

**SILVER DOLLAR**  
RESOURCES

## **FORM 51-102F3 MATERIAL CHANGE REPORT**

### **Item 1: Name and Address of Company**

Silver Dollar Resources Inc. (the “Company” or “Silver Dollar”)  
Suite 416, 179 - 2945 Jacklin Road  
Victoria, BC, V9B 6J9

### **Item 2: Date of Material Change**

August 6, 2024

### **Item 3: News Release**

A news release was issued August 7, 2024 at Vancouver, British Columbia and was disseminated by Newsfile.

### **Item 4: Summary of Material Change**

The Company has completed the acquisition of the assets related to the Ranger-Page Project located in Shoshone County, Idaho, USA, which includes the option rights under the Government Gulch Option and Joint Venture Agreement and the Page Mine Mineral Rights Lease and Option Agreement.

### **Item 5: Full Description of Material Change**

Further to the news release of [July 15, 2024](#), the Company has completed the acquisition of the assets related to the Ranger-Page Project located in Shoshone County, Idaho, USA ([Figure 1](#)), which includes the option rights under the Government Gulch Option and Joint Venture Agreement and the Page Mine Mineral Rights Lease and Option Agreement.

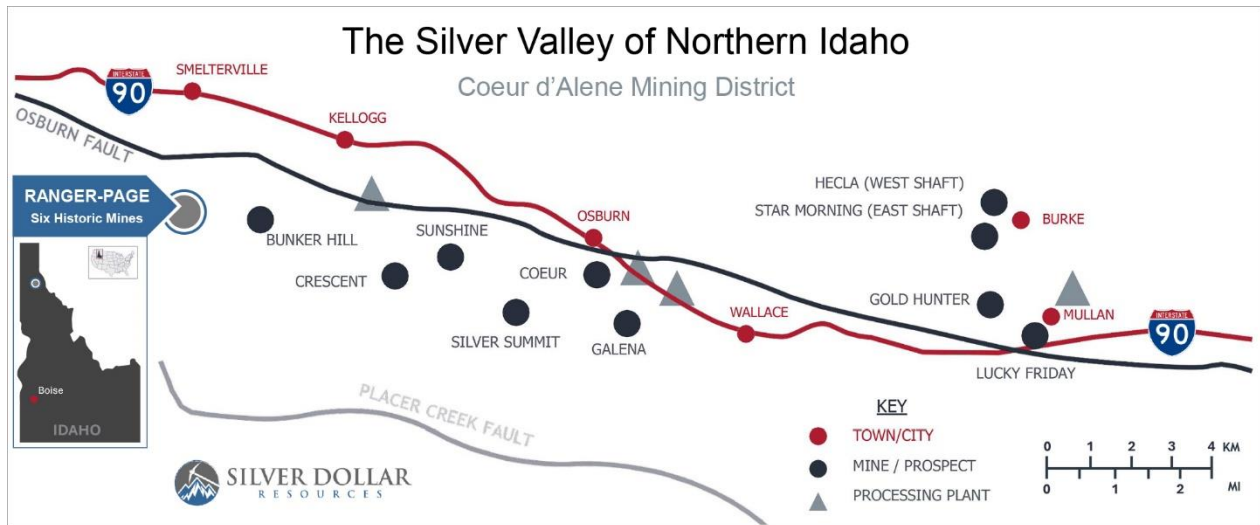

Figure 1: Location of the Ranger-Page Project in the Coeur d'Alene Mining District

### Project Highlights:

- A drill-ready project in a world-class silver district where over 90 mines have operated since the first major lead-zinc-silver discovery was staked in 1884.
- Ideally situated approximately two kilometres (km) south of Interstate 90 Freeway and the town of Smelterville, the Project features power, water, year-round access to local infrastructure and a workforce skilled in exploration and mining.
- The Project comprises two contiguous patented lode claim groups – Government Gulch (403 acres) and Page Mine (802 acres) – that consolidate the western end of the Silver Valley mining corridor under a single operator for the first time.
- The land package covers six historic mines with the option to acquire ownership of the Project's mineral rights, which are not currently subject to any royalties.
- Surface access rights are in place to allow Silver Dollar to conduct exploration activities, and the permitting process is with the State of Idaho, no federal permitting required.
- Multiple exploration targets developed over the last two years and are ready to drill after the systematic use of modern exploration techniques for the first time.
- Primary target areas are up-plunge from where historical underground mining ended, near surface, and targets have been defined laterally away from the footprint of the past producing mines.
- Additional drill targets not associated with the historical mining areas have also been identified.
- The Project borders the Bunker Hill mine that is on track to restart mining in Q4 2024.

#### A Structurally Active Area:

The ore deposits of the Coeur d'Alene Mining District are hosted in structural features characterized by a complex network of faults and folds resulting from tectonic forces of diverse ages and movements. The district occurs at the intersection of the west-northwest-trending Osburn Fault and a north-trending anticlinal (upfolded) structure called the Noxon Arch.

The 27 km displacement of the Osburn Fault runs through the district's most productive silver belts and along the northern boundary of the Ranger-Page Project. A network of seven secondary faults transverse the Project area, with the north-south trending Page Fault (that hosts the Page Mine) at the western end and the Crown Point Fault at the eastern end intersecting the Osburn Fault. Additional faults include the east-west trending Curlew, 96, Buckeye and Spring faults and the southeast-northwest trending Government Gulch Fault (Figures 2 and 3).

#### Exploration Potential:

Major discoveries in the Coeur d'Alene Mining District tend to result from deep exploration down plunge of near-surface mineral showings. Narrow veins near surface can blossom into multimillion-ounce ore bodies at depth, where vein structures intersect favourable rock formations. Consequently, the district remains an active region for exploration and mining even 140 years after Ag-Pb-Zn deposits were first discovered along the South Fork of the Coeur d'Alene River.

Consistent with the exploration history of the district, the Ranger-Page Project exhibits similar discovery potential near surface and at depth. This assessment is based on the comprehensive underground mining database that provides strong evidence of high-grade mineralization continuing at depth and along strike from where historical underground mining ended, and the

latest exploration results from geophysical and geochemical surveys, extensive trenching and sampling, and geological mapping that have identified new target areas with potential near-surface mineralization.<sup>1</sup>

For additional information on the Ranger-Page Project see the news release of [July 15, 2024](#).

**Transaction Summary:**

The vendors assigned the assets to Silver Dollar’s wholly owned subsidiary for cash consideration of \$300,000 and the issuance of 6,000,000 common shares in the capital of Silver Dollar at a deemed price of \$0.30 per share for aggregate consideration of \$2,100,000. The shares are subject to a statutory four-month hold period and contractual escrow in accordance with the following release schedule:

Release Date	Release from Contractual Escrow
August 6, 2024	1,000,000 shares
February 6, 2025	1,250,000 shares
August 6, 2025	1,250,000 shares
February 6, 2026	1,250,000 shares
August 6, 2026	1,250,000 shares

The Company also paid finders’ fees totaling \$30,000 and 600,000 shares in respect of the acquisition. The finders’ shares are subject to a statutory four-month hold period.

Mike Kilbourne, P.Geo., an independent Qualified Person (QP) as defined in NI 43-101, has reviewed and approved the technical contents herein on behalf of the Company. The QP and the Company have not completed sufficient work to verify the information on the Ranger-Page Project, particularly regarding historical exploration, resources and production, neighbouring companies and government geological work.
