuable to Agent	245,000		

Note:

(1) These securities are qualified compensation securities ("Qualified Compensation Securities") within the meaning of National Instrument 41-101 – General Prospectus Requirements ("NI 41-101") and are qualified for distribution by this Prospectus. See "Plan of Distribution" below.

The Agent, as exclusive agent of the Corporation for the purposes of this Offering, offers the Common Shares for sale under this Prospectus at the Offering Price on a commercially reasonable efforts basis, in accordance with the Agency Agreement referred to under "Plan of Distribution" below and subject to the approval of certain legal matters on behalf of the Corporation by Chitiz Pathak LLP and by Cummings Cooper Schusheim Berliner with respect to certain tax matters, and on behalf of the Agent by Miller Thomson LLP. No person is authorized to provide any information or to make any representation in connection with this offering other than as contained in this Prospectus.

This Offering is subject to the completion of a minimum subscription of 3,500,000 Common Shares for gross proceeds to the Corporation of \$350,000. If the minimum subscription is not completed within 90 days of the issuance of a receipt for the (final) Prospectus or, if a receipt is issued for an amendment to the (final) Prospectus, within 90 days of the issuance of such receipt and, in any event, not later than 180 days from the date of the receipt for the (final) Prospectus, or such other time as may be consented to by the Agent and Subscribers, all subscription monies will be returned to subscribers without interest or deduction, unless the subscribers have otherwise instructed the Agent.

Subscriptions will be received subject to rejection or allotment in whole or in part by the Corporation and the right is reserved to close the subscription books at any time without notice. It is expected that the share certificates evidencing the Common Shares in definitive form will be available for delivery at the Closing unless the Agent elects for delivery in electronic book entry form through CDS Clearing and Depository Services Inc. ("CDS") or its nominee. If delivered in book entry form, purchasers of Common Shares will receive only a customer confirmation from the registered dealer that is a CDS participant from or through which the Common Shares were purchased.

FORWARD-LOOKING STATEMENTS

This Prospectus contains "forward-looking information" within the meaning of applicable securities legislation. Forward-looking information may include, but is not limited to, statements with respect to the future price of coal, historical estimates of mineralization, capital expenditures, success of exploration activities, obtaining the required permits, permitting time lines, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage, the completion of regulatory approvals. In certain cases, forward-looking information can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information in this Prospectus includes, among other things, proposed expenditures for exploration work on the Division Mountain Property (as defined herein), general and administrative expenses, expectations generally regarding completion of this Offering, the ability of the Corporation to raise further capital for corporate purposes, the utilization of the net proceeds of the Offering and treatment under applicable governmental regimes for permitting and approvals. See "Narrative Description of the Business – Recommendations", "Use of Proceeds" and "Risk Factors" below.

Such forward-looking statements are based on a number of material factors and assumptions, including, but not limited in any manner, to those disclosed in any other of the Corporation's public filings and include the ultimate determination of mineral reserves, if any, the availability and final receipt of required approvals, licenses and permits, sufficient working capital to develop and operate any proposed mine, access to adequate services and supplies, economic conditions, commodity prices, foreign currency exchange rates, interest rates, access to capital and debt markets and associated costs of funds, availability of a qualified work force and the ultimate ability to mine, process and sell mineral products on economically favourable terms. While the Corporation considers these assumptions to be reasonable based on information currently available to it, they may prove to be incorrect. Actual results may vary materially from such forward-looking information for a variety of reasons, including but not limited to, risks and uncertainties disclosed in this Prospectus. See "Risk Factors" below. The Corporation has no specific policies or procedures for updating forward-looking information. Forward-looking statements are based upon management's beliefs, estimates and opinions on the date the statements are made and, other than as required by law, the Corporation does not intend, and undertakes no obligation, to update any forward-looking information to reflect, among other things, new information or future events.

Investors are cautioned against placing undue reliance on forward-looking statements.

GLOSSARY OF TERMS

"Agency Agreement" means the agency agreement dated June 26, 2019 between the Agent and the Corporation.

"Agent" means PI Financial Corp.

"Agent's Fee" means the cash commission payable to the Agent equal to 7.5% of the gross proceeds in relation to this Offering.

"Agent's Options" means the 245,000 options granted to the Agent as compensation for its services in relation to this Offering entitling the Agent to purchase one Agent's Option Share per Agent's Option at the Offering Price within 24 months after the Listing Date.

"Agent's Option Shares" means the Common Shares that may be sold to the Agent pursuant to the due exercise of the Agent's Options, as described under the heading "Plan of Distribution" below.

"Board of Directors" or **"Board"** means the Corporation's board of directors.

"Closing" means the closing of the Offering and the issuance by the Corporation of the Common Shares.

"Common Shares" means the common shares in the capital of the Corporation.

"Corporate Finance Fee" means the fee to be paid by the Corporation to the Agent of \$25,000 (plus HST) on the Listing Date in consideration of corporate finance and structuring services provided by the Agent.

"Corporation", **"Issuer"** or **"Yukoterre"** means Yukoterre Resources Inc.

"Division Mountain Property" means the coal property located at latitude 61°20' N and longitude 136°05' W on NTS map sheet 115 H/8, 90 km north-northwest of Whitehorse and 290 km from tidewater at Skagway, Alaska, including five coal leases and four territorial coal exploration licenses.

"Escrow Agent" means TSX Trust Corporation.

"Exchange" or **"CSE"** means the Canadian Securities Exchange.

"Listing Date" means the date the Common Shares are first listed for trading on the Exchange.

"NI 43-101" means National Instrument 43-101 "Standards of Disclosure for Mineral Projects."

"Offering" has the meaning ascribed to it on the face page of this Prospectus.

"Offering Price" means \$0.10 per Common Share.

"Shares for Debt Transaction" means the shares for debt settlement agreement entered into between the Corporation and 2227929 Ontario Inc. on February 27, 2019 pursuant to which the Corporation issued 2,100,541 Common Shares at a deemed price of \$0.10 per Common Share in full and final settlement of \$210,054.10 owed by the Corporation to 2227929 Ontario Inc.

"Stock Option Plan" means the stock option plan approved by the Board of Directors on February 9, 2017, providing for the granting of incentive stock options to the Corporation's directors, officers, employees and consultants.

"Subscriber" means a subscriber for the Common Shares offered under this Offering.

"Technical Report" means the technical report dated June 4, 2019 entitled "*NI 43-101 Technical Report on the Division Mountain Coal Property, Yukon Territory, Canada*" authored by Kevin J. Brewer, P.Geo.

PROSPECTUS SUMMARY

The following is a summary of the principal features of this distribution and should be read together with the more detailed information and financial data and statements contained elsewhere in this Prospectus.

The Corporation: The Corporation was incorporated under the *Business Corporations Act* (Ontario) on February 8, 2017 under the name "2560344 Ontario Inc.". On October 25, 2017, the Corporation changed its name to "Yukoterre Resources Inc."

The Corporation's corporate and registered office is located at 65 Queen Street West, 8th Floor, Toronto, Ontario, Canada, M5H 2M5.

The Corporation's Business: The Corporation is a natural resource company engaged in the acquisition and exploration of mineral properties. The Corporation's current main emphasis is on coal exploration in the Yukon Territory where the Corporation has a 100% interest in the Division Mountain Property.

The Corporation intends to fund the exploration of the Division Mountain Property using the proceeds of its prior private placement financing and this Offering.

The Division Mountain Property is more specifically described below in this Prospectus under the heading "Narrative Description of the Business".

The Property: The Division Mountain Property consists of five coal leases covering a total area of 776.4 hectares and four coal exploration licences covering a total area of 60862.8 hectares, approximately 90 km north-northwest of Whitehorse. See "Narrative Description of the Business".

Management, Directors and Officers: René Bharti – Chief Executive Officer and Director
Deborah Battiston – Chief Financial Officer
Kenny Choi – Corporate Secretary
Fred Leigh – Director and Promoter
Dr. Andreas Rompel – Director
Maurice Colson- Director

See "Directors and Officers" below.

The Offering: The Corporation is offering 3,500,000 Common Shares for sale at a price of \$0.10 per Common Share in the provinces of Ontario, Alberta and British Columbia.

This Prospectus also qualifies the distribution of 245,000 Agent's Options.

See "Plan of Distribution" below.

Use of Proceeds:

The gross proceeds to the Corporation from the sale of the Common Shares offered hereby will be \$350,000. The total funds available to the Corporation at the closing of the Offering, after deducting the estimated expenses of the Offering of \$60,000, the Agent's Fee of \$26,250 and the Corporate Finance Fee of \$25,000 (plus HST), and including the Corporation's estimated working capital deficit as at May 31, 2019 of \$40,993, are estimated to be \$197,757. The Corporation intends to expend its available funds for the following principal purposes:

Principal Purpose	Funds to be Used⁽¹⁾
To fund the recommended exploration program on the Division Mountain Property ⁽²⁾	\$100,000
To provide funding sufficient to meet administrative costs for 12 months	\$97,542
Unallocated working capital	\$215
Total	\$197,757

Notes:

- (1) See "Use of Proceeds" below. The Corporation intends to spend the funds available to it as stated in this Prospectus. There may be circumstances, however, where for sound business reasons a reallocation of funds may be necessary.
- (2) See "Narrative Description of the Business – Recommendations" below for a summary of the work to be undertaken and a breakdown of the estimated costs.

Summary of Financial Information:

The following selected financial information is subject to the detailed information contained in the audited and unaudited financial statements of the Corporation and notes thereto appearing in Schedule "B" to this Prospectus. The selected financial information is derived from the audited financial statements for the period from incorporation to October 31, 2017, for the fiscal year ended October 31, 2018 and for the six month period ended April 30, 2019. The Corporation has established October 31 as its financial year end.

	Period Ended October 31, 2017 (audited)	Fiscal Year Ended October 31, 2018 (audited)	Second Quarter Ended April 30, 2019 (unaudited)
Total Revenues	Nil.	Nil.	Nil
Consulting and Management Fees	\$22,285	\$40,744	\$14,200
Professional fees	\$16,175	\$9,855	\$6,435
General office expenses	\$3,016	\$2,097	\$11,500
Interest expense	0	\$8,790	\$5,264
Net loss and comprehensive loss	\$41,483	\$61,484	\$37,399
Basic and diluted loss per Common Share	0.02	0.01	0.01
Total assets	\$219,679	\$331,989	\$356,681

Total liabilities	\$15,162	\$188,956	\$40,993
Total shareholders' equity	\$204,517	\$143,033	\$315,688

See "Selected Financial Information and Management Discussion and Analysis".

Risk Factors:

An investment in the Common Shares should be considered highly speculative and investors may incur a loss on their investment. The Corporation has no history of earnings and to date has not defined any commercial quantities of mineral reserves on the Division Mountain Property. The Corporation and its assets may also become subject to uninsurable risks. The Corporation's activities may require permits or licenses which may not be granted to the Corporation. The Corporation competes with other companies with greater financial resources and technical facilities. The Corporation may be affected by political, economic, environmental and regulatory risks beyond its control. The Corporation is currently largely dependent on the performance of its directors, officers and consultants and there is no assurance the Corporation can retain their services. In recent years both natural resource prices and publicly traded securities prices have fluctuated widely. A purchase of any of the securities offered hereunder involves a high degree of risk and should be undertaken only by purchasers whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment. An investment in the securities offered hereunder should not constitute a major portion of an individual's investment portfolio and should only be made by persons who can afford a total loss of their investment. See "Risk Factors" below.

Currency:

Unless otherwise indicated, all currency amounts herein are stated in Canadian Dollars.

CORPORATE STRUCTURE

Name and Incorporation

The Corporation was incorporated pursuant to the *Business Corporations Act* (Ontario) on February 8, 2017 under the name "2560344 Ontario Inc.". On October 25, 2017 the Corporation filed articles of amendment to change its name to "Yukoterre Resources Inc."

The Corporation filed a statement for registration as an extra-territorial corporation in the Yukon Territory on August 31, 2017 under its former name "2560344 Ontario Inc.". On November 1, 2017, the Corporation filed a notice of change to statement for registration as an extra-territorial corporation to change its name to "Yukoterre Resources Inc." effective as of October 25, 2017.

On February 27, 2019, the shareholders of the Corporation adopted a new By-Law No. 1 (the "**New By-Law**"). The New By-Law is standard in its form and governs all aspects of the business and affairs of the Corporation, such as the establishment of a quorum for meetings of directors and shareholders, the conduct of such meeting, signing authorities, the appointment of officers, the description of the officers' duties, the establishment of committees of the board, the authority of persons to contract on behalf of Corporation and similar matters. Section 3.04 of the New By-Law directs the manner in which nominations for directors may be made and include provisions requiring, in certain circumstances, advance notice of the nomination of directors. The advance notice provisions are designed to ensure that where a shareholders' meeting is called for the election of directors, all shareholders, and in particular, shareholders whose votes are being cast by proxy and who are not able to attend the meeting, receive adequate notice of director nominations in order to be able to make informed decisions as to how to cast their votes on the election of directors.

The Corporation's registered and head office is located at 65 Queen Street West, 8th Floor, Toronto, Ontario, M5H 2M5.

Intercorporate Relationships

The Corporation has no subsidiaries.

GENERAL DEVELOPMENT OF THE BUSINESS

Business of the Corporation

The Corporation is engaged in the business of mineral exploration and the acquisition of mineral property assets in the Yukon Territory. See "Narrative Description of the Business" below.

History

Subsequent to its incorporation, the Corporation has completed a private seed capital equity financing, raising aggregate gross proceeds of approximately \$246,000. These funds have been, and are being, used for the acquisition, exploration and maintenance of the Division Mountain Property and general working capital. The Corporation intends to raise funds through the Offering to carry out additional exploration on the Division Mountain Property, as set out in "Use of Proceeds" below.

Acquisitions

On August 8, 2017, the Corporation entered into a purchase agreement with Pitchblack Resources Ltd. to acquire a 100% interest in the Division Mountain Property for a cash payment of \$100,000, including a total of 17 coal licenses (CYW0137 to CYW0138 and CYW0143 to

CYW0157) and five coal leases (CMW3000 to CMW3004). The cash payment was made and the acquisition by the Corporation of the Division Mountain Property closed on August 21, 2017. In late 2018, the Corporation renewed four of the coal licenses (CYW0154 to CYW0157) which covers the Division Mountain Property. The remaining coal licenses, which covered areas outside of the Division Mountain Property, were allowed to lapse.

Trends

As a junior mining company, the Corporation is highly susceptible to the cycles of the mineral resource sector and the financial markets as they relate to junior companies.

The Corporation's financial performance is dependent upon many external factors. Both prices and markets for natural resources are volatile, difficult to predict and subject to changes in domestic and international, political, social and economic environments. Circumstances and events beyond its control could materially affect the financial performance of the Corporation. Apart from this risk and the risk factors noted under the heading "Risk Factors", the Corporation is not aware of any other trends, commitments, events or uncertainties that are reasonably likely to have a material adverse effect on the Corporation's business, financial conditions or result of operations.

NARRATIVE DESCRIPTION OF THE BUSINESS

Overview

The Corporation is engaged in the business of acquiring and exploring mineral resource properties. The Corporation's sole property is the Division Mountain Property (in this section, the "**Property**"), located in the Yukon Territory. See "Acquisitions" above.

The Corporation intends to use the net proceeds from this Offering to carry out exploration on the Division Mountain Property and for working capital. The Corporation may decide to acquire other mineral properties in addition to the Division Mountain Property described below.

Division Mountain Property

The following information regarding the Division Mountain Property is summarized or extracted from an independent Technical Report prepared for the Corporation by Kevin J. Brewer, P. Geo (the "**Author**"), in accordance with the requirements of NI 43-101.

All figure and table references herein are numbered in accordance with the Technical Report available on the Corporation's SEDAR profile at www.sedar.com.

Property Description, Location, Leases and Licences

The Division Mountain deposit is located at latitude 61°20' North and longitude 136°05' West on NTS map sheet 115 H/8, 90 kilometers north-northwest of Whitehorse and 290 kilometers from tidewater at Skagway, Alaska (Figure 2.1).

The area of detailed exploration and historical resource definition at Division Mountain lies largely within five coal leases. These leases are held by Yukoterre and cover 776.4 ha (See Figure 4.1). Under the Yukon Coal Regulations Act, the five coal leases grant coal mining rights for a renewable twenty-one year term that can be extended for additional twenty-one year periods. The coal leases are kept in good standing through a payment of \$1/acre payable yearly in advance. Work conducted on the leases may be applied against the levy charges for a maximum period of five (5) years. In addition to the annual rental, a lessee shall pay annually a royalty at the rate of \$0.10 per ton on merchantable coal mined on lands acquired by the lease. The lessee is the only party that

is entitled to the coal upon, or included in such lease. The leases are currently in good standing and with annual payments will extend all lease rights to Yukoterre to April 18, 2038 (See Table 4.1).

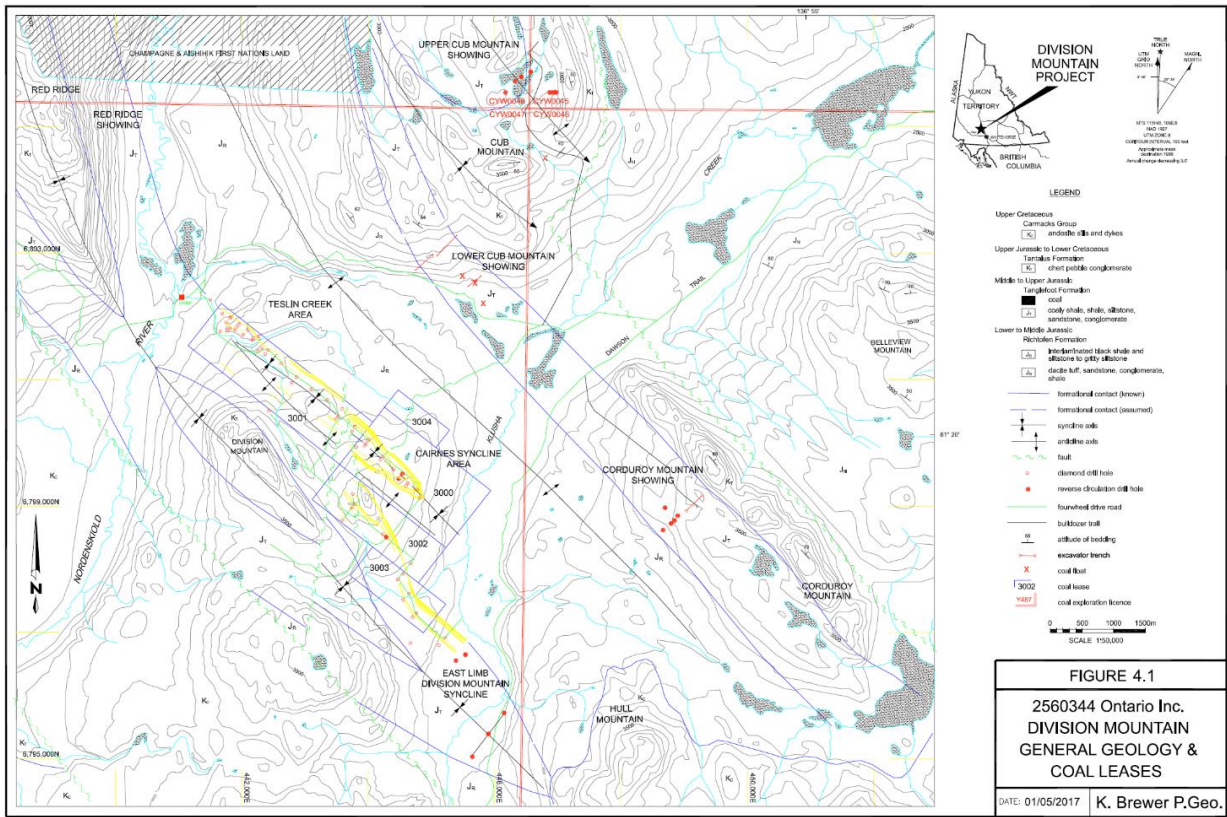

In addition, four (4) contiguous Territorial Coal Exploration Licences are also held by Yukoterre in the Division Mountain area (See Figure 4.2). The licences cover a total area of 60,862.8 hectares. Under the Coal Regulations Act, these licences are valid for a three-year, renewable term (see Table 4.1).

The exploration licences and leases encompass Upper Jurassic, Lower Cretaceous and Tertiary coal-bearing stratigraphy including a number of previously known coal occurrences. Renewal dates of both Licences and Leases are given below in Table 4.1.

TABLE 4.1 CLAIM LIST

License No.	Mining District	Renewal Date
CYW0154 and CYW0155	Whitehorse	07-Sept-2019
CYW0156 and 0157	Whitehorse	6-March-2020
Lease No.		
CMW3000 to 3004	Whitehorse	18-April-2038

Under the Yukon Coal Regulations Act, exploration licenses are currently subject to rental fees of \$0.05/acre in the first year, \$0.10/acre in the second year and \$0.20/acre in the third and final year for each license period. Costs incurred by the license holder on exploration work may be reported to the Yukon Mining Recorder and credited against rental fees.

Accessibility, Physiography, Local Resources, Infrastructure and Climate

Accessibility

Access is by 85 kilometers of paved highway from Whitehorse northwards on the Dawson Highway to Braeburn and then on a 31 kilometer all-season four-wheel drive road from Braeburn (Figure 5.1) to Division Mountain.

Approximately one kilometer north of Braeburn Lodge you turn westward into a residential area.

The northernmost portion of the lake has to be forded and this crossing is generally 50 meters wide and approximately 0.5-0.75 meters deep. Just after the crossing there is a private accommodation - Scuttlebutt Lodge - which can provide crew accommodations and logistical support. The trail then continues to the northwest and eventually joins the historic Dawson Trail stage route, which then extends southward and westward for a distance of approximately 22.5 kilometers to a point opposite the northwest end of Corduroy Mountain and approximately due east of the coal occurrences at Division Mountain. From this point, a variety of exploration trails have been constructed over the decades of activity in the area. The main property trail extends another 8.5 kilometers westward across Klusha Creek Valley and then climbs up the slopes of Division Mountain to the southernmost portion of the deposit area. There are a number of short steep grades (7 – 15% slope) along the stretch just prior to the trail descending into the Nordenskiöld valley.

The access trail is generally 3-7 meters wide and is currently passable with a both a four wheel drive truck, all-terrain vehicles, and equipment such as drills and heavy equipment.

Physiography

Tree line in the property area is at approximately 1300 meters on south-facing slopes with willow, alder and black spruce at lower elevations giving way to dwarf birch, alder and stunted spruce at tree line, and finally to grass and lichen at elevations above 1500 meters. Stands of heavy timber occur at lower elevations near Braeburn Lake.

Topography in the Division Mountain area is characterized by rolling hills and broad river valleys with local regions of moderate to steep relief along northerly-trending ridges. Elevations range between 670 and 1680 meters. Most of the area is mantled by glacial till and outwash between 1 and 60 meters thick. Permafrost is generally restricted to poorly drained areas of moderate to dense vegetation. Natural bedrock exposure is less than 5%, especially within the generally recessive coal measures. Creeks flowing to the north and west off the property are tributaries of the Nordenskiöld River (approximately 5-8 meters wide and 2 meters deep), which is part of the Yukon River watershed, while creeks draining to the south and east flow into Klusha Creek (approximately 3 to 4 meters wide and one meter in depth), which joins the Nordenskiöld River further to the north.

Several small lakes are present, some of which cover areas of up to 1.0 square kilometer. The whole area is covered with volcanic ash to a depth of about 6 inches (Teslin Exploration Ltd., 1970). The area appears to have escaped Pleistocene glaciation but glacio-fluvial outwash and loess exceeding 30 meters or more in thickness typically mantles all of the area below the 900 meter elevation level (Carne, 1992). Above the 900 meter elevation level, residual overburden cover is typically thin and bedrock exposures are more common.

Local Resources and Infrastructure

The nearest permanent buildings are at the northern end of Braeburn Lake just off the Klondike Highway. There are about 10-12 year-round and/or seasonal residential homes in the area. Braeburn Lodge is at Mile 55 of the Dawson Highway but now only comprises of a store and a seasonal restaurant. At Braeburn Lodge there is also a 3000 foot airstrip which runs immediately adjacent to the Dawson Highway. The Whitehorse-Aishihik-Faro electrical transmission line parallels the Klondike Highway, 20 kilometers east of the main historic coal reserves.

Being only 85 kilometers from Whitehorse, the project benefits from the infrastructure of the capital city of Yukon. Whitehorse has an international airport, it is the primary center for government and all of the regulatory agencies are also headquartered in Whitehorse, most of the First Nations have offices in Whitehorse or in the nearby communities, and the city also has numerous equipment and supplies stores. The city has a vibrant population of over 28,000 persons.

Yukon College is headquartered in Whitehorse. The college has established the Centre for Northern Innovation in Mining (CNIM) that develops and delivers innovative and flexible employment and career training to suit the labour needs of Yukon's mining sector. Its facilities are state-of-the-art and include mobile classrooms and are designed to help grow and improve the

competitiveness of Yukon's mining sector and its environmental sustainability. Whitehorse also has a large base of consultants and specialists with expertise in environmental, engineering, mine planning, geology, and construction and also a work force that is experienced in all aspects of exploration, mine development and operations.

Climate

The area has a continental climate with low levels of precipitation and a wide temperature range. Temperatures range from – 40C in the winter to 30C in the summer. Summers are typically pleasant with extended daylight hours whereas winters are long and cold. Lakes in the area are suitable for floatplane use during the ice-free period of early June to late September. Explorations programs are usually conducted between late-May and mid-October but winter drill programs have been conducted on the property to take advantage of easier access over frozen ground which also limits the environmental impact associated with construction of temporary drill access roads.

History

Summary of Exploration Activity at the Division Mountain Project by Various Companies

It is important to note that the previously estimated mineral resources and mineral reserves discussed below are all considered to be historical in nature. A qualified person has not done sufficient work to classify the historical estimates as current resources or reserves under NI 43-101 and Yukoterre is not treating the historical estimates as current. The historical resources and reserves therefore cannot be construed in any manner as to ascertain the potential economic viability of the Division Mountain coal deposit. For clarity, there are no current NI 43-101 mineral resource or mineral reserve estimates on the Division Mountain property.

There has been over a century of exploration activity in the Division Mountain area (see Summary of Exploration Activity, Table 6.1). In 1903, John Quinn and H.E. Porter staked coal near Division Mountain. In 1907, D. Cairnes of the Geological Survey of Canada mapped and sampled three coal seams in Teslin Creek Canyon, 2 kilometers north of Division Mountain. An additional coal occurrence was located by Cairnes near the base of Red Ridge approximately 5 kilometers northwest of the Teslin Creek showings (Figure 6.1).

No exploration was carried out on the showings until 1970 when Arjay Kirker Resources Ltd. (for Teslin Exploration Ltd.) excavated seven bulldozer pits near the Teslin Creek coal outcrop. Eight seams were exposed ranging in thickness from 0.6 to 4.4 meters. A 1,047 meter, six-hole diamond drill program, also conducted in the Teslin Creek area by Arjay Kirker in 1972, outlined a historical geological resource of 2.5 Mt. Also in 1970, Norman H. Ursel Associates Ltd. conducted geological mapping of the Cub Mountain area. Teslin Exploration Ltd. also conducted exploration and drilling of coal seams north of Carmacks in 1971. Proximate analysis was conducted on samples in 1972. However in 1974, a decision by the Government of Canada to proceed with construction of the Aishihik hydroelectric project resulted in termination of coal exploration at Division Mountain by Teslin Exploration Ltd.

In 1975, Allen Resource Consultants Ltd. (Resourcex Ltd.) located coal float on Cub Mountain in gopher holes (Allen, 1975).

In 1991, the Geological Survey of Canada ("GSC") carried out detailed analysis of coal samples including petrological and geochemical studies on samples obtained from some of the trench sites still exposed from previous exploration efforts.

As a result of the GSC survey, the W4 Joint Venture was then encouraged to explore for coal in the area and completed a minor trenching and short hole (2 holes) program at Division Mountain.

Table 6.1 An outline of exploration activity in the Division Mountain area.

