Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

1. Nature of Operations

Mongoose Mining Ltd., (the “Company”) was incorporated on January 16, 2019 under the laws of British Columbia. The Company’s principal place of business is located at 215 Edward Street, Victoria, British Columbia, V9A 3E4.

The Company’s principal business activities include the acquisition and exploration of mineral property assets. As of September 30, 2019, the Company had not yet determined whether the Company’s mineral property asset contains reserves that are economically recoverable.

2. Basis of presentation

Statement of Compliance

The interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) in effect as of March 16, 2019.

These financial statements were approved and authorized for issuance by the Board of Directors on November 29, 2019.

Basis of Measurement

The interim financial statements have been prepared on the historical cost basis except as otherwise allowed for in accordance with IFRS.

Functional and Presentation Currency

The interim financial statements are presented in Canadian dollars, which is the Company’s functional currency.

Significant Accounting Estimates and Judgments

The preparation of these interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the interim financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the interim financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

2. Basis of presentation and significant estimates and judgments *(continued)*

Significant Accounting Estimates and Judgments *(continued)*

Significant accounting estimates

- (i) The assessment of indications of impairment of the exploration and evaluation asset and related determination of the recoverable amount value and write-down of the exploration and evaluation asset where applicable;
- (ii) The amounts recorded for current and deferred tax expense and deferred tax assets and liabilities are based on estimates as to the timing of the reversal of temporary differences, substantially enacted tax rates and the likelihood of tax assets being realized. The availability of tax pools and other deductions are subject to audit and interpretation by tax authorities; and

Significant accounting judgments

- (i) Exploration and evaluation assets: Certain exploration and evaluation costs are initially capitalized with the intent to establish commercially viable reserves. The Company is required to make judgments about future events and circumstances and applies judgement to assess the economic viability of extracting the underlying resources. The costs are subject to technical, commercial and management review to confirm the continued intent to develop the project. Level of drilling success, or changes to project economics, resource quantities, expected production techniques, production costs and required capital expenditures, are important judgments when making this determination.; and
- (ii) The evaluation of the Company's ability to continue as a going concern is dependent on its ability to raise financing to further explore and develop its exploration and evaluation assets to achieve profitable operations. Certain judgements are utilized when making the determination on the Company's ability to achieve its plans.

3. Significant Accounting Policies

The accounting policies set out below have been applied in these interim financial statements.

a) Financial instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expires.

(i) Classification and measurement

The Company measures its financial assets and financial liabilities at fair value on initial recognition, which is typically the transaction price unless a financial instrument contains a significant financing component. Subsequent measurement is dependent on the financial instrument's classification which in the case of financial assets, is determined by the context of the Company's business model and the contractual cash flow characteristics of the financial asset. Financial assets are classified into two categories: (1) measured at amortized cost and (2) fair value through profit and loss ("FVTPL"). Financial liabilities are subsequently measured at amortized cost, other than financial liabilities that are measured at FVTPL or designated as FVTPL where any change in fair value resulting from an entity's own credit risk is recorded as other comprehensive income ("OCI").

Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

The Company's non-derivative financial instruments are comprised of cash, accounts receivable, advances from related party and accounts payable and accrued liabilities. Non-derivative financial instruments are recognized initially at fair value except in the case of financial assets or liabilities measured at amortized cost which are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, non-derivative financial instruments are measured as described below.

The Company has classified cash as fair value through profit or loss and these financial assets are measured at fair value with changes in fair value recognized in profit or loss.

The Company has classified accounts receivable and accounts payable and accrued liabilities as financial instruments measured at amortized cost. The contractual cash flows received from the financial assets are solely payments of principal and interest and are held within a business model whose objective is to collect the contractual cash flows. These financial assets and financial liabilities are subsequently measured at amortized cost using the effective interest method.

ii) Equity instruments

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares are recognized as a deduction from equity, net of any tax effects.

iii) Impairment

The Company recognizes a loss allowance for the expected credit losses associated with its financial assets, other than debt instruments measured at fair value through profit or loss and equity investments. Expected credit losses are measured to reflect a probability-weighted amount, the time value of money, and reasonable and supportable information regarding past events, current conditions and forecasts of future economic conditions.

The Company applies the simplified approach for accounts receivable which do not contain a significant financing component. Using the simplified approach, the Company records a loss allowance equal to the expected credit losses resulting from all possible default events over the assets' contractual lifetime.

