**MICH RESOURCES ENTERS INTO DEFINITIVE AGREEMENTS TO ACQUIRE
ADVANCED COPPER EXPLORATION PROJECT IN PERU VIA REVERSE TAKEOVER**

November 8, 2021

CSE – MICH

Vancouver, British Columbia – Mich Resources Ltd. (CSE – MICH) (the “**Company**”) is pleased to announce that further to its news release dated July 30, 2021, the Company has entered into definitive agreements (the “**Definitive Agreements**”) with each of Pembroke Copper Corp. (“**Pembroke**”) and Minera Andina de Exploraciones SAA (“**Minandex**”) for the acquisition of the advanced stage Pecoy exploration copper project (the “**Pecoy Project**”) located in Peru (the “**Transaction**”).

About the Pecoy Project

The Pecoy Project is an advanced exploration copper project located one hundred and fifty kilometres northwest of Arequipa, within the Cretaceous Copper Porphyry Belt of Peru, host to the Zafranal Cu porphyry (Teck Resources Limited and Mitsubishi Materials Corporation) located approximately 100 kilometers to the southeast of the project.

The Pecoy project is located within the Peruvian coastal desert region which grades into the Atacama desert further south in Chile. Topography within the project area ranges from 800m at the Rio Ocoña, to slightly more than 4,000m at the highest ridges. Within the area of mineralization, the relief ranges from 1650m to 2200m. There is no infrastructure in the immediate project area, but water is available from the Rio Ocoña delta some 8 km to the west, and power is available from the national grid 100 km from site. The site also has excellent road access to a number of nearby seaports for shipping of concentrates.

The combined Project area consists of approximately 13,300 hectares. Exploration on the Property dates back to 2009, and consists of 48,500m of diamond drilling in 121 drill holes completed by previous operators including Pembroke. The project database consists of 1,222 downhole surveys, and 23,210 assays. The average drill spacing is about 118m in the main mineralized zone on the Pembroke property, and 80m on the Minandex (Ocaña) side. The project database also includes quality control data including blanks, standards and duplicates.

In 2018 Pembroke engaged Micon International to prepare a Canadian National Instrument 43-101 compliant Technical Report and mineral resource estimate, however as a non-reporting Issuer the report was never filed on SEDAR. The 2018 Technical Report considers 2 mining scenarios: the first being a pit constrained to the Pembroke owned concessions only, and the second assuming the adjacent Minandex (Arirahua, formerly named Ocaña) ground is available for pit expansion excluding any resources on the adjacent land.

These assumptions led to two historical mineral resource estimates as shown in Table 1 below.

Table 1
Historical Inferred Mineral Resource Estimates as reported by Micon International (2018)

Scenario	k Tonnes ¹	Cu (%)	Mo(%)	Au (ppm)	Ag (ppm)
Pembrook Only	473,000	0.33	0.012	0.03	1.18
Pembrook/Ocaña	721,000	0.34	0.011	0.05	1.27

Notes:

1 – above a cutoff of 0.25% Cu

2 – based on the following metal prices – Cu (\$3.25), Mo (\$8.00), Au (\$1,400), Ag (\$20.00)

3 – based on the following metal recoveries - Cu (88-90%), Mo (70-72%), Au (40-54%), Ag (52-80%)

4 – the Qualified Person for this estimate is Christopher Keech, P.Geo. of CGK Consultants

5 – Effective date of the resource estimate is May 1, 2018

The Micon estimate was prepared to CIM (May 2014) standards for the reporting of mineral resources and in accordance with CIM Best Practice Guidelines. The mineral resources were calculated in a 3-dimensional block model using commercial mine planning software. Resource classifications were assigned in accordance with CIM guidance.

The Company considers the Micon 2018 estimate to be a historical estimate since it was never filed on SEDAR. It should be noted that a qualified person has not done sufficient work to classify the historical estimate as current mineral resources, and the Company is not treating the historical estimate as current mineral resources.

The Company intends to verify the historical estimate and has carried out a site visit to the Pecoy Project as part of its work to complete an updated Technical report with current mineral resources. Verification of the Micon 2018 resource is expected to be straightforward as the core and pulps are available at the Pecoy site, the drilling database is available along with original surveys and assay certificates.

The Pecoy Project to be acquired by the Company is comprised of all rights and title of the Pecoy Project currently held indirectly by Pembrook and Minandex. Additionally, Minandex is the owner of certain lands adjoining the Pecoy Project which will be optioned to the Company concurrently with the closing of the Transaction.

Transaction Details

The Transaction will constitute a reverse take-over of Mich when completed. The Company intends on seeking approval for the listing of the Company’s shares on the TSX Venture Exchange (the “**Exchange**”) and concurrent voluntary delisting of the Company’s shares on the Canadian Securities Exchange (the “**CSE**”).

