

Alabama State University Selects Draganfly's Varigard Spraying Program to Disinfect All Stadiums

Varigard Spray is the Only Sanitizer That Can Provide a 24-Hour Sequestration and Kill Efficacy Against Pathogens Including COVID-19 in a Single Application

Los Angeles, CA. December 16, 2020 -- Draganfly Inc. (OTCQB: DFLYF) (CSE: DFLY) (FSE: 3U8) ("Draganfly" or the "Company"), an award-winning, industry-leading manufacturer and systems developer, is pleased to announce that Alabama State University ("ASU") will be implementing Draganfly's Varigard pathogen and surface sanitizer at its on-campus stadium and Acadome arena.

Using its patented drone technologies, Draganfly is the exclusive flight services provider of Varigard's pathogen and virus sanitizer.

Varigard is an Alabama based company that specializes in preventing the spread of pathogens using their patented bio-based organic sanitizers. Both their hand sanitizing gel and surface spray have been independently verified to sequester pathogens for extended periods of time thus preventing the pathogens ability to spread. Varigard's sanitizers have been proven to sequester and kill COVID-19, STAPH, MRSA, E Coli, and PNEUMONIA for a minimum of 2+ hours on skin and 24 hours on surfaces. Varigard represents a new age of safe germ defense that faculty, staff, students, and parents have been looking for.

ASU recently installed Draganfly's Smart Vital technology and social distancing units across its campus as part of its COVID-19 protocol to keep faculty, students and staff safe.

Draganfly's Vital Intelligence Smart Vital Assessment Station and Vital Sign Screening technology provides a quick, non-invasive (contactless) and anonymous measurement of an elevated body temperature and, with voluntary consent, heart rate, respiratory rate and O2 saturation, all from a camera that takes seconds to capture. The Social Distancing Awareness unit ensures compliance with social distancing guidelines.

The Smart Vital Assessment and Social Distancing units are North American made and managed.

"We have had great success at incorporating Draganfly's technology and health protocols onto our campus. Our students, faculty and staff are aware of social distancing and are comfortable having their temperatures assessed before entering designated facilities. As we prepare for the spring semester, we want to do all that we can to ensure the safety of the campus," said Dr. Quinton T. Ross Jr., President, ASU. "One of the added layers of protection is to disinfect prominent areas such as the ASU Stadium and the Dunn-Oliver Acadome with Draganfly's Varigard sanitizer."

"Alabama State University has been a true partner utilizing our Smart Vital and social distancing units," said Cameron Chell, CEO of Draganfly. "We are thrilled to continue working with Dr. Ross and his team's amazing vision and leadership in keeping his campus safe by implementing safety protocols including Draganfly's Varigard spraying program."

About Alabama State University

Founded in 1867, ASU is a comprehensive, regional institution offering students from across the nation and around the globe a world-class education. ASU's learning experiences are holistic and are designed to develop intellectual, as well as social, moral, cultural and ethical values. ASU graduates are equipped with the skills, insights, attitudes and practical experiences that will enable them to become well-rounded, contributing citizens, fully qualified to take their places in their chosen professions and in service to humanity.

Over the past 15 years, ASU has experienced tremendous growth, both physically and academically. State-of-the-art academic facilities now grace the 395-acre campus. High-demand programs have been established and cutting-edge research is being conducted by ASU faculty and students. With a focus on a global initiative, the campus has a more diverse population while maintaining its proud heritage as one of the nation's leading Historically Black College and Universities (HBCUs). We offer the Bachelor of Arts and Bachelor of Science, as well as master's and educational specialist degrees.

The University also offers the Ph.D. in microbiology, the Ed.D. and the Ph.D. in Educational Leadership, Policy and Law, the Clinical Doctorate in Physical Therapy and the Master of Science in Prosthetics and Orthotics.

Forward-Looking Statements

This release contains certain "forward looking statements" and certain "forward-looking information" as defined under applicable Canadian securities laws. Forward-looking statements and information can generally be identified by the use of forward-looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans" or similar terminology. Forward-

looking statements and information are based on forecasts of future results, estimates of amounts not yet determinable and assumptions that, while believed by management to be reasonable, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Forward-looking statements include, but are not limited to, statements with respect to the implementation of Draganfly's Varigard pathogen and surface sanitizer. Forward-looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of the Company to control or predict, that may cause the Company's actual results, performance or achievements to be materially different from those expressed or implied thereby, and are developed based on assumptions about such risks, uncertainties and other factors set out here in, including but not limited to: the potential impact of epidemics, pandemics or other public health crises, including the current outbreak of the novel coronavirus known as COVID-19 on the Company's business, operations and financial condition, the successful integration of technology, the inherent risks involved in the general securities markets; uncertainties relating to the availability and costs of financing needed in the future; the inherent uncertainty of cost estimates and the potential for unexpected costs and expenses, currency fluctuations; regulatory restrictions, liability, competition, loss of key employees and other related risks and uncertainties disclosed under the heading "Risk Factors" in the Company's most recent filings filed with securities regulators in Canada on the SEDAR website at www.sedar.com. The Company undertakes no obligation to update forward-looking information except as required by applicable law. Such forward-looking information represents managements' best judgment based on information currently available. No forward-looking statement can be guaranteed and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
