New Leaf Ventures, Inc.
Notes to the Condensed Consolidated Interim Financial Statements
For the Three-Month Periods Ended March 31, 2021 and 2020
(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

New Leaf Ventures Inc. (the “Company”) was incorporated under the Business Corporations Act (British Columbia) on June 4, 2018. On September 13, 2019, the Company entered into the Share Purchase Agreement (“Acquisition Transaction”) to purchase New Leaf USA Inc. (“New Leaf USA”) and its subsidiaries (collectively the “New Leaf USA Entities”). As a result of the completion of the Acquisition Transaction on April 30, 2020, the New Leaf USA Entities are now the core business of the Company, and through which the Company will provide consulting services, real property, intellectual property and equipment for lease and enhanced ancillary services to New Leaf Enterprises, Inc., a Washington-based Tier 3 Producer/Processor focused on industrial-scale agronomy, processing, packaging, marketing and distributing cannabis and cannabis related products (the “License Holder”). The License Holder is considered a related party; refer to Note 5 for details on the Acquisition Transaction and Note 10 for details on the related party nature and transactions with the License Holder during the three-month periods ended March 31, 2021.

The Company’s head office, principal address and registered address and records office is 2200 HSBC Building, 885 West Georgia Street, Vancouver, British Columbia, V6C 3E8, Canada. The Company is listed on the Canadian Securities Exchange (the “CSE”) under the ticker symbol “NLV.CN” and on the OTCQB, part of the OTC Markets Group, under the ticker “NLVVF”.

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) on a going concern basis, which contemplates the realization of assets and discharge liabilities at their carrying values in the ordinary course of operations for the foreseeable future rather than through the process of forced liquidation.

During the three months period ended March 31, 2021, the Company generated a net loss of \$1,742,427 (March 31, 2020 - \$204,217) and negative cash flows from operating activities of \$941,625 (March 31, 2020 – negative cash flows of \$9,035). As at March 31, 2021, the Company has an accumulated deficit of \$9,513,534 (December 31, 2020 – deficit of \$7,807,458) and a working capital of \$210,146 (December 31, 2020 – working capital deficiency \$1,276,856). As a result, the Company may not have sufficient capital to fund its current planned operations during the twelve-month period subsequent to March 31, 2021.

These unaudited condensed consolidated interim financial statements do not include any adjustments to the classification and amounts of assets and liabilities that may be required should the Company be unable to continue as a going concern. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. The Company’s continuing operations as intended are dependent upon its ability to identify, evaluate and negotiate the acquisition of, participation in or interest in new assets or business opportunities, and its ability to attain profitable operations and generate funds therefrom, and raise equity capital or obtain the necessary financing sufficient to meet current and future obligations. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. Although the Company has been successful at raising funds in the past through the issuance of securities, it is uncertain whether it will be successful in doing so in the future

The COVID-19 pandemic continues to cause significant financial market and social dislocation. The situation is dynamic with various cities and countries around the world responding in different ways to address the outbreak. While the Company has experienced the impact of the COVID-19 outbreak on its operations, it has continued to operate during the current pandemic. The Company will continue to monitor developments of the pandemic and continuously assess its potential further impact on its operations to prevent any

disruptions. The Company has put in place multiple contingency plans to ensure its supply chain and general operations can be maintained with minimal disruption throughout the crisis. In the event of prolonged continuation of the pandemic, it is not clear what the potential impact may be on the Company's business, financial position and financial performance.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

Basis of presentation and statement of compliance

The unaudited condensed consolidated interim financial statements ("interim financial statements") of the Company as at and for the three months period ended March 31, 2021, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board, applicable to the preparation of interim financial statements as set out in International Accounting Standard 34 Interim Financial Reporting ("IAS 34").

The Company has consistently applied the same accounting policies throughout all periods presented. These interim financial statements do not include all the disclosures required for a complete set of IFRS financial statements. Accordingly, they should be read in conjunction with the last audited consolidated annual financial statements and notes thereto for the year ended December 31, 2020 ("annual financial statements"), which are available on SEDAR at www.sedar.com. Selected explanatory notes are included in the interim financial statements to explain events and transactions that are significant to an understanding of the changes in the Company's financial position and performance since the last annual financial statements.

