Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

*The following is management's discussion and analysis ("MD&A") of Nine Mile Metals Ltd. and its subsidiary (together, "Nine Mile" or the "Company"), prepared as of August 29, 2024. This MD&A is intended to assist the reader to assess material changes in the financial condition and results of operations of Nine Mile as of June 30, 2024 and for the period then ended. This MD&A should be read together with the audited consolidated financial statements for the year ended September 30, 2023 and related notes thereof. Financial amounts are expressed in Canadian dollars unless otherwise indicated.*

*This MD&A contains "forward-looking information" which may include, but is not limited to, statements with respect to the future financial or operating performance of the Company. Often, but not always, forward-looking information can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or variations (including negative variations) of such words and phrases, or statements that certain actions, events or results "may", "could", "would", "likely", "might" or "will" be taken, occur or be achieved.*

*To the extent that such statements are not recitations of historical fact, such statements constitute forward-looking statements which, by definition involve risks and uncertainties. Where in any forward-looking information, the Company expresses an expectation or belief as to future results or events, such expectation or belief is expressed in good faith and believed to have a reasonable basis, but there can be no assurance that the statement of expectation or belief will result or be achieved or accomplished.*

*Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law, the Company does not intend to update any of the forward-looking statements to conform these statements to actual results.*

*The Company's unaudited condensed interim financial statements for the nine months ended June 30, 2024 (the "Condensed Interim Financial Statements") have been prepared in accordance with IAS34 – Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee.*

## **Overview**

The Company was incorporated under the Business Corporations Act in British Columbia on June 8, 2018 as 1167609 B.C. Ltd. On November 19, 2018, the Company changed its name to Stevens Gold Nevada Inc. On April 12, 2021, the Company filed a Certificate of Amalgamation, whereby the Company and its wholly-owned subsidiaries, Lynx Gold Mining Corp., and Lynx Gold Corp. were amalgamated as one company under the name Stevens Gold Nevada Inc. On January 18, 2022, the Company changed its name to Nine Mile Metals Ltd. On June 14, 2022, the Company dissolved its wholly-owned subsidiary, Lynx Gold Exploration Corp.

The Company's shares are listed on the Canadian Securities Exchange ("CSE") under the symbol "NINE". The Company's shares also trade on the OTCQB Venture Market under the trading symbol "VMSXF" and the Frankfurt Stock Exchange (the "FSE") under the symbol "KQ9".

The principal business of the Company is to acquire, explore, and develop mineral properties and ultimately seek earnings by exploiting mineral claims. The Company is currently focused on its mineral projects in New Brunswick and continues to evaluate and review potential resource properties and other business opportunities as possible options or joint ventures. The Company's registered and head office is located at 1500 – 800 West Pender St., Vancouver, BC, V6C 2V6.

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

The disclosure of technical information in this MD&A has been prepared in accordance with Canadian regulatory requirements as set out in National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and reviewed and approved by Gary Lohman, B.Sc., P. Geo. Director and V.P. Exploration who acts as the Company’s Qualified Person and is not independent of the Company.

### Corporate Developments

- In October 2023, the Company announced that it has received all necessary drill permits on its Wedge project. Lantech Drilling has been engaged to drill these high priority targets once it completes the current hole at Nine Mile Brook.
- In November 2023, the Company received the water baseline results and final report from GEMTEC Consulting Engineers and Scientists Limited (“GEMTEC”) for the Nine Mile Brook Lens bulk sample project. See *Mineral Properties* below.
- In November 2023, the Company announced that it has initiated its California Lake Volcanogenic Massive Sulphides (“VMS”) Drill Program and provided an update on drill hole CL23-10-01 in December 2023. See *Mineral Properties* below.
- In December 2023, the Company closed a convertible loan financing for a total of \$201,000 (the “Convertible Loans”). The Convertible Loans bear interest at a rate of 15% per annum and are repayable 12 months from the issuance date. See *Convertible Loans* below for additional details.
- In December 2023, the Company announced the terms of a flow-through private placement (the “FT Private Placement”). The FT Private Placement will consist of the sale of up to 7,500,000 Flow-Through Units (“FT Units”) at \$0.20 each, for gross proceeds of up to \$1,500,000. Each FT Unit will be comprised of one common share, issued on a flow-through basis (“FT Share”) and one-half common share purchase warrant, issued on a non flow-through basis. Each full warrant will entitle the holder thereof to acquire one common share in the capital of the Company at a price of \$0.23 per common share for a period of 24 months from date of issuance. In consideration for their services in introducing subscribers to the Company under the FT Private Placement, finders may receive commission of 8% cash and 8% common share purchase warrants, exercisable to purchase one common share at a price of \$0.23 for a period of 24 months.

In December 2023, the Company closed the first tranche of the FT Private Placement with the issuance of 5,625,000 FT Units for total proceeds received of \$1,125,000. In consideration for their services in introducing subscribers to the Company under the Private Placement, finders received an aggregate of 420,000 common share purchase warrants, each exercisable to purchase one common share at a price of \$0.23 for a period of 24 months and cash of \$84,000.

- In January 2024, the Company announced that it has received final approval of its Nine Mile Brook Lens bulk sample permit for the Nine Mile Brook lens bulk sample project. See *Mineral Properties* below.
- In January 2024, the Company announced that it has mobilized the drill rig onsite for its high priority drill program on targets #1 & #2 on its Wedge Project southwest of the Brunswick #12 Mine. See *Mineral Properties* below.
- In February 2024, the Company announced its intention to complete a private placement (the “Private Placement”). The Private Placement will consist of the sale of up to 4,166,666 units (each a

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

"Unit") at a price of \$0.06 per Unit. Each Unit will be comprised of one common share and one common share purchase warrant with each warrant entitling the holder thereof to acquire one common share in the capital of the Company at a price of \$0.10 per common share for a period of 24 months from the date of issuance. In consideration for their services in introducing subscribers to the Company under the Private Placement, finders may receive commission of 8% cash and 8% common share purchase warrants, exercisable to purchase one common share at a price of \$0.10 for a period of 24 months.

- In February 2024, the Company announced it has made payments under its option to purchase 100% of the Wedge Project with Slam Exploration Ltd. ("SLAM"). See *Mineral Properties* below.
- In February 2024, the Company announced a segment of XRF results from Hole WD-24-01, marking a significant milestone in its inaugural Phase 1 drill program on the Wedge VMS Project. See *Mineral Properties* below.
- In March 2024, the Company announced that it completed a private placement financing of cash proceeds of \$175,238 and debt forgiveness of \$20,000. The Company issued 3,253,968 units at a price of \$0.06 each. Each unit consists of one common share and one common share purchase warrant. Each warrant will entitle the holder to purchase one common share at a price of \$0.10 per Common Share for a period of 24 months from the date of issuance. A commission of \$2,400 and 40,000 warrants were paid by the Company to a finder in connection with a portion of the private placement. The \$20,000 debt conversion was arranged by the Company with SLAM in lieu of the first anniversary payment owed by the Company to maintain its option on its Wedge Project property. See *Mineral Properties* below.
- In March 2024, the Company announced that it had drilled mineralized zones at its initial Phase 1 drill program on its Wedge VMS Project and in March and April 2024, announced certified assays for certain drill holes at the Wedge Mine. See *Mineral Properties* below.
- In April 2024, the Company entered into a consulting services agreement (the "Kindred Consulting Agreement") with Kindred Communications inc. ("Kindred") to support Nine Mile's investor relations activities. The Kindred Consulting Agreement will have an initial three month term, starting on April 5, 2024, following which the parties will operate on a month-to-month basis with a 60-day cancellation notice requirement to terminate. Kindred will provide the Company with social media management on the Company's accounts on Facebook, X, YouTube, LinkedIn and Instagram and may create new social media accounts for the Company, content creation, news release consultation and dissemination, including regulatory filings and updating the Company's website to share the Company's story with the investor audience. During the three-month term of the Kindred Consulting Agreement, the Company will pay Kindred \$4,000 per month, in arrears. Additionally, Kindred was granted 200,000 stock options. The options will vest immediately and may be exercised at an exercise price of \$0.10 per share until the earlier of 24 months, the cessation of services by Kindred to the Company, or otherwise in accordance with the Company's incentive stock option plan.
- In April 2024, the Company announced that it has granted 1,300,000 stock options to directors and officers, and 200,000 stock options to another consultant of the Company. The options will vest immediately and may be exercised at an exercise price of CAD \$0.10 per common share, for a period of 5 years from the date of issuance or earlier in accordance with the Company's incentive stock option plan. See *Mineral Properties* below.

