# US Critical Metals Corp.

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022  
(Expressed in Canadian dollars - Unaudited)

## 1. Nature and continuance of operations

### *Nature of operations*

Holly Street Capital Ltd. (the “Company” or “Holly”) was incorporated under the British Columbia Corporations Act on July 31, 2019. The Company is classified as a Capital Pool Company (“CPC”) as defined in the TSX Venture Exchange (the “Exchange”) Policy 2.4. The principal business of the Company is the identification and evaluation of a Qualifying Transaction (“QT”) and once identified or evaluated, to negotiate an acquisition or participation in a business subject to receipt of shareholder approval, if required, and acceptance by regulatory authorities.

On December 17, 2019, the Company completed its Initial Public Offering (“IPO”) on the Exchange raising gross proceeds of \$250,000 through the issuance of 2,500,000 common shares at \$0.10 per share.

On April 12, 2022, the Company completed a QT pursuant to the terms of a business combination agreement and changed its name to US Critical Metals Corp. (see Note 8 for details).

The head office, principal address and registered office of the Company are located at 550 Burrard Street, Suite 2300, Vancouver, British Columbia, V6C 2B5.

### *Going concern*

These consolidated financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The Company has not generated revenues from operations and will need to identify other sources of financing to remain as a going concern. As of March 31, 2022, the Company has a working capital surplus of \$169,239 (September 30, 2021 – \$243,808). The Company has incurred losses from inception. During the period ended March 31, 2022, the Company recorded a loss of \$74,569 (2021 – \$45,068) and has a deficit of \$308,783 (September 30, 2021 – \$234,214). These circumstances have resulted in a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. These consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis was not appropriate for these consolidated financial statements, then adjustments would be necessary to the carrying values of assets and liabilities.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, have adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or results of operations at this time.

## 2. Basis of presentation and significant accounting policies

### **Basis of Presentation**

#### *Statement of Compliance*

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Accounting Standards (“IAS”) 34, ‘*Interim Financial Reporting*’ using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee.

#### *Basis of Presentation*

These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for any financial assets and liabilities held at fair value, as explained in the accounting policies set out below. These consolidated financial statements are presented in Canadian Dollars, which is also the Company and its subsidiary’s functional currency.

## US Critical Metals Corp.

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### 2. Basis of presentation and significant accounting policies (continued)

#### *Statement of Consolidation*

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiary 2812239 Ontario Inc. During the year ended September 30, 2021, the Company incorporated a new, wholly owned subsidiary in Canada. There were no transactions in the subsidiary. All intercompany transactions and balances have been eliminated on consolidation.

#### **Significant accounting policies**

##### *Financial instruments*

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

##### *Classification*

The Company classifies its financial instruments in the following categories: at fair value through profit and loss ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI"), or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company's business model for managing the financial assets and the contractual terms of the cash flows. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or if the Company has opted to measure them at FVTPL. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives), or the Company has opted to measure them at FVTPL.

##### *Measurement*

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss. Financial assets are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Subsequent measurement of financial assets depends on their classification. There are three measurement categories under which the Company classifies its debt instruments:

- **Amortized cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included as finance income using the effective interest rate method.
- **FVTOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains and losses, interest revenue, and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains (losses). Interest income from these financial assets is included as finance income using the effective interest rate method.
- **FVTPL:** Assets that do not meet the criteria for amortized cost or FVTOCI are measured at FVTPL. A gain or loss on an investment that is subsequently measured at FVTPL is recognized in profit or loss and presented net as revenue in the consolidated statement of loss and comprehensive loss in the period in which it arises.

## US Critical Metals Corp.

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### 2. Basis of presentation and significant accounting policies (continued)

#### *Financial instruments (continued)*

At present, the Company's cash is measured as FVTPL, and its accounts payable and accrued liabilities are measured at amortized cost.

#### *Impairment of Financial Assets at Amortized Cost*

The Company recognizes a loss allowance for expected credit losses ("ECL") on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime ECL of the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the 12-month ECL. The Company shall recognize in the consolidated statements of loss, as an impairment gain or loss, the amount of ECL (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

#### *Derecognition*

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in profit or loss.

#### *Loss per share*

Basic loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. The computation of diluted loss per share assumes the conversion, exercise or contingent issuance of securities only when such conversion, exercise or issuance would have a dilutive effect on the loss per share. For this purpose, the treasury stock method is used for the assumed proceeds upon the exercise of stock options and warrants that are used to purchase common shares at the average market price during the year. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

#### *Income Taxes*

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used are those that are substantively enacted by the end of the reporting date.

Deferred income tax is calculated based on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting. The change in the net deferred income tax asset or liability is included in income except for deferred income tax relating to equity items which is recognized directly in equity. The income tax effects of differences in the periods when revenue and expenses are recognized, in accordance with Company's accounting practices, and the periods they are recognized for income tax purposes are reflected as deferred income tax assets or liabilities. Deferred income tax assets and liabilities are measured using the substantively enacted statutory income tax rates which are expected to apply to taxable income in the years in which the assets are realized or the liabilities settled. A valuation allowance is recorded against any deferred tax asset if it is not probable to be utilized against future taxable profit.

