We believe transparency and open engagement with investors is the best way to build trust and long-lasting shareholder relationships.

"It is worth noting that Niger has emerged as a prominent global uranium jurisdiction, bolstered by recent development commitments from France and China. Furthermore, the imminent production commencement at Global Atomic's Dasa Project further solidifies Niger as a strategically significant uranium production centre. We look forward to working with Myriad Uranium and effectively communicating the company's exploration plans in Niger."

"Stian Flage is a uranium sector expert who produces extraordinarily high quality media," commented Thomas Lamb, Myriad's CEO. "He identified and invested in Myriad long before we considered working together. He views things from the perspective of a serious uranium investor and will communicate to others like him, an approach we believe is particularly well-suited to the current market environment."