## **Nine Mile Metals Ltd.**

### Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

- In April 2024, the Company that it has made payments under its mineral option agreement to purchase 100% of California Lake and Canoe Landing Lake East mineral projects, dated April 25, 2022. The Company issued 733,334 common shares at a deemed price of \$0.075 per share, in accordance with the option agreement. Additionally, the Optionors and the Company agreed to convert the \$30,000 cash payment owing under the option agreement to 40,000 common shares at a deemed price of \$0.075 per share. See *Mineral Properties* below.
- In April 2024, the Company announced that it completed a non-brokered private placement for proceeds of \$493,875 from the issuance of 4,675,910 units of its securities. 4,090,910 of the units are flow-through (each, an "FT Unit") at a price of \$0.11 per FT Unit, and 585,000 of the Units are non-flow-through units (each, a "NFT Unit") at a price of \$0.075 per NFT Unit. Each FT Unit consists of one flow-through common share of the Company and one-half of one common share purchase warrant (each whole common share purchase warrant, an "FT Warrant"), with each FT Warrant entitling the holder thereof to purchase one common share at a price of \$0.13 for a period of 24 months. Each NFT Unit consists of one common share of the Company and one-half of one common share purchase warrant (each whole common share purchase warrant, an "NFT Warrant"), with each NFT Warrant entitling the holder thereof to purchase one common share at a price of \$0.11 for a period of 24 months. In consideration for their services in introducing subscribers to the Company under the Private Placement, finders and brokers received 327,272 common share purchase warrants, exercisable to purchase one common share at a price of \$0.13 for a period of 24 months, and cash of \$36,000.
- In May 2024, the Company completed the exercise and acquisition of 100% of California Lake, Canoe Landing Lake East and Nine Mile Brook East mineral projects. The Company issued a total of 333,332 common shares at a deemed price of \$0.075 per share, in accordance with the option agreement. The Optionors and the Company also converted the final \$30,000 cash payment owing under the option agreement for 333,334 common shares at a deemed price \$0.09 per share. See *Mineral Properties* below.
- In May and June 2024, the Company announced that it has received certified assays for specific drill holes at its Wedge VMS Project. See *Mineral Properties* below.
- In June 2024, the Company announced that it has engaged EarthEx Geophysical Solutions Inc. ("EarthEX") to initiate its advanced Geophysical program over the California Lake and Wedge priority targets. See *Mineral Properties* below.
- In June 2024, the Company also announced that it has received the New Brunswick Junior Mining Assistance Grant for 2024, specifically to address priority targets to the northwest of the Wedge mine site.

### ***New Brunswick Properties***

In November 2021, the Company entered into a mineral property purchase and sale agreement (the "Agreement") with Fiddlehead Mining Corp. ("Fiddlehead") to acquire 100% of the rights, title, and interest of Canoe Landing Lake West ("Canoe" or "Canoe Project") and 50% of the mineral claims known as Nine Mile Brook ("Nine Mile Brook" or "Nine Mile Brook Project") (the "Transaction"). Canoe and Nine Mile Brook (the "Properties") are located in eastern New Brunswick, Canada. Under the terms of the Agreement, the Company paid \$25,000 in cash and issued 21,000,000 common shares (the "Consideration Shares") of the Company. The Transaction was completed in January 2022.

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

The Properties are subject to a 3% Net Smelter Royalty ("NSR") and the Company issued 630,000 common shares as a finder's fee upon completion of the Transaction, valued at \$113,400.

Under the terms of the Agreement, the Company also acquired a mineral property option (the "Nine Mile Option") to acquire the remaining 50% of the rights, title, and interest of Nine Mile Brook (the "Nine Mile Option Agreement"). Further details regarding the Nine Mile Option Agreement can be found below within the *Nine Mile Mineral Property Option* subsection.

### *Nine Mile Mineral Property Option*

As described above, the Company acquired the Nine Mile Option as part of the Agreement. The Nine Mile Option Agreement entitles the Company to obtain the remaining 50% ownership in Nine Mile Brook from Fiddlehead. To exercise the Nine Mile Option, the Company must pay to Fiddlehead an aggregate of \$3,000,000 prior to the fourth anniversary of the effective date and incur an aggregate of \$1,000,000 of expenditures on the property over three years, with at least \$500,000 of the expenditures being in the first 12 months of the Nine Mile Option and a minimum of \$150,000 per year spent on expenditures after the first 12 months of the Nine Mile Option.

Under the terms of the Nine Mile Option Agreement, the Company is required to make the following payments:

- i. \$25,000 upon signing the Agreement ("Option Fee") (paid);
- ii. \$50,000 upon each anniversary of the Agreement ("Annual Option Fee"); and
- iii. An additional payment of \$3,000,000 less the Option Fee and all Annual Option Fees paid.

On November 30, 2023, the Company paid the Annual Option Fee of \$50,000.

Despite the schedule noted above, the Company can exercise the Nine Mile Option at any time during the four-year term by paying Fiddlehead \$3,000,000, less the payments already made as long as the Company is not in breach of the Nine Mile Option at that time.

### *Option of Additional BMC Claims*

In April 2022, the Company signed a new mineral property option agreement to acquire 100% of the rights, title, and interest in and to 12 mineral claims: California Lake (6 claims), Canoe Landing Lake East (4 claims); and Nine Mile Brook area (2 claims) of the Bathurst Mining Camp ("BMC") property, located in New Brunswick (see Figure 1 below). To exercise the option to acquire the mineral claims, the Company must pay \$100,000 and issue 1,500,000 common shares during a period of up to three years as follows:

- \$20,000 and 500,000 common shares upon signing the mineral property option agreement (paid and issued);
- \$20,000 and 333,334 common shares on the first anniversary of the date of the mineral property option agreement (paid and issued);
- \$30,000 and 333,333 common shares on the second anniversary of the date of the mineral property

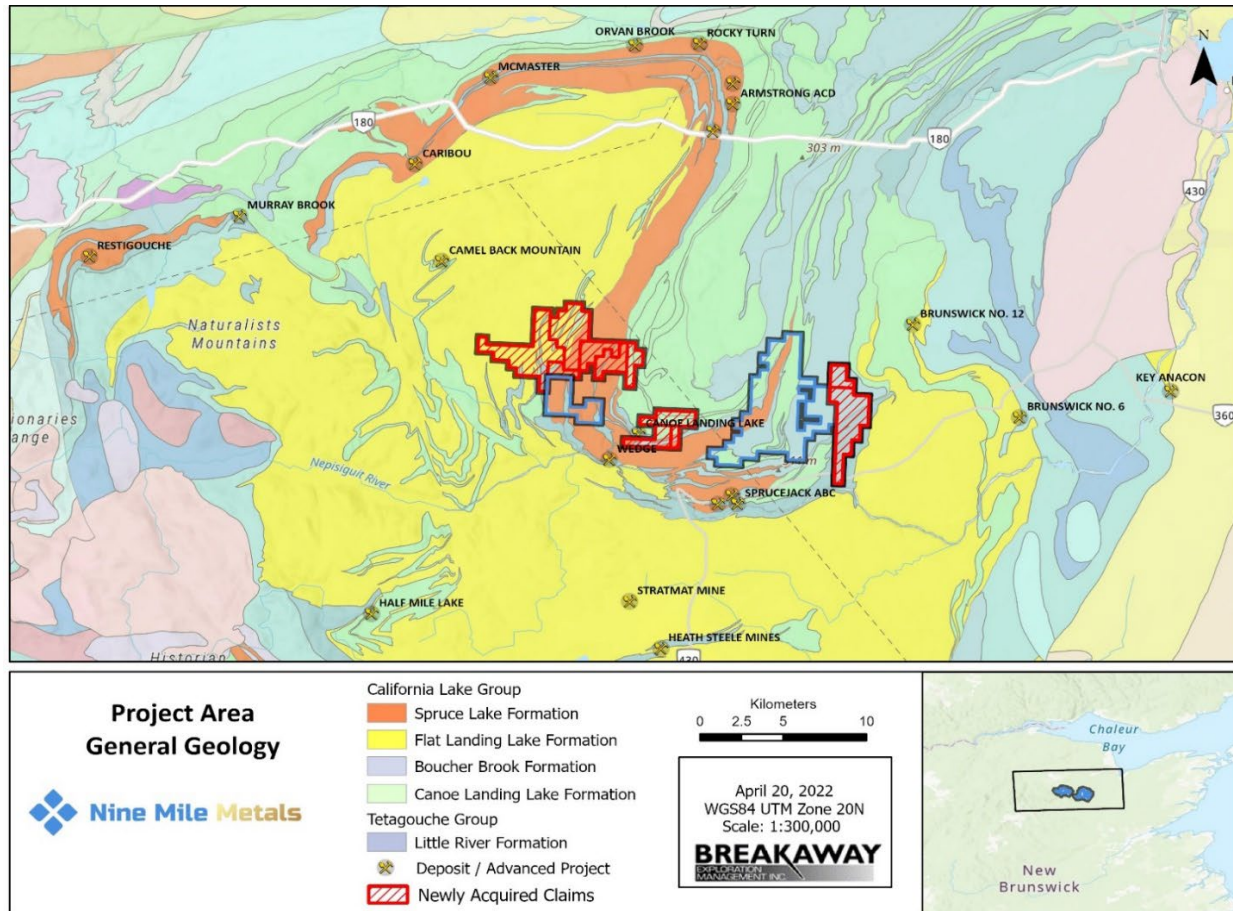

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

option agreement (cash payment converted to common shares and issued); and

- \$30,000 and 333,333 common shares on the third anniversary of the date of the mineral property option agreement (cash payment converted to common shares and issued).

The vendor retains a 2% NSR on the property. The Company has the right to purchase half of the NSR or \$1,000,000 at any time.

**Figure 1 - California Lake, Canoe Landing Lake East & Nine Mile Brook East Property Package (Highlighted Red)**

### Acquisition of West Nine Mile Brook

In February 2023, the Company announced that it has acquired 100% of the rights, title, and interest in the West Nine Mile Brook Project consisting of 29 claim units, located in New Brunswick, Canada. Under the terms of the agreement, the Company is required to issue 232,143 common shares (issued). The vendor retains a 2% NSR on the property. The Company has the right to purchase half of the NSR for \$500,000 at any time.