Date	Exploration company	Work performed and highlights	Reference
1903	John Quinn and H.E. porter	· staked coal near Division Mountain	Yukon Minfile (1997)
1970	Norman H, Ursel Associates Ltd.	· Cub Mountain area; geological mapping, no coal found (NW corner of NTS block 105E/5)	Hunt (1994)
1970, 1971	Arjay Kirker Resources Ltd. for Teslin Exploration Ltd.	· Division and Vowel mountains-bulldozer treching (7 trenches totalling 167 m near Teslin Creek), mapping, sampling and test I.P. survey ove coal outcrops near Teslin Creek · reconnaissance geological mapping, road building · estimated reserves at 41 million tons · exposed aggregate thickness of 18.6 m of coal over an interval approximately 305 m · explored Corduroy Mt, no coal located	Kirker (1971); Craig and Laporte (1972)
1972	Arjay Kirker Resources Ltd. (Archer, Cathro and Associates Ltd.)	· drilled 6 diamond drill holes in Teslin Creek area (totalling 1047 m) · coal seams intersected vary from 4.6 to 5.9 m · 24.8 m aggregate thickness of coal seams > 0.5 m · reserves calculated as 2.8 million tons	Phillips (1973)
1975	Allen Resource Consultants Ltd. (Resourcex Ltd.)	· located coal float on Cub Mountain in gopher holes, believed to be within the Tantalus formation	Allen (1975)
1977	Hill for Cyprus Anvil Mining Corp.	· collected coal samples for analysis	Hunt (1994)
1978	Hill for Utah Mines Ltd.	· collected coal samples for analysis	Hunt (1994)
1978	Manalta Coal Ltd.	failed to locate any additional coal seams	Hunt (1994)
1990-1991	All-North Resources Ltd. and W4 Join Venture	· trenching and mapping near Teslin Creek	Yukon Minfile (1992)
1990	Geological Survey of Canada	· one 1972 bulldozer trench was remapped and carefully sampled (Teslin Creek) for Beaton et al. report	Beaton et al, (1992)
1992	Beaton et al, (University of Western Ontario)	· petrography, geochemistry and utilisation potential of the Division Mountain coal occurrence (Cairnes Seam)	Beaton et al, (1992)
1993	Cash Resources Ltd. (Allister Peach Geo-Consulting Ltd.)	· drilled 16 holes totalling 1810 m near Teslin Creek · intersected over 28 coal seams > 0.5 m thick · total in situ reserves estimated at 11 139 920 tonnes · hand trenching at Red Ridge exposed 11.4 m coal	Peach (1993); Wengzynowski and Carne (1993, 1994)
1994-1995	Cash Resources Ltd. (Archer, Cathro and Associates Ltd.)	· 5.2 km of excavator trenching · 6034 m of HQ-size diamond drilling in 32 holes · aggregate coal thickness 10 to 32 metres · estimated open pit reserves of 31.7 million tonnes	Carne and Gish (1996)
1996-1997	Cash Resources Ltd. (Archer, Cathro and Associates Ltd.)	· 1667 m of HQ-size diamond drilling in 10 holes · 21 excavator trenches totalling 2695 m at Division and Corduroy mountains · hand trenches southwest of Cub Mountain · raw coal reserves estimated at 54.7 million tonnes	Burke (1998); Gish and Carne (1998)
1998	Cash Resources Ltd. (Archer, Cathro and Associates Ltd.)	· 1329 excavator trenching at Cub Mountain · property optio-ed to Usibello Coal Mine Inc.	Burke (1999)
1999	Cash Resources Ltd. (Archer, Cathro and Associates Ltd.)	· 1,869 m of RC drilling in 20 holes and 4 excavator trenches totalling 315 m at Division Mountain	

2000	Usibelli Coal Mine Inc.	· Released Property option for Division Mtn	
2001	Cash Minerals Ltd.	· Cash Resources Ltd. changes name to Cash Minerals Ltd.	SEDAR, 2011
2005	Cash Minerals Ltd.	· 866.6 m of diamond drill holes at Division Mtn. Norwest Corporation Ltd, contracted to complete An NI 43-101 Resource Estimate	SEDAR, 2005 Norwest, 2005
2006	Cash Minerals Ltd.	· SNC Lavatin Ltd complete a study on thermal power · Norwest complete geotechnical drill holes	SEDAR, 2006
2008	Cash Minerals Ltd.	· Norwest complete a prefeasibility study for Division Mtn that concludes coal exporting is not feasible but a mine mouth thermal power facility project is the most feasible development option Mcloskey Group Ltd. complete a market study on steam And PCI coals	SEDAR, 2008
2009	Cash Minerals Ltd.	· Changes in corporate management	SEDAR, 2009
2010	Pitchblack Resources Ltd.	· Cash Minerals Ltd. changes its name to Pitchblack Resources Ltd.	SEDAR, 2010
2013	Pitchblack Resources Ltd.	· Mines Online Inc. contracted to promote the Division Mtn. Property	SEDAR, 2013
2008-2017	Yukon Geological Survey	· Range of studies focus on the hydrocarbon an Cbm potential in the Whitehorse Trough and highlight the Division Mtn property and Five Fingers area as 2 of 3 areas Trough with significant potential to host hydrocarbon deposits	YGS publications
2017	2560344 Ontario Inc.	· Acquire the Division Mtn Property and related Exploration Licences	SEDAR, 2017

Sample testing was completed by Birkley Engineering (Canada) Ltd. of Calgary who reported that a trench sample provided a calorific value of 7500 kcal/kg, 0.3% Sulphur and 21.8% ash, of which the ash occurred as adventitious material and could therefore be removed by washing (Carne, 1992). They reported various coal seam intersections of between 4.7 and 12.1 meters (Carne, 1990, 1992) and test results of 31.3% Ash, 22% volatile matter, 45% fixed carbon, 0.5% Sulphur, and a calorific values ranging from 7130-7870 kcal/kg, and 2.5% moisture. Carne (1992) noted that the coal qualities being identified were comparable with thermal coal quality values in a range of coal deposits in British Columbia, Alberta and Alabama. Carne (1992) also concluded that the Division Mountain basin appeared to have good potential for coal bed methane (“CBM”). The coal was noted to have a high liptinite content (spores, cuticular plant matter, resins and waxes) and this coupled with the high volatile rank, suggested that the potential for significant CBM was high. Carne’s report further stated that depending on the method of calculation, the CBM potential of the Division Mountain area ranged from 17.5 billion cubic meters to 75 billion cubic meters. Carne based his own estimates for CBM potential at that time using the Alberta Geological Survey Method of estimation which was calculated to be 13.5 cubic meters of gas per tonne of bituminous coal in seams greater than 0.5 meters thick, of which is half of the estimated volume considered to be recoverable. Carne (1992) concluded that further exploration should be conducted in the area, including proximate and ultimate analyses of coal seams, and testing of the coal for CBM potential.

In October 1992 Cash Resources Ltd. purchased four Territorial Coal Exploration Licences from Strategic Metals Ltd, that included the Division Mountain coal occurrences. In addition Cash

Resources applied for other coal licences extending northwards through the Whitehorse trough region to cover possible extensions of the same geological formations at Division. These licences included known coal showings and favorable stratigraphy extending to the north just past the Five Fingers area. During the 1993 field season, Cash Resources completed 16 drill holes totaling 1,810 meters that were designed to test the Teslin Creek area (Wengzynowski et al. 1994). This diamond drilling program defined four seams with an average raw coal aggregate thickness of 10 meters over a 1 kilometer strike length forming the eastern limb of the Cairnes Syncline. Measured near-surface historical resources were estimated at 2.6 Mt to a depth of 200 meters, confirming the Arjay Kirker historical estimate. Hand trenching at Red Ridge 5 kilometers to the north exposed a total thickness of 11.4 meters of raw coal in three seams and demonstrated lateral continuity of the coal measures.

An exploration program consisting of 5.9 kilometers of excavator trenching and 6,034 meters of HQ-size diamond drilling in 32 holes was also carried out by Cash Resources during 1994 and 1995 to explore a 5 kilometer long south-easterly extension of previously known coal-bearing strata along the limbs of a northerly- plunging syncline-anticline pair (Gish, 1995 and Gish, 1996) at Division Mountain. This work was successful in discovering a new area of coal deposition with thicker seams than the Teslin Creek area and a dramatically lower strip ratio.

All coal drill intersections greater than one meter thick were submitted for proximate analysis, with samples comprising of the entire seam core intersection, a standard practice at that time for coal testing procedures. In conjunction with the 1994 and 1995 drill campaign, environmental surveys, including biological and botanical inventories and water quality assessment, were carried out (Gish, 1995 and Gish, 1996). In addition, representative intersections of coal from the drill programs were composited for secondary tests such as grindability, washability, ash chemistry and Ultimate Analysis.

Exploration during 1997 consisted of 1,667 meters of HQ-size diamond drilling in ten holes and twenty-one excavator trenches totaling 2,695 meters on both Division Mountain and Corduroy Mountain (Gish et al, 1998). The diamond drilling focused on further delineating west-dipping coal-bearing strata discovered during the 1994-1995 exploration season.

Gish (1998) noted that the objective of the program was to increase the historical resources from approximately 30 million tonnes of coal to 50 million tonnes. The work resulted in more than 900 meters of strike length was added to the southwest coal deposits, while the average aggregate raw coal thickness increased to 24.7 meter. A short excavator trenching program was then conducted in early fall 1998 by Cash Resources (Gish, 1998). The work consisted of six excavator trenches totaling 1,329 meters and was designed to test favorable Tanglefoot Formation stratigraphy in the vicinity of Cub Mountain, approximately 4.5 kilometers northeast of Division Mountain. No significant coal seams were exposed in any of the trenches.

In November 1998 the Division Mountain property was optioned to Usibelli Coal Mine, Inc. (Usibelli) (Sedar, 1998b). Exploration in the spring of 1999 consisted of 20 reverse circulation percussion drill holes totaling 1,869 meters and 4 excavator trenches totaling 315 meters (Gish, 2000). The author located some of the holes that were proximal to the northern trail to Division Mountain. Usibelli's trenching and three of the drill holes were designed as a check of geologic data that formed the basis of a 1998 historic resource estimate that they published, but the bulk of the reverse circulation drilling was carried out to explore three target areas outside the defined deposit. The program confirmed the results of earlier drilling and outlined several new coal seams on Corduroy Mountain but ultimately Usibelli dropped its option on the property in May 1999 (Sedar, 1999).

On March 13, 2001 Cash Resources Ltd. announced a change of name to Cash Minerals Ltd.. (Sedar, 2001). Minimal exploration occurred between the period 2001-2005. Then in 2005, Cash Minerals Ltd. ("Cash") had renewed interest in the project and completed a total of four diamond

drill holes (886.57 m) on the Division Mountain property. That same year, Norwest Corporation ("Norwest") of Salt Lake City, Utah, was contracted by Cash to complete an historical resource estimate supported by a technical report to NI 43-101 standards at the time. The results of the 2005 drilling program, a review of all previous assessment work, coal quality tests and a site visit were completed and a report entitled "*Geologic Evaluation and Resources Calculation on the Division Mountain Property, Yukon Territory, Canada*" was prepared by T. Becker and published on March 9, 2005.

Extensive trenching programs have been conducted at Division Mountain and had good success in delineating coal seams and prospective exploration areas.

- The 1994 and 1995 excavator trenching programs utilized a Caterpillar 235 operated under contract by 10983 Yukon Ltd. of Whitehorse. The programs consisted of thirty (30) trenches totaling 5.9 kilometers in length and required 928 hours of excavator time
- The 1997 excavator trenching program required 569 hours of Hitachi UH09 excavator time to complete twenty-one (21) trenches totaling 2,695 m in length. The excavator was operated under contract by 15317 Yukon Inc. of Whitehorse
- Trenching in 1998 consisted of six trenches totaling 1,329 m completed with 116.5 hours of excavator time.
- In 1999 four excavator trenches totaling 315 m were completed with a Caterpillar 235 excavator operated by Caron Diamond Drilling Ltd. of Whitehorse.
- Limited geophysical surveys have been conducted with limited success in delineating coal seams.
- In 1993 VLF-EM, EM-31 and total magnetic field surveys were conducted over 16.5 km on grid crosslines between 10+000N and 15+182N. The readings were taken at 10 m stations by Amerok Geophysics of Whitehorse, Yukon (Wengzynowski et al, 1994).
- Geophysical surveys during the 1994 exploration program included 36.9 km of VLF-EM at 10 m intervals on 300 m lines spacing and 576 meters of reflection seismic surveys with a constant 4 meter geophone interval on selected VLF-EM lines (Gish, 1995). VLF-EM lines were run with 27.4 kilometers orientated at 130° and 9.5 kilometers orientated at 040°. The lines orientated at 130° were intended to test the eastern limb of the Division Mountain syncline while those orientated at 040° were used to better delineate the nose of the Cairnes syncline.

In the spring of 2005 Norwest was retained by Cash Resources Inc. to assist with ongoing exploration efforts and conduct a comprehensive reviews of all previous exploration efforts in order to complete an update of the historic resource estimations for the property. The assignment included a review by Norwest of all exploration procedures and results; compilation of regional and property-scale geological data and drill data from public sources, assessment reports and company reports. The results of the work were presented in a report titled *Geologic Evaluation and Resource Calculation on the Division Mountain Property, Yukon Territory, Canada* (Becker, 2005).

Upon completion of the 2005 exploration program Norwest was then further asked to continue a range of geological, geotechnical and preliminary engineering studies to further advance the project. This initially resulted in the reporting of a Scoping Study in 2006 which was then further upgraded with additional geotechnical, geological, engineering and exploration drilling to complete a feasibility study in 2008. The author responsible for the preparation of the feasibility study was involved in a range of activities at the site and supervised a majority of the work efforts. He was also previously involved in the exploration programs conducted in the fall of 1994, spring of 1995 and visited the property on July 5 and 6, 2005. All of these study efforts by Norwest were completed for Cash Minerals Ltd., they are considered to be reliable by the author, but are also considered to be historical in nature, and do not demonstrate any potential viability of the Division Mountain Coal Deposit.

The estimation methodology by Norwest in deriving historical resource estimates in 2005 and 2006 approximated that used in 1998 by Mr. R.C. Carne, M.Sc., P.Ge. and by Gish (2000) in earlier reports. The details of the historical resource and reserve estimation methodology are presented in the internal compilation report.

This initial report by Norwest was followed up with a series of reports between 2006-2008 including:

- Norwest Corporation., 2008. NI 43-101 Technical Report on Coal Resources and Reserves of the Division Mountain Property, Yukon Territory.
- Norwest Corporation., 2008. Division Mountain Project Pre-Feasibility Study for Cash Minerals Ltd.
- SNC-LAVALIN Thermal Power, 2006 Division Mountain Power Project for Cash Minerals Ltd.
- The McCloskey Group, Ltd., 2008. The Markets for Division Mountain Steam and PCI coals for Cash Minerals Ltd.

In the Norwest Corporation., 2008 report entitled “NI 43-101 Technical Report on Coal Resources and Reserves of the Division Mountain Property, Yukon Territory.” Norwest concluded that the drilling program to that date had been very successful in delineating the coal deposit at Division Mountain.

Norwest in 2008 based their historical resource estimates at that time on exploration programs, analysis of results, and their own modelling efforts and this work also included a compilation and comprehensive the results of all previous exploration efforts conducted by Archer Cathro & Associates (See Carne, 1995, 1996, 1998, 1999; Gish 1999, 2000). For the classification, estimation and reporting of the historic coal resources for the Division Mountain property by Norwest (2005, 2006, 2008) were developed in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum’s CIM “Definition Standards on Mineral Resources and Reserves” adopted by CIM Council on November 14, 2004 and they also referenced the Geological Survey of Canada Paper 88- 21 “A Standardized Coal Resource/Reserve Reporting System for Canada” (Hughes, et al, 1989). All historical resources fell into the Measured category based on the criteria provided in GSC Paper 88-21 and the results of the 2005 and 2006 drilling efforts which indicated that seam continuity and geological correlations could be made for distances of over 500 meters (Norwest 2008).

A total near-surface historical “Measured” resource of 52.5 Mt was defined (Table 6.2) by Norwest (2005, 2006, and 2008). Approximately 47.2 Mt of the historic resource were noted to occur within the area covered by the five coal leases while 5.3 Mt occurred just to the southeast of Lease CMW3003 on section line 8+950N (covered by Coal License CYW0156).

TABLE 6.2 Historic Coal Resource Summary

Resource Area	ASTM Coal Rank	In-Place Resources (Tonnes In Millions)		
		Measured	Indicated	Inferred
Division Mt.	High Volatile Bituminous B	52.493	0	0
Total		52.493		0

The Norwest (2008) report also included an historical estimate 26.4 Mt of in-place coal reserves, in the Proven assurance category (see Table 6.3)

TABLE 6.3 Historic Coal Reserve Summary

Area	ASTM Coal Rank	In-Place Reserves (Tonnes in Millions)	
		Proven	Probable
Division Mt.	High Volatile Bituminous B	26.372	0
Total		26.372	

Norwest also provided within this study a summary of the historic resource estimated by both section and by seams. They noted that further geological investigations and possibly drilling was required to explore potential areas for extension of the deposit to the southwest and unexplored areas to the west.

In the same year, as previously noted Norwest completed a study entitled: “Norwest Corporation, 2008 Division Mountain Project Pre-Feasibility Study for Cash Minerals Ltd.” This pre-feasibility study was based on the coal being surface-mined using conventional truck/shovel practices. It was envisioned that there would be a run-of-mine product that will be sold as fuel for a local “mine mouth” 50MW (net) generating station that would be operated as an independent entity.

The report was quite detailed and provided information on:

- Geotechnical analysis
- Surface mine design including pit optimization, selection of mining method, equipment selection, mine plan overview, volumetrics, mine access and haul roads, labor and work schedule, environmental and mine permitting
- Mine Infrastructure including coal handling facilities and shop/office facilities
- Estimates on Operating and Capital Costs
- Project Economics

Considering that this report was prepared in 2008, any data on cost estimates and project economics can no longer be relied upon. Furthermore as a new property owner, Yukoterre would need to conduct its own independent analysis to verify the other information presented in the 2008 Norwest Prefeasibility Report. However the work conducted provides an excellent base of knowledge and therefore is considered to be a significant contribution to the database associated with the historical work completed by various parties, such as Norwest, relating to the Division Mountain Coal Project.

Various changes in management of the company then occurred and on June 24, 2010 Cash announced a name change to that of Pitchblack Resources Inc. (“PIT”) who then completed a share consolidation. The author was then contracted by PIT and conducted two visits to the property in 2009 and 2011 to update the management on the status of the property, examine the condition of core storage at site, and to locate former diamond drill-hole locations. A majority of the former drill-hole locations were verified and located at their prescribed locations. Whole core of coal samples were found to have been removed from the drill core located at site. The logs appeared to be accurate for the non-coal portions in a representative number of holes inspected but due to the removal of whole coal core samples the author was unable to verify any of the coal data. The coal is stored outside and is not under cover and its condition will likely depreciate rapidly over time. In 2013, PIT contracted Mines Online Inc. to undertake promotional efforts to sell the property and the author assisted them in the preparation of those materials.

Recently the Yukon Geological Survey has been actively studying the hydrocarbon and coal bed methane potential of the Whitehorse Trough (YGS Open File 2015-23; Lowey et al, 2008 and 2009; Beaton et al, 1992; Hayes et al, 2012; White et. al, 2012, Hutchison, 2017). These reports noted that the Whitehorse Trough is a frontier intermontane basin that is prospective for oil and gas from

both conventional and unconventional reservoirs in nine possible plays. All nine plays were deemed prospective for gas and three were deemed to have potential for oil as well. They further highlighted three areas with the greatest potential for hydrocarbon resources which included the Division Mountain area covered by the coal exploration licence areas held by Yukoterre. The studies have concluded that the evidence for the presence of both conventional and unconventional hydrocarbons in the Whitehorse trough is compelling and assessed volumes are sufficiently substantial to support additional exploration and assessment work (Hayes et. al, 2012).

Summary of Coal Exploration Drilling - Division Mountain

A total of 68 diamond drill holes (11,441.57 meters), 20 reverse circulation percussion drill holes (1,869 meters, and 4 rotary air blast (RAB) drill holes), along with numerous trenches have been completed on the property. Geology and drill hole locations in the area of detailed exploration are shown on Figure 2.1 and cross sections through the coal measures are included within the internal compilation report.

All 68 of the diamond drill holes and three of the reverse circulation percussion drill holes were drilled in a 6.5 kilometer long by 1.5 kilometer wide southeast trending area. Seventeen of the reverse circulation percussion drill holes explored three target areas outside the defined deposit.

The 1993, 1994, 1995 and 1997 diamond drilling programs were contracted to E. Caron Diamond Drilling of Whitehorse. The drilling was done with one or two skid-mounted Longyear 38 wire-line equipped drills. All holes were drilled with HQ (6.25 cm diameter) equipment however, badly broken ground necessitated reducing to NQ (4.75 cm diameter) equipment in some holes. Core recovery of the coal intersections averaged about 96%.

Reverse circulation percussion drilling in 1999 was carried out by Midnight Sun Drilling Co. Ltd. using a track-mounted Schramm T6585WS drill supported with a Clark skidder.

Down-hole geophysical logging was performed in 1999 on all reverse circulation drill holes by Amerok Geoscience Ltd. of Whitehorse, Yukon (Gish, 2000). Resistivity was measured using an IFG BMP-04 galvanic resistivity tool, with 16 inch and 48 inch electrode spacing. Natural radioactivity was quantified with an IFG BSG-01 four channel gamma probe with windows in the 100 KeV to 3 MeV range. Measurement time was constant at one second. The results of these surveys were inconclusive and failed to accurately define the coal seams.

In 2005 a total of four diamond drill holes (886.57 meters) were completed on the property. Diamond drilling and bulldozer support was contracted to E. Caron Diamond Drilling of Whitehorse. The drilling was done with one skid-mounted Val d'Or wire-line equipped drill and a D7E bulldozer for drill pad construction and drill moves. Holes 05-85, 05-86 and 05-87 were completed with standard HQ equipment while the bottom of holes 05-87 and all of 05-88 were drilled with HQ3 bits and a split core tube.

PVC tubing with an inside diameter of 5.08 cm was inserted into drill holes 05-86, 05-87 and 05-88. For each of these holes electrical heat tape was suspended inside the PVC tubing from surface to a depth of 60 meters. The completion of these drill holes with PVC tubing and heat tape enabled the permafrost to be thawed in the holes when required.

Aurora Geosciences Ltd. of Whitehorse, Yukon was retained to perform down-hole geophysical logging. They attempted to record natural gamma, self-potential (SP) and resistivity logs in hole 05-85 but due to excessive caving they were not able to log this hole and abandoned any additional surveys. Roke Oil Enterprises Ltd. of Calgary, Alberta was then asked to perform additional logging. Roke arrived on the property as the final hole of the 2005 program was completed. Roke was unable to perform SP and resistivity surveys since the logging sonde was

damaged in transit. They were able to log holes 05-86, 05-87 and 05-88 with gamma ray, neutron and electron bulk density equipment. For each of these holes the HQ rods were lowered to the bottom of the hole then logging was performed through the rods. The rods were then pulled from the hole and the holes logged with a caliper sonde. The results were plotted on strip logs and provided in digital format.

The 2005 drilling program provided large diameter drill core that was used for geotechnical studies. The geotechnical logging of all drill holes was performed by Archer Cathro and Associates (1981) Limited personnel under instructions and supervision by EBA Engineering Consultants Ltd. of Whitehorse, Yukon.

All drill holes were marked with a 1.5 meter long wooden plug, bearing an aluminum tag inscribed with hole number, date drilled, azimuth, dip and total depth. Surface inclination of the diamond drill holes was determined using a Brunton compass with downhole inclination determined by acid tests. Results from the downhole surveys showed little or no change from surface inclinations.

Coal Exploration Drilling - Division Mountain Area

Hull Mountain

In 2006 the Hull Mountain area was selected as a target for reverse circulation drilling to assess whether the relatively abundant and thick coal seams of Division Mountain continue beneath Klusha Creek Valley. A track-mounted percussion drill was used. Three holes were attempted but none were completed through the overburden that exceeded 20 meters in thickness. Notwithstanding, further exploration in the form of geological mapping and excavator trenching is warranted on the northwest slope of Hull Mountain where depths may be thinner (Carne, 2006) and/or a return to the proposed original drill sites with a more robust drill.

Cub Mountain

In 1999 an exploration program was funded and managed by Usibelli Coal Mine Inc. under an option agreement from Cash Resources Ltd. Seven holes (99-78 to 99-84) were drilled just north of Cub Mountain and a total of 77 meters of trenching in four locations was conducted (Gish, 2000).

In 2006, four (4) holes totaling 581.5 meters of reverse circulation drilling were completed along the Division Mountain north access road in the Cub Mountain area. The holes were designed to explore the Upper Member of the Tanglefoot Formation for coal (Carne, 2006). Coal float was noted to occur nearby the drill sites (Carne, 2006). Recovery of drill cuttings was poor in softer lithologies, especially below the water table and consequently no uncontaminated samples were available for coal quality analyses. The only significant intersection was a 1.6 meter coal seam with low to moderate apparent ash content. It was thought that the seams in this area were thin and were part of the upper portion of the Tanglefoot Formation Upper Member while better coal intersections in Division Mountain for at the base of the Tanglefoot Formation Upper Member (Carne, 2006). Further exploration was deemed not to be warranted at that time by Carne (2006). Possible targets in this area in further exploration would have to consider possible locales where the lower portion of the Upper Tanglefoot Formation Upper Member may be at or near the surface.

Corduroy Mountain

In a letter from Usibelli to Cash Resources in 1999, Usibelli noted that they also conducted three drill holes in Corduroy Mountain all of which encountered coal (Gish, 2000). Unfortunately the drill logs were poorly recorded with no specific locations of the drill holes and so these locations are unknown. However, they do indicate that further exploration in Corduroy Mountain may be

warranted.

Geotechnical Drilling at Division Mountain

In July, 2005, four diamond drill holes were drilled and sampled as part of an exploration program at the Division Mountain site.

Norwest Corporation was engaged by Cash Minerals to provide stability analysis and pit wall recommendations for geotechnical data obtained in this program.

Drilling/logging/sampling were supervised by Archer-Cathro Consultants site geologists with onsite assistance from EBA Engineering from Whitehorse and technical support and review from Norwest.

Development of pit wall angles required the identification of potential failure modes for the given pit configurations. Primary failure modes were evaluated individually to identify failure potential (Norwest, 2006). The failure modes of concern for a pit in bedded geology such as Division Mountain were described and are included in the internal compilation report.

Geological Setting and Mineralization

This section describes regional geology, stratigraphy and structural geology of the Division Mountain property.

Regional Geology

The Division Mountain area lies within Whitehorse Trough, a northwest-trending, fore-arc basin comprised of Mesozoic volcanic and sedimentary rocks (See Figure 7.1). The Whitehorse Trough constitutes the northern end of the Intermontane Belt of the Canadian Cordillera. The Whitehorse Trough sequences are bounded by the Omineca Crystalline Belt to the east and the Coast Plutonic Complex to the west. The Division Mountain terranes are bounded by the Braeburn Fault to the north and the Miners Fault to the south. Yukon Crystalline Terrane comprises both Paleozoic igneous and sedimentary rocks as well as their metamorphosed equivalents. The Whitehorse Trough contains the coal-bearing strata currently under exploration.

During Late Triassic time an island arc assemblage consisting of a 7,000 meter thick succession of Lewes River Group aphyric to augite-phyric basaltic andesite flows, breccias and tuff, conglomerate, wacke, limestone and shale was deposited within Whitehorse Trough. Succeeding Jurassic basin-fill stratigraphy is more complex due to disconformities and hiatus in sedimentation and to diachronous or inter-fingering relationships in the shallow water and nearshore facies. In general, two sequences are present: Lower to Upper Jurassic conglomerate and sandstone turbidites of the marine to deltaic Laberge Group; and, Upper Jurassic to Cretaceous conglomerate, sandstone, mudstone and coal of the largely alluvial Tantalus Formation.

Stratigraphy

Generalized geology of the Division Mountain area is given in Figures 7.2 and 7.5. A stratigraphic representation of the Whitehorse Trough is presented in Figure 7.3 (after Hart, 1997). Detailed geology of the main area of exploration along with Section locations is shown in Figure 2.1.

Whitehorse Trough stratigraphy can be divided using major bounding disconformities between distinct sedimentary sequences deposited along the basin margins. These sequences are the Lewes River Group shallow marine carbonate and clastic rocks; Laberge Group conglomerate and

sandstone turbidites; and the Tantalus Formation, a largely alluvial package of chert pebble conglomerate, sandstone, shale and coal.

The Lewes River Group represents the oldest stratigraphy within the Trough consisting of Upper Triassic to Jurassic volcanoclastic conglomerates overlain by alternating lenses of greywacke and limestone.

The Laberge Group is subdivided into the following formations: (i) Conglomerate Formation, Hettangian to Bajocian in age, and consisting of polymitic cobble-boulder conglomerates dominated by granitic to granodioritic clasts; (ii) Richtofen Formation, Hettangian to Bajocian in age, and consisting of interlaminated black shale and wispy silt to fine sandstone laminae; and (iii) the Nordenskiöld Dacite, of Sinemurian to Toarcian age, and consisting of thick epiclastic and primary dacite tuffs and flows.

In the Division Mountain area, the stratigraphy encountered within the coal measure is comprised

of three distinctive lithologies; coal bearing strata within the Tanglefoot Formation; the underlying Richtofen Formation; and intrusive andesite bodies (Gish, 1995).

Tanglefoot Formation

The Tanglefoot Formation is the main coal-bearing unit on the property and occurs as fining-upward cycles of sub-rounded, clast-supported quartz granule conglomerate, brown coarse-grained sandstone and chocolate brown siltstone that often contains plant fossils; and black shale, coaly shale, shaly coal and coal (Gish, 1995). Contacts vary from gradational over several meters to sharp.

Thicknesses of all of the constituents of an individual cycle and the number of cycles encountered per drill section vary greatly (Gish, 1995). Often a unit of grey arkosic sandstone with 2 to 8 mm angular rip-up clasts of coaly shale and/or shale lies between the lower contact of the earliest coal-bearing cycle and the Richtofen Formation (Gish, 1995).

