

PRESS RELEASE

CSE: MOC

MOSAIC BEGINS DRILLING ON 113 NORTH

September 9, 2022 - Montreal, Quebec – Mosaic Minerals Corporation (CSE: MOC) (“Mosaic” or the “Company”) announces that it has started the drilling campaign of a minimum of 1,000 meters on the 113 North property. The company's management wants to test the possible continuity of an ultramafic associated with the Fortin/Ducros showing of Québec Nickel, located approximately 300 meters south of the property boundary

A magnetic anomaly trending NNO-SSE seems associated with this showing. This, according to MERN data and results obtained by Québec Nickel ([see press release dated 06-13-2022](#)), would contain interesting Ni, Cu, Pt, Pd and Au values.

A prospecting campaign on the northern part of the 113 North property was also launched in the last few days (see attached map). The objective is to collect as many samples as possible to learn more about this part of the property.

The 113 North project is located in the southeastern part of the Abitibi greenstone belt and is comprised of 59 claims totalling 3,010 ha within a 6-to-12-kilometer-wide band made up of volcano-sedimentary rocks located between the granodiorite-tonalite batholiths of Josselin and Montgay. The volcanic rocks of this group exhibit felsic, intermediate, and mafic compositions and are intersected by dunite, gabbro and diorite dykes. Iron formations (sulphides and oxides) and clastic sedimentary rocks, such as greywackes and shales, are also present.

The technical content of this press release has been reviewed and approved by Mr. Gilles Laverdière, P.Geo., an independent consulting geologist and a Qualified Person as defined in NI 43-101.

About Mosaic Minerals Corporation

Mosaic Minerals Corp. is a Canadian mining exploration company listed on the Canadian Securities Exchange (CSE: MOC) focusing on the exploration of strategic minerals in the territory of the province of Quebec.

This release contains certain “forward-looking information” under applicable Canadian securities laws concerning the Arrangement. Forward-looking information reflects the Company’s current internal expectations or beliefs and is based on information currently available to the Company. In some cases, forward-looking information can be identified by terminology such as “may”, “will”, “should”, “expect”, “intend”, “plan”, “anticipate”, “believe”, “estimate”, “projects”, “potential”, “scheduled”, “forecast”, “budget” or the negative of those terms or other comparable terminology. Assumptions upon which such forward-looking information is based includes, among others, that the conditions to closing of the Arrangement will be satisfied and that the Arrangement will be completed on the terms set out in the definitive agreement. Many of these assumptions are based on factors and events that are not within the control of the Company, and there is no assurance they will prove to be correct or accurate. Risk factors that could cause actual results to differ materially from those predicted herein include, without limitation: that the remaining conditions to the Arrangement will not be satisfied; that the business prospects and opportunities of the Company will not proceed as anticipated; changes in the global prices for gold or certain other commodities (such as diesel, aluminum and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, financing and interest rates; mining tax regimes; ability to successfully integrate acquired assets; legislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development; contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. The Canadian Securities Exchange does not accept responsibility for the adequacy or accuracy of this release.