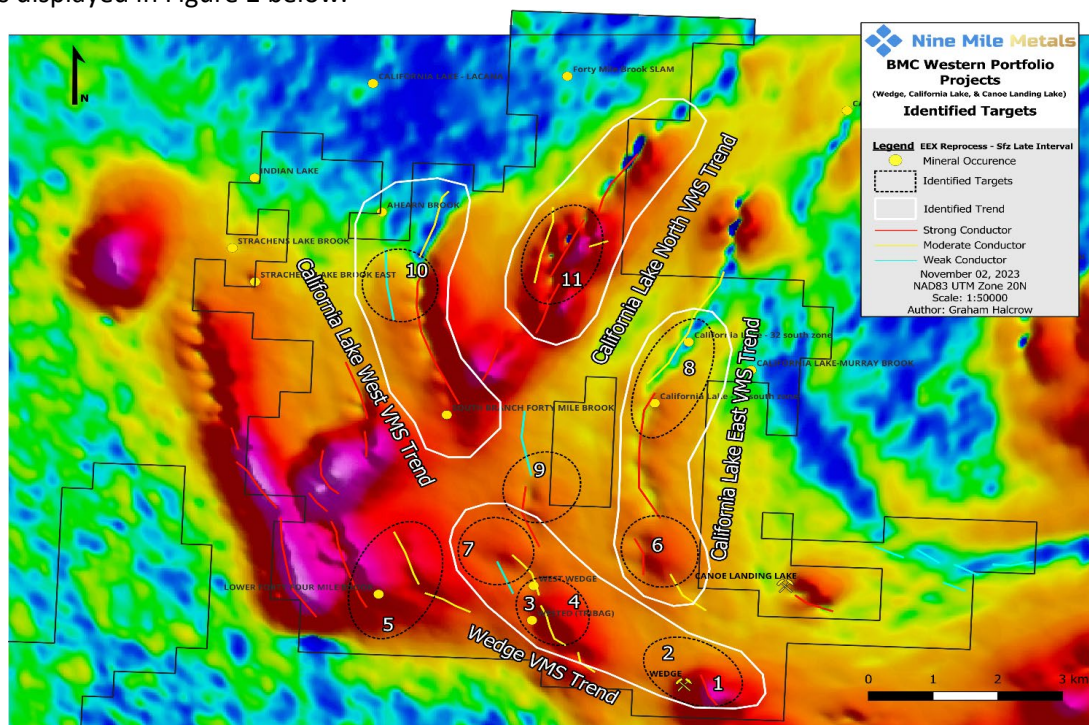

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

### California Lake VMS Project

The California Lake VMS Project covers 35.83 square kilometers immediately north of the Canoe Landing Lake Project and includes a large section of the highly prospective Spruce Lake Formation. Included in the land package are 4 known base metal (Cu, Pb, Zn) mineral occurrences: South Branch Forty Mile Brook; California Lake 32 South; California Lake 68 South; and California Lake – Murray Brook. Historical work in the area identified a variety of VMS depositional styles including disseminated and stringer sulphides in addition to massive, tabular massive sulphides as at the California Lake 32 South Zone where previous drilling intersected values ranging from 7.86% Zn, 2.51% Pb, 73.9 g/t Ag and 1.41 g/t Au over 6 metres. At California Lake - Murray Brook, historical surface trenching identified an extensive hydrothermal alteration zone some 500 metres in length and between 10 and 100 metres wide with significant concentrations of base metal sulphides including grab samples up to 5% Cu. At California Lake 68 South, 4-meter drill intersections assayed 2% Pb/Zn with minor copper and silver.

In November 2023, the Company initiated its California Lake VMS Drill Program and engaged Les Forages Chapais from Sussex, N.B. ("Chapais") to drill high priority targets beginning with Target #10 Drillhole CL-23-10-01 as displayed in Figure 2 below.

**Figure 2 – New Geophysics Targeting Compilation (Western Portfolio) BMC, New Brunswick**

Rocks intersected include felsic volcanics of the Flat Landing Brook Formation which hosts numerous VMS mines and occurrences in the southern portion of the BMC including Stratmat and Headway. Mixed felsic rocks of the Flat Landing Brook Formation continued to 557 meters where a distinct break occurred, the drill hole intersecting the upper boundary of a Tectonic Zone characterized by white quartz and pink – orange K-Spar veining. Pyrite and Chalcopyrite (Cu) mineralization is locally present in the quartz – K-Spar veins associated with the Tectonic Zone. Still above target depth, the geological sequences encountered in drill hole CL-23-10-01 are characteristic of the Flat Landing Brook felsic volcanics. Local intense hydrothermal

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

alteration, high temperature mineralogy and sulphide banding confirm the potential of the California Lake VMS West trend. Additional drilling is planned along this prospective trend where EarthEx defined numerous untested, late time EM conductors, characteristic of VMS mineralization, along strike of known Cu, Pb and Zn occurrences.

In May 2024, the Company exercised its option early to acquire 100% of the California Lake VMS Project with the issuance of common shares as described in the *Option of Additional BMC Claims* section of this MD&A.

Additionally, in May 2024, the Company engaged EarthEx to a Borehole Electromagnetic ("BHEM") survey at California Lake (CL-23-10-01). By August 2024, EarthEx completed the BHEM Survey at the California Lake Project for hole CL-23-10-01. The Company is awaiting final results processing, interpretation and 3D modelling. The preliminary results from the California Lake CL-23-10-01 BHEM survey, indicated a weak to moderate conductor at depth. While we await the final results of the BHEM surveys, interpretation and 3D modeling, EarthEx has initiated high priority ground-based Time Domain Electromagnetic ("TDEM") surveying over previously identified priority conductors at the Wedge including targets 3, 4, 6 and 7, to further define the respective anomalies (Figure 3). Located in the western Wedge trend, the TDEM survey over the clustered anomalies provides the opportunity to validate the trend with high priority drill targets. Several lines are also planned over Target 6 which is along the southern extension of the California Lake East VMS trend that was successfully drilled in 2022.

**Figure 3 – EEX TDEM Ground Based Grids & Loop covering Wedge Targets 3-4-6-7**

At California Lake, Target Areas 10 and 11 were previously defined by EarthEX, the reprocessed MegaTEM data identifying numerous strong, late time conductive trends crudely forming a fold nose as seen in red in Figure 3 and highlighted by the red polylines that define the conductive axis. With a moderate conductor identified in CL-23-10-01 at a depth of 230.00 meters and adjacent, unresolved conductors, a ground-based TDEM survey will be undertaken, the grid location shown in Figure 3, the southern corner of the grid proximal to the South Branch Forty Mile Brook Cu, Zn mineral occurrence identified by the yellow circle.

In conjunction with the TDEM program, EarthEx is also conducting a large, 1,400-line kilometer, close spaced UAV (Drone) magnetic survey over the California Lake project areas including target areas 1 through 10. The drone survey is underway in addition to linecutting to facilitate the ground based TDEM surveys.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

### Canoe Landing Lake VMS Project

To the southeast of California Lake, the acquired Canoe Landing Lake East VMS property covers 5.5 square kilometers along the east flank of the Canoe Landing Lake VMS Deposit. Hosted within the Boucher Brook Formation near the contact with the Canoe Landing Lake Formation, the deposit consists of 22.8 million tons grading 0.64% Pb, 1.82% Zn, 0.56% Cu, 0.94 oz/ton Ag and 0.034 oz/t Au. This additional property increases Nine Mile's Canoe Landing Lake VMS Project to 10.78 km<sup>2</sup>, which includes both Canoe Landing Lake West and Canoe Landing Lake East properties.

In May 2024, the Company exercised its option early to acquire 100% of the Canoe Landing Lake East VMS mineral Project with the issuance of common shares as described in the *Option of Additional BMC Claims* section of this MD&A.

### Nine Mile Brook VMS Project

The newly acquired Upper Pabineau River and Nine Mile Brook properties on the eastern flank of our existing Flagship Nine Mile Brook VMS Project, adds 9.02 square kilometers of prospective stratigraphy along the Boucher Brook Formation, host of the Nine Mile Brook VMS occurrence and the Canoe Landing Lake Deposit to the west. These additional properties increase the Company's Nine Mile Brook VMS Project to 34.98 km<sup>2</sup>.

Utilizing recent proprietary advances in both technology and data processing, this large project portfolio will be aggressively explored for its VMS potential. Initial geophysical targeting will be followed up by ground-based surveys, 3D modeling and diamond drilling. Bore hole surveys will be conducted to define subsurface mineralization.

In June 2023, Simcoe Geoscience Limited was engaged to reprocess the ground geophysical data and provide a separate analysis. Enhanced target definition identified a massive new structure termed the Nine Mile Structural Corridor. The boundaries of the structure correlate to the Islands Trend in the west and along a well-defined geophysical contact in the east. Targets have been identified in areas where there is no previous drilling.

Additionally in June 2023, the Company received the final report analysis and results of mineralogical testing by RPC. RPC was engaged by Nine Mile Metals to investigate the potential of Cu-Pb-Zn-Ag-Au recovery from the Nine Mile Brook VMS Lens. RPC was provided with 52 kilograms of drill core samples from the 2022 drill program to characterize the mineralogy and direct further recovery investigations. Highlights from the report include the following:

- The mineralogy is like other Bathurst Mining Camp deposits however the concentration of payable metals is not typical, having very high grades.
- Combined payable metal in each of the samples were 21.3% Cu, 16.1% Pb and 18.1% Zn.
- RPC concluded that an 18.5% combined payable metal could be attained based on a non-weighted average blend (Note: This does not include Ag and Au values).
- Silver grades were similar in all samples, averaging 216 g/t Ag, the silver contained in the mineral tetrahedrite, an antimony sulphide of Cu, Fe, Zn, Ag.
- Gold varied between 1.481 – 1.922 g/t Au.
- The samples also contained the critical technology element Indium, ranging from 200 – 390 ppm In.