A section measured at Red Ridge consists of fifteen sedimentary cycles, each on the order of approximately 10 meters thick. A typical cycle consists of:

1. A scour-based arkosic pebble conglomerate containing fossils, twigs and branches lying transverse to paleoflow along 1 to 2 meter trough foresets;
2. Conglomerate lags infilling troughs as lenticular beds;
3. A fining-upward zone of medium- to fine-grained arkose containing trough cross-beds, which exhibit an upward decrease in set size;
4. Grey organic rich shale or shaly mudstone containing leaves, grasses and *Metasequoia* needles and twigs;
5. Coaly shale to shaly coal, commonly rich in coalified twigs and branches;
6. Banded coal; and,
7. Either a transition back to grey shale or an abrupt termination by the basal pebbly conglomerate bed of the next cycle.

The depositional environment was one of a broad coastal zone characterized by tidal marshes and high-constructive river-dominated deltas (Lowey, 2008), rapidly aggrading flood-dominated delta. Cross-bedded conglomerate-sandstone cycles represent point-bar deposits from a high energy fluvial system. Paleo-current variance supports a meandering river interpretation. Of particular interest is that, despite the generally coarse-grained nature of the channel sandstones and conglomerates, the overbank deposits and related coals are relatively thick and demonstrate remarkable lateral continuity.

The coal seams were deposited in long-lived delta plain swamps that served as collection sites for transported organic material and for generation of peat bogs. Closer to the Tanglefoot Tantalus contact, coal becomes less abundant. Instead, grey shale and coaly shale predominates as much thinner beds than the coal seams lower in the succession.

Trenching in the vicinity of Cub Mountain and Corduroy Mountain exposed northeast-dipping coal and Tanglefoot Formation stratigraphy. This is probably a fold repeat of the coal-bearing Division Mountain and Cairnes Syncline Tanglefoot Formation sequences.

Resistant beds of thick-bedded chert pebble conglomerate of the Upper Jurassic to Lower Cretaceous Tantalus Formation cap the Tanglefoot Formation coal-bearing sequence, forming prominent topographic highs at Division Mountain, Red Ridge and Corduroy Mountain. Depositional environment of the Tantalus Formation appears to be one of an active flood plain. Coal has previously been mined within the Tantalus conglomerates 100 kilometers to the north of Division Mountain in the Carmacks region. Coal float has been found in the vicinity of gopher holes

in areas underlain by the Tantalus Formation at Division Mountain and Red Ridge but to date none has been found in bedrock.

Richtofen Formation

The lithologically distinctive Richtofen Formation serves as an easily recognizable base for the overlying coal measures (Gish, 1995). Brown weathering black mudstone, with wispy siltstone to fine sandstone laminae in the form of low amplitude cross-stratification, alternates with thick (>10 meter) intervals of massive brown weathering calcareous sandstone. Fossil gastropods were found in the Richtofen Formation in diamond drill hole 94-38 (Gish, 1995). However these are not considered index fossils and cannot therefore be used for accurate dating (Gish, 1995). A Lower to Middle Jurassic depositional span is recorded elsewhere in Whitehorse Trough for the unit but since this sequence is likely diachronous, being a record of a nearshore facies that migrated with basin fill, the precise age of the Richtofen Formation in this area will remain unknown until it can be locally constrained by paleontological data.

Andesite

Small stocks, dykes and sills of porphyritic basalt, andesite and dacite intrude the Tanglefoot Formation coal measures. This intermediate to mafic altered andesite to basalt sequence, of likely intrusive origin, appears for the most part to be sill-like bodies conformable with the Tanglefoot and Richtofen stratigraphy although they do on occasion crosscut the formations (Gish, 1995). The presence of glassy chill zones and rare amygdaloidal textures are indicative of emplacement in a near-surface setting (Norwest, 2008). Colours vary from pale green to dark green. Carbonate veins, veinlets and stringers are common throughout (Gish, 1995). Composition is primarily cryptocrystalline clay and/or plagioclase, carbonate, augite and quartz (Gish, 1995). Age of the intrusions is unknown but they are probably related to regionally extensive volcanic rocks of the Upper Cretaceous Carmacks Group, which unconformably overlie the Laberge and Tantalus stratigraphy in the Division Mountain area. In 1995 eight drill core samples were sent for analysis at Vancouver Petrographics Ltd. in Langley, British Columbia (Gish, 1995). All the samples were recognized as intermediate-mafic volcanic lithology, representing altered porphyritic andesite to basalt.

Stratigraphy – Whitehorse Trough

Other important stratigraphic units assigned to the Whitehorse trough basin underly the coal exploration licence areas of Yukoterre and will now be briefly described in the following sections.

Cache Creek Terrane

The Cache Creek Terrane is an oceanic allochthon within the Whitehorse trough that comprises of a massive, finely crystalline, locally crinoidal and fusiline limestone with limestone breccia, recrystallized limestone, and minor dolostone (Colpron, 2011). These rocks were thrust over Whitehorse Trough strata during a Middle Jurassic accretionary event.

Lewes River Group

In the Whitehorse trough the Lewes River Group is represented by the Povoas Formation and the Aksala Formation.

The Povoas Formation is interpreted as predominantly subaqueous lava flows and volcanoclastic deposits (Templeman-Kluit, 1978).

The Aksala Formation is assigned to the upper member of the Lewes River Group. The Aksala Formation is interpreted as platform to slope, reef, and littoral deposits (Templeman-Kluit, 1978).

An unconformity (spanning approximately 5 Ma.) separates this formation of the Lewes River Group from the overlying Laberge Group (i.e. Richtofen, Nordenskiold and Tanglefoot Formations).

Nordenskiold Formation (Laberge Group)

The Nordenskiold Formation is the middle unit of the Laberge Group and underlies the Tanglefoot Formation and overlies the Richtofen Formation. It is characterized massive bedded crystal-rich volcanoclastic rocks. It is approximately 100 meters thick and occurs mainly as isolated, massive outcrops near the centre and western margins of the Whitehorse Trough. U-Pb zircon ages date the formation at a range of 188.5 – 182.5 Ma. It represents mainly sub-aerially erupted pyroclastic beds.

Tantalus Formation

The Tantalus Formation (Middle Jurassic-Lower Cretaceous) overlies unconformably with the Tantalus Formation, the uppermost sequence of the Laberge Group. It consists of chert-pebble conglomerate and coal-bearing sandstone and mudstone. This formation is host to the major coal deposits mined at Tantalus Butte and Tantalus immediately northeast of Carmacks. This formation is at least 1000 meters thick and occurs widely scattered throughout the Whitehorse Trough and represents sedimentation in fluvial and lake environments.

Detailed Geology of the Division Mountain Coal Measures

Coal seams occur throughout the 450 meter thick Tanglefoot Formation but to date the thickest and most continuous accumulations of coal in the Division Mountain area are found to be present near the base of the Tanglefoot Formation. Internal stratigraphy and structure of the recessive coal measures is best illustrated on the geology map (Figure 7.3) and on cross sections showing drill hole data included within the internal compilation report.

At Division Mountain three depositional basins are present (Gish, 2000). On the southeastern end of the coal deposit at approximately Sections 9+00N and Section 10+050N, Seams 1a to 2b lie near the Tanglefoot-Richtofen contact. Seam 1 a, which forms the base of the coal measures, is unusually thick here. For example in Hole 97-61 Seam 1a reached a maximum thickness of 17.3 meters (Gish, 2000). A relatively thick barren interval lies between Seams 2 and 3.

A stratigraphic cut-out or pinch-out is thought to occur on Section 10+050N where only Seam 1a at 1.7 meters thick is present near surface (Gish, 2000). However Hole 97-60 intersected a 16.8 meter thickness in the same seam just 80 meters down the dip (Gish, 2000).

Between Section 10+050N and Section 13+962N, another pinch-out is present (Gish, 2000). Seams 1 to 3 are moderately thick and lie in an evenly spaced manner within a 50 meter stratigraphic interval approximately 20 to 30 meters above the Tanglefoot-Richtofen contact. Seams 4 and 5 are also present above a 40 to 50 meter barren interval.

Northwest of Section 13+962N, Seams 1 and 2 are not present (Gish, 2000). A number of relatively thin subsidiary splits of Seams 3, 4 and 5 have been intersected by drilling, however only the basal Seams 3c and 3e have any economic significance (Gish, 2000).

Structural Geology

Deformation in the Whitehorse Trough occurred primarily as flexural slip folding during the Middle Cretaceous, within synclinal and anticlinal axes trend north-northwest, parallel to the trough axis (See Figure 7.6). Fold wavelengths are generally between 500 meters and 2 kilometers, although complex tight folds with wavelengths less than 3 meters have been noted (Gish, 2000). The coal-bearing Cairnes Syncline outlined by 1994- 95 exploration trends 310° and plunges 9° to the northwest. The limbs dip between 25 and 72°. Drilling in 1997 and 1999 concentrated on the coal

rich east limb of the Division Mountain Syncline about 2 km south of the Cairnes Syncline. This syncline also trends approximately 310° with the east limb dipping 45 to 55° to the southwest. Exploration to date has not yet defined either the fold nose or the western limb of the Division Mountain Syncline. The folded stratigraphy has only been slightly modified by northwest- and northeast-trending normal faults with minor dip-slip displacements (Gish, 2000).

In the northernmost portions of the Whitehorse Trough, the Tantalus Basins appear to have been deposited in narrow valley-confined systems during intervals of regional convergence of Stikinia, Quesnellia, and the Yukon-Tanana Terranes with the North American craton. Deformation of the pre-Tantalus strata in the Whitehorse Trough began in the Bajocian and continued during deposition of the Tantalus Formation, continuing into the Paleogene. The *en echelon* pattern of folds in the Whitehorse Trough suggests that some dextral strike-slip movement may have occurred during Upper Jurassic to Lower Cretaceous folding and this may have directly influenced the geometry of the Tantalus basins (Colpron, 2011). Lowey (2008) estimated that the Tantalus and Tanglefoot Formations in the northern part of the Whitehorse Trough must have been buried by about 3-4 kilometers of strata, prior to Aptian to Albian uplift, erosion and deposition of volcanic strata (Mount Nansen Group) and overlying Carmacks Groups (Colpron, 2011).

Mineralization

Coal mineralization has been identified in a large number of occurrences throughout the Whitehorse Trough, many of which are included within the current licence holdings of Yukoterre.

Division Mountain

There are limited natural exposures of coal in the Division Mountain area. Almost all of the bedrock occurrences have either been located by hand or machine trenching through glacial till cover in areas of coal float or where coal-bearing stratigraphy has been projected to be present. Coal seams occur throughout the 450 meters thick Tanglefoot Formation but the thickest and most continuous accumulations of coal are present near the base of the unit. Coal-bearing rocks comprise of interbedded sandstones and shales in roughly equal proportion (Carne, 1992).

The coal seams are generally vitreous to dull black in color fissile to massive bedded and brittle (Gish, 1995). Fissility varies with argillaceous content (Gish, 1995).

Sections of coal with moderate to high amounts of argillaceous matter are also more susceptible to shearing. Pyrite content is low and occurs as flakes or plates along bedding/shear planes. Calcite veins (<1mm) also occur infrequently within the coal seams (Gish, 1995). Competency of the coal intersected in drill holes is variable but was, for the most part, rated as high (Gish, 1995). Petrographic analysis of the coal seams noted that on a mineral-matter free basis, the coals from the Teslin Creek portion of the Division Mountain deposit contained an average of 54% vitrinite, predominantly desmocollinite. Macerals of the liptinite group (primarily sporangite) comprised on average 10% of the coal, and an average total inertite content (principally fusinites) was approximately 36% (Gish, 1996).

Internal stratigraphy and structure of the recessive coal measures is best illustrated on the geology map (Figure 7.3) and on cross sections showing drill-hole data in the Norwest 2008 Geology report.

Division Mountain Area

Coal measures have also been identified at the Red Ridge, Upper and Lower Cub Mountain and Corduroy Mountain, occurrences, all within 7.5 kilometers of Division Mountain.

As noted in section 6.1 of this technical report, extensive exploration during the period 1993-2008 at Division Mountain resulted in a significant historical reserve and resource estimate of Bituminous High Volatile B Coal. But there are other potential areas for mineralization within the Division Mountain property area.

Historical activities including geological mapping, trenching and other exploration activities in the Division Mountain area at Cub Mountain and Corduroy Mountain exposed northeast-dipping coal sequences and Tanglefoot Formation stratigraphy. Gish (2000) noted that these coals were possibly a fold repeat of the coal-bearing Division Mountain and Cairnes Syncline Tanglefoot Formation sequences. A description of the mineralization in these localities is now provided.

Red Ridge

The Red Ridge (also named Vowel, see Minfile 115H012, Appendix 2) coal occurrence was first discovered in 1907 by D.C. Cairnes of the Geological Survey of Canada. It lies approximately 5 kilometers along strike to the northwest of the Teslin Creek discovery area (see Figure 2.1) and occurs approximately 245 meters below the base of the Tantalus Formation (Carne, 1992).

In 1972 Arjay Kirker Resources Ltd. relocated the coal showing and measured a section from the top of Red Ridge northeast to the Nordenskiold River, which defines approximately 245 meters of Tantalus conglomerate overlying finer-grained Tanglefoot sedimentary rocks containing coal and carbonaceous shale.

In 1993, a 25 meter hand trench was cut near the break-in-slope to the Nordenskiold River valley. A further 15 meters was added to this trench in 1997. The trench profile consists of a blanket of glacial soil overlying a series of sub- horizontal layers of arkose-sandstone grit, sand lenses and coal fragment horizons varying in thickness from 20 to 70 cm. Structures within the coal fragment horizon are virtually nonexistent (Gish, 2000). The nature of the stratigraphy in the trench is most likely attributed to downhill creep of a coal horizon uphill at least 10 meters from the initial exposure and it was thought that the probable aggregate true width of the bedrock coal may be in the range of 12 to 15 meters (Gish, 2000). Gish (2000) made no comment as to whether the Red Ridge area should be further explored.

Upper and Lower Cub Mountain

The Upper Cub Mountain and Lower Cub Mountain showings (also known as Klusha, see Minfile 105E 028, Appendix 2) are located approximately 6 kilometers and 3 kilometers, respectively, to the northeast of the Division Mountain deposit (See Figure 2.1). The Lower Cub Mountain Showing is 1.5 kilometers due south of Cub Mountain and the Upper Cub Mountain Showings are located 1.0-1.3 kilometers north of Cub Mountain.

In 1997 a 30 meter long hand trench was completed on the Lower Cub Mountain occurrence. The trench exposed coal, shale, siltstone and sandstone of the Tanglefoot Formation. It was cut perpendicular to bedding near the location where numerous patches of coal float were found. Excavator trenching tested this area in 1998 but only encountered 12.8 meters of coaly shale in fifteen seams, the thickest being 9.1meters. Permafrost and overburden exceeding the 6 meter reach of the excavator prevented the exposure of bedrock in many of the trenches. Gish (2000) noted this this area warranted a 500 to 600 meter, southwest oriented excavator trench from the Tanglefoot-Tantalus contact at Cub Mountain towards Division Mountain.

Favorable stratigraphy was identified at the Upper Cub Mountain occurrence but drilling in 1999 suggests that the area lies near the contact of the Tanglefoot and Tantalus Formations and maybe higher in the stratigraphy compared to where coal has been stratigraphically discovered in the Division Mountain area.

Corduroy Mountain

Corduroy Mountain (see Minfile 105E 022, Appendix 2) is located approximately 6 kilometers east-southeast of the Division Mountain deposit (See Figure 2.1).

Tanglefoot Formation stratigraphy was explored by trenching on the west side of Corduroy Mountain in 1997. This area is 5 kilometers along strike to the southeast of the same stratigraphy exposed at Cub Mountain.

The 1999 trenching program completed a 360 meter long trench and uncovered an aggregate coal thickness of 23 meters in 25 coal seams, the thickest seam being 3 meters (Gish, 2000). Drilling in 1999 below the excavator trench exposed several additional coal seams with one hole returning an aggregate thickness of 17.96 meters of coal.

The rocks strike 130 to 150 degrees and dip 45 to 85 degrees to the northeast. Due to overburden thickness which exceeded the 6 meter limit of the excavator, the most favorable part of the lower Tanglefoot stratigraphy at Corduroy Mountain was not explored (Gish, 2000). Gish (2000) recommended that further excavation trenching should be used to define targets for resource definition.

Coal Quality

There is extensive information on coal quality in the Whitehorse Trough from studies conducted on the Division Mountain and Tantalus Mine deposits. Past studies suggested that the coal quality improves in the northernmost sections of the Whitehorse Trough. Studies also show that slight variations in coal quality can exist within individual deposits as is the case in Division Mountain. The following sections provide an overview of the coal quality data in these areas.

Division Mountain

During the drilling programs in the late 1990's, whole core samples of coal intersections were sent to Chemex Labs Ltd. of North Vancouver, B.C. in 1992, 1994 and 1995 and to Loring Laboratories Ltd. of Calgary, Alberta in 1997 for proximate analysis (Gish, 2000).

Coal quality data for the 1972 to 1997 drill core intersections are tabulated within the synoptic drill logs that were compiled in the internal compilation report. Analytical certificates from the 1997 diamond drill core samples were also detailed by Gish (2000).

A seam by seam listing of coal quality data for each drill-hole intersection is also available in company reports and presented in the internal compilation report. Gish (2000) also calculated a tonnage estimate for each intersection using an area of influence equal to half the distance to the next drill-hole but not exceeding 250 meters from the bedrock surface.

Gish (2000) noted that coal quality in the area of the relatively shallow-dipping southeast limb of the Division Mountain Syncline was better than the deposit average. For instance, he noted that the calorific value of the seam in this portion of the deposit was 5,315 cal/g versus the average of 5,161 cal/g, considered to be due largely to lower ash contents. Other seams in this portion of the deposit were also noted to have lower ash content (Gish, 2000), for example 8.7% ash (Seam 3d, Section 9+100N), 8.2% ash (Seam 3c, section 10+00N), 8.2% ash (Seam 3b, Section 9+700N), 13.0% ash (Seam 2c, section 9+700N), 12.3% ash (Seam 2b, 9+700N) and 14.3% ash (Seam 1b, 9+100N). Gish (2000) concluded that the coincidence of shallow-dipping, low ash coal in thick seams is even more important in the context of the excellent potential for further expansion of near-surface deposits

by additional drilling in the south-easternmost portions of the Division Mountain Syncline.

More recent coal quality tests were conducted by Norwest in 2005 and 2006. Prior to 2005, limited studies had been conducted with regards to washability analysis and estimating the potential of coalbed methane resources. Norwest completed proximate analysis on samples from the 2005 drilling program and calculated an average analysis for the Division Mountain deposit raw coal, based on an air dried basis, to be 2.8% Residual Moisture, 27.6% Ash content, 26.3% Volatile Matter, 43.7% Fixed Carbon, 0.45% Sulphur and a calorific value of 5,159 cal/g.

The average analysis corresponds to an ASTM rank of High Volatile Bituminous "B" Coal (Norwest, 2006). No coking test, long proximate analysis, or rank analysis has been performed on samples from the property (Norwest, 2008). The low Sulphur nature of the coal may reduce the need for expensive scrubbers in a thermal power generation facility (Carne, 1992). Trace element content is also very low with average selenium values of 0.6 ppm, antimony values of 0.5 ppm and arsenic values of 3.0 ppm (Carne, 1992).

It was noted by Norwest that in a possible scenario of the coal being mined and provided to a mine-mouth power generation facility there would be no need for the coal to be washed. However, if the Division Mountain coal was to be exported to global markets, they noted it would need to be washed, prior to shipment.

The author has been unable to verify the coal quality data though the procedure for testing and the related analysis appear to be consistent with standard coal testing procedures at that time and therefore it is considered that the results have a high degree of probability to be reliable. Yukoterre would need to conduct their own verification of coal quality at Division Mountain as the new owner of the property.

Coal Bed Methane and Conventional Hydrocarbons

In 1992, R.C. Carne was one of the first geologists to discuss the potential for coal bed methane in the Division Mountain area. Carne at that time, reported that "the coal has a high liptinite content" and when he coupled that with the high volatile rank, he concluded that was evidence that the potential for significant coalbed methane resource was high.

Coal bed methane is a gas created as a result of coal formation. Natural gas is approximately 74% methane. Gas from coal beds is approximately 98% methane and is invariably low in hydrogen sulphide and sulphur dioxide, regardless of the Sulphur content of the coal and coal measures (Carne, 1992). Coal bed methane has a calorific value similar to, and substitutes readily for, natural gas (Carne, 1992). The gas content of a coal bed is variable and is related to gas formation during coalification as well as the post-depositional history and current geological condition of the coal bed.

In the 1990's the Alberta Geological Survey standard used for estimating coal bed methane potential was 13.5 cubic meters of gas per tonne of bituminous coal in seams greater than 0.5 meters thick, half of which is considered to be recoverable. Carne (1992) used this methodology to estimate that the recoverable coal bed methane potential of Division Mountain could be as high as 75 billion cubic meters.

Lowey et al., (2009) evaluated over 600 samples from the Aksala, Richtofen, Tanglefoot and Tantalus Formations using Rock-Eval programmed pyrolysis and combustion testing complimented with a study of thermal alteration indices (TAI) of palynomorphs, conodont alteration indices (CAI) and vitrinite reflectance. The Povoas and Nordenskiold Formations were not sampled as they consist of volcanic and volcanoclastic rocks, and hence have no source rock potential. Both the Tanglefoot and Tantalus Formations were defined to be good source rocks and that are immature to early-mature and gas-prone. They noted that potential petroleum (gas) generative intervals occur

at surface and in the shallow subsurface in deltaic mudstones (Tanglefoot Formation) and fluvial mudstones (Tantalus Formation). They concluded that the most prospective areas for petroleum exploration included Five Finger Rapids, Division Mountain and Tantalus Butte and in the northern portion of the Whitehorse Trough. As previously noted, with the exception of Tantalus Butte, the coal exploration licences cover all of these prospective areas for petroleum exploration.

Petrel Robertson Consulting Ltd. who completed an assessment of the petroleum resource potential of the Whitehorse Trough for the Yukon Geological Survey in 2012 also concluded that there was hydrocarbon prospectivity in nine plays within the Whitehorse trough region, namely:

1. Cache Creek Assemblage Structural (speculative)
2. Lewes River Structural
3. Hancock Stratigraphic
4. Tanglefoot (Structural)
5. Tanglefoot (Stratigraphic)
6. Tanglefoot CBM (Speculative unconventional)
7. Richtofen Stratigraphic/Tight shale/shale gas (Speculative unconventional)
8. Tantalus Stratigraphic/Structural
9. Tantalus CBM (Speculative unconventional)

Deposit Types

As specified in GSC Paper 88-21 coal deposits are commonly classified with respect to their “Geology Type”. Coal “Geology Type” is a definition of the amount of geological complexity, usually imposed by the structural complexity of the area. The classification of a coal deposit by “Geology Type” determines the approach to be used for the resource/reserve estimation procedures and the limits to be applied to certain key estimation criteria. The identification of a particular “Geology Type” for a coal property defines the confidence that can be placed in the extrapolation of data values away from a particular point of reference such as a drill hole.

The classification scheme of GSC Paper 88-21 is similar to many other international coal reserve classification systems but it has one significant difference. This system is designed to accommodate differences in the degree of tectonic deformation of different coal deposits in Canada. Four classes of Geology Type are provided for that range from the first, “low”, which is for Plains type deposits with low tectonic disturbance; to the fourth, “severe”, which is for Rocky Mountains type deposits.

The Division Mountain property falls within the ‘moderate’ category based on broad open folds (wavelengths from 400 m to well over 1.5 km), relatively uncommon faults (displacements ranging from 10’s of meters up to 100 m) and average bedding inclinations of approximately 50° (range from 25° to 72°).

Coal deposits are further classified on the basis “Deposit Type” as defined in GSC Paper 88-21 which refers to the extraction method most suited to the coal deposit. There are four categories, which are:

1. Surface
2. Underground
3. Non-conventional
4. Sterilized.

The Division Mountain deposit is considered to be a “Surface” mineable deposit.

Exploration

Exploration on the Division Mountain Property by Yukoterre in late May and early June of 2018 was

designed to test the possible extension of the coal seams from the northeastern corner of the proposed Pit #4 outlined by Norwest (2008) to verify the proposed pit boundaries and test the possible extension of coal seams identified on the surface in that immediate area of the property.

The author completed reconnaissance traverses of the area northeast of the proposed Pit 4 in Norwest (2008). The reconnaissance efforts served to identify the presence of several coal seams at surface the extent of which was not possible to fully determine. In addition, examination of past data also indicated that coal seams existed 300-400 meters west of the proposed Pit 4 and also possible outcrops of coal on the west side of Division Mountain. Due to lack of trail access and the limited scope of the 2018 exploration program it was not possible to investigate these areas.

The 2018 exploration program and additional reviews of previous work concluded that any future exploration efforts should include and examination of areas with coal signs yet to be explored as these areas hold potential to expand the known coal deposits, and include:

- An area west of proposed Pit 4 with coal float identified over an area of up to 400 meters in strike and 250 meters in width.
- Possible coal outcrops on the western side of Division Mountain.
- Testing of known coal outcrops in the Corduroy Mountain area as this could be a repeat structure of the Cairnes Syncline.

These three areas hold the potential to identify repeat structures to the known structures in the Division Mountain area that could host significant coal deposits.

The area west of Proposed Pit 4 is considered to be of the highest priority. This could be completed through the construction of new trails into the area, prospecting, geological mapping and trenching to verify the existence of coal seams/outcrops and then potentially followed by reverse circulation or conventional drilling techniques. It was also observed that coal seams might exist from historical geological maps by Carne et al (2005) but access to that part of the property would be a lot more challenging due to the lack of access trails and the steep topography of Division Mountain. Access would have to be constructed from the southwestern portion of the property and therefore examining the southwestern portion of the property initially is a more practical approach to the future exploration sequence for the Division Mountain area. These areas were deemed as having potential to host additional significant coal seams that might potentially be the western portion of the major synclinal fold known to host the coal deposits in the eastern side of Division Mountain.

In addition reconnaissance efforts of Corduroy Mountain indicated that access to the area was relatively easy due to moderate topography and future exploration with a focus on additional drilling of the known coal seams in that area should be considered by Yukoterre. In addition, other coals seams known to occur in the Division Mountain area remain relatively unexplored and provide Yukoterre with the potential to find new coal deposits in the area.

The most effective exploration techniques to explore for coal in the Division Mountain remain to be trail construction to provide access for initial trenching followed by reverse circulation or conventional diamond drill methods.

Drilling

Rotary Air Blast Drilling

Rotary Air Blast (“RAB”) drilling was completed by Ground Truth Exploration Ltd. from Dawson City. The four RAB drill-holes were completed in late May and early June of 2018. They were conducted to test the possible extension of coal seams on the northeastern corner of the proposed Pit 4.

A rotary air blast (RAB) drill had been selected for the work as it was thought to be highly portable in nature, would not have any environmental impacts, and could complete drilling in a time effective manner. However, the RAB drill used suffered numerous mechanical breakdowns, could not drill

through any stratigraphy once wet conditions were encountered, and even though it was highly portable set up times were slow and drill footage productivity was less than 30% of original estimates provided by the contractor, Ground Truth Exploration Services.

Crews traversed the access trail daily to the work area. The trail is generally 3-4 meters wide and is currently passable with an ATV and/or a 4WD pickup. Minor upgrading of the trail would be required to allow for improved access as there are a couple of areas along the trail that are flooded and in addition there are two major creek crossings. The daily traverse by ATV took crews approximately 75 minutes to traverse in each direction from Scuttlebutt Lodge to the drill sites.

The results demonstrated that the seams in this area beyond the proposed extent of the Pit as outlined by Norwest (2005) were not of any significance and therefore the proposed pit outline by Norwest was determined to be highly accurate.

Sample Preparation, Analyses and Security

No samples were tested in the 2018 exploration program.

Data Verification

Yukoterre has not completed any verification of historical data.

Mineral Processing and Metallurgical Testing

There has been very limited work done on metallurgical testing and processing techniques during the exploration history of this property and none completed on the exploration samples obtained during the 2018 exploration program.

It is therefore not considered applicable for reporting at this time. Initial results by Norwest in 2008 indicated that the coal may require washing after crushing for market acceptability but would not be necessary for use in a mine mouth power generating facility. This data was not verified by the author and as previously mentioned coal quality issues would need verification by Yukoterre as the new property owner.

Mineral Resource Estimates

There are no current mineral resource estimates on the Division Mountain property.

Historical mineral resources identified by Norwest (2008) have not been verified by Yukoterre. See section 6.1 for more information related to historical estimates.

Mineral Reserve Estimates

There are no current mineral reserve estimates on the Division Mountain property.

Historical mineral reserves identified by Norwest (2008) have not been verified by Yukoterre. See section 6.1 for more information related to historical estimates.

Mining Methods

Not applicable to this report.

Recovery Methods

Not applicable to this report.

Project Infrastructure

Not applicable to this report.

Market Studies and Contracts

There have been limited market studies done to date for this project. McLoskey et al (2008) conducted studies on coal prices for the feasibility study prepared by Norwest. However these are out of date and at the time were also designed to examine the coal export markets.

Future studies on coal pricing to a mine mouth located power generation facility will need to be accompanied with detailed studies on the marketability of the electricity within Yukon's isolated electrical grid or for new industrial developments will need to be completed in the future in order to further determine the actual viability of any coal mine in the Division Mountain area.

Environmental Studies, Permitting and Social and Community Impacts

Environmental Setting

The Division Mountain project is located within the Boreal Cordillera ecozone which covers southern Yukon and Northern British Columbia.

