### 1. NATURE OF OPERATIONS

The Company is incorporated and domiciled in Canada under the Business Corporations Act (British Columbia), and its registered office is 25<sup>th</sup> Floor, 700 West Georgia Street, Vancouver, BC, V7Y 1C3. The Company's common shares are listed on the Canadian Securities Exchange ("CSE") under the trading symbol "MICH" effective June 19, 2019.

The Company is principally engaged in the acquisition and exploration of mineral properties.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The ability of the Company to continue as a going concern is dependent on obtaining additional financing through equity financing or obtaining joint venture or property sale agreements for one or more properties.

There can be no assurance that the Company will be able to continue to raise funds in which case the Company may be unable to meet its obligations. Should the Company be unable to realize on its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the statements of financial position. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

Adverse financial market conditions and volatility could increase the uncertainty of the Company's ability to continue as a going concern given the need to both manage expenditures and to raise additional funds. The Company is experiencing, and has experienced, negative operating cash flows. The Company will continue to search for new or alternate sources of financing. Accordingly, these material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

As at February 28, 2021, the Company had working capital of \$11,149 (November 30, 2020: \$33,016). The Company recorded a loss of \$32,667 during the three months ended February 28, 2021, and had an accumulated deficit of \$929,245 as at February 28, 2021.

### 6. FINANCIAL INSTRUMENTS (Continued)

#### *Financial Instrument Risk Exposure*

The Company is exposed in varying degrees to a variety of financial instrument related risks.

#### Credit Risk

Credit risk arises from the potential for non-performance by counterparties of contractual financial obligations. The Company is exposed to credit risk on cash and amounts receivable. The Company reduces its credit risk on cash by maintaining its bank account with a large international financial institution. The maximum exposure to credit risk is equal to the carrying value of its cash.

#### Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company controls liquidity risk by ensuring that it has sufficient cash resources to pay for its financial obligations. At February 28, 2021, the Company had working capital of \$11,149. Management has concluded that the Company will require additional funding to continue operations for the next twelve months (Note 1).

#### Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign currency and price risk.

##### *a) Interest Rate Risk*

The Company is nominally exposed to interest rate risk. The Company's cash earns interest at variable rates. The Company's future earned interest is exposed to short-term rate fluctuations. Interest rate exposure is considered to be insignificant.

##### *b) Foreign Currency Risk*

The Company is not exposed to currency risk as all transactions are denominated in Canadian dollars.

##### *c) Price Risk*

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

### 6. FINANCIAL INSTRUMENTS (Continued)

#### *Fair value*

IFRS establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments are classified and subsequently measured as follows:

<b>Account</b>	<b>Classification</b>
Cash	Amortized cost
Accounts Payable and accrued liabilities	Amortized cost

### 7. MANAGEMENT OF CAPITAL

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can continue to provide returns for shareholders and benefits for other stakeholders.

The Company considers the items included in equity as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions, business opportunity and the risk characteristics of the underlying assets. In order to maintain or adjust its capital structure, the Company may issue new shares or return capital to its shareholders. The Company is not subject to externally imposed capital requirements.

Management reviews its capital management approach on an ongoing basis. There was no change in the Company's management of capital policies during the three months ended February 28, 2021.

### 8. COVID-19 UNCERTAINTY

To the date of this report, the spread of COVID-19 has severely impacted many local economies around the globe. In many countries, including Canada, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. Global stock markets have also experienced great volatility. Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions. As at the date of this report, the Company has not been significantly impacted by the spread of COVID-19.

The duration and impact of the COVID-19 pandemic, as well as the effectiveness of government and central bank responses, remains unclear at this time. It is not possible to reliably estimate the duration and severity of these consequences, as well as their impact on the financial position and results of the Company for future periods.