**Nine Mile Metals Ltd.**  
 Management's Discussion and Analysis  
 Nine Months Ended June 30, 2024

The Company has also received approval and additional grant funding through the National Research Council-Industrial Research Assistance Program to fully fund the next stage directed by RPC which includes:

- Gravity separation and a bulk sulphide flotation testing to determine if there is potential to further upgrade the payable metal contents.
- Identify and contact smelters that can process high-grade ore.
- Analyze and assess potential processing options for the high Indium mineralization found in the Lens Ore, a critical mineral used in defence, energy, and telecommunications.

In November 2023, the Company received the water baseline results and final report from GEMTEC for the Nine Mile Brook Lens Bulk Sample Project. A total of six surface water and six sediment samples were collected for laboratory analysis. The surface water samples were submitted for analysis of general chemistry, total suspended solids, total metals, as well as dissolved manganese, zinc, organic carbon, and petroleum hydrocarbons. The sediment samples were also sent for analysis, specifically for available metals and petroleum hydrocarbons. Field water quality parameters, including conductivity, dissolved oxygen, pH, and temperature, were measured using a multiparameter water quality meter. Proper QA/QC protocols were followed, which included submitting two duplicate samples for laboratory analyses—namely, one surface water sample and one sediment sample.

In January 2024, the Company announced it had received final approval of its Nine Mile Brook Lens bulk sample permit for the Nine Mile Brook Lens sample project. Figure 4 below shows the Nine Mile Brook Lens Bulk Sample Site Plan.

**Figure 4 – Nine Mile Brook Lens Bulk Sample Site Plan**

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

In May 2024, the Company exercised its option early to acquire 100% of the Nine Mile Brook East mineral Project with the issuance of common shares as described in the *Option of Additional BMC Claims* section of this MD&A.

### *New Claims Adjacent to California Lake and Nine Mile Brook VMS Projects*

In September 2023, the Company acquired 49 new claim units from Prospect Or Corp (the "Prospect Or Claims") adjacent to the Company's California Lake and Nine Mile Brook VMS Project. In exchange for the Prospect Or Claims, Nine Mile issued 300,000 common shares of the Company. In addition, the vendor retains a 2% NSR on the Prospect Or Claims. The Company has the right to purchase half of the 2% NSR from the vendor for \$1,000,000 at any time prior to commencement of commercial production.

In September 2023, the Company acquired 23 claim units (the "Lorena Hamilton Claims") adjacent to the Company's California Lake and Nine Mile Brook VMS Project. In exchange for the Lorena Hamilton Claims, Nine Mile issued 550,000 common shares of the Company. In addition, the vendor retains a 2% NSR on the Lorena Hamilton Claims. The Company has the right to purchase half of the 2% NSR from the vendor for \$1,000,000 at any time prior to commencement of commercial production.

### *Wedge Project Mineral Property Option*

In February 2023, the Company announced it has entered into a mineral property option agreement to acquire a 100% interest in the Wedge Project, which includes the Wedge Copper Deposit Project from Slam Exploration Ltd. The Wedge Property consists of 114 claim units covering 25 km<sup>2</sup>. Proprietary New technology (UAV 3D and AI) will be utilized to explore the entire mineralized trend at depth and along the wedge horizon including the massive western property targets.

To exercise its option to acquire the mineral property interests, Nine Mile must issue an aggregate of 1,200,000 common shares and pay \$150,000 to SLAM, during a period of up to four years as follows:

- (a) pay 100,000 common shares and \$10,000 on the date of the agreement (paid and issued);
- (b) pay 200,000 common shares on or before February 9, 2024 and equivalent of \$20,000 of units of the Company upon the completion of the next financing, in which each unit will consist of one common share and one share purchase warrant exercisable at \$0.10 per share for a period of 2 years (issued);
- (c) pay \$30,000 and issue 200,000 common shares on or before February 9, 2025;
- (d) pay \$40,000 and issue 300,000 common shares on or before February 9, 2026; and
- (e) pay \$50,000 and issue 400,000 common shares on or before February 9, 2027;

The Company has agreed to keep the claims in good standing during the term of the agreement but has not agreed to any minimum exploration expenditures on the property. The vendor retains a 2% NSR on the property. The Company has the right to purchase half of the NSR for \$1,000,000 at any time.

The agreement was negotiated at arm's length. All Company shares issued to SLAM will be subject to four-month resale restrictions in accordance with Canadian securities legislation. No finder's fees, broker's fees or other commissions are payable in connection with this transaction.

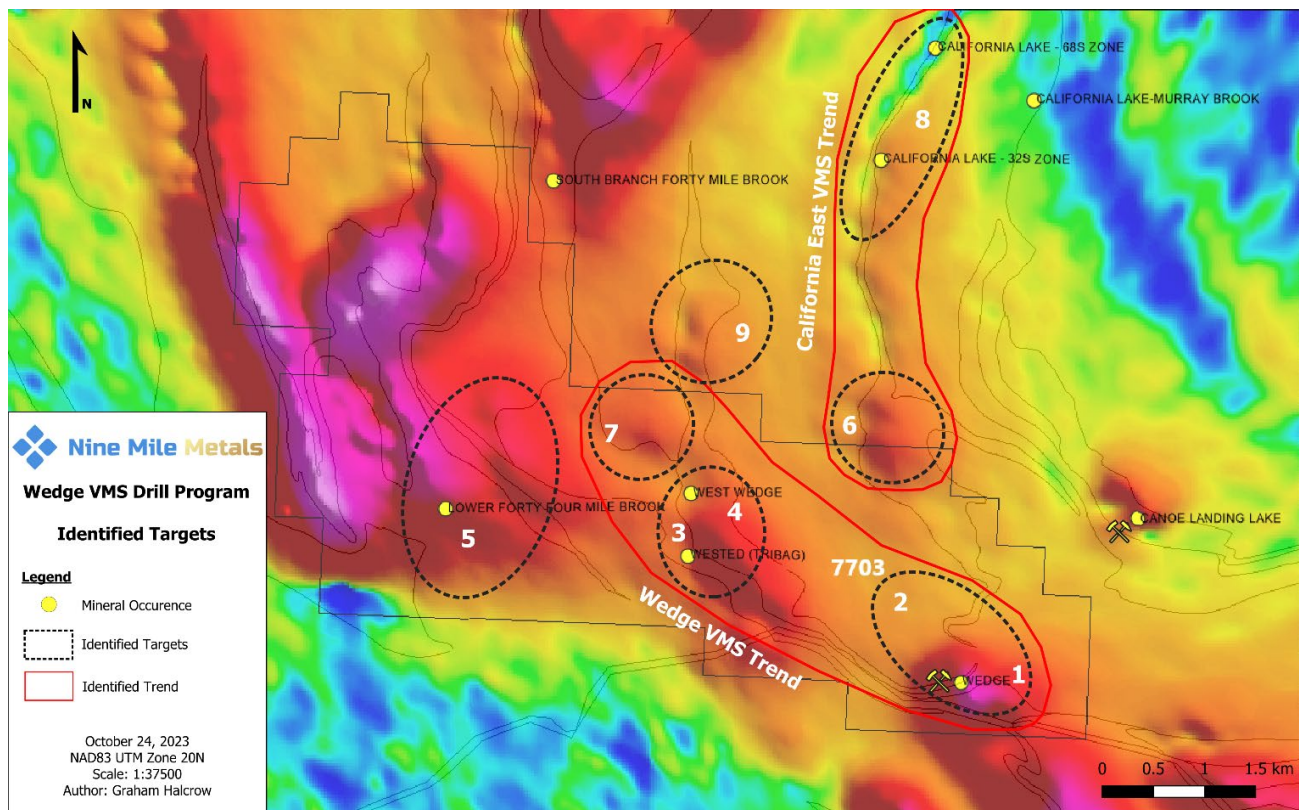

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

Despite a long exploration and operating history, technical data regarding the mine was not required to be reported to the New Brunswick Department of Energy and Mines ("NBDEM"), including drill logs, assay certificates, production figures and underground mine plans.

In October 2023, the Company announced that it has received all necessary drill permits on its Wedge project. The Company has identified nine (9) high priority target areas in its western camp portfolio, of the Wedge Project, which is located 20 kilometers southwest of the Brunswick #12 mine. In addition to the historic Wedge Mine, the Cominco Wedge Mine Extension (never drill tested), the Wedge North Target, which completes the California Lake East Trend, West Wedge and Tribag (representing a 4.5kms VMS Trend) and Lower 44 Mile Brook targets.

Figure 5 displays the newly identified nine (9) VMS priority targets: 1. Wedge Mine, 2. Wedge Mine Extension, 3. TriBag Target, 4. West Wedge Target, 5. Lower 44 Mile Brook Target, 6. Wedge North Target, 7. Upper 44 Mile Brook Target, 8. California East Drill Holes 2022, and 9. Canoe South Target.

**Figure 5 - "New" Drill Program High Priority Targets, Wedge Project Area, New Brunswick**

The drill program at California Lake Target #10 stopped on December 21, 2023, above target depth due to inclement weather. The drill target is located in rolling hills west of Bathurst, N.B. and the roads (20km+) are not maintained by the N.B. Department of Transportation and Infrastructure, making access for both crew and fuel trucks extremely hazardous in bad winter weather. The drill hole has been capped and will be re-entered when weather permits. Once shut down, the drill was relocated to the Wedge to avoid having

## Nine Mile Metals Ltd.

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

equipment stuck deep in the bush over the winter months. Meanwhile, drill core is being cut and submitted to ALS Certified Labs in Vancouver for assay. Downhole geophysics (BHEM) is also being evaluated since this can be done in the winter months prior to resuming the drill program, through snowmobile access.