The ecozone consists of several mountain ranges of the Northern Rockies, as well as several plateaus. Ice age glaciers covered virtually all the plateaus, which are heavily eroded and contain large deposits of glacial debris. The mountain ranges of the ecozone are generally lower than those of the coastal ranges. Summers are brief and cool, winters typically long and cold. Mean annual temperatures are -0.7°C - -0.3°C , with the average temperature rising above 10°C from one to three months per year, depending on elevation. Mean annual precipitation is 460-700mm, with 30-65% falling as snow. Above treeline (1,000 – 1,400 meters) the weather may be considered alpine, with much cooler temperature and permanent ice and snow cover at high elevations.

Lower elevations are generally forested with White Spruce and lesser density of Pine and Aspen. Subalpine Fir becomes more abundant at progressively higher elevations, eventually giving way to deciduous shrubs such as scrub birch and willows. The highest elevations consist of alpine vegetation such as shrubs, herbs moss and lichen.

Species of wildlife include Elk, Moose, Caribou, mountain goats and sheep, bears, as well as several species of migratory and sedentary birds.

Permitting

The mining industry in Yukon is managed according to several key pieces of legislation. In general, The *Yukon Environmental and Socio-economic Assessment Act* (YESAA), *Yukon Waters Act* and *Territorial Lands (Yukon) Act*, and *Yukon Coal Regulations* must all be addressed prior to the issuance of any authorizations that would permit the Division Mountain Coal Project to proceed and/or exploration of the current licence holdings.

Permitting – Exploration Licence

In 2017, the initial stage of work for Yukoterre Resources Inc. was to renew previous exploration permits so that new work programs could be conducted. Yukoterre Resources Inc. filed and received approval for an exploration permit from the Chief of Mining Lands, Yukon Energy, Mines and

Resources to conduct a limited drilling program that was subsequently completed in June, 2018.

The filings involved submitting a Form 1 application for a Class 3 Level exploration permit to the Designated Office of the Yukon Environmental and Assessment Board in Whitehorse, Yukon. These document filings were quite detailed and required various support documents including emergency response plans, archeological reports (if available), oil spill response plans, maps depicting proposed areas of exploration, proposed access routes, and a variety of other documentation. Consultation efforts with affected First Nations, who have traditional lands in the area, were also conducted. Typically the primary contact in this situation within the First Nations government is the Director of Lands (or equivalent title) and the author held meetings with three of the four affected First Nations to discuss the proposed program. As the work program undertaken was consistent with previous work programs conducted in the Division Mountain area there will be few to no problems in obtaining the permit.

Assessments formerly undertaken by the Yukon government for any exploration permits are conducted by the arms-length Yukon Environmental and Socio-economic Assessment Board (YESAB) through one of its six Designated Offices in Yukon. In the instance of this project, the applicable designated office is located in Whitehorse, Yukon. YESAB operates under YESAA which stands for the Yukon Environmental and Socio-economic Assessment Act. This relatively new federal legislation is now fully in effect in the Yukon. It provides for a single environmental and socio-economic assessment process for projects under federal, territorial or First Nation jurisdiction. This assessment is part of the overall review and approval process that will apply to all exploration and development activities for resource and industrial sectors.

YESAA assessors must conduct their assessments within specific time lines. As part of the assessment, they seek input from government and First Nations and provide opportunities for the public to provide comments on proposed projects. The assessment process basically consists of identifying the environmental and socio-economic effects of a project and appropriate mitigation before providing a recommendation to the Decision Body (government) on whether a project should proceed. The YESAB has an on-line public registry that is accessible to anyone who has access to a computer with a connection to the internet. This registry contains all information related to YESAA assessments. Once the Yukon government reviews the recommendations from the assessor, it will then decide whether to accept, reject or vary the assessment recommendation and state this decision in a Decision Document. The Yukon government continues to be the decision maker and to be responsible for regulating and enforcing permits and licenses for development projects which fall under its legislated authority.

In simple terms, the regulatory process is led by the regulator and generally begins with an application phase where the proponent applies for a permit or license to undertake a regulated activity. The regulator then reviews the application to see whether it is complete and meets certain regulatory requirements. The regulatory phase ends with the regulator either issuing the proponent a permit or license or rejecting the proponent's application. Steps on the left side of the flowcharts are part of the regulatory process.

In summary the following are the steps for an exploration permit:

1. The proponent contacts the Designated Office and fills out assessment Form 1.
2. The Designated Office conducts the assessment of the project proposal by seeking input from government agencies, First Nations, interested parties and the public. The time from the acceptance of the application by the assessor to the end of the public input period can take up to 30 days or be extended up to 86 days, if required.
3. The assessor concludes the assessment based on input received and produces an assessment report with the recommendation on whether the project should proceed. This process can take up to 14 days.
4. The Yukon government Decision Body issues a Decision Document accepting,

varying or rejecting the assessor's recommendation within 30-90 days of receiving the recommendation. Consultation with applicable Yukon First Nations is undertaken by Yukon during this time.

5. If the Yukon government Decision Body determines that the project may proceed, the proponent receives the Decision Document and fills out the applicable exploration class notification form in conformity with the Decision Document and submits it to the appropriate Mining Lands district office of EMR. If the Decision Body determines that the project may not proceed, the project is rejected and the proponent is notified.
6. If the Exploration Class notification is approved, the proponent is notified and can proceed with the exploration program.

Lease Acquisition

It is proposed that as part of the permitting process for the 2019-2020 exploration season, Yukoterre also apply for a coal lease to cover the known historical resources in the southwestern portion of the Division Mountain deposit and it is also suggested that the lease cover additional prospective ground in this area. The features of land ownership associated with a lease and with a coal licence were previously described in Section 4.0 of this report.

As field work involving the staking of posts has to be completed to fulfill the terms of any lease application, it is proposed that Yukoterre complete that work in the 2019 field season and then complete an application for a new coal lease for the Division Coal Mine Property. The application for the coal lease is sent to the Chief of Mining Lands in Yukon EMR, which is then reviewed and a recommendation is made to the Minister for approval. The timelines associated with this application are not defined.

First Nations Relations and Consultation

First Nations have demonstrated that they are willing to work with mining companies and support their projects in exchange for benefits to the local community. Many of these new partnerships are reflected in socio-economic agreements designed to foster more local benefits.

In the area of Division Mountain there are four overlapping traditional territories of the following Yukon First Nations:

1. Champagne and Aishihik First Nation, Haines Junction Yukon
2. Kwanlin Dun First Nation, Whitehorse, Yukon
3. Ta'an Kwach'an First Nations, Whitehorse, Yukon
4. Little Salmon-Carmacks First Nation, Carmacks, Yukon

For the 2018 exploration permit, Yukoterre conducted consultation activities with these First Nations Groups, and with the exception of Little Salmon Carmacks First Nation, conducted face-to-face meetings. Initial concerns on the proposed program were identified and addressed. It was also noted that if the Division Mountain Project ever did proceed to development there would be a need for Yukoterre to establish socio-economic and environmental agreements with each First Nation affected through traditional land rights. These are typically negotiated with the Chief and Council of each First Nation. Elements of these agreements typically include specialized training, scholarships, contracting opportunities, environmental monitoring, recognition and protection of traditional lifestyles, employment and training opportunities, and equity participation, are some of the topics discussed in these negotiations.

First Nation economic development corporations involve themselves in helping to facilitate business relations with local First Nations companies and/or strategic alliances.

Key considerations for consultation with First Nations that should be addressed by companies when researching and developing a project proposal for either exploration or licensing applications include (After Yukon EMR, 2017):

- identify nearby communities
- identify key contact people in nearby communities (e.g. chief, councillors, lands officer, administrators, mayor)
- identify issues and concerns of importance to the communities
- communicate the company's short and long term plans to the community
- be aware of local cultural differences and communication styles
- initiate meetings to exchange information between the company president and the chief
- Director of Mineral Resources or other senior official(s)

The Yukon Chamber of Mineral Resources based in Whitehorse is also an excellent resource to aid companies in preparing for Permitting and First Nations Consultation processes.

Capital and Operating Costs

This is not applicable to this report.

Economic Analysis

This is not applicable to this report.

Adjacent Properties

This technical report does not utilize any data and/or interpretations from adjacent properties. Nor are there any known adjacent coal properties to the knowledge of the author.

Other Relevant data and Information

This is not applicable to this report.

Interpretation and Conclusions

The Division Mountain property potentially hosts significant tonnages of high volatile bituminous "B" coal. Most of the coal occurs in the Middle to Upper Jurassic Tanglefoot Formation, which was deposited in a complex fluvial-deltaic depositional environment. The geology type is "moderate" according to the guidelines set forth in Geological Survey of Canada paper 88-21.

Exploration has focused on a 6.5 kilometer long by 1.5 kilometer wide southeast trending area immediately adjacent to Division Mountain. Drilling identified an historical 52.5 million tonne resource of high volatile bituminous "B" coal that is not being treated as a current estimate and has not been verified by the author and would need considerable exploration efforts to be verified by Yukoterre. The author has not determined what would be required for a verification of the historical resource as the current focus of Yukoterre is to identify additional coal deposits at Division Mountain.

Yukoterre has over 62,000 hectares of land within their current coal exploration licences all of which cover potential coal-bearing (and possibly gas and oil-bearing) strata within the Whitehorse Trough region. Many portions of the licence areas have had little to no exploration for coal conducted on them. Therefore there is the potential to identify new coal deposits at Division Mountain and the surrounding area, within the current licence holdings. Previous exploration efforts and recent Yukon

government studies have also identified that the Division Mountain Area has the potential to host coal bed methane and conventional/unconventional petroleum resources. There has been no exploration for coal bed methane and/or hydrocarbons in the Whitehorse Trough to date.

Recommendations

The project recommendations reflect the current objective of Yukoterre to further identify additional coal deposits at Division Mountain.

The recommendations for 2019 and 2020 are therefore as follows:

- Trail Construction: Trail access is required to be constructed in order to access areas in the southwestern portion of the property area
- Exploration: A comprehensive exploration program should be conducted in the Division Mountain area focusing on the unexplored portions of the property and in particular a possible western limb of the Division Mountain Syncline. This will involve detailed prospecting and geological mapping at a 1:5000 scale and possibly trenching.
- Staking and Lease Application: Staking will be completed and a lease application will be filed with Yukon EMR.
- Permitting: the current Land Use permit expires in November of 2019 so it is recommended that the work program be completed prior to the expiry of the permit. Otherwise permitting of the project work will be required and is not included in the following project budget.

Proposed Budget

Site Reconnaissance and Staking	\$8,000
Lease Application	\$400
Trail Construction and Development	\$13,700
Trenching	\$35,300
Testing and Reporting	\$32,150
Project Contingency	<u>\$9,950</u>
 Total	 <u>\$100,000</u>

The proposed exploration budget is \$100,000.

USE OF PROCEEDS

The Agent has agreed to use its commercially reasonable efforts to secure subscriptions for the Common Shares offered pursuant to the Offering in the provinces of Ontario, Alberta and British Columbia. If all of the Common Shares offered pursuant to this Offering are sold, the gross proceeds to the Corporation will be \$350,000.

This offering is subject to the completion of a minimum subscription of 3,500,000 Common Shares for gross proceeds to the Corporation of \$350,000. If the minimum subscription is not completed within 90 days of the issuance of a receipt for the (final) Prospectus or, if a receipt is issued for an amendment to the (final) Prospectus, within 90 days of the issuance of such receipt and, in any event, not later than 180 days from the date of the receipt for the (final) Prospectus, or such other time as may be consented to by the Agent and Subscribers, all subscription will be returned to Subscribers without interest or deduction unless the subscribers have otherwise

instructed the Agent.

Funds Available

The gross proceeds to the Corporation from the sale of the Common Shares offered hereby will be \$350,000. The total funds available to the Corporation at the closing of the Offering, after deducting the estimated expenses of the Offering of \$60,000, the Agent's Fee of \$26,250 and the Corporate Finance Fee of \$25,000 (plus HST), and including the Corporation's estimated working capital deficit as at May 31, 2019 of \$40,993, are estimated to be \$197,757. The Corporation intends to expend its available funds for the following principal purposes:

Principal Purposes

Expenses	Funds to be Used⁽¹⁾
To pay the estimated cost of the recommended exploration program and budget on the Division Mountain Property as outlined in the Technical Report	\$100,000
To provide funding sufficient to meet administrative costs for 12 months	\$97,542
Unallocated working capital	\$215
Total	\$197,757

Notes:

- (1) The Corporation intends to spend the funds available to it as stated in this Prospectus. There may be circumstances, however, where for sound business reasons a reallocation of funds may be necessary.
- (2) See "Narrative Description of the Business – Recommendations" above for a summary of the work to be undertaken and a breakdown of the estimated costs.

Upon completion of the Offering, the Corporation's working capital available to fund ongoing operations will be sufficient to meet its administrative costs and exploration expenditures for 12 months. Estimated administrative expenditures for the 12 months following completion of the Offering are comprised of the following:

Administrative Expenses	Funds to be Used
Office Rent	\$12,000
Management Services, Administration Services and Office Supplies	\$54,542
Transfer Agent	\$18,000
Legal	\$0
Accounting and Audit	\$13,000
Total	\$97,542

Since its incorporation on February 8, 2017, the Corporation has not generated cash flow from its operations and has incurred certain operating losses. Such losses and negative operating cash flow are expected to continue since funds will be expended to pay its administrative expenses and to conduct the recommended Phase 1 exploration program on the Division Mountain Property. Although the Corporation has allocated \$97,542 (as above) from the Offering to fund its ongoing operations for a period of 12 months and expects to have \$215 in unallocated working capital, the Corporation will be reliant on future equity and/or debt financings for its funding requirements.

Management of the Corporation believes that, based on currently available resources and the proceeds of the Offering, the Corporation will be able to complete the Phase 1 exploration program.

The Corporation intends to spend the funds available to it as stated in this Prospectus. There may be circumstances, however, where for sound business reasons, a reallocation of funds may be necessary. The Corporation's Chief Financial Officer will be responsible for the investment of unallocated funds.

Stated Business Objectives and Milestones

The Corporation's business objectives in using the available funds are to:

- (a) obtain a listing of its Common Shares on the Exchange; and
- (b) conduct the Phase 1 exploration program on the Division Mountain Property recommended in the Technical Report.

The listing of the Corporation's Common Shares on the Exchange is subject to the Corporation fulfilling all of the requirements of the CSE and is expected to occur concurrently with completion of this Offering. Depending on the timing for the completion of the Offering, the recommended exploration program is expected to be conducted in the summers of 2019 and 2020. The Phase 1 exploration program may extend into the summer 2020 season depending on the timing of the closing of the Offering. If such a scenario occurs, the Corporation will reduce its administrative and exploration costs in preparation for the continuation of the Phase 1 exploration program in 2020 such that the \$100,000 exploration budget would still be sufficient to cover the full Phase 1 exploration program. This scenario is possible as the geologist and administrative staff are consultants hired on an hourly basis.

SELECTED FINANCIAL INFORMATION AND MANAGEMENT DISCUSSION AND ANALYSIS

Annual Information

The following selected financial information is subject to the detailed information contained in the audited and unaudited financial statements of the Corporation and notes thereto appearing elsewhere in this Prospectus. The selected financial information is derived from the audited financial statements for the period from incorporation to October 31, 2017, for the fiscal year ended October 31, 2018 and for the second quarter ended April 30, 2019. The Corporation has established October 31 as its financial year end.

	Period Ended October 31, 2017 (audited)	Fiscal Year Ended October 31, 2018 (audited)	Second Quarter Ended April 30, 2019 (unaudited)
Total Revenues	Nil.	Nil.	Nil
Consulting and Management Fees	\$22,285	\$40,744	\$14,200
Professional fees	\$16,175	\$9,855	\$6,435
General office expenses	\$3,016	\$2,097	\$11,500
Interest expenses	\$0	\$8,790	\$5,264
Net loss and comprehensive loss	\$41,483	\$61,484	\$37,399
Basic and diluted loss per Common Share	\$0.02	\$0.01	0.01
Total assets	\$219,679	\$331,989	\$356,681
Total liabilities	\$15,162	\$188,956	\$40,993
Total shareholders' equity	\$204,517	\$143,033	\$315,688

Dividends

There are no restrictions that would prevent the Corporation from paying dividends on the Common Shares; however, the Corporation has neither declared nor paid any dividends on its Common Shares since incorporation and has not established any dividend or distribution policy. The Corporation does not anticipate paying any dividends on its Common Shares in the foreseeable future.

Management's Discussion and Analysis

The following discussion of the operating results and financial position of the Corporation should be read in conjunction with the audited financial statements and related notes for the fiscal year ended October 31, 2018 and the second quarter ended April 30, 2019. The financial statements are included in this Prospectus and should be referred to when reading this disclosure. The financial statements summarize the financial impact of the Corporation's financings, investments and operations, which financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Except as otherwise disclosed, all dollar figures included therein and in the following MD&A are quoted in Canadian dollars. The effective date of this management's discussion and analysis is October 31, 2018 or April 30, 2019 as indicated.

Year Ended October 31, 2018

Overview

The Corporation is an independent Canadian coal exploration company focused on pursuing the exploration, evaluation and development of resource assets. Formerly known as 2560344 Ontario Inc., Yukoterre was incorporated under the laws of the Province of Ontario, Canada by Articles of Incorporation, dated February 8, 2017, and on October 25, 2017 was renamed "Yukoterre Resources Inc." The principal activity of the Corporation is the exploration and evaluation of the Division Mountain Property. The Corporation's head office is located at 65 Queen Street West, 8th floor, Toronto, Ontario, M5H 2M5, Canada.

Division Mountain Property Acquisition

On August 8, 2017, the Corporation entered into a purchase agreement with PitchBlack Resources Ltd. in respect of the purchase of the Division Mountain Property in the Yukon Territory. The Division Mountain Property is located 90 km northwest of Whitehorse in Yukon Territory. The purchase included a total of 17 coal licenses (CYW0137 to CYW0138 and CYW0143 to CYW0157) and five coal leases (CMW3000 to CMW3004). In late 2018, the Corporation renewed four of the coal licenses (CYW0154 to CYW0157) which covers the Division Mountain Property. The remaining coal licenses, which covered areas outside of the Division Mountain Property, were allowed to lapse.

On August 21, 2017, the Corporation, closed the purchase of Division Mountain Property in consideration for cash payment of \$100,000 to PitchBlack Resources Ltd. (a NEX-listed company at the time). The Corporation assumed all property maintenance payments and obligations and indemnified PitchBlack Resources Ltd. against any environmental or reclamation obligations and liabilities.

The Issuer is responsible for any breach of a representation, warranty or covenant made by the Corporation under this agreement up to an aggregate loss of \$100,000 as well as any environmental liabilities associated with the Division Mountain Property arising with respect to the activities of the Issuer subsequent to closing. No such obligations or indemnifications have been paid to Pitchblack to date.

The Corporation is not a related party to PitchBlack Resources Ltd., its officers, directors or other

insiders. The sale transaction was an arm's length transaction for the purposes of the policies of the NEX Board of the TSX Venture Exchange. This transaction was approved by the NEX Board of the TSX Venture Exchange.

Selected Yearly Information

For the year ended October 31, 2018, the Corporation reported a loss of \$61,484 or \$0.01 per share. For the period from incorporation (February 8, 2017) to October 31, 2017, the Corporation reported a loss of \$41,483 or \$0.02 per share. The Corporation had a working capital deficit of \$186,646 for the year ended October 31, 2018 compared to a working capital deficit of 158 for the period from incorporation (February 8, 2017) to October 31, 2017.

The Corporation has and expects to continue to report negative earnings until the Corporation's exploration program finds and develops producing assets. The Corporation will continue to utilize proceeds from financing and equity issuances to fund its exploration program and general and administrative operating costs.

As at October 31, 2018, the Corporation had no operating assets and expects to generate negative cash flow from operations for the foreseeable future.

Review of Financial Results

The Corporation recorded consulting and management fees of \$9,600 and \$40,744 for the three months and year ended October 31, 2018. The Corporation recorded consulting and management fees of \$10,442 for the three months ended October 31, 2017 and \$22,285 for the period from incorporation (February 8, 2017) to October 31, 2017.

The Corporation recorded \$3,000 and \$9,855 in professional fees for the three months and year ended October 31, 2018, mainly for audit fees. Professional fees for the three months and for the period from incorporation (February 8, 2017) to October 31, 2017 was \$16,175 for audit and legal fees.

General office expenses of \$269 and \$2,097 for the three months and year ended October 31, 2018 relate to office costs, telephone and computer expenses. The Corporation recorded general office expenses of \$1,022 for the three months ended October 31, 2017 and \$3,016 for the period from incorporation (February 8, 2017) to October 31, 2017. The Corporation strives to minimize general and administrative type expenses.

Cash Flows

Cash used by operating activities for the year ended October 31, 2018 was \$39,781 and cash used by operating activities for the period from incorporation (February 8, 2017) to October 31, 2017 was \$32,480. Expenditures during the years was primarily related to consulting and professional fees. For the year ended October 31, 2018, the Corporation received \$157,000 in loans from 2227929 Ontario Inc. which accrues interest at 12% with no specific maturity date. Cash raised by financing activities of \$246,000 for the period from incorporation (February 8, 2017) to October 31, 2017 relates to a private placement held on June 29, 2017. Investing activities of \$125,004 and \$204,675 was used to for developing the exploration and evaluation asset for the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017.

Liquidity and Capital Resources

On December 18, 2017, the Corporation entered into loan agreements with 2227929 Ontario Inc. Pursuant to the terms of the loans, 2227929 Ontario Inc. agreed to lend the Corporation \$52,000

on December 18, 2017, \$20,000 on May 25, 2018 and \$10,000 on June 12, 2018 at an interest rate of 12% per year with no specified maturity date. A further \$40,000 was loaned on August 13, 2018 and \$35,000 on August 22, 2018. On October 31, 2018, the loan balance was \$165,790 including accrued interest.

As at October 31, 2018, the Corporation had working capital deficit of \$186,646 and \$1,060 in cash compared to a working capital deficit of \$158 and cash of \$8,845 for the period from incorporation (February 8, 2017) to October 31, 2017. The Corporation's primary cash flow needs are for development of its mining and exploration activities, administrative expenses and working capital.

At present, the Corporation has no producing properties and consequently no revenue generating assets or operations. The recovery of the amounts expended for resource properties are dependent on the ability of the Corporation to obtain necessary financing to complete the development of the Division Mountain Property or other potential projects and attain future profitable production. The Corporation's financial success will depend on its ability to raise financing to construct potential projects. At present, the Corporation has no established sources of income and the success of its exploration and development programs will be contingent upon the Corporation's ability to raise sufficient equity financing on terms favourable to the Corporation. The Corporation does not expect to generate any internal cash flows to help finance the development costs.

Going Concern

Yukoterre is an exploration stage enterprise. To date, the Corporation has not found proven reserves. The business of exploration for coal involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable operations. The Corporation's continued existence is dependent upon the acquisition of coal properties, preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Corporation to raise alternative financing, if necessary, or alternatively upon the Corporation's ability to dispose of its interests on an advantageous basis. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Corporation's ability to continue as a going concern. Consequently, the Corporation's ability to continue as a going concern is dependent on the Corporation's ability to obtain additional financing if, as and when required, and, ultimately, the attainment of profitable operations or the profitable sale of the Corporation's exploration interests.

Commitments and Contingencies

Management contracts

The Corporation is party to certain management contracts. Currently, these contracts require payments of \$Nil (October 31, 2017 - \$Nil) to be made upon the occurrence of a change in control to the officers of the Corporation. The Corporation is also committed to payments upon termination of approximately \$9,600 (October 31, 2017 - \$9,600) pursuant to the terms of these contracts. As a triggering event has not taken place, these amounts have not been recorded in these financial statements.

Contingencies

Coal operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Corporation's operations may require licenses and permits from various governmental authorities in the countries in which it operates. There can be no assurance that the Corporation will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Environmental

The Corporation's exploration and evaluation activities are subject to laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Corporation believes its operations are materially in compliance with all applicable laws and regulations. The Corporation has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Share Capital and Off-Balance Sheet Arrangements

As at the date of this management discussion and analysis, there are 4,920,000 common shares outstanding.

There are no off-balance sheet financing arrangements.

Related Party Transactions

Key management personnel compensation

As at October 31, 2018, no compensation or options have been issued to the executive officers of the Corporation.

Changes in Accounting Policies

The Corporation will monitor the development of the relevant IFRS and change its accounting policies accordingly.

New accounting standards

During 2018, the Corporation adopted a number of new IFRS standards, interpretations, amendments and improvements of existing standards. These new standards and changes did not have any material impact on the Corporation's consolidated financial statements.

IFRS 9 – Financial Instruments ("IFRS 9") was issued July 2014 and introduced new requirements for financial assets. This standard addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments, and such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. A new general hedge accounting standard, which aligns hedge accounting more closely with risk management also forms part of IFRS 9. The mandatory effective date is for annual periods beginning on or after January 1, 2018 and must be applied retrospectively with some exemptions.

IFRIC 22 – Foreign Currency Transactions and Advance Consideration ("IFRIC 22") was issued in December 2016 and addresses foreign currency transactions or parts of transactions where there is consideration that is denominated in a foreign currency; a prepaid asset or deferred income liability is recognized in respect of that consideration, in advance of the recognition of the related asset, expense or income; and the prepaid asset or deferred income liability is non-monetary. The interpretation committee concluded that the date of the transaction, for purposes of determining the exchange rate, is the date of initial recognition of the non-monetary prepaid asset or deferred income liability. IFRIC 22 is effective for annual periods beginning on or after January 1, 2018.

Critical Accounting Estimates and Judgements

The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results could differ from those estimates and these estimates could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Assets' carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Corporation considers includes changes in the market, economic and legal environment in which the Corporation operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets and goodwill. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Corporation's assets, costs to sell the assets and the appropriate discount rate.

Reductions in coal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Corporation's exploration and evaluation assets.

Income, value added, withholding and other taxes

The Corporation is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Corporation's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Corporation recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Corporation's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Corporation's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

Contingencies and provisions

Contingencies can be either possible assets or possible liabilities arising from past events which, by their nature, will only be resolved when one or more future events not wholly within our control

occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. In assessing loss contingencies related to legal proceedings that are pending against us or un-asserted claims, that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Corporation and its legal counsel evaluate the perceived merits of any legal proceedings or un-asserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent liability or assessing the impact on the carrying value of assets. Contingent assets are not recognized in the financial statements.

Financial Instruments and Risk Management

Fair value

Yukoterre. financial instruments as at October 31, 2018, consist of cash, accounts receivable and accounts payable, accrued liabilities, loans payable and the amounts reflected in the statements of financial position approximate fair value due to the short term maturity of these instruments.

Financial instruments recorded at the reporting date at fair value are classified into one of three levels based upon the fair value hierarchy. Items are categorized based on inputs used to derive fair value based on:

- Level 1 - quoted prices that are unadjusted in active markets for identical assets or liabilities;
- Level 2 - inputs other than quoted prices included in level 1 that are observable for the asset/liability either directly or indirectly; and
- Level 3 - inputs for the instruments are not based on any observable market data.

The Corporation had no financial instruments recorded at fair value in the statements of financial position at October 31, 2018.

Fair value estimates are made at the relevant transaction date, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

Risk management overview

The Corporation has exposure to credit, liquidity and market risks from its use of financial instruments. This note provides information about the Corporation's exposure to each of these risks, the Corporation's objectives, policies and processes for measuring and managing risk. Further quantitative disclosures are included throughout this MD&A and the financial statements for the year ended October 31, 2018.

Credit risk

Credit risk is the risk of financial loss to the Corporation if a counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Corporation's receivables.

The carrying amount of accounts receivable represents the maximum credit exposure. As at October 31, 2018 the Corporation's total receivables was \$1,250 (October 31, 2017 - \$6,159) from the Government of Canada for Harmonized Sales Taxes (HST). There were no derivative instruments held at October 31, 2018 and 2017.

Market risk

Market risk is the risk that changes in market conditions, such as commodity prices, interest rates, and foreign exchange rates, will affect the Corporation's net income or the value of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing the Corporation's returns.

- i. Commodity price risk
 - a. Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for coal are impacted by not only the relationship between the Canadian and United States dollar, as outlined below, but also global economic events that dictate the levels of supply and demand. Lower commodity prices can also reduce the Corporation's ability to raise capital. As the Corporation is not generating revenues, commodity price risk does not directly impact the Corporation's financial results.
- ii. Foreign exchange risk
 - a. Foreign currency exchange rate risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates.

As at October 31, 2018, the Corporation had US\$20.00 in its bank accounts.

Liquidity risk

Liquidity risk is the risk that the Corporation will encounter difficulty in meeting obligations associated with the financial liabilities. The Corporation's financial liabilities consist of accounts payable, accrued liabilities and loans payable.

The Corporation prepares annual capital expenditure budgets, which are monitored and updated as considered necessary. Financial modeling is used to provide economic outlooks and the Corporation utilizes authorizations for expenditures on projects to monitor capital expenditures.

Accounts payable and accrued liabilities consist of invoices payable to trade suppliers for administration and professional expenditures. The Corporation processes invoices within a normal payment period. Accounts payable have contractual maturities of less than one year.

The Corporation had unsecured loans from 2227929 Ontario Inc. (a company wholly-owned by Mr. Fred Leigh, a director of the Corporation) bearing a 12% annual interest rate. All such unsecured loans have been settled for Common Shares pursuant to the Shares for Debt Transaction.

