NEWS RELEASE

JNC RESOURCES COLLECTS GRAB SAMPLES FROM THE IMPERIAL PROPERTY IN NEVADA

August 19, 2020

Trading Symbol: JNC (CSE)

VANCOUVER, BC - JNC Resources Inc. (CSE: JNC) ("JNC" or the "Company") is pleased to announce that the Company has recently visited the Imperial Property to collect grab samples that will be sent off for validation and testing. The Imperial Property is located 18 miles northeast of Goldfield, Nevada in the Silver Peak District within the Walker Lane. Silver Peak is the second largest gold producing area in Esmeralda County after Goldfield.

6 samples were taken in total, 5 of which were in the immediate area of the upcoming drill program. An additional sample was obtained further to the northeast in an area of previous drilling with good surface alteration. Four of the samples will represent sampling of the main Imperial vein, while two were of surface alteration that represents different, but related veins. All of the samples taken were heavily limonite stained and silicified, with much of the material also being brecciated. Quartz after calcite replacement textures were also noted in the sample material.

"We are very excited about the collection of our grab samples at the Imperial Property and look forward to the results," stated CEO, Mike Mulberry. "With the overall excitement around gold, historical results of the area and the exploration potential of the Imperial Property it is becoming a very exciting time for us. We are permit ready and look forward to receiving the results of our preliminary sampling as we move towards our drilling program," continued Mr. Mulberry.

Qualified Persons

Warren Robb, P.Geo., is the qualified person for the Company as defined in National Instrument 43-101 and has reviewed the technical information presented within this news release.

About JNC Resources Inc.

JNC is a North American-based junior venture mineral exploration company with a goal to develop under-explored properties and benefit from deal flow generated by strategic partnerships and growth opportunities. Currently the Company is developing its 100% optioned Triple 9 Project in South Central British Columbia. The Triple 9 Project is a gold property with a new discovery of high levels of base metals, located 20 km from the town of Sicamous. JNC also has an option agreement with Great Basin Resources to acquire 100% control and interest in the Imperial Project in Nevada. The Imperial Property is located in Esmeralda County, Nevada, which has been a prolific mining area in the state. The Property is in close proximity to the town of Goldfields, where gold production occurred in the early part of the 20th century.