Deferred income tax assets and liabilities are offset only if a legally enforceable right exists to offset current tax assets against liabilities and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on the same taxable entity and are intended to be settled on a net basis.

The determination of current and deferred taxes requires interpretations of tax legislation, estimates of expected timing of reversal of deferred tax assets and liabilities, and estimates of future earnings.

## **US Critical Metals Corp.**

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### **2. Basis of presentation and significant accounting policies (continued)**

#### ***Related party transactions***

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

#### ***Share capital and share issuance costs***

The Company's common shares and any future offerings of share warrants and options are classified as equity instruments. Costs directly attributable to the raising of capital are charged against the related share capital. Costs related to shares not yet issued are recorded as deferred share issuance costs. These costs are deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related share capital or charged to profit or loss if the shares are not issued.

#### ***Share-based compensation***

The Company grants stock options to buy common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes or provides services similar to those performed by an employee. The Company accounts for share-based payments using the fair value method. Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured and are recorded at the date the goods or services are received.

The fair value of the share-based compensation awards is determined at the date of grant using the Black-Scholes option pricing model ("Black-Scholes"). The fair value of the award is charged to profit or loss, unless they are considered to be share issuance costs in which case they are booked as a reduction to share capital, and credited to reserves rateably over the vesting period, after adjusting for the number of awards that are expected to vest. Expenses recognized for forfeited awards are reversed. For awards that are cancelled, any expense not yet recognized is recognized immediately in profit or loss. Where the terms of an equity-settled award are modified, as a minimum an expense is recognized as if the terms had not been modified over the original vesting period. In addition, an expense is recognized for any modification which increases the total fair value of the share-based payment arrangement as measured at the date of modification, over the remainder of the vesting period.

#### ***Warrants***

Warrants issued to agents in connection with a financing are recorded at fair value using Black-Scholes and charged as share issuance costs associated with the offering with an offsetting credit to share-based payment and warrants reserve.

Proceeds of the exercise of these warrants are credited to share capital together with the corresponding amount, if any, of the original warrant charge included in share-based payment and warrants reserve.

#### ***New accounting standards interpretations issued and applicable but not yet adopted***

IAS 1 – Presentation of Financial Statements ("IAS 1"), has been amended to clarify how to classify debt and other liabilities as either current or non-current. The amendment to IAS 1 is effective for the years beginning on or after January 1, 2023, with early application permitted. The Company is currently assessing the impact of this amendment.

## **US Critical Metals Corp.**

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### **3. Significant Accounting Estimates and Judgments**

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect amounts reported in the consolidated financial statements and accompanying notes. Estimates are reviewed on an ongoing basis and are based on historical experience and other facts and circumstances. Revisions to estimates and the resulting effects on the carrying amounts of the Company's assets and liabilities are accounted for prospectively. Management believes the estimates and assumptions used in these consolidated financial statements are reasonable; however, actual results could differ from those estimates and could have a material impact on future results of the Company's consolidated financial statements.

The Company's significant accounting judgments and estimates have been applied in these consolidated financial statements:

#### ***Judgments***

The evaluation of the Company's ability to continue as a going concern.

#### ***Estimations***

The measurement of deferred income tax assets and liabilities; and

The inputs used in accounting for share-based compensation expense and for agents' options recorded in share capital and reserves.

### **4. Share Capital and Reserves**

#### ***Authorized***

The Company is authorized to issue an unlimited number of common shares without par value.

#### ***Share issuances***

*For the period ended March 31, 2022*

There were no share issuances during the period ended March 31, 2022.

#### ***Stock option plan***

The Company has a stock option plan whereby the Company may grant options with a maximum term of ten years, for up to 10% of the Company's issued and outstanding common shares, to directors, officers, employees and consultants at exercise prices to be determined by the market value on the date of grant. The number of common shares reserved for issuance to any individual director or officer will not exceed 5% of the issued and outstanding common shares, and the number of common shares reserved for issuance to all technical consultants will not exceed 2% of the issued and outstanding common shares. Incentive stock options issued have an immediate vesting term, unless vesting is imposed by the Company's Board of Directors.

#### ***Agents' Options***

Concurrent with the completion of the IPO (Note 1), the Company granted 250,000 agent options exercisable at a price of \$0.10 per share expiring two years from the listing date of December 19, 2019. The fair value of these agents' options granted was determined to be \$13,000 using Black-Scholes and the following inputs: exercise price of \$0.10, stock price of \$0.10, volatility of 100%, risk free rate of 1%, and a term of two years. The fair market value of these agents' options has been included as a reduction against share capital. These agent options expired on December 19, 2021 unexercised.