In January 2024, the Company announced it has mobilized the Drill Rig onsite for its High Priority Drill Program on Targets #1 & #2. Drill targeting focused on target areas #1 and #2 as shown on the above figure. Located approximately 4 kilometers west of Hwy 430, the Wedge target areas #1 & #2 are the only accessible targets in the western portfolio due to heavy snowstorms and the New Brunswick Snowmobile Federation ("NBSF"), who take over road responsibilities for grooming until April. Arrangements were made with the NBSF allowing the Company to clear a portion of the road to facilitate access to the Wedge for fuel deliveries.

In February 2024, the Company announced it drilled its first drill hole WD-24-01 and intersected three mineralized zones including 6.18 meters of pyritic VMS with chalcopyrite and lesser Pb and Zn mineralization between 33.47 meters and 39.65 meters (XRF results are listed in Table 1 below). Mineralization continued to a depth of 53.16 meters. A third zone of mineralization was intersected between 139 and 142 meters. The hole terminated in hanging wall volcanics at 164.5m in total hole depth. The VMS mineralization is very fine-grained consisting of 95% sulphides making Cu, Pb, Zn mineralogy difficult to identify. 54 Samples from all three zones representing 56.29 meters of both VMS mineralization and adjacent rock, have been logged, measured, cut, and shipped for submission to the ALS Global Labs in Moncton, New Brunswick for certified analysis.

The Company completed its XRF analysis for the first upper VMS portion of the drill hole utilizing an Olympus Vanta 50 Portable XRF equipped with a 50Kv Workstation and Reflex XRF software. The XRF process included calibrating the machine and utilizing two standards in the sample stream (OREAS 502B and CDN-BL-10 Blank) at the beginning and end of the analytical sequence. Except for one sample, each sample consisted of a 1-meter section of cut drill core, and as such, the sample was not homogeneous. There were six Sample Batches over 6.18 meters of mineralization. Each sample batch had approximately 12 -21 data points analyzed per meter. The core sample is placed cut face down, and the XRF gun takes a random unknown sample of the core. The operator has no knowledge of the laser point. The sum of the averages was divided by the number of pieces, the results of which are presented in Table 1 below.

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

depth of 165 meters. The drill hole successfully intersected three (3) Zones of visual sulphide mineralization: 26.76 – 53.16 meters, 69.00 – 82.00 meters, and 139.00 – 142.00 meters. The main copper zone intersected 11.10 meters (32.55 – 43.65 meters) assaying 1.37% Cu, 0.21% Pb, 0.29% Zn, 19.02 g/t Ag, and 0.36 g/t Au (refer to Table 2). This includes:

- 8.18 meters of pyritic VMS assaying 1.83% Cu, 0.28% Pb, 0.38% Zn, 25.24 g/t Ag, and 0.46 g/t Au.
- 5.18 meters of pyritic VMS assaying 2.59% Cu, 0.43% Pb, 0.48% Zn, 39.09 g/t Ag, and 0.69 g/t Au.

Sample #	From (m)	To (m)	Width (m)	Cu (%)	Pb (%)	Zn (%)	Pb + Zn (%)	Ag (g/t)	Au (g/t)

**Table 2: Certified Assays (32.55 – 43.65 meters)**

In the southern portion of the Wedge, footwall sediments consisting of sheared argillite with occasional graphite and sulphide clasts are visible at the surface. These sediments appear to serve as a marker horizon, often found in proximity to mineralization in the drill holes. VMS mineralization at the Wedge occurs over extended intervals, with the most significant accumulations typically found at intersections between the felsic volcanics and sediments. In drill hole WD-24-01, sulphide mineralization is discontinuous featuring individual bands of pyrite/pyritic up to 20 cm thick. This style of mineralization defines the lower zones found in the drill hole, with felsic volcanics found at depth. At this early stage, some common features are present, and with the completion of the 3D model, the geological-structural controls on the mineralization should become more evident.

In March 2023, the Company announced that it has drilled a mineralized zone covering 134.0m in WD-24-02 as part of its Phase 1 drill program. The hole was collared on the northeast flank of the Wedge Deposit and drilled at an azimuth of 160 degrees and a dip of – 50 degrees to a depth of 219 meters. Copper mineralization first appears at 39.6 meters and continued down the hole with numerous secondary zones of VMS mineralization identified. Nine Mile completed an XRF Analysis of a random zone of mineralization between 157.65 – 173.05 meters (15.4 meters) consisting of bands of mixed VMS between 164.50 – 170.25 meters (XRF results are listed in Table 3 below). Entire mineralized zone of 134.0m has been sample cut and being shipped to ALS Global Labs for Certified Lab Analysis.

**Table 3: Random Section of 15.40m of Mineralized Core XRF Analyst. (157.65m – 173.05m)**

The Company has completed its XRF analysis for the main VMS portion of the drill hole utilizing an Olympus Vanta 50 Portable XRF equipped with a 50Kv Workstation and Reflex XRF software. The XRF process included calibrating the machine and utilizing three standards in the sample stream (OREAS 502B, OREAS 622 and CDN-BL-10 Blank) at the beginning and end of the analytical sequence. Most samples consisted of a 1-meter section of cut drill core, and as such, the sample was not homogeneous. There were fifteen Sample Batches over 15.40 meters of mineralization. Each sample batch had approximately 15 -21 data points analyzed per meter. The core sample is placed cut face down, and the XRF gun takes a random unknown sample of the core. The operator has no knowledge of the laser point. The sum of the averages was divided by the number of pieces, the results of which are presented in the table above.

In March 2024, the Company announced the certified assays for drill hole WD-24-02 at the Wedge Mine. Drill hole WD-24-02 confirms the presence of a new, larger mineralized system at the Wedge VMS Project, intersecting three mineralized zones spanning from 36.74m to 173.05m. This 136.31m width assays 0.44% Cu, 0.07% Pb, 0.54% Zn, 0.06 g/t Au and 3.52 g/t Ag. Three zones of visual mineralization were identified: (1) 36.74m–49.90m, (2) 88.90m–110.00m, and (3) 134.00m–174.00m, with the sulphide mineralogy primarily consisting of pyrite and lesser chalcopyrite, sphalerite, and galena. The Main Copper Zone occurs between 134.00m and 174.00m, spanning 40.00m and assaying 1.32% Cu, 0.21% Pb, 1.54% Zn, 8.8g/t Ag, and 0.164

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

The Company also announced that it had drilled a mineralized zone covering 76.10m in WD-24-04 as part of its Phase 1 drill program. The hole was collared on the northeast flank of the Wedge Deposit approximately 40 meters east of WD-24-02 and at an azimuth of 160 degrees and a dip of – 50 degrees to a depth of 167 meters. Copper mineralization first appears at 71 meters and continued down the hole with numerous secondary zones (117.00 – 122.00 m) of VMS and banded copper bearing pyritic mineralization. Nine Mile completed an XRF Analysis at the base of the mineralization between 136.86 – 147.10 meters (10.24 meters) consisting of bands of massive sulphides with visible copper (chalcopyrite) and zinc (Sphalerite) mineralization (XRF results are listed in Table 6 below). The entire sequence from 71.00 – 147.10 meters is in the process of cutting prior to shipping to ALS Global in Moncton for analysis.

In April 2024, the Company announced the certified assays for drill hole WD-24-04 at the Wedge Mine. Drill hole WD-24-04 was collared on the northeastern flank of the Wedge deposit, positioned approximately 40 meters east of drill hole WD-24-02. The drill hole successfully intersected three (3) Zones of visual sulphide mineralization at depths of 55.00 – 78.00m (Zone 1), 110.00 – 132.20m (Zone 2), and 136.00 – 147.10m (Zone 3) (see Table 7 below). The main copper zone intersected a 37.10m section (110.00 – 147.10 m), assaying 0.81% Cu, 0.25% Pb, 1.00% Zn, 8.5 g/t Ag and 0.13 g/t Au (Copper Equivalent: 1.33% Cu). Sub-zones within this section demonstrated higher yields, including 10.24 meters of pyritic VMS assaying 1.57% Cu, 0.74% Pb, 2.99% Zn, 26.61 g/t Ag, and 0.31 g/t Au (Cu Equivalent: 3.08%) and 7.52 meters of pyritic VMS assaying 1.86% Cu, 1.00% Pb, 1.17% Zn, 35.50 g/t Ag, and 0.42 g/t Au (Copper Equivalent: 3.07%). Notable gold and silver mineralization are present alongside the lead and zinc within the VMS deposits.

**Table 7: Drill Hole Summary, WD-24-04**

In the northeastern section of the Wedge, the geology comprises a blend of volcanic materials and sedimentary deposits. The mineralization is primarily located at the contact point between the felsic volcanic rocks and the underlying graphitic argillite, similar to what was observed in DDH-24-02 to the west. The most significant lead and zinc mineralization has been consistently found at the base of the geological section, adjacent to the graphitic sediment layer.

In May and June 2024, the Company also announced certified Assays of holes WD-24-03, WD-24-05, WD-24-06, WD-24-07 and WD-24-08.

Drill hole WD-24-03 was collared along the southern flank of the Wedge deposit within the footwall sediments utilizing the same drill pad as WD-24-01, drill at an azimuth of 50 degrees and a dip of -45 degrees to a total depth of 100.00m. The drill hole successfully intersected Cu, Pb, Zn, Au, and Ag mineralization between 37.90m and 70.00m (32.10m) assaying 0.60% Cu, 0.70% Pb, 1.98% Zn, 0.21 g/t Au, and 17.03 g/t Ag with a Cu-Eq of 1.58%. Two distinct zones of VMS mineralization were intersected: i) Cu Zone (44.85m – 61.00m): 16.15m assaying 1.06% Cu, 1.17% Pb, 2.97% Zn, 0.35 g/t Au, and 28.64 g/t Ag with a Cu-Eq of 2.60% and ii) Pb/Zn Zone (44.85m – 53.00m): 8.15m assaying 0.95% Cu, 2.29% Pb, 5.80% Zn, 0.65 g/t Au, and 55.16 g/t Ag with a Cu-Eq of 3.61%. See summary Table 10 below.

