The “Swiss Army Knife” of drones is capable of drop and winch-down systems to transport up to 22lb of payload. It performs extremely well in light rain and snow.

Cameron Chell, President and CEO of Draganfly, will participate in a panel discussion about how drone technology is redefining the way the conflict in Ukraine is being managed and how UAVs have proven to be a more stealthy and cost-effective alternative to conventional aircraft for global military and emergency operations moving forward.

Mr. Chell will join experts from across the commercial industry, including Mark McKinnon, Partner at Fox Rothschild, Kenji Sugahara, CEO of Drone Service Providers Alliance, and Mary-Caitlin Ray, Counsel at Crowell & Moring LLP, in room 401/402 on Monday, May 8th, at 1:40 PM MST.