As consideration for Pembrook and Minandex’s interests in the Pecoy Project, the Company will pay the amount of USD \$2,000,000 and issue 121 million common shares of the Company to the shareholders of Pembrook and to Minandex. As finders fees, the Company will issue 6.4 million shares to UMS Projects LP, as well as and aggregate 2.6 million shares to Fiore Management & Advisory Corp. and Winchester Securities Corp.

Pursuant to the Definitive Agreements, completion of the Transaction is subject to a number of conditions, including but not limited to: (i) the approval of all regulatory bodies having jurisdiction in connection with the Transaction (including Exchange approval); (ii) completion of a subscription receipt financing for minimum aggregate proceeds of \$15,000,000 (the “**Financing**”); and (iii)

approval of the shareholders of Pembrook, and if required, the Company's shareholders. There can be no assurance that the Transaction will be completed as proposed or at all. The Company intends on applying for an exemption from any Exchange sponsorship requirements.

It is anticipated (and without taking into account the Financing), that Minandex and the shareholders of Pembrook will hold approximately 70% of the approximately 173 million common shares of the Company (excluding dilutive securities) following closing of the Transaction (the "**Resulting Issuer**").

Upon completion of the Transaction, the Resulting Issuer will continue to carry on the business of exploration and development of the Pecoy Property under the Company's existing name or such other name as may be approved by the board of directors of the Resulting Issuer and the stock exchange.

Trading of the common shares of the Company has been halted, and will remain halted until closing of the Transaction which is currently targeted for December, 2021.

Further details of the Transaction and related transactions, including the proposed executive management and board of directors of the Resulting Issuer will be disclosed in future news releases.

The Qualified Person responsible for the technical content in this release is Dr David Stone, P.Eng., an independent consultant to the Company.

About the Company

The Company is a British Columbia public company with a registered office at 25th Floor, 700 West Georgia Street, Vancouver, BC, V7Y 1C3. The Company's common shares are listed on the Exchange under the trading symbol "MICH" and reporting in British Columbia and Ontario. The Company is principally engaged in the acquisition and exploration of mineral properties.

About Pembrook

Pembrook is a British Columbia private company with a head office located at 500-666 Burrard Street, Vancouver, British Columbia. Concurrently with or prior to the closing of the Transaction, Pembrook will divest itself of certain assets not related to the Pecoy Project.

About Minandex

Minandex is a Peruvian public company with a head office located at Calle Arnaldo Alvarado Degregori #39, Surco, Lima, 33, Peru.

Forward Looking Information

Certain statements and information herein, including all statements that are not historical facts, contain forward-looking statements and forward-looking information within the meaning of applicable securities laws. Such forward-looking statements or information include but are not limited to statements or information with respect to: the proposed Transaction; the satisfaction of the conditions and closing of the Transaction (including Exchange and shareholder approvals); transfer of the Pecoy Project to the Resulting Issuer; and, general business and economic conditions. The foregoing list of assumptions is not exhaustive.

Although management of the Company believe that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that forward-looking statements or information herein will prove to be accurate. Forward-looking statements and information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. These factors include, but are not limited to: the Transaction may not close on the terms set forth herein, or at all; risks relating to the availability of financing for the Resulting Issuer; risks relating to the receipt of all requisite approvals for the Transaction, including the approval of the Exchange; risks associated with the business of the Company; business and economic conditions in the mining industry generally; the supply and demand for labour and other project inputs; changes in interest and currency exchange rates; risks relating to unanticipated operational difficulties (including failure of equipment or processes to operate in accordance with specifications or expectations, cost escalation, unavailability of materials and equipment, government action or delays in the receipt of government approvals, industrial disturbances or other job action, and unanticipated events related to health, safety and environmental matters); political risk and social unrest; changes in general economic conditions or conditions in the financial markets; changes in laws (including regulations respecting mining concessions); risks related to the direct and indirect impact of COVID-19 including, but not limited to, its impact on general economic conditions, the ability to obtain financing as required, and causing potential delays in the supply of equipment and services; and other risk factors as detailed from time to time.

The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

Reader Advisory

Investors are cautioned that, except as disclosed in the filing statement to be prepared in connection with the Transaction, any information released or received with respect to the Transaction may not be accurate or complete and should not be relied upon. Trading in the securities of the Company and Resulting Issuer should be considered highly speculative.

Neither the CSE or the Exchange has in no way passed upon the merits of the proposed Transaction and has neither approved nor disapproved the contents of this press release.

*This news release does not constitute an offer to sell, or a solicitation of an offer to buy, any securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**") or any state securities laws and may not be offered or sold within the United States or to U.S. Persons (as defined under the U.S. Securities Act) unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.*