## Nine Mile Metals Ltd.

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

Drill hole WD-24-06 was collared on the same drill pad as drill hole WD-24-02 and drilled at an azimuth of 160 degrees and a dip of -65 degrees to a total depth of 215.50m to undercut WD-24-02. The drill hole successfully intersected Cu, Zn, Au, and Ag mineralization between 68.00m and 78.00m. Mineralization was limited to the one zone with individual meter intersections further down the hole. See summary Table 12 below.

WD -24-06	From	To	Width (m)	Cu %	Pb %	Zn %	Au g/t	Ag g/t	Cu-Eq %
	68.00	78.00	10.00	1.53	nil	0.81	0.08	7.00	1.88
	69.00	78.00	9.00	1.60	nil	0.83	0.08	7.40	1.96

**Table 12: Certified Assays Drill Hole WD-24-06 – Summary**

Drill hole WD-24-07 was collared on the northeastern flank of the Wedge deposit, 20.00m east of WD-24-02 and drilled at an azimuth of 160 degrees with a dip of -50 degrees to a total depth of 159.00m. The drill hole successfully intersected continual base metal mineralization between 116.00m and 156.32m (40.32m) assaying 1.20% Cu, 0.18% Pb, 0.88% Zn, 0.12 g/t Au, and 8.00 g/t Ag, with a Copper Equivalent (Cu-Eq) of 1.65%. Two distinct zones of visible sulphide mineralization were intersected: i) UPPER ZONE (123.00m – 138.50m): 15.50m assaying 1.64% Cu, 0.08% Pb, 0.82% Zn, 0.08 g/t Au, and 3.32 g/t Ag, with a Cu-Eq of 1.98%; and ii) LOWER ZONE (143.20m – 156.32m): 13.12m assaying 1.40% Cu, 0.45% Pb, 1.55% Zn, 0.25 g/t Au, and 19.8 g/t Ag, with a Cu-Eq of 2.29%. See summary Table 13 below.

**Table 13: Certified Assays Drill Hole WD-24-07 – Summary**

Drill hole WD-24-08 was collared along the southern flank of The Wedge deposit within the footwall sediments, utilizing the same drill pad as drill hole WD-24-01, and drilled at an azimuth of 10 degrees and a dip of -45 degrees to a total depth of 175.5m. The drill hole successfully intersected Cu, Pb, Zn, Au, and Ag mineralization between 37.00m and 81.00m (44.00m) assaying 0.47% Cu, 0.89% Pb, 1.54% Zn, 0.18 g/t Au and 15.35 g/t Ag with a Cu-Eq of 1.34%. Two distinct zones of visible sulphide mineralization were intersected,

**Table 14: Certified Assays Drill Hole WD-24-08 – Summary**

By August 2024, a total of three BHEM surveys were completed by EarthEx, at the Wedge Project for holes WD-24-01, WD-24-05, and WD-24-06. The Company is awaiting final results processing, interpretation and 3D modeling.

## Financial

### Quarterly Results

During the most recent eight quarters, the Company has not recognized any revenue or incurred any loss from discontinued operations. The following provides a summary of selected quarterly results:

Period ended:	Revenues	Net loss	Net loss per share – basic and diluted
	\$	\$	\$
September 30, 2022	–	(619,899)	(0.02)
December 31, 2022	–	(714,618)	(0.01)
March 31, 2023	–	(682,226)	(0.01)
June 30, 2023	–	(574,285)	(0.01)
September 30, 2023	–	(724,482)	(0.01)
December 31, 2023	–	(451,301)	(0.01)
March 31, 2024	–	(608,052)	(0.01)
June 30, 2024	–	(519,431)	(0.01)

## **Nine Mile Metals Ltd.**

### Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

Some differences in the results of operations for each quarter include:

- June 30, 2022 – The Company incurred mineral exploration expenditures of \$211,149 related primarily to exploration and drill program on the Nine Mile Brook VMS project. The Company also incurred share-based compensation of \$57,117 with the issuance of incentive stock options. Consulting fees for the quarter were \$62,258.
- September 30, 2022 – The Company incurred mineral exploration expenditures of \$276,380 related primarily to exploration and drill program on the Nine Mile Brook VMS project. The Company also incurred share-based compensation of \$121,207 with the issuance of incentive stock options. Consulting fees for the quarter were \$171,150.
- December 31, 2022 – The Company incurred mineral exploration expenditures of \$463,491 related to exploration and drill program on the Nine Mile Brook VMS project and California Lake project. The Company also incurred share-based compensation of \$17,648 with the issuance of incentive stock options. Consulting fees for the quarter were \$107,600.
- March 31, 2023 – The Company incurred mineral exploration expenditures of \$395,462 related primarily to the winter drill program on the Nine Mile Brook VMS Project. The Company also incurred share-based compensation of \$1,165 with the issuance of incentive stock options. Consulting fees for the quarter were \$130,104.
- June 30, 2023 – The Company incurred mineral exploration expenditures of \$268,949 primarily related to the drill program on the Nine Mile Brook VMS project. Consulting fees for the quarter amounted to \$156,787.
- September 30, 2023 – The Company incurred mineral exploration expenditures of \$406,336 primarily related to the drill program on Nine Mile Brook VMS project. The Company also incurred share-based compensation of \$125,527 with the issuance of incentive stock options. Consulting fees for the quarter were \$51,650.
- December 31, 2023 – The Company incurred mineral exploration expenditures of \$249,307 primarily related to the drill program in the California Lake project. The Company also incurred professional fees of \$45,048 during the quarter.
- March 31, 2024 – The Company incurred mineral exploration expenditures of \$433,741 primarily related to the Wedge Project drill program. The Company also incurred flow-through penalties of \$18,084 as a result of Part XII.6 tax on unspent flow through expenditures. Additionally, during the quarter ended March 31, 2024, the Company settled \$31,732 of its flow-through share liability.
- June 30, 2024 – The Company incurred mineral exploration expenditures of \$224,651 primarily related to the Wedge Project drill program. The Company also incurred share-based compensation expense of \$113,982. The Company recorded a recovery of flow-through penalties of \$6,028 and settled \$16,122 of its flow-through share liability during the three months ended June 30, 2024.

### ***Results of Operations***

For the three months ended June 30, 2024, the Company incurred a loss of \$519,431 (June 30, 2023 - \$574,285). For the nine months ended June 30, 2024, the Company incurred a loss of \$1,578,784 (June 30, 2023 - \$1,971,133).

Certain notable expenses and related costs in the Company's operations during the nine months ended June 30, 2024, compared to the previous period, include:

- Consulting fees decreased by \$326,991 during the nine months ended June 30, 2024 compared to

## Nine Mile Metals Ltd.

### Management's Discussion and Analysis Nine Months Ended June 30, 2024

---

the nine months ended June 30, 2023. The decrease is primarily due to service contracts that existed in the previous period but have since expired and were not renewed.

- Management fees include amounts paid to the President, two directors, the CEO, and the CFO.
- Mineral exploration costs include drilling and exploration costs and other exploration programs on the Company's mineral projects (see breakdown of costs below).
- Share-based compensation expense is recognized over the vesting period of stock options granted. During the nine months ended the Company granted 1,700,000 stock options and recorded share-based compensation of \$113,982 compared to \$15,716 during the nine months ended June 30, 2023. \$96,296 of the total share-based compensation expense pertains to directors and officers of the Company compared to \$nil during the nine months ended June 30, 2023.
- Accretion of discount on convertible loans of \$17,941 was recorded during the nine months ended June 30, 2024, compared to \$nil during the prior nine months ended June 30, 2023. During the nine months ended June 30, 2024, the Company issued convertible loans as outlined in the *Convertible Loans* section of this MD&A
- The Company incurred flow-through penalties of \$12,056 as a result of Part XII.6 tax on unspent flow through expenditures. During the nine months ended June 30, 2024, the Company closed an FT Private Placement resulting in a flow-through share premium liability recorded on the Condensed Interim Financial Statements. During the nine months ended June 30, 2024, the Company settled \$49,710 of the flow-through share liability.

#### **Exploration costs**

The Company incurred exploration costs of \$907,699 during the nine months ended June 30, 2024 (June 30, 2023 - \$1,127,902).

A breakdown of the nature of the nine months ended June 30, 2024 exploration costs is provided below:

	Canoe Landing Lake West Project \$	Canoe Landing Lake East Project \$	Nine Mile Brook Project \$	California Lake Project \$	Wedge Project \$	Total \$
Assays	–	–	1,225	–	122,586	123,811

	10,800	10,695	819,258	1,000	256,469	29,680	1,127,902

**Liquidity and Capital Resources**

As at June 30, 2024, the Company had cash of \$806,745 (September 30, 2023 - \$446,001) and working capital of \$442,240 (September 30, 2023 – \$403,648). The cash on hand as at June 30, 2024, includes \$785,004 in cash allocated for flow-through expenditures. For the nine months ended June 30, 2024 and 2023, the Company had negative cash flows from operating activities.