Sensitivity analysis

The Corporation has, for accounting purposes, designated its cash and accounts receivable as loans and receivables which are measured at amortized cost. Accounts payable, accrued liabilities and loans payable are classified for accounting purposes as other financial liabilities, which are measured at amortized cost. As of October 31, 2018, both the carrying and fair value amounts of the Corporation's financial instruments are approximately equivalent due to the short term maturity of these instruments.

The sensitivity analysis shown in the notes below may differ materially from actual results. Based on management's knowledge of and experience with the financial markets, the Corporation believes the following movements are "reasonably possible" over a one year period:

- i. Cash is subject to floating interest rates. As at October 31, 2018, if interest rates had decreased/increased by 1% with all other variables held constant, there would not have

been a material impact to the loss for the year ended October 31, 2018 given the low level of cash on hand throughout the year.

- ii. Cash, accounts payable, accrued liabilities and provisions denominated in US dollar are subject to foreign currency risk. As at October 31, 2018, had the US dollar weakened/strengthened by 5% against the Canadian dollar with all other variables held constant, there would have been a change of approximately \$1 in the Corporation's net loss.

Additional Disclosures

Risks and uncertainties

The operations of the Corporation are speculative due to the high-risk nature of its business, which is the acquisition, financing, exploration and development of coal properties. These risk factors could materially affect the Corporation's future operating results and could cause actual events to differ materially from those described in forward-looking information relating to the Corporation.

Substantial capital requirements

The Corporation anticipates making substantial capital expenditures for the acquisition, exploration, development and production of mining reserves in the future. In addition, uncertain levels of near term industry activity coupled with the present uncertainty in global financial markets exposes the Corporation to additional financing risks. There can be no assurance that debt or equity financing, or funds generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Corporation. The inability of the Corporation to access sufficient capital for its operations could have a material adverse effect on the Corporation's business financial condition, results of operations and prospects.

Regulatory

Mining and exploration operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Corporation's operations may require licenses and permits from various governmental authorities in the countries in which it operates. There can be no assurance that the Corporation will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Litigation and arbitration

All industries, including the mining industry, are subject to legal claims, with and without merit. Legal proceedings and arbitration may arise from time to time in the course of the Corporation's business. Such litigation may be brought against the Corporation or its subsidiary in the future from time to time or the Corporation or its subsidiary may be subject to another form of litigation. Defense and settlement costs of arbitration or legal claims can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation and arbitration process, the process of defending such claims (or any other claims that may be brought against the Corporation), could take away from management time and effort and the resolution of any particular legal proceeding to which the Corporation or its subsidiary may become subject could have a material effect on the Corporation's financial position and results of operations.

Competition

The mining industry is competitive in all its phases. The Corporation competes with numerous other organizations in the search for and the acquisition of other properties and in the marketing of coal. Our competitors include mining companies that have substantially greater financial resources, staff and facilities than Yukoterre. Our ability to acquire properties in the future will depend on our ability to select and acquire suitable properties or prospects for exploratory drilling. Competitive factors in the distribution and marketing of coal include price and methods, reliability of delivery and control over key operations infrastructure

Conflicts of interest

Certain of the directors and officers of the Corporation may serve from time to time as directors, officers, promoters and members of management of other companies involved in mining or natural resource exploration and development and therefore it is possible that a conflict may arise between their duties as a director or officer of the Corporation and their duties as a director, officer, promoter or member of management of such other companies.

The directors and officers of the Corporation are aware of the existence of laws governing accountability of directors and officers for corporate opportunity and requiring disclosures by directors of conflicts of interest and the Corporation will rely upon such laws in respect of any directors' and officers' conflicts of interest or in respect of any breaches of duty by any of its directors or officers. All such conflicts will be disclosed by such directors or officers in accordance with applicable laws and the directors and officers will govern themselves in respect thereof to the best of their ability in accordance with the obligations imposed upon them by law.

Exploration, development and production risks

Mining operations involve many risks which even a combination of experience, knowledge and careful evaluation may not be able to overcome. The long-term commercial success of Yukoterre depends on its ability to find, appraise, develop and commercially produce resources and reserves, which will depend not only on its ability to explore and develop any properties it may have from time to time, but also on its ability to select and acquire additional producing properties or prospects.

The Corporation may not be able to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, Yukoterre may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participations uneconomic. There is no assurance that commercial quantities of coal will be discovered or acquired by the Corporation. Future exploration may involve unprofitable efforts from mines that are productive but do not produce sufficient coal to return a profit after drilling, operating and other costs. Completion of a mine does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations, and various field operating conditions may adversely affect the production from a successful mine. These conditions include delays in obtaining governmental approvals or consents, insufficient storage or transportation capacity or other geological and mechanical conditions.

Second Quarter Ended April 30, 2019

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

This Management's Discussion and Analysis ("MD&A") relates to the financial position and results of Yukoterre Resources Inc. (formerly 2560344 Ontario Inc.) (the "Company") for the three and six months ended April 30, 2019. This MD&A should be read in conjunction with the condensed interim financial statements for the three and six months ended April 30, 2019 and 2018 and the audited financial statements for the year ended October 31, 2018 and for the period from

incorporation (February 8, 2017) to October 31, 2017. Unless otherwise noted, all references to currency in this MD&A are in Canadian dollars.

All financial statement information discussed in this MD&A have been prepared using International Financial Reporting Standards (“IFRS”) applicable to a going concern, which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. Should the Company be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they come due.

The Company’s certifying officers are responsible for ensuring the financial statements do not contain any untrue statement of material fact or omit a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made. The Company’s officers certify that the financial statements fairly present, in all material respects, the financial condition, result of operations and cash flows, of the Company as of the date hereof. The Board of Directors approves the financial statements and ensures that management has discharged its financial responsibilities. The Board of Directors’ review is accomplished principally through the Audit Committee, which meets periodically to review all financial reports, prior to filing.

This MD&A is as of June 26, 2019. The reader should be aware that historical results are not necessarily indicative of future performance.

OVERVIEW

The Company is an independent Canadian coal exploration company focused on pursuing the exploration, evaluation and development of resource assets. Yukoterre Resources Inc., formerly 2560344 Ontario Inc., was incorporated under the laws of the Province of Ontario, Canada by Articles of Incorporation, dated February 8, 2017, and on October 25, 2017 was renamed Yukoterre Resources Inc. The principal activity of the Company is the exploration and evaluation of coal. The Company’s head office is located at 65 Queen Street West, 8th floor, Toronto, Ontario, M5H 2M5, Canada.

DIVISION MOUNTAIN

On August 8, 2017, the Company entered into a purchase agreement with PitchBlack Resources Ltd. in respect of the purchase of the Division Mountain Property in the Yukon Territory. The Division Mountain Property is located 90 km northwest of Whitehorse in Yukon Territory. The purchase included a total of 15 coal licenses (CYW0143 to CYW0157) and five coal leases. In late 2018, the Corporation renewed four of the coal licenses (CYW0154 to CYW0157) which covers the Division Mountain Property. The remaining coal license, which covered areas outside of the Division Mountain Property, were allowed to lapse.

On August 21, 2017, the Company, closed the purchase of Division Mountain Property in consideration for cash payment of \$100,000 to PitchBlack Resources Ltd. (a NEX-listed company at the time). The Corporation assumed all property maintenance payments and obligations and indemnified PitchBlack Resources Ltd. against any environmental or reclamation obligations and liabilities. The Corporation is not a related party to PitchBlack Resources Ltd., its officers, directors or other insiders. The sale transaction was an arm’s length transaction for the purposes of the policies of the NEX Board of the TSX Venture Exchange. This transaction was approved by the NEX Board of the TSX Venture Exchange.

Since acquiring the Division Mountain Property, the Company has been focused on (a) reviewing historical drill reports and technical reports in respect of the Division Mountain Property to identify areas warranting further exploration and development and (b) conducting a drilling program in the northeast corner of Pit 4 of the Division Mountain Property to test the possible extension of coal

seams in the area and to verify pit wall boundaries. In 2018, the Company conducted a total of four (4) rotary air blast (“RAB”) drill holes for a total of 409 feet (the “2018 Drill Program”) at a cost of \$109,838. Management reviewed the results of the 2018 Drill Program, along with historical drill reports and technical reports in respect of the Division Mountain Property and has developed a Phase 1 exploration plan for the Division Mountain Property (the “Phase 1 Exploration Program”).

HIGHLIGHTS

On February 27, 2019, the Company issued 2,100,541 common shares at \$0.10 per share to settle the \$210,054.10 loan with 2227929 Ontario Inc.

The Company is expecting to complete an initial public offering on the Canadian Securities Exchange in June 2019 (the “IPO”).

OUTLOOK

The Company’s ongoing focus is to enhance shareholder value by identifying undervalued and producing assets with exploration upside potential and near term cash flow. Pursuant to the 2018 Drill Program and after the review of historical drill reports and technical reports, management has developed the Phase 1 Exploration Program, as recommended in the Technical Report, for the Division Mountain Property. Management expects to use the proceeds from the IPO to implement the Phase 1 Exploration Program.

Shares outstanding at end of period	7,020,541	4,920,000	4,920,000	4,920,000	4,920,000	4,920,000	4,920,000

For the three and six months ended April 30, 2019, the Company reported a loss of \$20,496 and \$37,399. For the three and six months ended April 30, 2018, the Company reported a loss of \$16,768 and \$27,254. The Company had a working capital deficit of \$15,008 for the six months ended April 30, 2019 compared to a working capital deficit of 186,646 for the year ended October 31, 2018.

The Company has and expects to continue to report negative earnings until the Company’s exploration program finds and develops producing assets. The Company will continue to utilize proceeds from financing and equity issuances to fund its exploration program and general and administrative operating costs.

As at April 30, 2019, the Company had no operating assets and expects to generate negative cash flow from operations for the foreseeable future.

REVIEW OF FINANCIAL RESULTS

Selected Financial Information

Three months ended	April 30, 2019	January 31, 2019	October 31, 2018	July 31, 2018	April 30, 2018	January 31, 2018	For the period from incorporation (February 8, 2017) to October 31, 2017
Loss and comprehensive loss for the period	\$ 20,496	\$ 16,903	\$ 17,778	\$ 16,452	\$ 16,768	\$ 10,486	\$ 41,483
Loss per share	0.00	0.00	0.00	0.00	0.00	0.00	0.02
General and administrative:							
Consulting and management fees	6,600	7,600	9,600	10,350	10,444	10,350	22,285
Professional fees	2,500	3,935	3,000	4,355	4,000	(1,500)	16,175
General office expenses	11,396	104	269	142	803	883	3,016
	\$ 20,496	\$ 11,639	\$ 12,869	\$ 14,847	\$ 15,247	\$ 9,733	\$ 41,476

Expenses

For the period:	Three months ended April 30, 2019	Three months ended April 30, 2018	Six months ended April 30, 2019	Six months ended April 30, 2018
Expenses				
Consulting and management fees	\$ 6,600	\$ 10,444	\$ 14,200	\$ 20,794
Professional fees	2,500	4,000	6,435	2,500
General office expenses	11,396	803	11,500	1,686
Total	\$ 20,496	\$ 15,247	\$ 32,135	\$ 24,980

The Company recorded consulting and management fees of \$6,600 and \$14,200 for the three and six months ended April 30, 2019 and \$10,444 and \$20,794 for the three and six months ended April 30, 2018.

The Company recorded \$2,500 and \$6,435 in professional fees for the three and six months ended April 30, 2019, mainly for audit fees. The Company recorded \$4,000 and \$2,500 in professional fees for the three and six months ended April 30, 2018 as the October 31, 2017 year end audit fees were lower than expected.

General office expenses of \$11,396 and \$11,500 for the three and six months ended April 30, 2019 relate to office costs, rent, telephone, computer expenses and shareholder communication. \$11,190 was spent on filing fees for the IPO. The Company recorded general office expenses of \$803 and \$1,686 for the three and six months ended April 30, 2018. The Company strives to minimize general and administrative type expenses.

CASH FLOWS

Three months ended	April 30, 2018	January 31, 2019	October 31, 2018	July 31, 2018	April 30, 2018	January 31, 2018	For the period from incorporation (February 8, 2017) to October 31, 2017
Cash flows (used in) operating activities	\$ (17,850)	\$ (39,146)	\$ (66,703)	\$ 50,570	\$ (10,903)	\$ (12,745)	\$ (32,480)
Cash flows (used in) financing activities	9,500	49,000	75,000	30,000	-	52,000	246,000
Cash flows (used in) investing activities	-	(1,017)	(8,051)	(89,847)	(2,475)	(24,631)	(204,675)
Net change in cash	\$ (8,350)	\$ 8,837	\$ 246	\$ (9,277)	\$ (13,378)	\$ 14,624	\$ 8,845

Cash used in operating activities for the three and six months ended April 30, 2019 was \$17,850 and \$56,996 compared to \$10,903 and \$23,648 for three and six months ended April 30, 2018. Expenditures during the current period was primarily related to consulting and professional fees. Cash was also spent to start the underwriting process for the initial public offering. Expenditures in the previous period related mainly to consulting and professional fees.

For the three months ended April 30, 2019, the Company received \$9,500 in interest free loans from 2227929 Ontario Inc. For the six months ended April 30, 2019, the Company received a total of \$48,500 in loans from 2227929 Ontario Inc. of which \$39,000 of loans accrued interest at 12% and was paid via the issuance of common shares. On February 27, 2019, the total loans issued from 2227929 Ontario Inc. in the amount of \$210,054.10 was repaid by the issuance of 2,100,541 common shares at \$0.10 per share. The Company also received a \$10,000 loan from Sulliden Mining Capital Inc. which is interest free with no specific maturity date. For the six months ended April 30, 2018, 2227929 Ontario Inc. loaned \$52,000 to the Company.

Investing activities of \$Nil and \$1,017 for the three and six months ended April 30, 2019 compared to \$2,475 and \$27,106 for the three and six months ended April 30, 2018 was used to for developing the exploration and evaluation asset.

LIQUIDITY AND CAPITAL RESOURCES

On December 18, 2017, the Company entered into loan agreements with 2227929 Ontario Inc. Pursuant to the terms of the loans, 2227929 Ontario Inc. agreed to lend the Company \$52,000 on December 18, 2017, \$20,000 on May 25, 2018 and \$10,000 on June 12, 2018 at an interest rate of 12% per year with no specified maturity date. A further \$40,000 was loaned on August 13, 2018 and \$35,000 on August 22, 2018, \$14,000 on November 5, 2018 and a final \$25,000 on January 17, 2019. On January 31, 2019, the loan balance was \$210,054 including accrued interest. On February 27, 2019, the entire amount of the loans was repaid by the issuance of 2,100,541 common shares at \$0.10 per share.

On December 13, 2018, the Company entered into a loan agreement with Sulliden Mining Capital Inc. for \$10,000. The loan is interest free with no specific maturity date.

On March 8, 2019, the Company entered into a loan agreement with 2227929 Ontario Inc. for \$7,000. A further \$2,500 loan was received on April 1, 2019. These loans are interest free with no specific maturity date as they will be repaid from the proceeds of the IPO.

As at April 30, 2019, the Company had working capital deficit of \$15,008 and \$1,547 in cash compared to a working capital deficit of \$186,646 and cash of \$1,060 for the year ended October 31, 2018. The Company's primary cash flow needs are for development of its mining and exploration activities, administrative expenses and working capital.

At present, the Company has no producing properties and consequently no revenue generating assets or operations. The recovery of the amounts expended for resource properties are dependent on the ability of the Company to obtain necessary financing to complete the development of the Division Mountain coal project or other potential projects and attain future profitable production. The Company's financial success will depend on its ability to raise financing to construct potential projects. At present, the Company has no established sources of income and the success of its exploration and development programs will be contingent upon the Company's ability to raise sufficient equity financing on terms favourable to the Company. The Company does not expect to generate any internal cash flows to help finance the development costs.

Going Concern

Yukoterre Resources Inc. is an exploration stage enterprise. To date, the Company has not found

proven reserves. The business of exploration for coal involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable operations. The Company's continued existence is dependent upon the acquisition of coal properties, preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Consequently, the Company's ability to continue as a going concern is dependent on the Company's ability to obtain additional financing if, as and when required, and, ultimately, the attainment of profitable operations or the profitable sale of the Company's exploration interests.

COMMITMENTS AND CONTINGENCIES

Management contracts

The Company is party to certain management contracts. Currently, these contracts require payments of \$Nil as at April 30, 2019 (October 31, 2018 - \$Nil) to be made upon the occurrence of a change in control to the officers of the Company. The Company is also committed to payments upon termination of approximately \$9,600 (October 31, 2018 - \$9,600) pursuant to the terms of these contracts. As a triggering event has not taken place, these amounts have not been recorded in these financial statements.

Contingencies

Coal operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Company's operations may require licenses and permits from various governmental authorities in the countries in which it operates. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Environmental

The Company's exploration and evaluation activities are subject to laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

SHARE CAPITAL AND OFF-BALANCE SHEET ARRANGEMENTS

As at the date of this report, there are 7,020,541 common shares outstanding.

There are no off-balance sheet financing arrangements.

RELATED PARTY TRANSACTIONS

Key management personnel compensation

For the six months ended April 30, 2019 and 2018, no compensation has been issued to the executive officers of the Company.

Fred Leigh, a director of the Company, is also a director of 2227929 Ontario Inc. with the which it has loans with the Company in the amount of \$9,500 as at April 30, 2019.

On December 18, 2017, the Company entered into loan agreements with 2227929 Ontario Inc., which is wholly owned by Fred Leigh, a director of the Company. Pursuant to the terms of the loans, 2227929 Ontario Inc. agreed to lend the Company \$52,000 on December 18, 2017, \$20,000 on May 25, 2018 and \$10,000 on June 12, 2018 at an interest rate of 12% per year with no specified maturity date. A further \$40,000 was loaned on August 13, 2018 and \$35,000 on August 22, 2018, \$14,000 on November 5, 2018 and a final \$25,000 on January 17, 2019. On January 31, 2019, the loan balance was \$210,054 including accrued interest. On February 27, 2019, the entire amount of the loans was repaid by the issuance of 2,100,541 common shares at \$0.10 per share.

CHANGES IN ACCOUNTING POLICIES

The Company will monitor the development of the relevant IFRS and change its accounting policies accordingly.

New accounting standards

During 2019, the Company adopted a number of new IFRS standards, interpretations, amendments and improvements of existing standards. These new standards and changes did not have any material impact on the Company's consolidated financial statements.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results could differ from those estimates and these estimates could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Assets' carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets and goodwill. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Company's assets, costs to sell the assets and the appropriate discount rate.

Reductions in coal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

Income, value added, withholding and other taxes

The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

Contingencies and provisions

Contingencies can be either possible assets or possible liabilities arising from past events which, by their nature, will only be resolved when one or more future events not wholly within our control occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. In assessing loss contingencies related to legal proceedings that are pending against us or un-asserted claims, that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Company and its legal counsel evaluate the perceived merits of any legal proceedings or un-asserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent liability or assessing the impact on the carrying value of assets. Contingent assets are not recognized in the financial statements.

ADDITIONAL DISCLOSURES

Risks and uncertainties

The operations of the Company are speculative due to the high-risk nature of its business, which is the acquisition, financing, exploration and development of coal properties. These risk factors could materially affect the Company's future operating results and could cause actual events to differ materially from those described in forward-looking information relating to the Company.

Substantial capital requirements

The Company anticipates making substantial capital expenditures for the acquisition, exploration, development and production of mining reserves in the future. In addition, uncertain levels of near term industry activity coupled with the present uncertainty in global financial markets exposes the Company to additional financing risks. There can be no assurance that debt or equity financing, or funds generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Company. The inability of the Company to access sufficient capital for its operations could have a material adverse effect on the Company's business financial condition, results of operations and prospects.

Regulatory

Mining and exploration operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Company's operations may require licenses and permits from various governmental authorities in the countries in which it

operates. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Litigation and arbitration

All industries, including the mining industry, are subject to legal claims, with and without merit. Legal proceedings and arbitration may arise from time to time in the course of the Company's business. Such litigation may be brought against the Company or its subsidiary in the future from time to time or the Company or its subsidiary may be subject to another form of litigation. Defense and settlement costs of arbitration or legal claims can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation and arbitration process, the process of defending such claims (or any other claims that may be brought against the Company), could take away from management time and effort and the resolution of any particular legal proceeding to which the Company or its subsidiary may become subject could have a material effect on the Company's financial position and results of operations.

Competition

The mining industry is competitive in all its phases. The Company competes with numerous other organizations in the search for and the acquisition of other properties and in the marketing of coal. Our competitors include mining companies that have substantially greater financial resources, staff and facilities than Yukoterre Resources Inc. Our ability to acquire properties in the future will depend on our ability to select and acquire suitable properties or prospects for exploratory drilling. Competitive factors in the distribution and marketing of coal include price and methods, reliability of delivery and control over key operations infrastructure

Conflicts of interest

Certain of the directors and officers of the Company may serve from time to time as directors, officers, promoters and members of management of other companies involved in mining or natural resource exploration and development and therefore it is possible that a conflict may arise between their duties as a director or officer of the Company and their duties as a director, officer, promoter or member of management of such other companies.

The directors and officers of the Company are aware of the existence of laws governing accountability of directors and officers for corporate opportunity and requiring disclosures by directors of conflicts of interest and the Company will rely upon such laws in respect of any directors' and officers' conflicts of interest or in respect of any breaches of duty by any of its directors or officers. All such conflicts will be disclosed by such directors or officers in accordance with applicable laws and the directors and officers will govern themselves in respect thereof to the best of their ability in accordance with the obligations imposed upon them by law.

Exploration, development and production risks

Mining operations involve many risks which even a combination of experience, knowledge and careful evaluation may not be able to overcome. The long-term commercial success of Yukoterre Resources Inc. depends on its ability to find, appraise, develop and commercially produce resources and reserves, which will depend not only on its ability to explore and develop any properties it may have from time to time, but also on its ability to select and acquire additional producing properties or prospects.

The Company may not be able to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, Yukoterre Resources Inc. may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participations uneconomic. There is no assurance that commercial quantities

of coal will be discovered or acquired by the Company. Future exploration may involve unprofitable efforts from mines that are productive but do not produce sufficient coal to return a profit after drilling, operating and other costs. Completion of a mine does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations, and various field operating conditions may adversely affect the production from a successful mine. These conditions include delays in obtaining governmental approvals or consents, insufficient storage or transportation capacity or other geological and mechanical conditions.

DESCRIPTION OF SECURITIES DISTRIBUTED

Authorized and Issued Share Capital

The authorized share capital of the Corporation consists of an unlimited number of common shares. As of the date of this Prospectus, 7,020,541 Common Shares were issued and outstanding as fully paid and non-assessable shares.

Common Shares

The holders of the Common Shares are entitled to receive notice of and to attend and vote at all meetings of the shareholders of the Corporation and each Common Share confers the right to one vote in person or by proxy at all meetings of the shareholders of the Corporation. The holders of the Common Shares, subject to the prior rights, if any, of any other class of shares of the Corporation, are entitled to receive such dividends in any financial year as the Board of Directors may by resolution determine. In the event of the liquidation, dissolution or winding-up of the Corporation, whether voluntary or involuntary, the holders of the Common Shares are entitled to receive, subject to the prior rights, if any, of the holders of any other class of shares of the Corporation, the remaining property and assets of the Corporation.

Agent's Options

The Corporation has also agreed to grant to the Agent, Agent's Options entitling the Agent to purchase that amount of Agent's Option Shares as is equal to 7% of the Common Shares to be issued pursuant to the Offering, exercisable at a price of \$0.10 per Agent's Option Share for a period of 24 months from the Listing Date.

This Prospectus qualifies the Offering of the Common Shares and the Agent's Options.

CONSOLIDATED CAPITALIZATION

The following table summarizes the changes in the Corporation's capitalization since incorporation and after giving effect to the Offering:

Description	Authorized	Outstanding at April 30, 2019 (unaudited)	Outstanding as at date of the Prospectus ⁽¹⁾ (unaudited)	Outstanding after giving effect to the Offering ⁽²⁾ (unaudited)
Common Shares	unlimited	7,020,541	7,020,541	10,520,541

Notes:

(1) Includes the Common Shares issued pursuant to the Shares for Debt Transaction.

(2) As partial consideration for the sale of Common Shares pursuant to this Prospectus, the Corporation has agreed

to grant the Agent's Options entitling the Agent to purchase up to that amount of Agent's Option Shares as is equal to 7% of the number of Common Shares issued pursuant to this Offering. The Agent's Options may be exercised at a price of \$0.10 per Agent's Option Share for a period of 24 months from the Listing Date. This Prospectus qualifies the distribution of the Agent's Options to the Agent. The Common Shares issuable on exercise of the Agent's Options are not reflected in these figures.

OPTIONS TO PURCHASE SECURITIES

Stock Option Plan

The Stock Option Plan was approved by the Corporation's directors on February 9, 2017. The purpose of the Stock Option Plan is to assist the Corporation in attracting, retaining and motivating directors, officers, employees and consultants (together "service providers") of the Corporation and of its affiliates and to closely align the personal interests of such service providers with the interests of the Corporation and its shareholders.

The Stock Option Plan provides that, subject to the requirements of the Exchange, the aggregate number of securities reserved for issuance will be 10% of the number of Common Shares of the Corporation issued and outstanding from time to time.

The Stock Option Plan will be administered by the Board of Directors, who will have full and final authority with respect to the granting of all options thereunder.

Options may be granted under the Stock Option Plan to such service providers of the Corporation and its affiliates, if any, as the Board may from time to time designate. The exercise prices shall be determined by the Board, but shall, in no event, be less than the closing market price of the Corporation's shares on the Exchange on the date of grant of such options, less the maximum discount permitted under the Exchange policies. The Stock Option Plan provides that the number of Common Shares issuable on the exercise of options granted to all persons together with all of the Corporation's other previously granted options may not exceed 10% of the Corporation's issued and outstanding Common Shares on a non-diluted basis, from time to time. In addition, the number of Common Shares, which may be reserved for issuance to any one individual upon the exercise of all stock options held by such individual within a one-year period, may not exceed 5% of the Common Shares issued and outstanding on the grant date, on a non-diluted basis, unless otherwise approved by disinterested shareholders of the Corporation. Subject to earlier termination in the event of dismissal for cause, early retirement, voluntary resignation or termination other than for cause, or in the event of death or disability, all options granted under the Stock Option Plan will expire on the date set by the Board as the expiry date of the option, which expiry date shall not be more than 10 years from the date that such options are granted. Options granted under the Stock Option Plan are not transferable or assignable other than by testamentary instrument or pursuant to the laws of succession.

As of the date of this Prospectus, the Corporation has not granted any Options pursuant to the Stock Option Plan.

Agent's Options

The Corporation will issue to the Agent, Agent's Options for the purchase of up to that number of Agent's Option Shares as is equal to 7% of the Common Shares of the Corporation issued pursuant to the Offering exercisable at a price of \$0.10 per Agent's Option Share for a period of 24 months from the Listing Date.

PRIOR SALES

On February 27, 2019, at the annual and special shareholders meeting of the Corporation, the

disinterested shareholders of the Corporation authorized the Corporation to enter into the Shares for Debt Transaction, whereby the Corporation issued 2,100,541 Common Shares at a deemed price of \$0.10 per Common Share in full and final settlement of \$210,054.10 owed by the Corporation to 2227929 Ontario Inc. (a company wholly-owned by Mr. Fred Leigh, a director of the Corporation). Other than as disclosed in this paragraph, no securities of the Corporation have been issued in the 12-month period before the date of this Prospectus.

ESCROWED SECURITIES

Escrowed Securities

Under the applicable policies and notices of the Canadian Securities Administrators, securities held by Principals (as defined below) are required to be held in escrow in accordance with the escrow regime applicable to initial public distributions. Equity securities, including Common Shares, owned or controlled by the Principals of the Corporation are subject to the escrow requirements set out in National Instrument 46-201 - *Escrow for Initial Public Offerings*.

Principals include all persons or companies that, on the completion of the Offering, fall into one of the following categories:

- (a) directors and senior officers of the Corporation, as listed in this Prospectus;
- (b) promoters of the Corporation during the two years preceding this Offering;
- (c) those who own and/or control more than 10% of the Corporation's voting securities immediately after completion of this Offering if they also have appointed or have the right to appoint a director or senior officer of the Corporation or of a material operating subsidiary of the Corporation;
- (d) those who own and/or control more than 20% of the Corporation's voting securities immediately after completion of this Offering;
- (e) a company, trust, partnership or other entity more than 50% held by one or more principals will be treated as a principal. (In calculating this percentage, include securities of the entity that may be issued to the principals under outstanding convertible securities in both the principals' securities of the entity and the total securities of the entity outstanding.) Any securities of the issuer that this entity holds will be subject to escrow requirements; and
- (f) a principal's spouse and their relatives that live at the same address as the principal will also be treated as principals and any securities of the issuer they hold will be subject to escrow requirements.

The Principals of the Corporation are René Bharti, Deborah Battiston, Kenny Choi, Fred Leigh, Maurice Colson and Dr. Andreas Rompel.

The Corporation is an "emerging issuer" as defined in the applicable policies and notices of the Canadian Securities Administrators and if the Corporation achieves "established issuer" status during the term of the Escrow Agreement (as defined below), it will "graduate" resulting in a catch-up release and an accelerated release of any securities remaining in escrow under the 18 month schedule applicable to established issuers as if the Corporation had originally been classified as an established issuer.

