

JNC RESOURCES ANNOUNCES UPCOMING DRILL PROGRAM AT THE IMPERIAL PROJECT IN NEVADA

VANCOUVER, BC - October 13, 2020 – (CSE: JNC) (OTC: JNCCF) – JNC Resources Inc. (“JNC” or the “Company”) is pleased to announce the upcoming drill plans at our Imperial Project in Nevada. The Company has secured qualified contractors to commence as soon as a suitable drill rig is available, in addition, all Covid-19 protocols will be established and implemented.

The Company has targeted three to four reverse circulation (RC) holes that will define gold-silver-rich veins and will further explore structures parallel to those already discovered. These holes will not exceed 600 feet in depth unless a hole ends in altered rock, in which case drilling will continue until in barren material. Minimal earthwork will be undertaken to construct roads, pads, and sumps for the holes.

Mike Mulberry, CEO of JNC Resources stated “We are excited to begin the drilling for the Imperial Project, given the current demand for gold exploration. We anticipate all holes will intersect the main imperial vein, with at least one hole testing the down-dropped portion of the vein in deeper, more favorable host rock than historic drilling. Given the strategic location of our Imperial Property and being within the peripheral of Goldfields, we are highly encouraged about the prospect of our project and the potential for some significant discoveries.”

About JNC Resources Inc.

JNC is a North American-based junior venture mineral exploration company with a goal to develop under-explored properties and benefit from deal flow generated by strategic partnerships and growth opportunities. Currently the Company is developing its 100% optioned Triple 9 Project in South Central British Columbia. The Triple 9 Project is a gold property with a new discovery of high levels of base metals, located 20 km from the town of Sicamous. JNC also has an option agreement with Great Basin Resources to acquire 100% control and interest in the Imperial Project in Nevada. The Imperial Property is located in Esmeralda County, Nevada, which has been a prolific mining area in the state. The Property is in close proximity to the town of Goldfields, where gold production occurred in the early part of the 20th century.
