

Alabama State University Selects Draganfly to Provide the Safe School Solution™ Utilizing its Vital Intelligence Technology

Vital Intelligence's Smart Thermal and Vital Sign Screening Detects Potential Symptoms of COVID-19

Los Angeles, CA. September 1, 2020 -- Draganfly Inc. (OTCQB: DFLYF) (CSE: DFLY) (FSE: 3U8) ("Draganfly" or the "Company"), an award-winning, industry-leading manufacturer and systems developer is pleased to announce that Alabama State University ("ASU") has selected Draganfly's Vital Intelligence Smart Thermal Temperature Assessment Stations, Vital Signs Assessment Stations and Social Distancing awareness technologies to be used campus-wide to detect potential symptoms of COVID-19.

Draganfly's Vital Intelligence Smart Thermal Assessment Station and Vital Sign Screening technology provides a quick, non-invasive (contactless) and anonymous measurement of an elevated body temperature and, with voluntary consent, heart rate, respiratory rate and O2 saturation, all from a camera that takes seconds to capture. The Social Distancing Awareness unit ensures compliance with social distancing guidelines.

Alabama State University has agreed to purchase and install 5 Smart Thermal and Vital Sign Assessment units and 5 Social Distancing Awareness units to be stationed across the campus and accessible by its staff, faculty and 4,000-plus students. Individuals who appear to have an elevated temperature could then be screened by a medical professional to confirm the presence of fever.

The Smart Thermal Temperature Assessment Stations, Vital Sign Assessment Stations and Social Distancing units are North American made and owned.

The platform does not register any personal data of the individual being screened. Data provided back to Alabama State University will include the number of individuals screened, number of elevated temperatures and potential cases with elevated vital signs detected and the time it took for each screening. The data will also provide real-time data on the overall health of Alabama State University's community in relation to scans.

"As we enter into a new school year during this pandemic, the safety of our students, faculty and staff is of utmost importance," said Dr. Quinton T. Ross Jr., President, Alabama State University. "We have implemented a number of safety measures as we prepared for the reopening of the campus. The Smart Thermal Temperature Screening Stations are an added layer of protocols that assist us in identifying and mitigating the risk of the spread of COVID-19. Draganfly has provided us with the approved requirements needed to do this effectively. The stations are an essential tool in screening large groups of people in a short period of time."

"Re-opening our schools is imperative," said Sen. Bobby Singleton (D- Greensboro). "We want to implement a safe, accurate and measurable protocol to enable this to happen. With all the fear, uncertainty and loss that COVID-19 has caused, we need to change the landscape of public

education in Alabama. I am confident that the Draganfly Vital intelligence platform, which fits with the Safely Opening Schools (SOS) Program, will help to do just that.”

“We are excited that Alabama State University has chosen Draganfly to implement our Vital Intelligence technology on their campus,” said Cameron Chell, CEO of Draganfly. “A screening protocol before entering their on-campus facilities is an important preventative measure during this pandemic. In addition, providing informative data in relation to the number of faculty, staff and students tested can help to assess the overall health of their facility and help to keep their school safe and open.”

About Alabama State University

Founded in 1867, Alabama State University is a comprehensive, regional institution offering students from across the nation and around the globe a world-class education. ASU’s learning experiences are holistic and are designed to develop intellectual, as well as social, moral, cultural and ethical values. ASU graduates are equipped with the skills, insights, attitudes and practical experiences that will enable them to become well-rounded, contributing citizens, fully qualified to take their places in their chosen professions and in service to humanity.

Over the past 15 years, ASU has experienced tremendous growth, both physically and academically. State-of-the-art academic facilities now grace the 395-acre campus. High-demand programs have been established and cutting-edge research is being conducted by ASU faculty and students. With a focus on a global initiative, the campus has a more diverse population while maintaining its proud heritage as one of the nation’s leading Historically Black College and Universities (HBCUs). We offer the Bachelor of Arts and Bachelor of Science, as well as master’s and educational specialist degrees.

The University also offers the Ph.D. in microbiology, the Ed.D. and the Ph.D. in Educational Leadership, Policy and Law, the Clinical Doctorate in Physical Therapy and the Master of Science in Prosthetics and Orthotics.

Forward-Looking Statements

This release contains certain “forward looking statements” and certain “forward-looking information” as defined under applicable Canadian securities laws. Forward-looking statements and information can generally be identified by the use of forward-looking terminology such as “may”, “will”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “continue”, “plans” or similar terminology. Forward-looking statements and information are based on forecasts of future results, estimates of amounts not yet determinable and assumptions that, while believed by management to be reasonable, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Forward-looking statements include, but are not limited to, statements with respect to the viability and continued use of the Company’s Vital Intelligence Technology and the successful utilization and integration of the technology. Forward-looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of the Company to control or predict, that may cause the Company’s actual results, performance or achievements to be materially different from those expressed or implied thereby, and are developed based on assumptions about such risks, uncertainties and other factors set out here in, including but not limited to: the potential impact of epidemics, pandemics or other public health crises, including the current outbreak of the novel coronavirus known as COVID-19 on the Company’s business, operations and financial condition, the successful integration of technology, the inherent risks involved in the general securities markets; uncertainties relating to the availability and costs of financing needed in the future; the inherent uncertainty of cost estimates and the potential for unexpected costs and expenses, currency fluctuations; regulatory restrictions, liability, competition, loss of key employees and other related risks and uncertainties disclosed under the heading “Risk Factors” in the Company’s most recent filings filed with securities regulators in Canada on the SEDAR website at www.sedar.com. The Company undertakes no obligation to update forward-looking information except as required by applicable law. Such forward-looking information represents managements’ best judgment based on information currently available. No forward-looking statement can be guaranteed and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