Certain factors that may have an effect on the Company's liquidity include:

- The Company has entered into an agreement to acquire mineral property interests in the BMC area that requires the Company to make option payments in aggregate of \$100,000 over three years.
- The Company has entered into an agreement with Fiddlehead to acquire the Properties that requires the Company to make option payments in aggregate of \$3,000,000 over four years and incur \$1,000,000 of expenditures, including at least \$500,000 of expenditures in the 12 months following the effective date of the option agreement and a minimum of \$150,000 per year on expenditures after the first 12 months.
- The Company has entered into new consulting and investor relations agreements with companies like Kindred that require ongoing monthly fee payments.
- In April, 2024, the Company entered into a lease agreement for office space commencing on July 1, 2024, for a term of 2 years. The base rent due under the lease is \$19,712 per annum for the term of the lease.
- Obtaining financing is subject to a number of factors that may make the timing, amount, terms or conditions of additional financing unavailable to the Company. As previously stated within the *Corporate Developments* of this MD&A, the Company has raised proceeds from the issuance of shares from the issuance of FT Units, NFT Units and Convertible Loans.

The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing through debt or equity. Management is of the opinion that sufficient working capital will be obtained from external financing to meet the Company's liabilities and commitments as they become due,

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These factors may cast significant doubt on the Company's ability to continue as a going concern. The Condensed Interim Financial Statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

### ***Convertible Loans***

On December 14, 2023, the Company issued convertible loans for total proceeds of \$201,000. The convertible loans bear interest at a rate of 15% per annum and are repayable on December 14, 2024 ("Maturity"). At the election of the lenders, the principal and interest amount of the loans is convertible into units at \$0.10 per unit at the Maturity date. Each unit will consist of one common share and one share purchase warrant. Each share purchase warrant is exercisable at \$0.10 per common share for a period of 2 years from the date of conversion. In connection with the issuance of the convertible loans, the Company incurred issuance costs of \$17,625 and issued 104,000 finder's warrants with a fair value of \$13,849, which are exercisable at \$0.10 per common share until December 14, 2025.

The present value of the liability component of the convertible loans at issuance was \$192,625, using a discount rate of 20%, which is the estimated interest rate the Company would pay on a similar debt instrument without a conversion option or warrants. The residual value of \$8,375 was allocated to the equity component.

Transaction costs were allocated between the liability and equity components on a relative fair value basis, resulting in \$30,163 of transaction costs being allocated to the liability component and \$1,311 being allocated to the equity component.

The discount on the convertible loans totaling \$38,538 will be amortized over the term of the convertible loans using the effective interest rate method.

During the nine months ended June 30, 2024, the Company recorded accretion expense of \$17,941. As at June 30, 2024, the carrying value of the convertible loans is \$180,403 and the Company has recognized accrued interest of \$16,393, which is included in accounts payable and accrued liabilities.

### ***Related Party Transactions***

- (a) During the nine months ended June 30, 2024, the Company incurred management fees of \$67,500 (2023 – \$67,500) to the President and former Chief Executive Officer ("CEO") of the Company. As at June 30, 2024, the Company owed the President \$16,500 (September 30, 2023 – \$nil) which is unsecured, non-interest bearing, and due on demand.
- (b) During the nine months ended June 30, 2024, the Company incurred management fees of \$76,500 (2023 – \$76,500), and mineral exploration costs of \$13,500 (2023 – \$nil) to a company controlled by the CEO of the Company. As at June 30, 2024, the Company owed the CEO of the Company \$3,655 (September 30, 2023 – \$1,332) which is unsecured, non-interest bearing, and due on demand.
- (c) During the nine months ended June 30, 2024, the Company incurred management fees of \$9,000 (2023 – \$9,000) to the Chief Financial Officer ("CFO") of the Company.
- (d) During the nine months ended June 30, 2024, the Company incurred management fees of \$18,000 (2023 – \$12,000) to three directors of the Company. As at June 30, 2024, the Company owed the directors a total of \$6,000 (September 30, 2023 – \$4,000) which is unsecured, non-interest bearing, and due on demand.

## **Nine Mile Metals Ltd.**

### Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

- (e) During the nine months ended June 30, 2024, the Company incurred mineral exploration costs of \$72,000 (2023 – \$72,000) to companies controlled by a director of the Company. As at June 30, 2024, the Company owed the director \$3,450 (September 30, 2023 – \$3,762) which is unsecured, non-interest bearing, and due on demand.
- (f) During the nine months ended June 30, 2024, the Company incurred an aggregate of \$nil (2023 – \$9,100) in mineral exploration costs and \$50,000 (2023 – \$nil) as mineral property option payments to a company controlled by directors of the Company.
- (g) During the nine months ended June 30, 2024, the Company incurred mineral exploration costs of \$72,235 (2023 – \$58,143) to a company controlled by the sons of the CEO of the Company. As at June 30, 2024, the Company owed \$4,658 (September 30, 2023 – \$4,226) to a company controlled by the sons of the CEO of the Company which is unsecured, non-interest bearing, and due on demand.
- (h) During the nine months ended June 30, 2024, the Company incurred consulting fees of \$63,000 (2023 – \$63,000) to a company controlled by the son of the CFO of the Company. As at June 30, 2024, the Company owed \$15,197 (September 30, 2023 – \$2,418) to the son of the CFO of the Company which is unsecured, non-interest bearing, and due on demand.
- (i) During the nine months ended June 30, 2024, the Company incurred rent of \$nil (2023 – \$10,500) to a company with common officers and directors.

### ***Material Accounting Policies***

The same accounting policies and methods of computation were followed in the preparation of the Condensed Interim Financial Statements as were followed in the preparation and as described in Note 2 of the annual audited consolidated financial statements as at and for the year ended September 30, 2023.

### ***Fair Value Measurements and Risks***

#### (a) Fair Values

Fair value measurements are classified using a fair value hierarchy that reflects the significance of inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 – valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 – valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of the Company's financial instruments, which include cash, accounts payable and accrued liabilities, due to related parties, and convertible loans approximate their carrying values due to the relatively short-term maturity of these instruments.

#### (b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit

## Nine Mile Metals Ltd.

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

quality financial institutions. The carrying amount of financial assets represents the maximum credit exposure.

### (c) Foreign Exchange Rate Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's functional and reporting currency is the Canadian dollar. The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. As at June 30, 2024 and 2023, the Company is not exposed to significant foreign exchange rate risk.

### (d) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk as it does not have any liabilities with variable rates.

### (e) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting financial obligations due to shortage of funds. The Company manages liquidity risk by maintaining sufficient cash balances and adjusting its operating budget and expenditure. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term and other specific obligations.

The following amounts are the contractual maturities of financial liabilities as at June 30, 2024:

	Total	Within 1 year	Within 2-5 years
	\$	\$	\$
Accounts payable and accrued liabilities	126,720	126,720	–
Due to related parties	49,460	49,460	–
Convertible loans	180,403	180,403	–
<b>Total</b>	<b>356,583</b>	<b>356,583</b>	<b>–</b>

### (f) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

## Management's Report on Internal Controls Over Financial Reporting

In connection with National Instrument 52-109 – Certification of Disclosure in Issuer's Annual and Interim Filings ("NI 52-109") adopted by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company are required to file a Venture Issuer Basic Certificate with respect to the financial information contained in the Condensed Interim Financial Statements and the audited annual consolidated financial statements and respective accompanying MD&A. The Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal controls over financial reporting as defined in NI 52-109.

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

### **Off-Balance-Sheet Arrangements**

As of the date of this MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the financial performance or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

### **Capital Management**

The Company's objectives when managing capital are to raise the necessary equity financing to fund its projects and to manage the equity funds raised which best optimizes its programs and the interests of its equity shareholders at an acceptable risk. In the management of capital, the Company includes the components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may raise additional equity funds. The Company is not subject to externally imposed capital requirements.

### **Significant Events After June 30, 2024**

Subsequent to the nine months ended June 30, 2024, a total of 8,861,105 share purchase warrants with exercise prices ranging between \$0.28 per share and \$0.38 per share expired unexercised.

Subsequent to the nine months ended June 30, 2024, a total of 500,000 stock options with exercise price of \$0.25 per share expired unexercised.

### **Share Capital**

The Company had 78,998,265 common shares issued and outstanding at June 30, 2024 (September 30, 2023 – 63,843,387).

#### ***Share Issuances during the nine months ended June 30, 2024***

- (a) On December 19, 2023, the Company issued 5,625,000 flow-through units at \$0.20 per unit for gross proceeds of \$1,125,000. Each unit consisted of one flow-through common share and one-half of one share purchase warrant. Each whole share purchase warrant is exercisable at \$0.23 per common share expiring on December 19, 2025. In connection with the private placement, the Company incurred finder's fees of \$84,000, share issuance costs of \$5,619 and issued 420,000 finder's warrants with a fair value of \$34,711. Each finder's warrant is exercisable at \$0.23 per common share expiring on December 19, 2025. A value of \$256,381 and \$81,118 was attributed to the share purchase warrants and flow-through share premium liability, respectively, in connection with the financing.
- (b) On February 9, 2024, the Company issued 200,000 common shares with a fair value of \$13,000 pursuant to a mineral property option agreement to acquire 100% of the rights, title, and interest in the Wedge Project
- (c) On March 1, 2024, the Company issued 2,920,634 units at \$0.06 per unit for gross proceeds of \$175,237. Each unit consists of one common share and one common share purchase warrant. Each share purchase warrant is exercisable at \$0.10 per common share expiring on March 1, 2026. In connection with the private placement, the Company incurred finder's fee of \$2,400, share issuance

## Nine Mile Metals Ltd.

### Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

costs of \$4,390 and issued 40,000 finder's warrants with a fair value of \$2,222. Each finder's warrant is exercisable at \$0.10 per common share expiring on March 1, 2026. A value of \$nil was attributed to the share purchase warrants in connection with the financing.