The Company assesses whether a financial asset is credit-impaired at the reporting date. Regular indicators that a financial instrument is credit-impaired include significant financial difficulties as evidenced through borrowing patterns or observed balances in other accounts or requests to restructure payment schedules. For financial assets assessed as credit-impaired at the reporting date, the Company continues to recognize a loss allowance equal to lifetime expected credit losses.

For financial assets measured at amortized cost, loss allowances for expected credit losses, if any, are presented in the statement of financial position as a deduction from the gross carrying amount of the financial asset. Financial assets are written off when the Company has no reasonable expectations of recovering all or any portion thereof.

Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

3. Significant Accounting Policies *(continued)*

b) Fair value determination

A number of the Company's accounting policies and disclosures require the determination of fair value for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining the fair values is disclosed in the notes specific to that asset or liability.

The Company classifies the fair value of financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instruments:

- Level 1: Values based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets and liabilities.
- Level 2: Values based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability.
- Level 3: Values based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement

The carrying value of cash, accounts receivable, advances from related party and accounts payable and accrued liabilities approximates its fair value due to their short-term to maturity.

c) Foreign currency

Transactions in foreign currencies are translated to Canadian dollars at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated to Canadian dollars at the period end exchange rate. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on translation are recognized in profit or loss.

d) Cash

Cash includes amounts on deposit with banks.

e) Exploration and evaluation assets

The Company capitalizes the direct costs of acquiring and maintaining mineral property interests. Option payments are considered acquisition costs if the Company has the intention of exercising the underlying option. From time to time, the Company acquires and disposes of mineral property interests pursuant to the terms of option agreements. Options are exercisable entirely at the discretion of the optionee, and accordingly, are recorded as mineral property costs (recoveries) when payments are made or received until the original cost is recovered and after which subsequent recoveries are charged to the statements of loss and comprehensive loss. Ownership in mineral property interests involves certain inherent risks due to the difficulties of determining and obtaining clear title to claims as well as the potential for problems arising from the frequently ambiguous conveyance history characteristics of many mineral properties.

The Company's exploration and evaluation expenditures are charged to the statements of loss and comprehensive loss in the period incurred until such time as it has been determined that a property has economically recoverable reserves, in which case subsequent exploration and evaluation expenditures are capitalized. Exploration and evaluation expenditures may include salary costs of geologists, field employees and local management.

Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

3. Significant Accounting Policies (continued)

Management annually assesses carrying values of non-producing properties and exploration and evaluation assets for which events and circumstances may indicate possible impairment. Impairment of a property is generally considered to have occurred if the property has been abandoned, there are unfavourable changes in the property economics, there are restrictions on development, or when there has been an undue delay in development, which exceeds three years. In the event that estimated discounted cash flows expected from its use or eventual disposition is determined by management to be insufficient to recover the carrying value of the property, the carrying value is written-down to the estimated recoverable amount.

The recoverability of exploration and evaluation assets is dependent on the existence of economically recoverable reserves, the ability to obtain the necessary financing to complete the development of the reserves, and the profitability of future operations. Amounts capitalized to exploration and evaluation assets do not necessarily reflect present or future values.

When options are granted on mineral properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

f) Share-based payments

Stock options granted to directors, officers, employees and consultants of the Company are accounted for using the fair value method under which share-based payments are recorded based on the estimated fair value of stock options or other equity instruments granted using the Black-Scholes option pricing model. The Company measures share based payments to non-employees at the fair value of the goods or services received at the date of receipt of the goods or services. If the fair value of the goods or services cannot be measured reliably, the value of the options granted will be used, measured using the Black-Scholes option pricing model.

Under the fair value method, costs attributable to stock options granted are measured at fair value at the date of grant and expensed on a tranche-by-tranche basis over the vesting period, with a corresponding increase to contributed surplus. Upon exercise of the stock options, consideration paid by the holder together with the amount previously recognized in contributed surplus is recorded as an increase to share capital. The Company incorporates an estimated forfeiture rate at the date of grant and recognizes the effect of differences in non-vested stock option forfeitures in the period forfeiture occurs.

g) Earnings (loss) per share

Basic earnings (loss) per common share is computed by dividing the earnings (loss) by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per common share amounts are calculated by giving effect to the potential dilution that would occur if contracts to issue common shares were exercised, fully vested, or converted to common shares. The treasury stock method is used to determine the dilutive effect of dilutive instruments. The treasury stock method assumes that the proceeds received from the exercise price of in-the-money dilutive instruments are used to repurchase common shares.

h) Taxes

Tax expense comprises current and deferred tax. Tax expense is recognized in profit or loss except to the extent that it relates to items recognized directly in equity or other comprehensive income (loss).