These interim financial statements were authorized for issue by the Audit Committee, on behalf of the Board of Directors, on May 31, 2021.

These interim financial statements include the accounts of the Company and its subsidiaries with intercompany balances and transactions eliminated upon consolidation. The entities contained in the interim financial statements are as follows:

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE, CONTINUED

Use of Judgements, Estimates and Assumptions

The preparation of these interim financial statements in accordance with IAS 34 requires management to use judgement and make estimates and assumptions that affect the application of accounting policies, the reported amounts of assets and liabilities at the date of the interim financial statements, and the reported amounts of revenue and expenses during the reporting periods. The judgements, estimates and associated assumptions are based on historical experience and other factors that management considers to be relevant and are subject to uncertainty. Judgements, estimates and underlying assumptions are reviewed on an ongoing basis, and revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Actual results could differ from these estimates due to changes in interest rates, foreign exchange rates, inflation, and economic conditions. The areas of significant judgement and estimation were identified in the Company's annual consolidated financial statements for the year ended December 31, 2020, except for judgements pertaining to the adoption of new accounting policies effective on January 1, 2021 (note 3).

3. SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies applied to these condensed consolidated interim financial statements are the same as those applied to the Company's audited consolidated financial statements for the year ended December 31, 2020.

4. SEGMENT REPORTING

The Company operates in one operating segment. For the purpose of segment reporting, the Company's Chief Executive Officer ("CEO") is the Chief Operating Decision Maker. The determination of the Company's operating segment is based on its organizational structure and how the information is reported to CEO on a regular basis. During the three month period ended March 31, 2021, all the revenues from the Company were generated through intellectual property licensing, equipment leasing, and provision of management services to a single customer, the License Holder, who is located in the United States.

The Company's non-current assets by country are as follows:

5. ACQUISITION OF NEW LEAF USA, INC.

On April 30, 2020, the Company completed their previously announced acquisition of New Leaf USA, Inc. and all of its wholly-owned subsidiaries. In consideration for the acquisition, the Company issued the following:

- Issued 9,000,000 shares; and
- Issued 4,000,000 performance warrants (“Performance Warrants”).

Each Performance Warrant entitles the holder to purchase one common share of the Company at the price of \$0.02 per common share for a period of three years, and will vest and become exercisable as follows:

- 2,000,000 Performance Warrants will vest and become exercisable if the Company or New Leaf Enterprises, Inc. (the “License Holder”) achieves at least \$5,000,000 in annual gross revenue; and
- 2,000,000 Performance Warrants will vest and become exercisable the Company or License Holder achieves at least \$7,500,000 in annual gross revenue.

In addition, New Leaf USA entered into employment agreements, pursuant to which Robert Colwell is appointed to act as Chief Executive Officer of New Leaf USA, and Boris Gorodnitsky is appointed to act as President of New Leaf USA, in each case, for a period of three years following the closing of the Acquisition Transaction, and pursuant to which the Company issued 1,829,338 common shares to each of Boris Gorodnitsky and Robert Colwell. The following table shows the final allocation of the purchase price to assets acquired and liabilities assumed, based on estimates of fair value, including a summary of the identifiable classes of consideration transferred, and amounts by category of assets acquired and liabilities assumed at the acquisition date:

5. ACQUISITION OF NEW LEAF USA, INC. CONTINUED

- (i) The warrants were valued using the Black-Scholes Option Pricing model (note 12) and adjusted for the probability that revenue targets would be met over the vesting period. The Performance Warrants were accounted for under IFRS 9 Financial Instruments as a derivative financial liability as the instrument had an option to convert the Performance Warrants into shares of the Company for no consideration and which would result in a variable number of the Company's shares being issued on exercise (see note 12). The Performance Warrants were subsequently re-measured at March 31, 2021 with a resulting loss on re-measurement of \$409,485 recognized in profit and loss for the period ended March 31, 2021.
- (ii) There were no deferred tax liabilities identified as part of the Acquisition Transaction. Deferred tax assets were identified but were not recognized as its recoverability was not considered probable.
- (iii) During the year ended December 31, 2020 the Company performed an annual impairment test of goodwill and determine that the carrying value of the Company's total net assets exceeded the Company's value-in-use as at December 31, 2020. Subsequently, for the year ended December 31, 2020, the Company recorded an impairment loss of \$3,780,891 to reduce goodwill to \$nil. Refer to Note 8 of the Company's audited financial statements for the year ended December 31, 2020

