

ZeU Gaming's First Product Completed for Game Operator Play Moon & Expected to go Live This Month

-FOR IMMEDIATE RELEASE-

Montréal, November 11, 2021 – ZeU Technologies, Inc. (CSE: ZEU) (OTC: ZEUCF) is pleased to announce that it was notified earlier today that a first online gaming company had completed production testing of one of its games developed in partnership with KamPay.

The dice game will be operated by MJ Global, owner of the PlayMoon.io website. Players will be able to play the game using KamPay token. Token transactions will be automated for payouts and fees, according to the JV agreement between the two companies, after a short live testing period following the soft launch.

Play Moon is expected to launch many new games from ZeU in the coming months. ZeU's management expects that everything will be in place to launch ZeU's "Mad Candle" game before the end of this year. The Company is also working on bet syndication and buy-outs that could be deployed later in 2022, allowing players with smaller bets to participate as a group in very large game pots.

Each game will be soft-launched to test different technologies developed by ZeU, some for which the Company has filed patent applications in different jurisdictions worldwide.

The Company expects to be able to demonstrate its peer-to-peer gaming platform that allows players and stakeholders to participate in the revenue sharing of the platform by staking gaming tokens, hence owning a share of the casino or the lottery, after a legal review is completed by its license holding partners.

ON BEHALF OF THE BOARD OF DIRECTORS