Mongoose Mining Ltd.

Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

3. Significant Accounting Policies (continued)

h) Taxes (continued)

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

i) Provisions

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the units-of-production or the straight-line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations as the disturbance to date is immaterial.

Mongoose Mining Ltd.
Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

3. Significant Accounting Policies (continued)

j) Issuance Costs

Issuance costs directly related to issuance of share capital are charged as a reduction against share capital. Costs incurred for shares not yet issued are recorded as deferred finance costs. These costs are deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related share capital or charged to profit (loss) if the shares are not issued.

4. Deferred Finance Costs

The Company incurred certain share issue costs related to its initial public offering (“IPO”) raise that is expected to close subsequent to the period end date at which time it will be applied against equity.

5. Exploration and Evaluation Asset

	Acquisition Costs		Total	
Opening balance	\$	-	\$	-
Additions		34,480		34,380
Balance September 30, 2019	\$	34,380	\$	34,380

Chu Chua Gold Property

Pursuant to an option agreement (the “Agreement”) dated January 25, 2019, the Company was granted an option to acquire a 100% undivided interest in the Chu Chua Gold Property located in the Kamloops Mining District of British Columbia.

In accordance with the Agreement, the Company has the option to acquire a 100% undivided interest in the Chu Chua Gold Property by issuing a total of 600,000 common shares of the Company to the optionors and making a payment of \$7,500. The cash payment has been made and the common shares will be issued no later than 15 days after the Company’s common shares are listed, posted and called for trading on the Canadian Securities Exchange (“CSE”).

In accordance with the Agreement, the Company is required to spend a minimum of \$25,000 in expenditures that will qualify for assessment work to be recorded against the Chu Chua Gold Property before September 1, 2019.

In order to exercise the option, the Company shall pay the optionor the aggregate sum of \$557,500, which includes the \$7,500 deposit and will be paid in instalments, issue 600,000 common shares and complete \$625,000 in qualifying expenditures by the fourth anniversary of the initial public offering date (“Listing Date”), in accordance with the following schedule:

Date	Shares	Cash Payments	Expenditures
Signing Date	-	\$ 7,500	-
Listing Date	100,000	-	-
September 1, 2019	-	-	\$ 25,000
1 st Anniversary of Listing Date	100,000	-	-
2 nd Anniversary of Listing Date	100,000	\$ 20,000	\$ 100,000
3 rd Anniversary of Listing Date	100,000	\$ 30,000	\$ 100,000
4 th Anniversary of Listing Date	200,000	\$ 500,000	\$ 400,000
Total	600,000	\$ 557,500	\$ 625,000

During the three months ended September 30, 2019, the \$25,000 of expenditures required by September 1, 2019 was incurred.

Mongoose Mining Ltd.
Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

5. Exploration and Evaluation Asset (continued)

The Company has the right to terminate the Agreement by giving thirty days' written notice of such termination.

The optionors retain a 2% Net Smelter Return royalty on the Chu Chua Gold Property. The Company has the right to purchase the first 1% of the royalty for \$1,000,000 at any time prior to the commencement of commercial production.

6. Share Capital

- a) Authorized
Unlimited common shares
- b) Issued

	Number	Stated Value
Issuance of common shares at \$0.05 each (i)	6,000,000	\$ 300,000
Balance, September 30, 2019	6,000,000	\$ 300,000

- (i) At incorporation, the Company issued 6,000,000 common shares at \$0.05 per common share for total proceeds of \$300,000.
- (ii) 1,200,000 common shares are held in escrow until completion of the listing of the Company's shares on the CSE. 10% of the common shares held in escrow will be released on the issuance of the listing date and an additional 15% will be released on the dates 6 months, 12, months, 18 months, 24 months, 30 months and 36 months following the initial release. These common shares, which are considered contingently issuable until the Company completes a listing, are not considered to be outstanding for the purpose of the loss per share calculation.

Stock options

The Company has a common share purchase option plan (the "Plan") for directors, officers, employees and consultants. The total number of options issued and outstanding at any time cannot exceed 10% of the issued and outstanding common shares of the Company unless shareholder and regulatory approvals are obtained. Under the Plan, options may have up to a ten-year term and are non-transferable, however it is anticipated that options granted will likely have a five-year term. Unless otherwise determined by the Board of Directors, options vest immediately upon granting. Options are granted at a price no lower than the market price of the common shares less any discounts allowed by the CSE at the time of the grant. As at September 30, 2019, no options have been issued under the Plan.

