1. Nature and continuance of operations

Kraken Energy Corp. (the "Company" or "Kraken Energy") was incorporated on July 4, 2011, under the Canada Business Corporations Act. On May 12, 2022, the Company changed its name from Ivor Exploration Inc. to Kraken Energy Corp. The Company is a resource exploration company that is acquiring and exploring mineral properties. The Company's common shares began trading on Canadian Securities Exchange under the new stock symbol "UUSA" on May 11, 2022. Previously, the trading symbol was "IVOR".

The head office, principal address, records office, and registered address of the Company are located at Suite 918 – 1030 West Georgia Street, Vancouver, British Columbia V6E 2Y3.

These condensed consolidated interim financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. At December 31, 2022, the Company had not yet achieved profitable operations and had accumulated losses of \$15,634,680 (June 30, 2022 – \$12,321,116) since its inception. Management estimates that the Company has sufficient financial resources to carry out currently planned exploration and operations through the next twelve months.

Although the Company has been successful in the past in obtaining financing, there can be no assurances that the Company will continue to obtain the additional financial resources necessary and/or achieve profitability or positive cash flows from its future operations. If the Company is unable to obtain adequate additional financing, the Company would be required to curtail its planned operations, and exploration and development activities. These condensed consolidated interim financial statements do not give effect to adjustments, which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the condensed consolidated interim financial statements.

2. Significant accounting policies and basis of preparation

These condensed consolidated interim financial statements were authorized for issue by the directors of the Company on February 28, 2023.

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee. The accounting policies and methods of computation applied by the Company in these condensed consolidated interim financial statements are the same as those applied in the Company's annual audited consolidated financial statements as at and for the year ended June 30, 2022.

The condensed consolidated interim financial statements do not include all of the information and note disclosures required for full annual consolidated financial statements and should be read in conjunction with the Company's annual audited consolidated financial statements as at and for the year ended June 30, 2022.

2. Significant accounting policies and basis of preparation (continued)

Basis of presentation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for some financial instruments classified in accordance with measurements standards under IFRS. These condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise specified. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Consolidation

The condensed consolidated interim financial statements include the accounts of the Company and its controlled subsidiaries. Details of controlled subsidiaries are as follows:

On March 23, 2022, the Company incorporated a private company, Kraken Nevada, a 100% owned subsidiary incorporated in Nevada, United States.

On May 27, 2022, the Company acquired all of the shares of Panerai and its 100% owned subsidiary, Panerai USA (Note 4).

On April 8, 2022, the Company acquired all of the shares of 1330038 B.C. Ltd. ("133 B.C."), a private company (Note 4). On November 14, 2022, the Company completed a voluntary dissolution of 133 B.C.

Use of estimates and judgements

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Although management uses historical experience and its best knowledge of the amount, events, or actions to form the basis for judgments and estimates, actual results may differ from these estimates. The most significant accounts that require estimates as the basis for determining the stated amounts include valuation of share-based payments and recognition of deferred income tax amounts and provision for restoration, rehabilitation and environmental costs.

Foreign currency translation

The functional currency of the Company is measured using the currency of the primary economic environment in which the Company operates. The functional currency of Kraken, 133 B.C., and Panerai are Canadian dollars and the functional currency of Kraken Nevada and Panerai USA are US dollars. These condensed consolidated interim financial statements are presented in Canadian dollars.

Exploration and evaluation assets

All expenditures on exploration and evaluation activities, excluding costs of acquiring prospective properties and exploration rights, are recorded as exploration expenses until it has been established that a mineral property is commercially viable and technically feasible.

During the year ended June 30, 2022, the Company changed its accounting policy of capitalizing exploration and evaluation expenditures. The Company believes that expensing such costs as incurred provides more reliable and relevant financial information. Previously, the Company capitalized these amounts. The financial statements for the year ended June 30, 2021 were restated to reflect adjustments made as a result of this change in accounting policy.

Upcoming accounting pronouncements

The Company is not aware of any recent accounting pronouncements or upcoming standards expected to have a material impact on the condensed consolidated interim financial statements.

The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets, being mineral properties. The Company invests capital that is surplus to its immediate operational needs in short-term, liquid and highly-rated financial instruments, such as cash and other demand deposits, all held with major financial institutions.

9. Financial instruments

Fair value of financial instruments

The Company has classified fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of inputs used in making the measurements as follows:

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The fair value of cash and cash equivalents, interest receivable, loan advanced to related party, other receivables, accounts payables and accrued liabilities, and loans payable approximates their carrying value due to their short-term maturity.

Financial risk factors

The Company is exposed in varying degrees to a variety of financial instrument-related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. The Company's cash and cash equivalents are held in a large Canadian financial institution. The Company has not experienced nor is exposed to any significant credit losses.