## US Critical Metals Corp.

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### 4. Share Capital and Reserves (continued)

#### *Stock option plan (continued)*

##### *Stock Options*

Concurrent with the completion of the IPO (Note 1), the Company granted 450,000 stock options to officers and directors exercisable at a price of \$0.10 per share expiring ten years from the listing date of December 19, 2019. The fair value of these stock options granted was determined to be \$40,000 using Black-Scholes and the following inputs: exercise price of \$0.10, stock price of \$0.10, volatility of 100%, risk free rate of 1% and a term of ten years. The fair market value of these stock options has been included as in share-based compensation. The remaining life of the stock options as at March 31, 2022 is 5.87 years.

Due to the resignation of a director on July 22, 2021, 112,500 of the 450,000 stock options will expire on July 22, 2022, as per the Company's stock option plan.

##### *Escrow Shares*

On July 31, 2019, the Company issued 2,000,000 common shares to the founders of the Company at a price of \$0.05 per share for gross proceeds of \$100,000. During the year ended September 30, 2021, the Company adopted the new CPC rules, whereby the escrow term for founder's shares was reduced to 18 months and are no longer contingently returnable. Thus, they have been included in the weighted average number of shares outstanding as at March 31, 2022 and September 30, 2021.

### 5. Financial Instruments

As at March 31, 2022, the Company's financial instruments consist of cash and accounts payable and accrued liabilities. The Company believes that the carrying values of cash, and accounts payable and accrued liabilities approximate their fair values because of their nature and relatively short maturity dates or durations.

The Company's cash is considered to be Level 1 within the fair value hierarchy (as discussed below).

- Level 1 – fair values based on unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – fair values based on inputs that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – fair values based on inputs for the asset or liability that are not based on observable market data.

The Company's policy for determining when a transfer occurs between levels in the fair value hierarchy is to assess the impact at the date of the event or the change in circumstances that could result in a transfer. There were no transfers between the levels during the period ended March 31, 2022.

The risk exposure arising from these financial instruments is summarized as follows:

#### (a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a loss for the other party by failing to discharge an obligation. As the Company's cash is held in one bank, there is a concentration of credit risk. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. As of March 31, 2022, the Company's exposure to credit risk is minimal.

#### (b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company's ability to continue to meet its liabilities when due, beyond the current cash balance, is dependent on future support of shareholders through equity offerings. There is no assurance of continued access to significant equity funding.

## **US Critical Metals Corp.**

(Formerly Holly Street Capital Ltd.)

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX MONTHS ENDED MARCH 31, 2022

(Expressed in Canadian dollars - Unaudited)

### **5. Financial Instruments (continued)**

#### (c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or value of its holdings or financial instruments. The Company's activities have only been transacted in Canadian dollars since incorporation; in addition, the Company carries no interest-bearing debt. As such, the Company has minimal market risks facing it at present.

### **6. Capital Management**

The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the identification and evaluation of a QT and continue as a going concern. The Company considers capital to be all accounts in equity. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. Additional funds may be required to finance the Company's QT. In accordance with Policy 2.4 of the Exchange, the proceeds raised from the sale of securities may only be used to identify and evaluate assets or businesses, and obtain shareholder approval for a QT, with the exception that up to the lesser of 30% of the gross proceeds realized by the Company in respect of the sale of its securities, may be used for purposes other than such identification and evaluation of businesses or assets. These restrictions apply until completion of a QT by the Company as defined under Policy 2.4 of the Exchange.

### **7. Related Party Transactions**

Key management personnel are the persons having authority and responsibility for planning, directing and controlling the activities of the Company either directly or indirectly, including entities controlled by such persons. The key management personnel include the Company's executive management team and the Board of Directors.

During the period ended March 31, 2022, the Company recognized \$Nil (2021 - \$NIL) in share-based compensation.

### **8. Subsequent Event**

On January 7, 2022, the Company entered into a share exchange agreement with US Critical Metals Corp. ("USCM") (the "Definitive Agreement"). The Definitive Agreement is in respect of a business combination transaction pursuant to which the Company will acquire all of the issued and outstanding securities of USCM (the "Transaction").

On April 12, 2022, the Transaction closed which resulted in a reverse takeover transaction. Prior to completion of the Transaction, the Company changed its name from "Holly Street Capital Ltd." to "US Critical Metals Corp." and consolidated its share capital on the basis of 1 post-consolidation common share in the capital of USCM for every 1.5 pre-consolidation common shares held.

The Transaction was completed by way of a share exchange under the laws of the Province of British Columbia, whereby the Company acquired all of the issued and outstanding securities of US Critical Holdings Corp. ("USCH") in exchange for securities of USCM. In connection with the Transaction, the Company concurrently completed a non-brokered unit financing (the "Concurrent Financing") of 17,142,858 units (each, a "Unit") at a price of \$0.35 per Unit for aggregate gross proceeds of \$6,000,000.30. Each Unit consists of one common share and one common share purchase warrant of the Company (each, a "Warrant"). Each Warrant entitles the holder thereof to acquire one common share at an exercise price of \$0.50 for a period of 24 months following the listing of the common shares on the Exchange, subject to adjustment and acceleration.

On April 19, 2022, USCM's common shares commenced trading on the Exchange under the ticker symbol ("USCM").
