Management Commentary

Leo Gontmakher, CEO of 4Front, said, "Entering 2020, we have been laser-focused on leaning out and replicating our low-cost cultivation and production model in targeted states. We enter the second half of 2020 with a focused business model, streamlined cost structure and fortified balance sheet that has set the stage for us to accelerate growth across our core markets of Washington, Illinois, Massachusetts, Michigan and California.

Mr. Gontmakher added: "Our strong business momentum leaving the second quarter will be aided by significant tailwinds as we enter the second half of this year. We welcomed the first adult-use sales in Massachusetts at our Georgetown facility on August 12th and anticipate final approvals for adult use sales at our Worcester facility imminently. Our cultivation/processing facility expansions in Massachusetts and Illinois as well as our second Illinois retail location are on-track for end of year completion. We continue to execute on our plans to flip to cash flow positive during the third quarter and have set the stage to exit this year in a position to drive meaningful operating leverage in our business. We are proving that our success in Washington can be replicated in every state in which we operate and are extremely confident in how the company is positioned as we enter this new season."

Note Regarding Non-IFRS Measures, Reconciliation, and Discussion

In this press release, 4Front refers to certain non-IFRS financial measures such as Systemwide Pro Forma Revenue and Adjusted EBITDA. These measures do not have any standardized meaning prescribed by IFRS and may not be comparable to similar measures presented by other issuers. 4Front defines Systemwide Pro Forma Revenue as total revenue plus revenue from entities with which the Company has a management contract, or effectively similar relationship (net of any management fee or effectively similar revenue) but does not consolidate the financial results of per IFRS 10 – Consolidated Financial Statements. 4Front considers this measure to be an appropriate indicator of the growth and scope of the business.

Adjusted EBITDA is defined by the Company as earnings before interest, taxes, depreciation and amortization less share-based compensation expense and one-time charges related to acquisition and financing related costs, excluding fair value adjustments for biological assets. 4Front considers these measures to be an important indicator of the financial strength and performance of our business. The following tables provide a reconciliation of each of the non-IFRS measures to its closest IFRS measure.