The intangibles recognized on the acquisition relate to existing contracts at acquisition date for equipment leasing and intellectual property licensing, as well as management services. New Leaf USA leases intellectual property ("IP agreement"), including, brand names and know-how specific to operations and management of cannabis production and processing. The License Holder pays an annual exclusivity fee of USD\$100,000 and the greater of \$1.07 per each unit sold or a quarterly license fee of USD\$150,000 for a period of six months, expiring October 1, 2020. New Leaf USA also leases cannabis production and processing equipment for a monthly leasing fee of USD\$6,000 per month. Both the equipment and IP agreement were extended by the License Holder for another six months on October 1, 2020.

New Leaf USA provides various management services to the License Holder including office administration, human resource and staffing, marketing, and IT. For the provision of these services the License Holder pays a monthly services fee of USD\$100,000 a month. The management service agreement has a term of six months but automatically renews for an additional six months for up to four additional six-month renewal terms (from effective date August 1, 2019) unless sooner terminated. At the time of acquisition, the service agreement had three remaining six-month renewal terms available.

The goodwill recognized from the acquisition is attributable to synergies expected from integrating New Leaf USA into the Company's existing business. Another component of goodwill includes non-separable intangibles assets acquired, including know-how specific to operations and management of cannabis production and processing. The goodwill acquired is not deductible for tax purposes. Due to the timing of the acquisition, the fair values assigned to intangible assets, goodwill and the deferred income tax liability were measured on a provisional basis and have been revised by the Company as additional information was received.

Revenue of \$2,050,990 and net loss of \$262,216 from the acquired operations are included in the consolidated statement of loss and comprehensive loss from the date of acquisition to December 31, 2020.

- (i) On June 19, 2020, the Company decided to amend the terms (the "Amendment") of an aggregate of 12,000,000 outstanding common share purchase warrants previously issued by the Company. The 12,000,000 warrants were previously exercisable to acquire common shares of the Company at a price of \$0.05 until February 26, 2021. Under the Amendment, the exercise price of the Warrants was increased to \$0.25. There was no increase to the incremental fair value of the warrants as a result of these modifications. As compensation to allow for the repricing of the share purchase warrants, the Company issued 12,000,000 additional share purchase warrants with expiry date of June 19, 2022 and an exercise price of \$0.40. There was no increase to the value of the warrant reserve for the compensatory warrants as it was offset by a corresponding increase to warrant issuance costs resulting in a \$nil impact on the Company's equity position.
- (ii) As part of the acquisition transaction (note 5), the Company issued 4,000,000 Performance Warrants. The Performance Warrants are subject to vesting conditions based on revenue targets for either the Company or the License Holder. Each Performance Warrant entitles the holder to purchase one Class A common share of the Company at an exercise price of \$0.02. Assuming vesting conditions are met, the holder can elect to exercise the Performance Warrants, on a net settlement basis based on the fair market value of the shares on the exercise date

The Performance Warrants were assessed to be a derivative liability in accordance with IFRS 9 and were initially measured at fair value of \$352,800 using the Black-Scholes option pricing model. Subsequent to initial recognition, the Performance Warrants were re-measured at fair value using the following input assumptions:

Equity incentive plan

The Company implemented an Equity Incentive Plan (the “EIP”) which provides for the grant to eligible directors and employees (including officers) of share options and Restricted Share Rights (“RSR”). The EIP also provides for the grant to eligible directors of Deferred Share Units (“DSU”) which the directors are entitled to redeem for 90 days following retirement or termination from the Board of the Company (the “Board”). The aggregate number of Common Shares that may be subject to issuance under the Equity Incentive Plan, together with any other securities-based compensation arrangements of the Corporation, shall not exceed 15% of the Corporation’s issued and outstanding share capital from time to time.