Pursuant to the terms of the Escrow Agreement, the Escrowed Securities may not be transferred or otherwise dealt with during the term of the Escrow Agreement unless the transfers or dealings

within the escrow are:

- (a) transfers to continuing or, upon their appointment, incoming directors and senior officers of the Corporation or of a material operating subsidiary, with approval of the Board of Directors;
- (b) transfers to an RRSP or similar trustee plan provided that the only beneficiaries are the transferor or the transferor's spouse or children or parents;
- (c) transfers upon bankruptcy to the trustee in bankruptcy;
- (d) pledges to a financial institution as collateral for a loan, provided that upon a realization the securities remain subject to escrow; and
- (e) tenders of Escrowed Securities to a take-over bid are permitted provided that, if the tenderer is a Principal of the successor corporation upon completion of the take-over bid, securities received in exchange for tendered Escrowed Securities are substituted in escrow on the basis of the successor corporation's escrow classification.

The following table sets forth details of the Escrowed Securities that are subject to the Escrow Agreement as of the date of this Prospectus:

Name	No. of Escrowed Common Shares ⁽¹⁾⁽²⁾	Offering Percentage (Prior to Giving Effect to the Offering)	Offering Percentage (After Giving Effect to the Offering) ⁽³⁾
Fred Leigh ⁽⁴⁾	2,560,541	36.47%	24.34%

Notes:

- (1) These shares have been deposited in escrow with the Escrow Agent.
- (2) Pursuant to an escrow agreement (the "**Escrow Agreement**") made as of June 26, 2019, among the Corporation, the Escrow Agent and certain Principals of the Corporation, the Principals agreed to deposit in escrow their Common Shares (the "**Escrowed Securities**") with the Escrow Agent. The Escrow Agreement provides that 10% of the Escrowed Securities will be released from escrow upon the Listing Date and that, where there are no changes to the Common Shares initially deposited and no additional Escrow Securities, the remaining Escrowed Securities will be released in equal tranches of 15% every 6 month interval thereafter, over a period of 36 months.
- (3) Does not include exercise of Agent's Options.
- (4) Shares are held by 2227929 Ontario Inc., a corporation that is wholly-owned by Mr. Leigh, and includes the Common Shares issued under the Shares for Debt Transaction.

PRINCIPAL SHAREHOLDERS

To the knowledge of the directors and officers of the Corporation, as of the date of this Prospectus, no person beneficially owns or exercises control or direction over Common Shares carrying more than 10% of the votes attached to the Corporation's Common Shares except for the following:

Name	Prior to the Offering		After Giving Effect to the Offering		
	Number of Common Shares Owned Directly or Indirectly ⁽¹⁾	Percentage of Common Shares Held	Number of Common Shares Owned Directly or Indirectly	Percentage of Common Shares Held ⁽²⁾	Percentage of Common Shares Held ⁽³⁾
Routemaster Capital Inc. ⁽⁴⁾⁽⁶⁾	1,000,000	14.2%	1,000,000	9.5%	9.2%

Forbes & Manhattan Inc. ^{(5) (6)}	1,000,000	14.2%	1,000,000	9.5%	9.2%
Newdene Gold Inc. ⁽⁷⁾	1,000,000	14.2%	1,000,000	9.5%	9.2%
Fred Leigh ⁽⁸⁾	2,560,541	36.47%	2,560,541	24.34%	23.78%

Notes:

- (1) Such Common Shares are owned both of record and beneficially.
- (2) Does not include exercise of Agent's Options.
- (3) On a fully-diluted basis, assuming completion of the Offering and the exercise of Agent's Options.
- (4) Fred Leigh, a director of the Corporation, is currently the interim CEO and a director of this entity.
- (5) A company wholly-owned by Hannele Bharti. Ms. Bharti is the mother of Rene Bharti, who is the Chief Executive Officer and a director of the Issuer.
- (6) Forbes and Manhattan owns approximately 28% of the common shares of Routemaster Capital Inc..
- (7) A company wholly-owned by Kam Gill.
- (8) Shares are held by 2227929 Ontario Inc., a corporation that is wholly-owned by Mr. Leigh.

DIRECTORS AND OFFICERS

The following table provides the names, provinces of residence, positions, principal occupations and the number of voting securities of the Corporation that each of the directors and executive officers beneficially owns, directly or indirectly, or exercises control over, as of the date hereof:

Name and Province of Residence and Position with the Corporation	Director / Officer Since	Principal Occupation for the Past Five Years	Number and % of Common Shares Beneficially Owned Directly or Indirectly (as at the date of this Prospectus)
René Bharti ⁽¹⁾ Toronto, Ontario <i>Chief Executive Officer and Director</i>	April 12, 2017	Former Chairman and current Director of ARHT Media Inc.	20,000 (0.28%)
Deborah Battiston Toronto, Ontario <i>Chief Financial Officer</i>	April 12, 2017	Chief Financial Officer of Sulliden Mining Capital Inc.	20,000 (0.28%)
Kenny Choi Toronto, Ontario <i>Corporate Secretary</i>	January 14, 2019	Former Associate of Davies Ward Phillips & Vineberg LLP	20,000 (0.28%)
Fred Leigh Toronto, Ontario <i>Director and Promoter</i>	January 14, 2019	President of Siwash Holdings Ltd.	2,560,541 ⁽²⁾ (36.47%)
Dr. Andreas Rompel ⁽¹⁾ Toronto, Ontario <i>Director</i>	January 14, 2019	President of Jourdan Resources Inc.	0
Maurice Colson ⁽¹⁾ Toronto, Ontario <i>Director</i>	May 13, 2019	Officer of China Goldcorp. Ltd. and public company director	0

Notes:

- (1) Denotes a member of the Audit Committee of the Corporation.

(2) Shares are held by 2227929 Ontario Inc., a corporation wholly-owned by Mr. Leigh.

The term of office of the directors expires annually at the time of the Corporation's annual general meeting. The term of office of the officers expires at the discretion of the Corporation's directors.

The Corporation has one committee, the audit committee, comprised of all three current directors, namely René Bharti, Maurice Colson and Dr. Andreas Rompel.

The following is a brief description of the background of the key management, directors and promoters of the Corporation.

René Bharti. Mr. Bharti has held several roles over the past 20 years in both public and private companies, including those in the resource, technology and entertainment industry. In particular, Mr. Bharti has held positions in emerging resource companies, including as director of Alder Resources Ltd., and Rosita Mining Corporation. Mr. Bharti is currently a director of ARHT Media Inc. and Jourdan Resources Inc. Mr. Bharti holds a B.Comm (Honours) from Queen's University. Mr. Bharti is an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation and will devote approximately 25% of his time to the affairs of the Corporation and is 46 years of age.

Deborah Battiston. Ms. Battiston is a CPA-CGA who holds BA in Economics from the University of Guelph and has over 20 years of financial management experience. Ms. Battiston has broad public company and mining expertise having served as CFO for a multitude of public resource sector companies. Ms. Battiston has managed the financial departments of numerous successful domestic and international organizations through exploration, development and into production. She formerly served as CFO for Consolidated Thompson Iron Mines, Largo Resources Ltd., Forbes and Manhattan Coal Corp., Allana Potash Corp. and is currently CFO of ARHT Media Inc., Copper One Inc., QMX Gold Corporation and Sulliden Mining Capital Inc. each of which are reporting issuers. Ms. Battiston is an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation and will devote approximately 15% of her time to the affairs of the Corporation and is 61 years of age.

Kenny Choi. Mr. Choi is a corporate lawyer who works as a legal consultant to various TSX and TSX Venture listed companies in the mining and technology industries. He was previously an associate at Davies Ward Phillips & Vineberg LLP, where he worked on a variety of corporate and commercial transactions. Mr. Choi is currently the corporate secretary of Blue Sky Energy Inc., Q-Gold Resources Ltd., Routemaster Capital Inc. and QMX Gold Corporation, each of which are reporting issuers. Mr. Choi studied at Western University, where he obtained a Juris Doctor from the Faculty of Law and an Honours Business Administration degree from the Ivey Business School. Mr. Choi is an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation, will devote approximately 15% of his time to the affairs of the Corporation and is 29 years of age.

Fred Leigh. Mr. Leigh has been involved in the junior resource sector for more than 27 years and has had a significant role as founder, director and/or investor in many public companies. He is also the founder and President of Siwash Holdings Ltd., a privately held company which, for over 18 years has invested in early stage opportunities in the resource sector. Siwash was an early investor in successful companies such as Wheaton River Minerals, Hathor Exploration and Blue Pearl Mining. Mr. Leigh is also currently a director of Magnolia Colombia Ltd., QMX Gold Corporation, Routemaster Capital Inc., Q-Gold Resources Ltd., Halo Labs Inc., Copper One Inc. and the Chief Executive Officer of Apogee Opportunities Inc. and Routemaster Capital Inc., each of which are reporting issuers. Mr. Leigh is not an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation, will devote approximately 10% of his time to the affairs of the Corporation and is 63 years of age.

Dr. Andreas Rompel. Dr. Rompel is an exploration professional with three decades of exploration and mining experience in a wide range of roles from VP Exploration and Project Manager to Country Manager and Corporate Development. Dr. Rompel has worked in a variety of commodities, including precious metals and base metals as well as energy metals - cobalt. For more than a decade Dr. Rompel evaluated capital projects within Anglo American and was on the board of Spectrem (an Anglo-American Company) as Technical Director. Dr Rompel was formerly the President & CEO of Cobalt Power Group Inc. and is currently a director of QMX Gold Corporation and president and director of Jourdan Resources Inc. Dr. Rompel is a fellow of the South African Institute of Mining and Metallurgy and a member of the Council for Geosciences of South Africa. Dr. Rompel is not an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation, will devote approximately 10% of his time to the affairs of the Corporation and is 57 years of age.

Maurice Colson. Mr. Colson has worked in the investment industry for more than 35 years and was for many years managing director for a major Canadian investment dealer in the United Kingdom. He is involved in providing strategic counsel and assistance with financing to emerging private and public companies in Canada and to Canadian companies operating internationally. He sits on the board of directors of several TSX and TSX Venture listed companies and is the former President and CEO of Lithium One Resources. Mr. Colson holds a Masters of Business Administration degree from McGill University. Mr. Colson is not an independent contractor of the Issuer, has not entered into a non-competition or non-disclosure agreement with the Corporation, will devote approximately 10% of his time to the affairs of the Corporation and is 77 years of age.

Corporate Cease Trade Orders or Bankruptcies

To the Corporation's knowledge:

- a) no existing director, executive officer or promoter of the Corporation is, as at the date of this Prospectus, or was within ten years before the date of the Prospectus, a director or executive officer of any company that, while that person was acting in the capacity of director, chief executive officer or chief financial officer of such company, was the subject of a cease trade order, an order similar to a cease trade order, or an order that denied the company access to any exemption under securities legislation, that was in effect for a period of more than 30 consecutive days; and
- b) no existing director, executive officer, promoter or a shareholder holding sufficient number of securities to affect materially control of the Corporation is, as at the date of this Prospectus, or was within ten years before the date the Prospectus, a director or executive officer of any company that, while that person was acting in that capacity, or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets.

Penalties or Sanctions

To the Corporation's knowledge, no existing director, executive officer, shareholder holding sufficient number of securities to affect materially control of the Corporation, promoter or other member of management of the Corporation has been subject to any penalties or sanctions imposed by a court or securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority, or has been subject to any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable investor in making an investment decision.

Personal Bankruptcies

To the Corporation's knowledge no existing or proposed director, officer, promoter or other member of management of the Corporation has, during the ten years prior to the date hereof, been declared bankrupt or made a voluntary assignment into bankruptcy, made a proposal under any legislation relating to bankruptcy or insolvency or has been subject to or instituted any proceedings, arrangement, or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold his or her assets.

Conflicts of Interest

The directors of the Corporation are required by law to act honestly and in good faith with a view to the best interests of the Corporation and to disclose any interests, which they may have in any project or opportunity of the Corporation. If a conflict of interest arises at a meeting of the Board of Directors, any director in a conflict will disclose his interest and abstain from voting on such matter.

To the Corporation's knowledge and other than disclosed herein, there are no known existing or potential conflicts of interest among the Corporation, its promoters, directors and officers or other members of management of the Corporation or of any proposed promoter, director, officer or other member of management as a result of their outside business interests except that certain of the directors and officers serve as directors and officers of other companies and, therefore, it is possible that a conflict may arise between their duties to the Corporation and their duties as a director or officer of such other companies.

STATEMENT OF EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

The executive compensation discussion below discloses compensation paid to the following individuals:

- (a) each individual who, in respect of the Corporation, during any part of the most recently completed financial year, served as chief executive officer, including an individual performing functions similar to a chief executive officer;
- (b) each individual who, in respect of the Corporation, during any part of the most recently completed financial year, served as chief financial officer, including an individual performing functions similar to a chief financial officer;
- (c) in respect of the Corporation and its subsidiaries, the most highly compensated executive officer other than the individuals identified in paragraphs (a) and (b) at the end of the most recently completed financial year whose total compensation was more than \$150,000, as determined in accordance with Section 1.3(5) of Form 51-102F6V under National Instrument 51-102 – *Continuous Disclosure Obligations*, for that financial year; and
- (d) each individual who would be a named executive officer under paragraph (c) but for the fact that the individual was neither an executive officer of the Corporation, nor acting in a similar capacity, as at the end of the most recently completed financial year,

(each, a "**Named Executive Officer**").

During the period from incorporation to October 31, 2017 and the fiscal year ended October 31, 2018, the Corporation had two individuals who were Named Executive Officers, namely (i) René Bharti, who was appointed the Chief Executive Officer of the Corporation on April 12, 2017; and (ii) Deborah Battiston, who was appointed the Chief Financial Officer of the Corporation on April

12, 2017.

Compensation Discussion and Analysis

In assessing the compensation of its Named Executive Officers, the Corporation does not have in place any formal objectives, criteria or analysis; compensation payable is currently determined by the Board of Directors.

As of the date of this Prospectus, the Corporation's Board of Directors has not established any benchmark or performance goals to be achieved or met by Named Executive Officers, however, such Named Executive Officers are expected to carry out their duties in an effective and efficient manner so as to advance the business objectives of the Corporation. The satisfactory discharge of such duties is subject to ongoing monitoring by the Corporation's directors.

The Corporation's Named Executive Officer compensation during the most recently completed financial year ended October 31, 2018 was determined and administered by the Corporation's Board of Directors. The Board of Directors was solely responsible for assessing the compensation to be paid to the Corporation's Named Executive Officers and for evaluating their performance.

It is expected that once the Corporation becomes a reporting issuer, base salary will be the principal component of Named Executive Officer compensation. The base salary for each Named Executive Officer will be based on the position held, the related responsibilities and functions performed by the executive and salary ranges for similar positions in comparable companies. Individual and corporate performance will also be taken into account in determining base salary levels.

Another component of Named Executive Officer compensation is the grant of stock options pursuant to the Corporation's Stock Option Plan. The objective of this compensation component is to attract, retain and motivate certain persons of training, experience and leadership as key service providers to the Corporation, including its directors, Named Executive Officers and employees and to advance the interest of the Corporation by providing such persons with additional compensation and the opportunity to participate in the success of the Corporation.

In addition to, or in lieu of, the compensation components described above, payments may be made from time to time to individuals, including Named Executive Officers or directors of the Corporation, or companies they control for the provision of management or consulting services. Such services are paid for by the Corporation at competitive industry rates for work of a similar nature by reputable arm's length services providers.

Summary Compensation Table

The following table sets forth the value of the compensation, excluding compensation securities, of the Corporation's directors and Named Executive Officers, for the period from incorporation to October 31, 2017 and the fiscal year ended October 31, 2018:

Name and Principal Position	Year	Salary	Share-Based Awards	Option-Based Awards	Non-Equity Incentive Plan Compensation		Pension Value	All Other Compensation	Total Compensation
					Annual Incentive Plans	Long-Term Incentive Plans			

René Bharti <i>Chief Executive Officer and Director</i>	2017	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	2018	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
Deborah Battiston <i>Chief Financial Officer</i>	2017	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	2018	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.

Director Compensation Table

The table below sets out the compensation of directors that are not also Named Executive Officers of the Corporation.

Name	Year	Fees Earned	Share-Based Awards	Option-Based Awards	Non-Equity Incentive Plan Compensation	Pension Value	All Other Compensation	Total
Adil Suleimanov ⁽¹⁾	2017	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	2018	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
Orlando Bustos ⁽¹⁾	2017	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	2018	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.

Note:

⁽¹⁾Mr. Suleimanov and Mr. Bustos resigned as directors on January 14, 2019.

External Management Companies

Of the Corporation's Named Executive Officers, neither René Bharti nor Deborah Battiston were or are employees of the Corporation.

As of the date of this Prospectus, the Corporation has not executed any employment, consulting or management agreements with any of its directors, Named Executive Officers or an external management company.

Stock Options and Other Compensation Securities

Stock options are granted to provide an incentive to the directors, officers, employees and consultants of the Corporation to achieve the longer-term objectives of the Corporation; to give suitable recognition to the ability and industry of such persons who contribute materially to the success of the Corporation; and to attract and retain persons of experience and ability, by providing them with the opportunity to acquire an increased proprietary interest in the Corporation. See "Options to Purchase Securities" above for a description of the material terms of the Corporation's Stock Option Plan.

As at the date of this Prospectus, no stock options granted to the Corporation's directors and Named Executive Officers. See "Options to Purchase Securities" above.

The Corporation has not adopted any defined benefit or defined contributions plans.

Proposed Compensation

During the next 12 months, the Corporation proposes to pay the following compensation to its Named Executive Officers and directors:

Name and Principal Position	Salary	All Other Compensation	Total Compensation
René Bharti <i>Chief Executive Officer and Director</i>	Nil.	Nil.	Nil.
Deborah Battiston <i>Chief Financial Officer</i>	Nil.	Nil.	Nil.
Fred Leigh <i>Director</i>	Nil.	Nil.	Nil.
Dr. Andres Rompel <i>Director</i>	Nil.	Nil.	Nil.
Maurice Colson <i>Director</i>	Nil.	Nil.	Nil.

The payment of any future compensation to its Named Executive Officers and Directors will depend on the growth of the Issuer following the completion of the Offering and its access to capital, and will be determined by the Board.

INDEBTEDNESS OF DIRECTORS AND EXECUTIVE OFFICERS

Other than routine indebtedness for travel and other expense advances, no existing or proposed director, executive officer or senior officer of the Corporation or any associate of any of them, was indebted to the Corporation as at October 31, 2018, or is currently indebted to the Corporation at the date of this Prospectus.

AUDIT COMMITTEE AND CORPORATE GOVERNANCE

Audit Committee

National Instrument 52-110 – *Audit Committees* (“NI 52-110”), NI 41-101 and Form 52-110F1 require the Corporation to disclose certain information relating to the Corporation's audit committee (the "Audit Committee") and its relationship with the Corporation's independent auditors.

Audit Committee Charter

The text of the Audit Committee's charter is attached hereto as Schedule “A”.

Composition of Audit Committee

The members of the Corporation's Audit Committee are set out below:

René Bharti	Not Independent ⁽¹⁾	Financially Literate ⁽²⁾
Maurice Colson	Independent ⁽¹⁾	Financially Literate ⁽²⁾
Dr. Andreas Rompel	Independent ⁽¹⁾	Financially Literate ⁽²⁾

Notes:

- (1) A member of an audit committee is independent if the member has no direct or indirect material relationship with the Corporation, which could, in the view of the Corporation's Board of Directors, reasonably interfere with the exercise of a member's independent judgment.
- (2) An individual is financially literate if he has the ability to read and understand a set of financial statements that

present a breadth of complexity of accounting issues that are generally comparable to the breadth and complexity of the issues that can reasonably be expected to be raised by the Corporation's financial statements.

Relevant Education and Experience

Each member of the Corporation's present Audit Committee has adequate education and experience that is relevant to their performance as an Audit Committee member and, in particular, the requisite education and experience that have provided the member with:

- (a) an understanding of the accounting principles used by the Corporation to prepare its financial statements and the ability to assess the general application of those principles in connection with estimates, accruals and reserves;
- (b) the ability to assess the general application of such accounting principles in connection with the accounting for estimates, accruals and provisions;
- (c) experience preparing, auditing, analyzing or evaluating financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of issues that can reasonably be expected to be raised by the Corporation's financial statements or experience actively supervising individuals engaged in such activities; and
- (d) an understanding of internal controls and procedures for financial reporting.

In particular, the audit committee members have the following experience and expertise:

René Bharti. Mr. Bharti has held several roles over the past 20 years in both public and private companies, including those in the resource, technology and entertainment industry. In particular, Mr. Bharti has held positions in emerging resource companies, including as director of Alder Resources Ltd., and Rosita Mining Corporation. Mr. Bharti is currently a director of ARHT Media Inc. and Jourdan Resources Inc. Mr. Bharti holds a B.Comm (Honours) from Queen's University.

Dr. Andreas Rompel. Dr. Rompel is an exploration professional with three decades of exploration and mining experience in a wide range of roles from VP Exploration and Project Manager to Country Manager and Corporate Development. Dr. Rompel has worked in a variety of commodities, including precious metals and base metals as well as energy metals - cobalt. For more than a decade Dr. Rompel evaluated capital projects within Anglo American and was on the board of Spectrem (an Anglo-American Company) as Technical Director. Dr Rompel was formerly the President & CEO of Cobalt Power Group Inc. and is currently a director of QMX Gold Corporation and president and director of Jourdan Resources Inc. Dr. Rompel is a fellow of the South African Institute of Mining and Metallurgy and a member of the Council for Geosciences of South Africa.

Dr. Rompel's involvement as both an officer and director with other companies operating in the resource sector, including Cobalt Power Group Inc. QMX Gold Corporation and Jourdan Resources Inc., have provided him with appropriate experience in analyzing and evaluating financial statements.

Maurice Colson. Mr. Colson has worked in the investment industry for more than 35 years and was for many years managing director for a major Canadian investment dealer in the United Kingdom. He is actively involved in providing strategic counsel and assistance with financing to emerging private and public companies in Canada and to Canadian companies operating internationally. He sits on the board of directors of several TSX and TSX Venture listed companies and is the former President and CEO of Lithium One Resources. Mr. Colson holds a Masters of

Business Administration degree from McGill University.

Audit Committee Oversight

The Audit Committee was established on February 15, 2019 and will, among other things, make recommendations to the Board of Directors to nominate or compensate an external auditor. As of the date of this Prospectus, the Audit Committee has not made any such recommendations for the Board to consider.

Reliance on Certain Exemptions

At no time since the commencement of the Corporation's most recently completed financial year has the Corporation relied on the exemptions in Sections 2.4, 3.2, 3.4, 3.5, 3.6 or Part 8 of NI 52-110, or an exemption from subsections 3.3(2) of NI 52-110. The Corporation is relying on the exemption in Section 6.1 of NI 32-110 regarding the composition of the audit committee and reporting obligations.

Pre-Approval Policies and Procedures

The Audit Committee is authorized by the Board of Directors to review the performance of the Corporation's external auditors and approve in advance the provision of services other than auditing and to consider the independence of the external auditors, including a review of the range of services provided in the context of all consulting services engaged by the Corporation. The Audit Committee is authorized to approve in writing any non-audit services or additional work which the Chairman of the Audit Committee deems is necessary and the Chairman will notify the other members of the Audit Committee of such non-audit or additional work and the reasons for such non-audit work for the Committee's consideration and, if thought fit, approval in writing.

External Auditor Service Fees

The aggregate fees charged to the Corporation by the external auditors for last two fiscal years are as follows:

Nature of Services	Fees Paid to Auditor in Year-ended October 31, 2017 (\$)	Fees Paid to Auditor in Year-ended October 31, 2018 (\$)
Audit Fees ⁽¹⁾	\$Nil	\$8,000
Audit-Related Fees ⁽²⁾	\$Nil	\$3,500
Tax Fees ⁽³⁾	\$Nil	\$1,500
All Other Fees ⁽⁴⁾	\$Nil	\$Nil
TOTALS	\$Nil	\$13,000

Notes:

- (1) "Audit Fees" include fees necessary to perform the annual audit and any quarterly reviews of the Corporation's financial statements. This includes fees for the review of tax provisions and for accounting consultations on matters reflected in the financial statements. This also includes audit or other attest services required by legislation or regulation, such as comfort letters, consents, reviews of securities filings and statutory audits.
- (2) "Audit-Related Fees" include fees for assurance and related services that are reasonably related to the performance of the audit or review of the Corporation's financial statements and that are not included in "Audit Fees".
- (3) "Tax Fees" include fees for professional services rendered by the Corporation's auditors for tax compliance, tax advice and tax planning.
- (4) "All Other Fees" include fees for products and services provided by the Corporation's auditors other than the services included in "Audit Fees", "Audit-Related Fees" and "Tax Fees".

Exemption

The Corporation is relying on Section 6.1 of *National Instrument 52-110 – Audit Committees* with respect to the composition and reporting obligations of the Corporation.

Corporate Governance

General

The Board of Directors believes that good corporate governance improves corporate performance and benefits all shareholders. National Policy 58-201 - *Corporate Governance Guidelines* provides non-prescriptive guidelines on corporate governance practices for reporting issuers such as the Corporation. In addition, National Instrument 58-101 - *Disclosure of Corporate Governance Practices* ("NI 58-101") prescribes certain disclosure by the Corporation of its corporate governance practices. This disclosure is presented below.

Board of Directors

The Board of Directors facilitates its exercise of independent supervision over the Corporation's management through frequent meetings of the Board.

The Board is comprised of four directors, of whom Maurice Colson and Dr. Andreas Rompel are independent for the purposes of NI 58-101. René Bharti is a member of the Corporation's management and is not independent as he serves as Chief Executive Officer of the Corporation. Fred Leigh is not independent as he is the promoter of the Issuer.

At this time, the Board of Directors does not have a Chairman. In the absence of a Chairman, and in accordance with the articles of the Corporation, the Chief Executive Officer of the Corporation is responsible for presiding over all meetings of the directors and shareholders. He is not an independent director; however, the independent directors either have significant experience as directors and officers of publicly traded companies or as members of the financial investment community and, therefore, do not require the guidance of an independent Chairman of the Board in exercising their duties.

The independent directors do not hold regularly scheduled meetings at which non-independent directors and members of management are not in attendance. In order to facilitate open and candid discussion among independent directors, directors are encouraged to regularly and independently confer amongst themselves. Additionally, when a matter being considered involves a director, that director does not vote on the matter.

Directorships

Certain of the Corporation's directors are also currently directors of other reporting issuers as follows:

Name	Reporting Issuer
René Bharti	Jourdan Resources Inc. Ridgemont Iron Ore Corp. ARHT Media Inc.
Fred Leigh	Copper One Inc. Halo Labs Inc. Magnolia Colombia Ltd. Q-Gold Resources Ltd. QMX Gold Corporation Routemaster Capital Inc.
Dr. Andreas Rompel	Jourdan Resources Inc. QMX Gold Corporation

Maurice Colson	China Goldcorp Ltd. Delrand Resources Limited Loncor Resources Inc. Magnolia Colombia Ltd. Aberdeen International Inc.
----------------	--

Board Mandate

The Board of Directors has not adopted a written mandate or code delineating the Board's roles and responsibilities, since it believes it is adequately governed by the requirements of applicable corporate and securities common and statute law which provide that the Board has responsibility for the stewardship of the Corporation. That stewardship includes responsibility for strategic planning, identification of the principal risks of the Corporation's business and implementation of appropriate systems to manage these risks, succession planning (including appointing, training and monitoring senior management), communications with investors and the financial community and the integrity of the Corporation's internal control and management information systems.

Orientation and Continuing Education

When new directors are appointed they receive orientation, commensurate with their previous experience, on the Corporation's business, assets and industry and on the responsibilities of directors. Meetings of the Board are sometimes held at the Corporation's offices and, from time to time, are combined with presentations by the Corporation's management to give the directors additional insight into the Corporation's business. In addition, management of the Corporation makes itself available for discussion with all members of the Board.

Ethical Business Conduct

The Board of Directors has not adopted a formal code of business conduct and ethics. The Board has found that the fiduciary duties placed on individual directors by the Corporation's governing corporate legislation and the common law and the restrictions placed by applicable corporate legislation on an individual director's participation in decisions of the Board in which the director has an interest have been sufficient to ensure that the Board operates independently of management and in the best interests of the Corporation.

Nomination of Directors

The Board considers its size each year when it considers the number of directors to recommend to the shareholders for election at the annual meeting of shareholders, taking into account the number required to carry out the Board's duties effectively and to maintain a diversity of view and experience.

The Board does not have a nominating committee and these functions are currently performed by the Board as a whole, however, if there is a change in the number of directors required by the Corporation, this policy will be reviewed.

The process by which candidates are identified is through recommendations presented to the Board of Directors, which establishes and discusses qualifications based on the needs of the Issuer, corporate law and regulatory requirements as well as education and experience related to the business of the Corporation.

Compensation

The Board is responsible for determining compensation for the directors of the Corporation to ensure it reflects the responsibilities and risks of being a director of a public company.

Other Board Committees

The Board has no committee other than the Audit Committee.

Assessments

Due to the minimal size of the Board of Directors, no formal policy has been established to monitor the effectiveness of the directors, the Board and its committees.