7. Taxes

The amount for deferred tax in the interim financial statements results from applying the combined federal and provincial tax rates to the Company's income before taxes as follows:

	2019
Loss before taxes	\$ (101,343)
Combined federal and provincial tax rates	27%
Expected tax recovery	(27,360)
Deferred tax benefits not recognized	(27,360)
Income tax recovery	\$ -

Mongoose Mining Ltd.
Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from Incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

7. Taxes (continued)

As at September 30, 2019, the Company's unrecognized deductible temporary differences are as follows:

	2019
Share issue costs	\$ 26,000
Non-capital loss carryforward	\$ 101,500
Unrecognized deductible temporary difference	\$ 127,500

The non-capital loss carryforward balance is available to reduce future years' income for tax purposes. These losses, if not fully utilized, will expire in 2039.

The Company has not recognized a deferred tax asset as the Company has deemed it is not probable that the asset will be realized at this time. The Company will recognize a deferred tax asset when it is probable there will be sufficient taxable income in future periods to utilize the deferred tax assets.

8. Financial Risk Management Objectives and Policies

Capital Management

The Company's objective when managing capital is to maintain its ability to continue as a going concern, in order to provide returns for the shareholders and benefits for other stakeholders. The Company does not have any externally imposed capital requirements to which it is subject. The Company includes shareholders' equity, comprised of issued common shares, in the definition of capital.

The Company's primary objective, with respect to its capital management, is to ensure that it has sufficient cash resources to fund sourcing and exploration of its resource property. Company may attempt to raise additional funds through the issuance of equity or by securing strategic partners.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The maximum exposure to credit risk is as follows:

	September 30, 2019
Cash	\$ 183,256
Accounts receivable	3,938
Total	\$ 187,194

Cash:

Cash consist of amounts on deposit with Canadian chartered banks and undeposited funds while accounts receivable is due from the Government of Canada. The Company manages credit exposure of cash by selecting financial institutions with high credit ratings.

Market risk

Market risk is the risk that changes in market conditions, such as foreign exchange rates and interest rates, will affect the Company's cash flow, income or the value of its financial instruments. The objective of the Company's market risk management is to manage and control market risk exposures within acceptable parameters, while maximizing the Company's return. The Company's policies for managing foreign currency risk and interest rate risk are as follows:

Mongoose Mining Ltd.
Notes to the Interim Financial Statements

For the three months ended September 30, 2019 and period from incorporation on January 16, 2019 to September 30, 2019
(amounts in Canadian dollars)

8. Financial Risk Management Objectives and Policies *(continued)*

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company does not sell or transact in any foreign currency or have assets or liabilities denominated in a foreign currency, as such the Company does not have foreign currency risk.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company's exposure to interest rate risk is a result of interest earned on its bank deposits which is insignificant.

Liquidity risk

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and the flexibility through the use of borrowings. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations.

The Company has cash of \$183,256 with which to settle obligations of \$57,841.

9. Related Party Transactions

During the period ended September 30, 2019, a director of the Company loaned the Company \$12,500 to cover initial costs. The loan was a non-interest bearing and without any fixed repayment terms. The loan was repaid by Company during the period.

10. Subsequent Events

Subsequent to September 30, 2019, the Company closed a prospectus to raise \$317,800 in connection with the Company's IPO. The Company had entered into an agreement with Canaccord Genuity Corp. (the "Agent") with respect to the equity raise. As part of the agreement, the Company will pay the Agent a 10% commission of gross proceeds and will grant options to acquire 10% of the common shares issued at an exercise price of \$0.10 per common share, exercisable for up to twenty-four months from the date the Company's shares are listed on the Exchange ("Agent's Warrants"). In addition, the Company will pay a corporate finance fee of \$25,000 (plus tax), Agent's legal fees, and other reasonable expenses to be incurred pursuant to the IPO. At September 30, 2019, the Company had paid a deposit of \$32,500 which is included in deferred finance costs. The IPO is subject to regulatory approval and the Company anticipates listing in early December 2019.

The Company intends to grant a total of 927,800 stock options to officers and directors at the closing of the IPO. Each stock option, which expires five years from the date of grant, will be entitled to acquire a common share of the Company at an exercise price of \$0.10 per share each.