Options are exercisable for a period of five years from the date the Option is granted or such greater or lesser period as determined by the Board. Options may be earlier terminated in the event of death or termination of employment or appointment. Vesting of Options is determined by the Board. Failing a specific vesting determination by the Board, Options automatically become exercisable incrementally over a period of eighteen months from the date of grant, as to: (i) 25% of the total number of shares under Option immediately upon the date of grant; and (ii) at each six-month interval thereafter, an additional 25% of the total number of shares under Option such that after the 18th month of the Option period, 100% of the Option will be exercisable. The right to exercise an Option may be accelerated in the event a takeover bid in respect of the Common Shares is made.

13. SHARE-BASED COMPENSATION CONTINUED

Concurrent with the granting of the RSR, the Board shall determine the period of time during which the RSR is not vested and the holder of such RSR remains ineligible to receive Common Shares. Such period of time may be reduced or eliminated from time to time for any reason as determined by the Board. Once the RSR vests, the RSR is automatically settled through the issuance of an equivalent number of underlying Common Shares as RSRs held.

DSUs are redeemable during the period commencing on the business day immediately following the date such director ceases to hold any directorship and ending on the 90th day following such date by providing written notice of redemption to the Corporation. Upon redemption, the director shall be entitled to receive the number of Common Shares equal to the number of DSUs in the director's account. If the director ceases to hold office during a year where DSUs have been granted in advance of being earned and they have not held office for the entire year, the director will only be entitled to a pro-rated issuance of shares

The Company's recorded share-based compensation for the three-month periods ended March 31, 2021 and 2020 comprised the following:

(a) Share options

The EIP authorizes the Board to grant options to eligible directors and employees (including officers). The number of options, the exercise price per option, the vesting period and any other terms and conditions of options granted from time to time pursuant to the EIP, are determined by the Board at the time of the grant, subject to the defined parameters of the EIP. Movements in the number of stock options outstanding and their related weighted average exercise prices are as follows:

13. SHARE-BASED COMPENSATION CONTINUED

The Company fair valued the options using the Black-Scholes option pricing model with the following inputs:

	Three-month period ended March 31, 2021	Year ended December 31, 2020
Share price at grant date (\$)	\$ 0.28	\$ 0.34

Expected dividend yield	0%	0%
Risk-free interest rate	0.15%	0.27%
Fair value per option	\$0.24	\$0.30

The risk-free interest rate is based on the yield of a risk-free Canadian government security with a maturity equal to the expected life of the options from the date of the grant. The assumption of expected volatility is based on the average historical volatility of comparable companies for the period immediately preceding the option grant. The Company does not anticipate paying any cash dividends in the foreseeable future and, therefore, uses an expected dividend yield of zero in the option-pricing model.

Total fair value of stock options granted during the three-month period ended March 31, 2021 was \$209,125 (three-month period ended March 31, 2020 - \$Nil).

14. FINANCIAL INSTRUMENTS

Fair value

The carrying values of cash, accrued interest receivable, accounts receivable, accounts payable and accrued liabilities and due to/from related parties approximate their fair values due to the relatively short period to maturity of those financial instruments. The fair value of notes payable and lease receivables approximate their carrying value as they were recently fair valued as part of the acquisition purchase price allocation using a market rate of interest. Derivative warrant liability is carried at fair value and revalued at each reporting date.

Financial instruments recorded at fair value on the statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Change in assumptions could significantly affect the estimates.

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and accounts receivable. Receivables are all due from the License Holder. Management feels there is minimal risk of non-collection since License Holder has been paying its obligations to the Company. The Company does not have significant credit risk with respect to customers. The Company's maximum credit risk exposure is equivalent to the carrying value of these instruments.

Liquidity risk

The Company manages liquidity risk by maintaining adequate cash balances to meet short and long-term business requirements. As at March 31, 2021, all of the Company's financial liabilities, except for its warrant derivative liability and notes payable, have maturities less than one year. As at March 31, 2021, the Company had cash of \$1,849,930 (December 31, 2020 – \$136,553) and a working capital of \$210,146 (December 31, 2020 – working capital deficiency of \$914,908). Refer to note 1 for further discussion regarding going concern.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company holds cash in accounts with variable interest rates, and currently does not carry variable interest-bearing debt. It is management's opinion that the Company is not exposed to significant interest rate risk.