Insider Trading Policy

The Issuer has implemented a Disclosure, Confidentiality and Insider Trading Policy (the "**Policy**") for its directors, officers and employees. This Policy addresses, among other things, compliance with the Corporation's timely disclosure obligations as required under applicable Canadian securities laws, including the *Securities Act* (Ontario), the prevention of selective disclosure of material changes to analysts, institutional investors, market professionals and others and ensuring that all appropriate parties who have undisclosed material information concerning the Issuer are prohibited from trading in securities of the Corporation on such undisclosed material information under applicable securities laws, stock exchange rules and the Policy.

PLAN OF DISTRIBUTION

The Offering consists of 3,500,000 Common Shares at a price of \$0.10 per Common Share, to raise gross proceeds of \$350,000, and will be conducted through the Agent in the provinces of Ontario, Alberta and British Columbia. The Offering Price was established through negotiations between the Corporation and the Agent.

Pursuant to the Agency Agreement, the Corporation has engaged the Agent as its exclusive agent for the purposes of the Offering. The Offering Price and terms of the Offering were established through negotiation between the Corporation and the Agent, in accordance with the policies of the Exchange. The Agent has agreed to use its commercially reasonable efforts to secure subscriptions for the Common Shares offered pursuant to the Offering in the provinces of Ontario, Alberta and British Columbia. This Prospectus qualifies the distribution of the Common Shares to Subscribers in those jurisdictions. The Agent may offer selling group participation in the normal course of the brokerage business to selling groups of other licensed dealers, brokers, and investment dealers who may or may not be offered part of the Agent's Fee or Agent's Options derived from this Offering.

The Agent may terminate its obligations under the Agency Agreement by notice in writing to the Corporation at any time before the Closing if, on the basis of its assessment of the state of the financial markets or the market for the Common Shares, the Common Shares cannot be marketed profitably or upon the occurrence of certain other stated events. The Agent may also terminate its obligations under the Agency Agreement at any time upon the occurrence of certain events, such as the breach of any term of the Agency Agreement by the Corporation.

The Agency Agreement provides that the Agent will have a right of first refusal to act as the Corporation's fiscal agent for any brokered financing for 12 months following the completion of the Offering. The Agency Agreement also provides that if the Agent exercises its right to terminate the Agency Agreement, then the Corporation will immediately issue a press release setting out particulars of the termination.

The Corporation has agreed to pay the Agent (A) an Agent's Fee equal to 7.5% of the aggregate Offering Price of the Common Shares sold under the Offering; and (B) a cash Corporate Finance Fee of \$25,000 (plus HST). In addition, upon successful completion of the Offering, the Agent is entitled to receive, as part of its remuneration, Agent's Options entitling the holder thereof to purchase that number of Agent's Option Shares equal to 7% of the number of Common Shares issued pursuant to this Offering. The Agent's Options will be exercisable at a price of \$0.10 per Agent's Option Share for a period of 24 months from the Listing Date.

Pursuant to NI 41-101 the aggregate number of securities which may be distributed under a prospectus to an Agent as compensation must not exceed 10% of the Common Shares offered pursuant to this Prospectus, which in the case of this Offering is 350,000 securities. For the purposes of this Offering, the 245,000 Agent's Options are qualified for distribution by this Prospectus.

This Offering is subject to the completion of a minimum subscription of 3,500,000 Common Shares for gross proceeds to the Corporation of \$350,000. If the minimum subscription is not completed within 90 days of the issuance of a receipt for the (final) Prospectus or, if a receipt is issued for an amendment to the (final) Prospectus, within 90 days of the issuance of such receipt and, in any event, not later than 180 days from the date of the receipt for the (final) Prospectus, or such other time as may be consented to by the Agent and Subscribers, all subscription monies will be returned to Subscribers without interest or deduction, unless the Subscribers have otherwise instructed the Agent.

The Corporation has applied to list its Common Shares including the Agent's Option Shares on the CSE. Listing will be subject to the Corporation fulfilling all of the requirements of the CSE. Confirmation of the listing of the Common Shares on the Exchange as of the Listing Date is a condition of Closing of the Offering.

As at the date of this Prospectus, the Corporation does not have any of its securities listed or quoted, has not applied to list or quote any of its securities and does not intend to apply to list or quote any of its securities, on the Toronto Stock Exchange, Aequis NEO Exchange Inc., a U.S. marketplace, or a marketplace outside of Canada and the United States of America other than the Alternative Investment Market of the London Stock Exchange or the PLUS markets operated by PLUS Markets Group plc.

Subscriptions for the Common Shares will be received and subject to rejection or allotment in whole or in part by the Corporation and the right is reserved to close the subscription books at any time. Upon rejection of a subscription, the subscription price and the subscription agreement will be returned to the Subscriber forthwith without interest or deduction.

RISK FACTORS

The Corporation is in the business of exploring mineral properties, which is a highly speculative endeavor. A purchase of any of the securities offered hereunder involves a high degree of risk and should be undertaken only by purchasers whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment. An investment in the securities offered hereunder should not constitute a major portion of an individual's investment portfolio and should only be made by persons who can afford a total loss of their investment. Prospective purchasers should evaluate carefully the following risk factors associated with an investment in the Corporation's securities prior to purchasing any of the securities offered hereunder.

Insufficient Capital

The Corporation does not currently have any revenue producing operations and may, from time to time, report a working capital deficit. To maintain its activities, the Corporation will require additional funds which may be obtained either by the sale of equity capital or by entering into an option or joint venture agreement with a third party providing such funding. There is no assurance that the Corporation will be successful in obtaining such additional financing; failure to do so could result in the loss or substantial dilution of the Corporation's interest in the Division Property. The Corporation's unallocated working capital will not suffice to fund the any exploration programs on the Division Mountain Property other than the recommended work program and there is no assurance that the Corporation can successfully obtain additional financing to fund any such exploration programs.

Financing Risks

The Corporation has no history of earnings and, due to the nature of its business, there can be no assurance that the Corporation will be profitable. The Corporation has paid no dividends on its Common Shares since incorporation and does not anticipate doing so in the foreseeable future. The only present source of funds available to the Corporation is through the sale of its Common Shares. Even if the results of exploration are encouraging, the Corporation may not have sufficient funds to conduct the further exploration that may be necessary to determine whether or not a commercially mineable deposit exists on any of its properties. While the Corporation may generate additional working capital through further equity offerings or through the sale or possible syndication of its properties, there is no assurance that any such funds will be available on terms acceptable to the Corporation, or at all. If available, future equity financing may result in substantial dilution to purchasers under the Offering. At present it is impossible to determine what amounts of additional funds, if any, may be required.

Limited Operating History

The Corporation has no history of earnings. There are no known commercial quantities of mineral reserves on the Division Mountain Property. The purpose of this Offering is to raise funds to carry out exploration and development on the Division Mountain Property with the objective of establishing economic quantities of mineral reserves.

Resale of Shares

The continued operation of the Corporation will be dependent upon its ability to generate operating revenues and to procure additional financing. There can be no assurance that any such revenues can be generated or that other financing can be obtained. If the Corporation is unable to generate such revenues or obtain such additional financing, any investment in the Corporation may be lost. In such event, the probability of resale of the Common Shares purchased would be diminished.

Price Volatility of Publicly Traded Securities

In recent years, the securities markets in the United States and Canada have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. It may be anticipated that any quoted market for the Common Shares will be subject to market trends generally, notwithstanding any potential success of the Corporation in creating revenues, cash flows or earnings. The value of Common Shares distributed hereunder will be affected by such volatility.

Before this Offering, there has been no public market for the Corporation's Common Shares. An active public market for the Common Shares might not develop or be sustained after this

Offering. The Offering Price of the Common Shares has been determined by negotiations between the Corporation and representatives of the Agent, and such Offering Price will not necessarily reflect the prevailing market price of the Common Shares following this Offering. If an active public market for the Common Shares does not develop, the liquidity of a shareholder's investment may be limited and the share price may decline below the Offering Price to the public.

Property Interests

There is no guarantee that title to the Division Mountain Property will not be challenged or impugned. The Corporation's mineral property interests may be subject to prior unregistered agreements or transfers or aboriginal or indigenous land claims or title may be affected by undetected defects. Surveys have not been carried out on any of the Corporation's mineral properties, therefore, in accordance with the laws of the jurisdiction in which such properties are situated; their existence and area could be in doubt. Until competing interests in the mineral lands have been determined, the Corporation can give no assurance as to the validity of title of the Corporation to those lands or the size of such mineral lands.

First Nations Land Claims

The Division Mountain Property may now or in the future be the subject of aboriginal or indigenous land claims. The legal nature of aboriginal land claims is a matter of considerable complexity. The impact of any such claim on the Corporation's ownership interest in the Division Mountain Property cannot be predicted with any degree of certainty and no assurance can be given that a broad recognition of aboriginal rights in the area in which the Division Mountain Property is located, by way of a negotiated settlement or judicial pronouncement, would not have an adverse effect on the Corporation's activities. Even in the absence of such recognition, the Corporation may at some point be required to negotiate with and seek the approval of holders of aboriginal interests in order to facilitate exploration and development work on the Division Mountain Property, there is no assurance that the Corporation will be able to establish a practical working relationship with any First Nations in the area which would allow it to ultimately develop the Division Mountain Property.

Exploration and Development

Resource exploration and development is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Corporation may be affected by numerous factors which are beyond the control of the Corporation and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, the combination of which factors may result in the Corporation not receiving an adequate return of investment capital.

There is no assurance that the Corporation's mineral exploration and development activities will result in any discoveries of commercial bodies of ore. The long-term profitability of the Corporation's operations will in part be directly related to the costs and success of its exploration programs, which may be affected by a number of factors. Substantial expenditures are required to establish reserves through drilling and to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis.

Uninsurable Risks

In the course of exploration, development and production of mineral properties, certain risks and, in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. It is not always possible to fully insure against such risks and the Corporation may decide not to take out insurance against such risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Corporation.

Permits and Government Regulations

The future operations and exploration plans of the Corporation may require permits, including additional coal leases and licenses to cover the known resources in the southwestern portion of the Division Mountain Property deposit, from various federal, territorial, provincial and local governmental authorities and will be governed by laws and regulations governing prospecting, development, mining, production, export, taxes, labour standards, occupational health, waste disposal, land use, environmental protections, mine safety and other matters. There can be no guarantee that the Corporation will be able to obtain all necessary permits and approvals that may be required to undertake exploration activity or commence construction or operation of mine facilities on the Division Mountain Property. Failure to obtain such permits, leases or licenses may result in delays or cancellation of operations and exploration plans.

Environmental Laws and Regulations

Environmental laws and regulations may affect the operations of the Corporation. These laws and regulations set various standards regulating certain aspects of health and environmental quality. They provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to rehabilitate current and former facilities and locations where operations are or were conducted. The permission to operate can be withdrawn temporarily where there is evidence of serious breaches of health and safety standards, or even permanently in the case of extreme breaches. Significant liabilities could be imposed on the Corporation for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of acquired properties or noncompliance with environmental laws or regulations. In all major developments, the Corporation generally relies on recognized designers and development contractors from which the Corporation will, in the first instance, seek indemnities. The Corporation intends to minimize risks by taking steps to ensure compliance with environmental, health and safety laws and regulations and operating to applicable environmental standards. There is a risk that environmental laws and regulations may become more onerous, making the Corporation's operations more expensive.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Corporation and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Negative Operating Cash Flow

The Corporation operates at a loss and there is no assurance that the Corporation will ever be profitable. The Corporation had a negative operating cash flow in its most recently completed financial year and will continue to for the foreseeable future. The Corporation may not have enough funds to carry out any additional work programs subsequent to the recommended work program on the Division Mountain Property as set out in the Technical Report and additional

financings may be required and cannot be assured.

Since its incorporation on February 8, 2017, the Corporation has not generated cash flow from its operations and has incurred certain operating losses. Such losses and negative operating cash flow are expected to continue since funds will be expended to pay its administrative expenses and to conduct the recommended Phase 1 exploration program on the Division Mountain Property. Although the Corporation has allocated \$97,542 from the Offering to fund its ongoing operations for a period of 12 months and expects to have \$20,352 in unallocated working capital, the Corporation will be reliant on future equity and/or debt financings for its funding requirements.

No Commercial Coal

The Division Mountain Property on which a portion of the proceeds of the Offering is to be expended does not contain any known amounts of commercial coal.

Competition

The mining industry is intensely competitive in all its phases and the Corporation competes with other companies that have greater financial resources and technical facilities. Competition could adversely affect the Corporation's ability to acquire suitable properties or prospects in the future.

Management

The success of the Corporation is currently largely dependent on the performance of its officers. The loss of the services of these persons will have a materially adverse effect on the Corporation's business and prospects. There is no assurance the Corporation can maintain the services of its officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Corporation and its prospects.

Fluctuating Coal Prices and Currency

The Corporation's revenues, if any, are expected to be in large part derived from the extraction and sale of coal. Factors beyond the control of the Corporation may affect the marketability of minerals discovered, if any. Coal prices have fluctuated widely, particularly in recent years. Consequently, the economic viability of any of the Corporation's exploration projects cannot be accurately predicted and may be adversely affected by fluctuations in coal prices. In addition, currency fluctuations may affect the cash flow which the Corporation may realize from its operations, since most mineral commodities are sold in the world market in United States dollars.

Relationship Between Parties

Hannele Bharti is the sole shareholder of Forbes & Manhattan Inc., which is a principal shareholder of the Issuer prior to the completion of the Offering. Ms. Bharti is also the mother of Rene Bharti, who is the Chief Executive Officer and a director of the Issuer. As such, a potential conflict of interest may occur in dealings between these two parties as a result of the familial relationship between Ms. Bharti and Mr. Bharti.

Conflicts of Interest

Some of the directors and officers are engaged and will continue to be engaged in the search for additional business opportunities on behalf of other corporations, and situations may arise where these directors and officers will be in direct competition with the Corporation. Conflicts, if any,

will be dealt with in accordance with the relevant provisions of the *Business Corporations Act* (Ontario).

Some of the directors and officers of the Corporation are or may become directors or officers of other companies engaged in other business ventures. In order to avoid the possible conflict of interest which may arise between the directors' duties to the Corporation and their duties to the other companies on whose boards they serve, the directors and officers of the Corporation have agreed to the following:

- (a) participation in other business ventures offered to the directors will be allocated between the various companies and on the basis of prudent business judgment and the relative financial abilities and needs of the companies to participate;
- (b) no commissions or other extraordinary consideration will be paid to such directors and officers; and
- (c) business opportunities formulated by or through other companies in which the directors and officers are involved will not be offered to the Corporation except on the same or better terms than the basis on which they are offered to third party participants.

Dividends

The Corporation does not anticipate paying any dividends on its Common Shares in the foreseeable future.

PROMOTERS

Mr. Fred Leigh is considered to be a promoter of the Corporation in that he took the initiative in organizing the Corporation. Mr. Leigh currently holds a total of 2,560,541 (36.47%) of the Corporation's currently issued and outstanding Common Shares, or 24.34% after giving effect to the Offering. See "Principal Shareholders" above for further details.

The named promoter of the Corporation has provided and may continue to provide management and administrative services to the Corporation for monthly fees, as more particularly outlined under the headings "Management's Discussion and Analysis" above and "Interest of Management and Others in Material Transactions" below.

LEGAL PROCEEDINGS AND REGULATORY ACTIONS

The Corporation is not a party to any legal proceedings or regulatory actions and is not aware of any such proceedings known to be contemplated.

INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

Except as set out above, the directors, senior officers and principal shareholders of the Corporation, a person or company that beneficially owns or controls or directs, directly or indirectly more than 10% of the Common Shares of the Corporation, or any associate or affiliate of the foregoing have had no material interest, direct or indirect, in any transactions in which the Corporation has participated within the three year period prior to the date of this Prospectus, or will have any material interest in any proposed transaction, which has materially affected or will materially affect the Corporation.

RELATIONSHIP BETWEEN THE ISSUER AND AGENT

The Corporation is not a related party or connected party to the Agent (as such terms are defined in National Instrument 33-105 *Underwriting Conflicts*).

AUDITORS

The auditor of the Corporation is UHY McGovern Hurley LLP, Chartered Accountants, of 251 Consumers Rd Suite 800, North York, Ontario, M2J 4R3.

REGISTRAR AND TRANSFER AGENT

The registrar and transfer agent of the Corporation is TSX Trust Corporation, of 100 Adelaide Street West, Suite 301, Toronto, Ontario, M5H 4H1.

MATERIAL CONTRACTS

Except for contracts made in the ordinary course of business, the following are the only material contracts entered into by the Corporation since its incorporation and that are still in effect as of the date hereof:

1. Stock Option Plan approved by the Board of Directors on February 9, 2017 referred to under "Options to Purchase Securities".
2. Escrow Agreement between the Corporation, TSX Trust Corporation and certain Principals of the Corporation dated June 26, 2019 referred to under "Escrowed Shares".
3. Agency Agreement between the Corporation and PI Financial Corp. dated as of June, 26, 2019, referred to under "Plan of Distribution".

A copy of any material contract and the Technical Report may be inspected during the distribution of the Common Shares being offered under this Prospectus and for a period of 30 days thereafter during normal business hours at the Corporation's offices at 65 Queen Street West, 8th Floor, Toronto, Ontario, M5H 2M5. As well, the Technical Report is available for viewing on SEDAR located at: www.sedar.com.

EXPERTS

Except as disclosed below, no person or company whose profession or business gives authority to a report, valuation, statement or opinion and who is named as having prepared or certified a part of this Prospectus or as having prepared or certified a report or valuation described or included in this Prospectus holds or is to hold any beneficial or registered interest, direct or indirect, in any securities or property of the Corporation or any associate or affiliate of the Corporation.

Certain legal matters related to this Offering will be passed upon on behalf of the Corporation by Chitiz Pathak LLP and also by Cummings Cooper Schusheim Berliner LLP concerning the opinion provided under "Eligibility for Investment".

Kevin Brewer, P. Geo, the Author of the Technical Report on the Division Mountain Property, is independent from the Corporation within the meaning of NI 43-101.

UHY McGovern Hurley LLP, Chartered Accountants is the auditor of the Corporation. UHY

McGovern Hurley LLP has informed the Corporation that it is independent of the Corporation within the meaning of the rules of professional conduct of the Institute of Chartered Professional Accountants of Ontario.

OTHER MATERIAL FACTS

There are no other material facts other than as disclosed herein.

ELIGIBILITY FOR INVESTMENT

In the opinion of Cummings Cooper Schusheim Berliner LLP, tax counsel to the Corporation, based on the current provisions of the *Income Tax Act* (Canada) (the "**Tax Act**") and the regulations thereunder in force on the date hereof (the "**Regulations**"), all proposals to amend the Tax Act and Regulations publically announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof and counsel's understanding of the current published administrative practices of the Canada Revenue Agency, the Common Shares issued pursuant to the Offering, if issued on the date hereof, would be "qualified investments" under the Tax Act for trusts governed by a registered retirement savings plan ("**RRSP**"), registered retirement income fund ("**RRIF**"), registered education savings plan ("**RESP**"), registered disability savings plan ("**RDSP**"), deferred profit sharing plan and tax-free savings account ("**TFSA**"), each as defined in the Tax Act (collectively, "**Deferred Plans**"), provided that the Common Shares are on the date hereof listed on a "designated stock exchange" for purposes of the Tax Act (which currently includes the Exchange) or the Corporation is otherwise a "public corporation", as that term is defined in the Tax Act, on the date hereof.

The Common Shares are not currently listed on a "designated stock exchange" and the Corporation is not currently a "public corporation" for the purposes of the Tax Act. The Corporation has applied to list the Common Shares on the Exchange as of the day before Closing, followed by an immediate halt in trading of the Common Shares in order to allow the Corporation to satisfy the conditions of the Exchange and to have the Common Shares listed and posted for trading prior to the issuance of the Common Shares on Closing. The Corporation must rely on the Exchange to list the Common Shares on the Exchange and have them posted for trading prior to the issuance of the Common Shares on Closing, and to otherwise proceed in such manner as may be required to result in the Common Shares being listed on the Exchange at the time of their issuance on Closing. If the Common Shares are not listed on the Exchange at the time of their issuance and the Corporation is not otherwise a "public corporation" for the purposes of the Tax Act at that time, the Common Shares will not be qualified investments for the Deferred Plans at that time.

Notwithstanding that the Common Shares may be qualified investments for a RRSP, RRIF, RESP, RDSP or TFSA, the holder, annuitant or subscriber thereof, as the case may be, will be subject to a penalty tax under the Tax Act if the Common Shares are a "prohibited investment" for purposes of the Tax Act for the RRSP, RRIF, RESP, RDSP or TFSA. The Common Shares will generally be a "prohibited investment" for a particular RRSP, RRIF, RESP, RDSP or TFSA, if the holder, annuitant or subscriber thereof, as applicable, (i) does not deal at arm's length with the Corporation for the purposes of the Tax Act or (ii) has a "significant interest", as defined in the Tax Act, in the Corporation. Generally, a holder, annuitant or subscriber, as applicable, will not have a "significant interest" in the Corporation unless the holder, annuitant or subscriber, together with persons with whom the holder, annuitant or subscriber, as applicable, does not deal at arm's length, does not own, directly or indirectly, 10% or more of the issued shares of any class of the capital stock of the Corporation or of a corporation "related" to the Corporation (for purposes of the Tax Act). In addition, the Common Shares will generally not be a "prohibited investment" if the Common Shares are "excluded property" as defined in subsection 207.01(1) of the Tax Act.

Purchasers who intend to hold Common Shares in a Deferred Plan should consult their own tax advisors in regard to the application of these rules in their particular circumstances.

PURCHASERS' STATUTORY RIGHT OF WITHDRAWAL AND RESCISSION

Securities legislation in the Provinces of Ontario, Alberta and British Columbia provides Subscribers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two business days after receipt or deemed receipt of a prospectus and any amendment. In several of the provinces, the securities legislation further provides a purchaser with remedies for rescission, revisions of the price or damages if the prospectus and any amendment contain a misrepresentation or is not delivered to the Subscriber, provided that the remedies for rescission or damages are exercised by the Subscriber within the time limit prescribed by the securities legislation of the Subscriber's province or territory. The Subscriber should refer to any applicable provisions of the securities legislation of the purchaser's province for the particulars of these rights or consult with a legal adviser.

EXEMPTIONS FROM PROSPECTUS FORM REQUIREMENTS

The Corporation has applied for relief from section 32.2 of Form 41-101F1 – Information Required in a Prospectus (“**Form 41-101F1**”), as prescribed by National Instrument 41-101 – *General Prospectus Requirements* in respect of the financial statements of the Division Mountain Property. The Division Mountain Property will form the primary business of the Corporation pursuant to section 32.1(1)(b) of Form 41-101F1, which would require the Corporation to provide the audited carve-out financial statements of this property for the period from November 1, 2016 to August 20, 2017 (the “**Time Period**”).”

The Corporation has sought relief from the requirement to include audited financial statements for the Division Mountain Property for the Time Period on the basis that:

- (a) the Division Mountain Property has been dormant during the Time Period as no exploration expenditures had been incurred by Pitchblack Resources Inc. and, therefore, there would be no exploration expenditures or capitalized exploration assets presented in such financial statements for the Time Period;
- (b) there are no liabilities, contingent liabilities or asset-retirement obligations that would have been recorded or disclosed on the balance sheet or in the notes to the financial statements for the Time Period for the Division Mountain Property; and
- (c) The Issuer has conducted satisfactory due diligence to determine that there are no liabilities present on the Division Mountain Property, including confirmation by the Issuer that there are no liens or encumbrances registered against this property. As the financial statements for the Time Period would be nil statements, no additional information would be provided to existing shareholders or prospective investors in the Corporation by including such statements in the Prospectus.

The Corporation has been advised by staff of the Ontario Securities Commission that the issuance of a receipt for the final prospectus in respect of the Offering will evidence the granting of the relief.

FINANCIAL STATEMENTS

Attached as Schedule "B" and forming part of this Prospectus are the audited financial statements of the Corporation for the period from incorporation date to October 31, 2017 and the fiscal year ended October 31, 2018 and the unaudited financial statements for the second quarter ended April 30, 2019.

SCHEDULE "A"- Audit Committee Charter

YUKOTERRE RESOURCES INC.

AUDIT COMMITTEE CHARTER

1. **Mandate and Purpose of the Committee**

The Audit Committee (the "**Committee**") of the board of directors (the "**Board**") of Yukoterre Resources Inc. (the "**Corporation**") is a standing committee of the Board whose primary function is to assist the Board in fulfilling its oversight responsibilities relating to:

- (a) the integrity of the Corporation's financial statements;
- (b) the Corporation's compliance with legal and regulatory requirements, as they relate to the Corporation's financial statements;
- (c) the qualifications, independence and performance of the Corporation's auditor;
- (d) internal controls and disclosure controls;
- (e) the performance of the Corporation's internal audit function;
- (f) consideration and approval of certain related party transactions; and
- (g) performing the additional duties set out in this Charter or otherwise delegated to the Committee by the Board.

2. **Authority**

The Committee has the authority to:

- (a) engage and compensate independent counsel and other advisors as it determines necessary or advisable to carry out its duties; and
- (b) communicate directly with the Corporation's auditor.

The Committee has the authority to delegate to individual members or subcommittees of the Committee.

3. **Composition and Expertise**

The Committee shall be composed of a minimum of three members, each of whom is a director of the Corporation. The majority of the Committee's members must not be officers or employees of the Corporation or an affiliate of the Corporation.

Committee members shall be appointed annually by the Board at the first meeting of the Board following each annual meeting of shareholders. Committee members hold office until the next

annual meeting of shareholders or until they are removed by the Board or cease to be directors of the Corporation.

The Board shall appoint one member of the Committee to act as Chairman of the Committee. If the Chairman of the Committee is absent from any meeting, the Committee shall select one of the other members of the Committee to preside at that meeting.

4. Meetings

Any member of the Committee or the auditor may call a meeting of the Committee. The Committee shall meet at least four times per year and as many additional times as the Committee deems necessary to carry out its duties. The Chairman shall develop and set the Committee's agenda, in consultation with other members of the Committee, the Board and senior management.

Notice of the time and place of every meeting shall be given in writing to each member of the Committee, at least 72 hours (excluding holidays) prior to the time fixed for such meeting. The Corporation's auditor shall be given notice of every meeting of the Committee and, at the expense of the Corporation, shall be entitled to attend and be heard thereat. If requested by a member of the Committee, the Corporation's auditor shall attend every meeting of the Committee held during the term of office of the Corporation's auditor.

A majority of the Committee who are not officers or employees of the Corporation or an affiliate of the Corporation shall constitute a quorum. No business may be transacted by the Committee except at a meeting of its members at which a quorum of the Committee is present in person or by means of such telephonic, electronic or other communications facilities as permit all persons participating in the meeting to communicate with each other simultaneously and instantaneously. Business may also be transacted by the unanimous written consent resolutions of the members of the Committee, which when so approved shall be deemed to be resolutions passed at a duly called and constituted meeting of the Committee.

The Committee may invite such directors, officers and employees of the Corporation and advisors as it sees fit from time to time to attend meetings of the Committee.

The Committee shall meet without management present whenever the Committee deems it appropriate.

The Committee shall appoint a Secretary who need not be a director or officer of the Corporation. Minutes of the meetings of the Committee shall be recorded and maintained by the Secretary and shall be subsequently presented to the Committee for review and approval.

5. Committee and Charter Review

The Committee shall conduct an annual review and assessment of its performance, effectiveness and contribution, including a review of its compliance with this Charter. The Committee shall conduct such review and assessment in such manner as it deems appropriate and report the results thereof to the Board.

The Committee shall also review and assess the adequacy of this Charter on an annual basis, taking into account all legislative and regulatory requirements applicable to the Committee, as well as

any guidelines recommended by regulators or the Canadian Securities Exchange and shall recommend changes to the Board thereon.

6. Reporting to the Board

The Committee shall report to the Board in a timely manner with respect to each of its meetings held. This report may take the form of circulating copies of the minutes of each meeting held.

7. Duties and Responsibilities

(a) Financial Reporting

The Committee is responsible for reviewing and recommending approval to the Board of the Corporation's annual and interim financial statements, any auditor's report thereon, MD&A and related news releases, before they are published.

The Committee is also responsible for:

- (i) being satisfied that adequate procedures are in place for the review of the Corporation's public disclosure of financial information extracted or derived from the Corporation's financial statements, other than the public disclosure referred to in the preceding paragraph, and for periodically assessing the adequacy of those procedures;
- (ii) engaging the Corporation's auditor to perform a review of the interim financial statements and receiving from the Corporation's auditor a formal report on the auditor's review of such interim financial statements;
- (iii) discussing with management and the Corporation's auditor the quality of applicable accounting principles and financial reporting standards, not just the acceptability of thereof;
- (iv) discussing with management any significant variances between comparative reporting periods; and
- (v) in the course of discussion with management and the Corporation's auditor, identifying problems or areas of concern and ensuring such matters are satisfactorily resolved.

(b) Auditor

The Committee is responsible for recommending to the Board:

- (i) the auditor to be nominated for the purpose of preparing or issuing an auditor's report or performing other audit, review or attest services for the Corporation; and
- (ii) the compensation of the Corporation's auditor.