- (d) On March 1, 2024, the Company issued 333,334 with a fair value of \$46,852, of which \$28,333 was attributable to the common shares and \$18,519 was attributable to the share purchase warrants, in consideration for an option payment of \$20,000 originally due on February 9, 2024 pursuant to a mineral property option agreement to acquire 100% of the rights, title, and interest in the Wedge Project. Each unit consists of one common share and one common share purchase warrant. Each share purchase warrant is exercisable at \$0.10 per common share for expiring on March 1, 2026.
- (e) On April 17, 2024, the Company issued 4,090,910 flow-through ("FT") units at \$0.11 per FT unit and 585,000 of non-flow-through ("NFT") units at \$0.075 per NFT unit for total proceeds of \$493,875. Each FT unit consists of one FT common share of the Company and one-half of one common share purchase warrant exercisable at \$0.13 per common share for a period of 2 years. Each NFT unit consists of one common share of the Company and one-half of one common share purchase warrant exercisable at \$0.11 per common share for a period of 2 years. In connection with the private placement, the Company incurred finder's fees of \$36,000 and issued 327,272 finder's warrants with fair value of \$14,563, exercisable at \$0.13 per warrant for a period of 2 years.
- (f) On April 18, 2024, the Company issued a total of 733,334 common shares with a fair value of \$58,667 pursuant to a mineral property option agreement to acquire mineral claims in the California Lake, Canoe Landing Lake East, and Nine Mile Brook areas. Of the 733,334 common shares issued, 400,000 common shares pertained to the second anniversary payment of \$30,000 originally due on April 25, 2024, whereby the optionors agreed to receive an equivalent number of common shares at a deemed price of \$0.075 per common share.
- (g) On May 2, 2024, the Company issued a total of 666,666 common shares with a fair value of \$60,000 pursuant to a mineral property option agreement to acquire mineral claims in the California Lake, Canoe Landing Lake East, and Nine Mile Brook areas. Of the 666,666 common shares issued, 333,334 common shares pertained to the final \$30,000 cash payment originally due on April 25, 2025, whereby the optionors agreed to receive an equivalent number of common shares at a deemed price of \$0.09 per common share.

### **Warrants**

The following table summarizes the continuity of the Company's share purchase warrants:

	Number of warrants	Weighted average exercise price \$
Balance, September 30, 2023	14,387,651	0.29
Issued	9,295,696	0.15
Balance, June 30, 2024	23,683,347	0.24

### **Outstanding Share Information**

The Company has unlimited number of common shares without par value. As at the date of this MD&A, the Company has the following issued and outstanding:

- 78,998,264 common shares.
- Warrants to purchase 14,822,242 common shares.
- Stock options to purchase 6,650,000 common shares.
- Convertible Loans into 2,010,000 common shares and 2,010,000 warrants (which, if exercised would be an additional 2,010,000 common shares).

### **Business Risks**

#### (a) Limited Operating History

The Company has no history of operations and is considered an early-stage exploration company. As such, the Company is subject to many risks common to such enterprises, including undercapitalization, cash shortages, limitations with respect to personnel, financial and other resources and lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investment. There is no guarantee that economic quantities of mineral reserves will be discovered on any properties optioned by the Company in the near future or at all. If the Company does not generate revenue, it will be unable to sustain its operations, in which case it will become insolvent and investors will lose their investment in the Company.

#### (b) Negative Cash Flow from Operations

The Company has had negative cash flow from operations since its inception. The Company has a

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis

Nine Months Ended June 30, 2024

---

limited history of operations, and no history of earnings, cash flow or profitability. The Company's assets are in the early exploration stage only. Nine Mile has no source of operating cash flow and no assurance that additional funding will be available for further exploration and development of the exploration and evaluation assets when required. No assurance can be given that the Company will ever attain positive cash flow or profitability.

### **(c) Substantial Capital Expenditures Required**

Substantial expenditures are required to establish ore reserves through drilling, to develop metallurgical processes to extract metal from the ore and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that the funds required for development can be obtained on a timely basis. The discovery of mineral deposits is dependent upon a number of factors. The commercial viability of a mineral deposit once discovered is also dependent upon a number of factors, some of which relate to particular attributes of the deposit, such as size, grade and proximity to infrastructure, and some of which are more general factors such as metal prices and government regulations, including environmental protection. Most of these factors are beyond the Company's control. In addition, because of these risks, there is no certainty that the expenditures made on the exploration and evaluation assets will result in the discovery of commercial quantities of ore.

### **(d) Management Experience**

The Company's success is currently largely dependent on the performance of its directors and officers. Members of the Company's management team have experience in resource exploration and business. The experience of these individuals is a factor that will contribute to the Company's success or failure. Nine Mile will initially be relying on our board members, as well as independent consultants, for certain aspects of our business. The amount of time and expertise expended on the Company's affairs by each member of the management team will vary according to the Company's needs. Nine Mile does not intend to acquire any key man insurance policies and there is, therefore, a risk that the death or departure of any member of management, the board, or any key consultant, could have a material adverse effect on the Company's future. Investors who are not prepared to rely on the Company's management team should not invest in its securities.

### **(e) Speculative Nature of Mineral Exploration**

Resource exploration is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Company may be affected by numerous factors which are beyond Nine Mile's control and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, the combination of which factors may result in the

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

Company not receiving an adequate return of investment capital. There is no assurance that Nine Mile's mineral exploration activities will result in any discoveries of commercial bodies of ore. The long-term profitability of the Company's operations will in part be directly related to the costs and success of its exploration programs, which may be affected by a number of factors. Substantial expenditures are required to establish reserves through drilling and to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis.

### **(f) Fluctuating Mineral Prices**

The mining industry is heavily dependent upon the market price of the metals or minerals being mined or explored for. There is no assurance that, even if commercial quantities of mineral resources are discovered, a profitable market will exist for their sale. There can be no assurance that mineral prices will be such that the Company's properties can be mined at a profit. Factors beyond Nine Mile's control may affect the marketability of any minerals discovered. The prices of base and precious metals have experienced volatile price movements over short periods of time and are affected by numerous factors beyond the Company's control. There is no assurance that, a profitable market may exist for the sale of products. Factors beyond Nine Mile's control may affect the marketability of minerals or concentrates produced, including quality issues, impurities, deleterious elements, government regulations, royalties, allowable production and regulations regarding the importing and exporting of minerals, the effect of which cannot be accurately predicted.

Fluctuations in base and precious metal prices may adversely affect the Company's financial performance and results of operations. Further, if the market price of applicable metals falls or remains depressed, we may experience losses or asset write-downs and may curtail or suspend some or all of the Company's exploration, development and mining activities.

### **(g) Exploration and Development**

The Company's exploration and evaluation assets are in the early stages of exploration. Mineral exploration and development involves a high degree of risk which even a combination of experience, knowledge and careful evaluation may not be able to mitigate. The vast majority of properties which are explored are not ultimately developed into producing mines. There is no assurance that the Company's mineral exploration and development activities will result in any discoveries of sustainable commercial bodies of ore. The long-term profitability of the Company's operations will be in part directly related to the cost and success of its exploration programs, which may be affected by a number of factors.

### **(h) Operating Hazards and Risks**

Mineral exploration and development involves risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to hazards and risks normally incidental to exploration, development and production of minerals, any of which could result in work stoppages, damage to or

## **Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

destruction of property, loss of life and environmental damage. The nature of these risks is such that liabilities might exceed any insurance policy limits (if any), the liabilities and hazards might not be insurable or the Company might not elect to insure itself against such liabilities due to high premium costs or other factors. Such liabilities may have a materially adverse effect on the Company's financial condition.

### (i) Competition

The mining industry is intensely and increasingly competitive, and Nine Mile competes for exploration and exploitation properties with many companies possessing greater financial resources and technical facilities than the Company does. Competition in the mining business could adversely affect the Company's ability to acquire suitable producing properties or prospects for mineral exploration in the future.

### (j) Environmental Risks and Other Regulatory Requirements

Nine Mile's current or future operations, including exploration or development activities and commencement of production on exploration and evaluation assets, require permits from various federal and local governmental authorities, and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs and delays in production and other schedules as a result of the need to comply with the applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for the construction of mining facilities and conduct of mining operations will be obtainable on reasonable terms or that such laws and regulations would not have an adverse effect on any mining project which Nine Mile might undertake.

Failure to comply with applicable environmental and other laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations.

Amendments to current environmental and other laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could increase Nine Mile's costs and remove the Company's ability to acquire permits for current or future operations. These factors would have material negative impacts on the Company's ability to continue operations.

### (k) Industry Regulation

Nine Mile currently operate its business in a regulated industry. There can be no assurances that the Company may not be negatively affected by changes in the applicable legislation, or by any decisions or orders of any governmental or administrative body or applicable regulatory authority.

**Nine Mile Metals Ltd.**

Management's Discussion and Analysis  
Nine Months Ended June 30, 2024

---

**(l) Uninsured or Uninsurable Risks**

Nine Mile may become subject to liability for cave-ins, pollution or other hazards against which the Company cannot insure or against which the Company may elect not to insure because of high premium costs or for other reasons. The payment of any such liabilities would reduce or eliminate the funds available for exploration and mining activities. Payments of liabilities for which the Company do not carry insurance may have a material adverse effect on the Company's financial condition.

**Additional Information**

Additional information relating to Nine Mile may be found on the Company's website at [www.ninemilemetals.com](http://www.ninemilemetals.com) and the Company's profile on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).