The Corporation's auditor reports directly to the Committee. The Committee is directly responsible for overseeing the work of the Corporation's auditor engaged for the purpose of preparing or issuing an auditor's report or performing other audit, review or attest services for the Corporation, including the resolution of disagreements between management and the Corporation's auditor regarding financial reporting.

(c) Relationship with the Auditor

The Committee is responsible for reviewing the proposed audit plan and proposed audit fees. The Committee is also responsible for:

- (i) establishing effective communication processes with management and the Corporation's auditor so that it can objectively monitor the quality and effectiveness of the auditor's relationship with management and the Committee;
- (ii) receiving and reviewing regular feedback from the auditor on the progress against the approved audit plan, important findings, recommendations for improvements and the auditor's final report;
- (iii) reviewing, at least annually, a report from the auditor on all relationships and engagements for non-audit services that may be reasonably thought to bear on the independence of the auditor; and
- (iv) meeting in camera with the auditor whenever the Committee deems it appropriate.

(d) Accounting Policies

The Committee is responsible for:

- (i) reviewing the Corporation's accounting policy note to ensure completeness and acceptability with applicable accounting principles and financial reporting standards as part of the approval of the financial statements;
- (ii) discussing and reviewing the impact of proposed changes in accounting standards or securities policies or regulations;
- (iii) reviewing with management and the auditor any proposed changes in major accounting policies and key estimates and judgments that may be material to financial reporting;
- (iv) discussing with management and the auditor the acceptability, degree of aggressiveness/conservatism and quality of underlying accounting policies and key estimates and judgments; and
- (v) discussing with management and the auditor the clarity and completeness of the Corporation's financial disclosures.

(e) **Risk and Uncertainty**

The Committee is responsible for reviewing, as part of its approval of the financial statements:

- (i) uncertainty notes and disclosures; and
- (ii) MD&A disclosures.

The Committee, in consultation with management, will identify the principal business risks and decide on the Corporation's "appetite" for risk. The Committee is responsible for reviewing related risk management policies and recommending such policies for approval by the Board. The Committee is then responsible for communicating and assigning to the applicable Board committee such policies for implementation and ongoing monitoring.

The Committee is responsible for requesting the auditor's opinion of management's assessment of significant risks facing the Corporation and how effectively they are managed or controlled.

(f) **Controls and Control Deviations**

The Committee is responsible for reviewing:

- (i) the plan and scope of the annual audit with respect to planned reliance and testing of controls; and
- (ii) major points contained in the auditor's management letter resulting from control evaluation and testing.

The Committee is also responsible for receiving reports from management when significant control deviations occur.

(g) **Compliance with Laws and Regulations**

The Committee is responsible for reviewing regular reports from management and others (e.g. auditors) concerning the Corporation's compliance with financial related laws and regulations, such as:

- (i) tax and financial reporting laws and regulations;
- (ii) legal withholdings requirements;
- (iii) environmental protection laws; and
- (iv) other matters for which directors face liability exposure.

(h) **Related Party Transactions**

All transactions between the Corporation and a related party (each a "related party transaction"), other than transactions entered into in the ordinary course of business, shall be presented to the Committee for consideration.

The term "related party" includes (i) all directors, officers, employees, consultants and their associates (as that term is defined in the *Securities Act* (Ontario), as well as all entities with common directors, officers, employees and consultants (each "general related parties"), and (ii) all other individuals and entities having beneficial ownership of, or control or direction over, directly or indirectly securities of the Corporation carrying more than 10% of the voting rights attached to all of the Corporation's outstanding voting securities (each "10% shareholders").

Related party transactions involving general related parties which are not material to the Corporation require review and approval by the Committee. Related party transactions that are material to the Corporation or that involve 10% shareholders require approval by the Board, following review thereof by the Committee and the Committee providing its recommendation thereon to the Board.

8. Non-Audit Services

All non-audit services to be provided to the Corporation or its subsidiary entities by the Corporation's auditor must be pre-approved by the Committee.

9. Submission Systems and Treatment of Complaints

The Committee is responsible for establishing procedures for:

- (a) the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls, or auditing matters; and
- (b) the confidential, anonymous submission by employees of the Corporation of concerns regarding questionable accounting or auditing matters.

The Committee is responsible for reviewing complaints and concerns that are brought to the attention of the Chairman of the Audit Committee and for ensuring that any such complaints and concerns are appropriately addressed. The Committee shall report quarterly to the Board on the status of any complaints or concerns received by the Committee.

10. Procedure For Reporting Of Fraud Or Control Weaknesses

Each employee is expected to report situations in which he or she suspects fraud or is aware of any internal control weaknesses. An employee should treat suspected fraud seriously, and ensure that the situation is brought to the attention of the Committee. In addition, weaknesses in the internal control procedures of the Corporation that may result in errors or omissions in financial information, or that create a risk of potential fraud or loss of the Corporation's assets, should be brought to the attention of both management and the Committee.

To facilitate the reporting of suspected fraud, it is the policy of Corporation that the employee (the "whistleblower") has anonymous and direct access to the Chairman of the Audit Committee. Should a new Chairman be appointed prior to the updating of this document, the current Chairman will ensure that the whistleblower is able to reach the new Chairman in a timely manner. In the event that the Chairman of the Audit Committee cannot be reached, the whistleblower should contact the Chairman of the Board.

In addition, it is the policy of the Corporation that employees concerned about reporting internal control weaknesses directly to management are able to report such weaknesses to the Committee anonymously. In this case, the employee should follow the same procedure detailed above for reporting suspected fraud.

11. Hiring Policies

The Committee is responsible for reviewing and approving the Corporation's hiring policies regarding partners, employees and former partners and employees of the present and former auditor of the Corporation.

SCHEDULE "B"- Financial Statements

**Audited Financial Statements for the Period
from Incorporation Date to October 31, 2017**

And

**Audited Financial Statements for the Fiscal
Year ended October 31, 2018**

And

**Unaudited Financial Statements for the
Second Quarter Ended April 30, 2019**

Yukoterre Resources Inc.

FINANCIAL STATEMENTS

For the year ended October 31, 2018 and for the period from incorporation
(February 8, 2017) to October 31, 2017

(Expressed in Canadian Dollars)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Yukoterre Resources Inc.

We have audited the accompanying financial statements of Yukoterre Resources Inc., which comprise the statements of financial position as at October 31, 2018 and 2017, and the statements of loss and comprehensive loss, statements of shareholders' equity and statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Yukoterre Resources Inc. as at October 31, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which indicates that Yukoterre Resources Inc. had continuing losses during the year ended October 31, 2018 and a working capital deficiency and cumulative deficit as at October 31, 2018. These conditions along with other matters set forth in Note 1 indicate the existence of material uncertainties that cast significant doubt about the ability of Yukoterre Resources Inc. to continue as a going concern.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS

Yukoterre Resources Inc. (formerly 2560344 Ontario Inc.) (the "Company") was incorporated under the laws of the Province of Ontario, Canada by Articles of Incorporation, dated February 8, 2017, and on October 25, 2017 was renamed Yukoterre Resources Inc. The principal activity of the Company is the exploration and evaluation of coal. The Company's head office is located at 65 Queen Street West, 8th floor, Toronto, Ontario, M5H 2M5, Canada.

Going concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. Should the Company be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they become due.

The business of exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable coal operations. The Company's continued existence is dependent upon the acquisition of properties, preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis.

The Company does not have any operating assets that generate revenues, does not have proven reserves and incurred a net loss of \$61,484 during the year ended October 31, 2018 (October 31, 2017 - \$41,483). As at October 31, 2018, the Company had a working capital deficit of \$186,646 (October 31, 2017 - \$158) and an accumulated deficit of \$102,967 (October 31, 2017 - \$41,483). These conditions indicate the existence of material uncertainties which cast significant doubt about the Company's ability to continue as a going concern. The Company's ability as a going concern is dependent on the Company's ability to obtain additional financing if, as and when required, and, ultimately, the attainment of profitable operations or the profitable sale of the Company's exploration interests.

These financial statements do not give effect to adjustments that would be necessary and could be material to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

2. BASIS OF PRESENTATION

The following is a summary of significant accounting policies used in the preparation of these financial statements.

Statement of compliance

These financial statements of the Company were prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC") effective for the Company's reporting for the year ended October 31, 2018.

Basis of presentation

The financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars unless otherwise noted. These financial statements were approved and authorized by the Board of Directors of the Company on February 26, 2019.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies used in the preparation of these financial statements for the year end October 31, 2018 and have been approved by the Audit Committee of the Company.

Foreign currency transactions

The presentation currency and functional currency of the Company is the Canadian dollar. Transactions in foreign currencies are recorded in the functional currency at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period end exchange rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in profit and loss.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Provisions

General

Provisions are recognized when (a) the Company has a present obligation (legal or constructive) as a result of a past event, and (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in the statement of operations, net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost in the statement of operations.

Decommissioning obligations

The Company records a liability for the fair value of legal or constructive obligations associated with the decommissioning of long-lived tangible assets in the period in which they are incurred. The decommissioning liability is recognized at the present value of the estimated future cash flow associated with the decommissioning of the applicable assets or properties. On recognition of the liability there is a corresponding increase in the carrying amount of the related asset known as the decommissioning cost, which is depleted on a unit-of-production basis over the life of the reserves. The liability is adjusted each reporting period to reflect the passage of time using the discount rate, with the interest charged to earnings, and for revisions to the estimated future cash flows. Actual costs incurred upon settlement of the obligations are charged against the liability.

As at October 31, 2018 and 2017, the Company did not have any material decommissioning obligations.

Cash

Cash includes cash on hand and deposits held with banks that have a maturity of less than three months at the date they are acquired. The Company did not have any cash equivalents as at October 31, 2018 and 2017.

Amounts receivable

Amounts receivable and other receivables are amounts that are due from others in the normal course of business. If collection is expected in one year or less, they are classified as current assets; if not, they are presented as non-current assets and discounted accordingly. Accounts receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method less any provision for impairment.

Exploration and evaluation assets

Exploration and evaluation assets include costs to establish an initial mineral resource and determine whether inferred mineral resources can be upgraded to measured and indicated mineral resources and whether measured and indicated mineral resources can be converted to proven and probable reserves. Costs incurred before the Company has obtained the legal right to explore an area are recognized in profit and loss.

Exploration and evaluation relating to the acquisition of, exploration for and development of mineral properties are capitalized and include, but are not restricted to: drilling, trenching, sampling, surveying and gathering exploration data; calculation and definition of mineral resource; test work on geology, metallurgy, mining, geotechnical and geophysical; and conducting geological, geophysical, engineering, environmental, marketing and financial studies.

Capitalized costs, including general and administrative costs, are only allocated to the extent that these costs can be related directly to operational activities in the relevant area of interest where it is considered likely to be recoverable by future exploitation or sale or where the activities have not reached a stage which permits a reasonable assessment of the existence of reserves.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Exploration and evaluation assets (continued)

Exploration and evaluation activities involve the search for mineral resources/reserves, the assessment of technical and operational feasibility and the determination of an identified mineral reserve's commercial viability. Once the legal right to explore has been acquired, exploration and evaluation expenditures less recoveries are capitalized by property.

Capitalized exploration and evaluation assets for a project are classified as such until the project demonstrates technical feasibility and commercial viability. Upon demonstrating technical feasibility and commercial viability, and subject to an impairment analysis, capitalized exploration and evaluation assets are transferred to mine development costs. Technical feasibility and commercial viability generally coincides with the establishment of proven and probable reserves and/or a decision to commence construction of a mine; however, this determination may be impacted by management's assessment of certain modifying factors including: legal, environmental, social and governmental factors. All subsequent expenditure on the construction, installation or completion of infrastructure facilities is capitalized within mine development costs.

All capitalized exploration and evaluation assets are monitored for indications of impairment. Indicators of impairment may include, but are not limited to:

- the period for which the right to explore is less than one year;
- further exploration expenditures are not anticipated;
- a decision to discontinue activities in a specific area; and
- the existence of sufficient data indicating that the carrying amount of an exploration and evaluation asset is unlikely to be recovered from the development or sale of the asset.

Where a potential impairment is indicated, assessments are performed for each area of interest. To the extent that mine development assets are not expected to be recovered, they are charged to profit and loss.

Impairment of non-financial assets

The carrying values of exploration and evaluation assets are assessed for impairment when indicators of such impairment exist. If any indication of impairment exists an estimate of the asset's recoverable amount is calculated. The recoverable amount is determined as the higher of the fair value less costs to sell for the asset and the asset's value in use.

For exploration and evaluation assets, indicators of impairment would include expiration of a right to explore, no budgeted or planned material expenditures in an area or a decision to discontinue exploration in a specific area. Impairment is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets. If this is the case, the individual assets of the Company are grouped together into cash generating units ("CGUs") for impairment purposes. Such CGUs represent the lowest level for which there are separately identifiable cash inflows that are largely independent of the cash flows from other assets. This generally results in the Company evaluating its non-financial assets on a geographical basis. If the carrying amount of the asset exceeds its recoverable amount, the asset is impaired and an impairment loss is charged to the statement of loss so as to reduce the carrying amount to its recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset is increased to its recoverable amount. The increased amount cannot exceed the carrying amount that would have been determined, net of depreciation/amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of loss.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument to another entity. Upon initial recognition all financial instruments, including derivatives, are recognized in the statement of financial position at fair value. Subsequent measurement is then based on the financial instruments being classified into one of the following categories: fair value through profit or loss, held-to-maturity, loans and receivables, available-for-sale, or other financial liabilities.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and such assets are recognized initially at fair value and subsequently on an amortized basis using the effective interest method, less any impairment losses. Loans and receivables are included in current assets, except for maturities greater than 12 months after the end of the reporting period, which are classified as non-current assets.

All other financial liabilities are recognized initially at fair value plus any direct attributable transaction costs on the date at which the Company becomes a party to the contractual provisions of the instrument. Subsequent to initial recognition, the Company's financial liabilities are measured at amortized cost using the effective interest rate method. The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expire.

The Company will assess at each reporting period whether any financial assets, other than those classified as held-for-trading, are impaired. An impairment loss, if any, is recorded immediately in profit or loss. Financial assets will be considered impaired if management determines such amounts are or will become uncollectable.

The Company measures and recognizes embedded derivatives separately from the host contracts when the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract, when it meets the definition of a derivative and when the entire contract is not measured at fair value. Embedded derivatives are recorded at fair value. The Company has not entered into any contracts with embedded derivatives during the year ended October 31, 2018 and 2017.

Share capital

Proceeds from the issuance of common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options and warrants are recognized as a deduction from equity, net of any tax effects.

Interest income

Interest income is reported on an accrual basis using the effective interest method.

Income taxes

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Income taxes (continued)

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Loss per share

Basic loss per share is calculated using the weighted average number of shares outstanding during the period. Diluted loss per share is calculated by assuming that any proceeds from the exercise of dilutive stock options and warrants would be used to repurchase common shares at the average market price during the period, with the incremental number of shares being included in the denominator of the diluted loss per share calculation. The diluted loss per share calculation excludes any potential conversion of options and warrants that would be anti-dilutive.

New accounting standards

During 2018, the Company adopted a number of new IFRS standards, interpretations, amendments and improvements of existing standards. These new standards and changes did not have any material impact on the Company's financial statements.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued July 2014 and introduced new requirements for financial assets. This standard addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments, and such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. A new general hedge accounting standard, which aligns hedge accounting more closely with risk management also forms part of IFRS 9. The mandatory effective date is for annual periods beginning on or after January 1, 2018 and must be applied retrospectively with some exemptions.

IFRIC 22 – Foreign Currency Transactions and Advance Consideration (“IFRIC 22”) was issued in December 2016 and addresses foreign currency transactions or parts of transactions where there is consideration that is denominated in a foreign currency; a prepaid asset or deferred income liability is recognized in respect of that consideration, in advance of the recognition of the related asset, expense or income; and the prepaid asset or deferred income liability is non-monetary. The interpretation committee concluded that the date of the transaction, for purposes of determining the exchange rate, is the date of initial recognition of the non-monetary prepaid asset or deferred income liability. IFRIC 22 is effective for annual periods beginning on or after January 1, 2018.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

4. CRITICAL JUDGEMENTS AND ESTIMATION UNCERTAINTIES

The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results could differ from those estimates and these estimates could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Assets' carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets and goodwill. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Company's assets, costs to sell the assets and the appropriate discount rate.

Reductions in coal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

Income, value added, withholding and other taxes

The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

Contingencies and provisions

Contingencies can be either possible assets or possible liabilities arising from past events which, by their nature, will only be resolved when one or more future events not wholly within our control occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. In assessing loss contingencies related to legal proceedings that are pending against us or un-asserted claims, that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Company and its legal counsel evaluate the perceived merits of any legal proceedings or un-asserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent liability or assessing the impact on the carrying value of assets. Contingent assets are not recognized in the financial statements.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

5. AMOUNTS RECEIVABLE

The amounts receivable balance as at October 31, 2018 and 2017, consists of amounts receivable from the Government of Canada for Harmonized Sales Taxes (HST).

	<u>October 31, 2018</u>	<u>October 31, 2017</u>
Government of Canada HST	\$ 1,250	\$ 6,159
Total	<u>\$ 1,250</u>	<u>\$ 6,159</u>

6. EXPLORATION AND EVALUATION ASSET

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

7. TRADE PAYABLE AND ACCRUED LIABILITIES

	October 31, 2018	October 31, 2017
Trade payable	\$ 8,166	\$ 162
Accrued liabilities	15,000	15,000
Total trade payable and accrued liabilities	\$ 23,166	\$ 15,162

Trade payables and accrued liabilities are generally unsecured and non-interest bearing and are expected to be settled on 30 to 60-day terms.

8. LOANS PAYABLE

On December 18, 2017, the Company entered into loan agreements with 2227929 Ontario Inc. Pursuant to the terms of the loans, 2227929 Ontario Inc. agreed to lend the Company \$52,000 on December 18, 2017, \$20,000 on May 25, 2018 and \$10,000 on June 12, 2018 at an interest rate of 12% per year with no specified maturity date. A further \$40,000 was loaned on August 13, 2018 and \$35,000 on August 22, 2018. On October 31, 2018, the loan balance was \$165,790 including accrued interest.

9. CAPITAL STOCK

a. Authorized

Unlimited number of common shares, without par value

b. Common shares issued

	Number of shares	Stated value \$
Opening Balance, February 8, 2017	-	\$ -
Private placement	4,920,000	246,000
Balance as of October 31, 2017	4,920,000	246,000
Balance as of October 31, 2018	4,920,000	\$ 246,000

On June 29, 2017, the Company closed a private placement financing for 4,920,000 shares at a price of \$0.05 per share for gross proceeds of \$246,000.

10. INCOME TAXES

a. Provision for income taxes

Major items causing the Company's effective income tax rate to differ from the combined Canadian federal and provincial statutory rate of 26.5% (2017 – 26.5%) were as follows:

	2018 \$	2017 \$
(Loss) before income taxes	(61,484)	(41,483)
Expected income tax recovery based on statutory rate	(16,000)	(11,000)
Adjustment to expected income tax benefit:		
Change in benefit of tax assets not recognized	16,000	11,000
Deferred income tax provision (recovery)	-	-

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

10. INCOME TAXES (continued)

b. Deferred income tax balances

Deferred tax assets have not been recognized in respect of the following deductible temporary differences as it is not probable that future taxable profit will be available against which the Company can use the benefits.

	2018	2017
	\$	\$
Non-capital loss carry-forwards	102,967	41,483
Capital loss carry-forwards	-	-
Total	102,967	41,483

As at October 31, 2018, the Company has estimated non-capital loss for Canadian income tax purposes of approximately \$102,967 available to use against future taxable income. The non-capital tax losses expire after 20 years.

2037	\$	41,483
2038		61,484
	\$	102,967

11. NET LOSS PER SHARE

The number of shares used to calculate the basic and diluted net loss per share for the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017 included the weighted average number of common shares outstanding of 4,920,000 and 2,302,189.

12. RELATED PARTY DISCLOSURES

Key management personnel compensation

For the year ended October 31, 2018 and the period from incorporation (February 8, 2017) to October 31, 2017, no compensation has been issued to the executive officers of the Company.

13. COMMITMENTS AND CONTINGENCIES

Management contracts

The Company is party to certain management contracts. Currently, these contracts require payments of \$Nil as at October 31, 2018 (October 31, 2017 - \$Nil) to be made upon the occurrence of a change in control to the officers of the Company. The Company is also committed to payments upon termination of approximately \$9,600 (October 31, 2017 - \$9,600) pursuant to the terms of these contracts. As a triggering event has not taken place, these amounts have not been recorded in these financial statements.

Contingencies

Coal operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Company's operations may require licenses and permits from various governmental authorities in the countries in which it operates. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

13. COMMITMENTS AND CONTINGENCIES (continued)

Contingencies (continued)

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

Environmental

The Company's exploration and evaluation activities are subject to laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value

The Company's financial instruments as at October 31, 2018, consist of cash, amounts receivable and trade payable, loans payable and the amounts reflected in the statement of financial position approximate fair value due to the short-term maturity of these instruments.

Financial instruments recorded at the reporting date at fair value are classified into one of three levels based upon the fair value hierarchy. Items are categorized based on inputs used to derive fair value based on:

Level 1 - quoted prices that are unadjusted in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in level 1 that are observable for the asset/liability either directly or indirectly; and

Level 3 - inputs for the instruments are not based on any observable market data.

The Company had no financial instruments recorded at fair value in the statements of financial position as at October 31, 2018 and October 31, 2017.

Fair value estimates are made at the relevant transaction dates, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

Risk management overview

The Company has exposure to credit, liquidity and market risks from its use of financial instruments. This note provides information about the Company's exposure to each of these risks, the Company's objectives, policies and processes for measuring and managing risk. Further quantitative disclosures are included throughout these financial statements.

Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables.

The carrying amount of amounts receivable represents the maximum credit exposure. As at October 31, 2018 the Company's total receivable was \$1,250 (October 31, 2017 – 6,159). There were no derivative instruments held at October 31, 2018 and October 31, 2017.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

Market risk

Market risk is the risk that changes in market conditions, such as commodity prices, interest rates, and foreign exchange rates, will affect the Company's net income or the value of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing the Company's returns.

i. Commodity price risk

Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for coal are impacted by not only the relationship between the Canadian and United States dollar, as outlined below, but also global economic events that dictate the levels of supply and demand. Lower commodity prices can also reduce the Company's ability to raise capital. As the Company is not generating revenues, commodity price risk does not directly impact the Company's financial results.

ii. Foreign exchange risk

Foreign currency exchange rate risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates.

As at October 31, 2018, the Company had the following assets and liabilities denominated in foreign currencies:

October 31, 2018	USD\$
Cash at bank	20
	20

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with the financial liabilities. The Company's financial liabilities consist of trade payable, accrued liabilities and loans payable.

The Company prepares annual capital expenditure budgets, which are monitored and updated as considered necessary. Financial modeling is used to provide economic outlooks and the Company utilizes authorizations for expenditures on projects to monitor capital expenditures.

Trade payable consist of invoices payable to trade suppliers for administration expenditures. The Company processes invoices within a normal payment period. Trade payable have contractual maturities of less than one year.

Sensitivity analysis

The Company has, for accounting purposes, designated its cash and accounts receivable as loans and receivables which are measured at amortized cost. Accounts payable, accrued liabilities and loans payable are classified for accounting purposes as other financial liabilities, which are measured at amortized cost. As of October 31, 2018, both the carrying and fair value amounts of the Company's financial instruments are approximately equivalent due to the short term maturity of these instruments.

The sensitivity analysis shown in the notes below may differ materially from actual results. Based on management's knowledge of and experience with the financial markets, the Company believes the following movements are "reasonably possible" over a one year period:

- (i) Cash is subject to floating interest rates. As at October 31, 2018, if interest rates had decreased/increased by 1% with all other variables held constant, there would not have been a material impact to the loss for the year ended October 31, 2018 given the low level of cash on hand throughout the year.
- (ii) Cash, accounts payable and provisions denominated in US dollar are subject to foreign currency risk. As at October 31, 2018, had the US dollar weakened/strengthened by 5% against the Canadian dollar with all other variables held constant, there would have been a change of approximately \$1 in the Company's net loss.

Yukoterre Resources Inc.

Notes to the Financial Statements

For the year ended October 31, 2018 and for the period from incorporation (February 8, 2017) to October 31, 2017

(Expressed in Canadian dollars)

15. CAPITAL MANAGEMENT

The Company considers the aggregate of its common shares and deficit as capital. The Company's objective, when managing capital, is to ensure sufficient resources are available to meet day to day operating requirements and to safeguard its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

At October 31, 2018, the Company has no cash-generating operations; therefore, the only source of cash flow is generated from financing activities or loans. The Company's officers and senior management are in the process of searching for additional business opportunities. Potential business activities are appropriately evaluated by senior management and a formal review and approval process has been established at the Board of Directors' level. The Company may enter into new financing arrangements to meet its objectives for managing capital, until such time as a viable business activity is operational and the Company can thereby internally generate sufficient capital to cover its operational requirements.

The Company's officers and senior management take full responsibility for managing the Company's capital and do so through quarterly meetings and regular review of financial information. The Company's Board of Directors is responsible for overseeing this process.

Notes to the Condensed Interim Financial Statements

For the three and six months ended April 30, 2019 and 2018

(Expressed in Canadian dollars)

(Unaudited)

1. NATURE AND CONTINUANCE OF OPERATIONS

Yukoterre Resources Inc. (formerly 2560344 Ontario Inc.) (the "Company") was incorporated under the laws of the Province of Ontario, Canada by Articles of Incorporation, dated February 8, 2017, and on October 25, 2017 was renamed Yukoterre Resources Inc. The principal activity of the Company is the exploration and evaluation of coal. The Company's head office is located at 65 Queen Street West, 8th floor, Toronto, Ontario, M5H 2M5, Canada.

Going concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. Should the Company be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they become due.

The business of exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable coal operations. The Company's continued existence is dependent upon the acquisition of properties, preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis.

The Company does not have any operating assets that generate revenues, does not have proven reserves and incurred a net loss of \$37,399 during the six months ended April 30, 2019 (April 30, 2018 - \$27,254). As at April 30, 2019, the Company had a working capital deficit of \$15,008 (October 31, 2018 - \$186,646) and an accumulated deficit of \$140,366 (October 31, 2018 - \$102,967). These conditions indicate the existence of material uncertainties which cast significant doubt about the Company's ability to continue as a going concern. The Company's ability as a going concern is dependent on the Company's ability to obtain additional financing if, as and when required, and, ultimately, the attainment of profitable operations or the profitable sale of the Company's exploration interests.

These condensed interim financial statements do not give effect to adjustments that would be necessary and could be material to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

2. BASIS OF PRESENTATION

The following is a summary of significant accounting policies used in the preparation of these financial statements.

Statement of compliance

The accompanying condensed interim financial statements have been prepared by management in conformity with IAS 34, Interim Financial Reporting and do not include all the disclosures required in full annual financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These condensed interim financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended October 31, 2018.

Basis of presentation

The condensed interim financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The condensed interim financial statements are presented in Canadian dollars unless otherwise noted. These condensed interim financial statements were approved and authorized by the Board of Directors of the Company on June 19, 2019.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies

The unaudited condensed interim financial statements were prepared using the same accounting policies and methods as those used in the Company's financial statements for the year ended October 31, 2018.

Yukoterre Resources Inc.

Notes to the Condensed Interim Financial Statements

For the three and six months ended April 30, 2019 and 2018

(Expressed in Canadian dollars)

(Unaudited)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

New accounting standards

During 2019, the Company adopted a number of new IFRS standards, interpretations, amendments and improvements of existing standards. These new standards and changes did not have any material impact on the Company's financial statements.

4. AMOUNTS RECEIVABLE

The amounts receivable balance as at April 30, 2019 and October 31, 2018, consists of amounts receivable from the Government of Canada for Harmonized Sales Taxes (HST).

	April 30, 2019	October 31, 2018
Government of Canada HST	\$ 1,938	\$ 1,250
Total	\$ 1,938	\$ 1,250

5. PREPAID EXPENSES

In order to start the underwriting process for the initial public offering ("IPO"), the Company prepaid \$22,500 to the underwriter of the proposed IPO.

6. EXPLORATION AND EVALUATION ASSET

As at:	April 30, 2019	October 31, 2018
Description		
Division Mountain coal acquisition	\$ 100,000	\$ 100,000

On February 27, 2019, the Company issued 2,100,541 common shares at \$0.10 per share to settle the entire loan of \$210,054.10 with 2227929 Ontario Inc.

11. COMMITMENTS AND CONTINGENCIES

Yukoterre Resources Inc.

Notes to the Condensed Interim Financial Statements

For the three and six months ended April 30, 2019 and 2018

(Expressed in Canadian dollars)

(Unaudited)

Management contracts

The Company is party to certain management contracts. Currently, these contracts require payments of \$Nil as at April 30, 2019 (October 31, 2018 - \$Nil) to be made upon the occurrence of a change in control to the officers of the Company. The Company is also committed to payments upon termination of approximately \$9,600 (October 31, 2018 - \$9,600) pursuant to the terms of these contracts. As a triggering event has not taken place, these amounts have not been recorded in these condensed interim financial statements.

Contingencies

Coal operations are subject to extensive controls and regulations imposed by various levels of government that may be amended from time to time. The Company's operations may require licenses and permits from various governmental authorities in the countries in which it operates. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration and development of its projects.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

Environmental

The Company's exploration and evaluation activities are subject to laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.
