SASSY RESOURCES CHANGING NAME TO “SASSY GOLD” RENEWED FOCUS ON ESKAY CAMP FOREMORE PROJECT

VANCOUVER, British Columbia, July 4, 2022 – Sassy Resources Corporation (“Sassy” or the “Company”) (CSE: SASY) (FSE: 4E7) (OTCQB: SSYRF) is pleased to provide the following corporate update as the Company mobilizes crews to its 100%-owned Foremore Project in Northwest B.C.’s prolific Eskay Camp to commence drilling at the Westmore Gold Discovery.

Name Change

Over the coming weeks, Sassy Resources Corp. will change its name to “**Sassy Gold Corp.**” to better reflect the Company’s renewed focus on its flagship Foremore high-grade gold project. Sassy’s trading symbols on the CSE, OTCQB and Frankfurt stock exchanges will remain the same, and there will be no changes to the Company’s capital structure.

“The rebranding of Sassy Resources to Sassy Gold is a natural step given the growing significance of Foremore and our direct exploration opportunity within one of the world’s premier gold camps,” stated Mr. Mark Scott, Sassy CEO. “Foremore provides exciting and immediate upside potential for shareholders while our long-term value proposition has never been better with our significant equity stake in the Newfoundland Gold Rush (Gander Gold and Galloper Gold) and our investment in MAX Power Mining.”

Sassy’s new website will be unveiled shortly in conjunction with the name change. For now, investors can visit SassyResources.com.

Strategic Financing

Sassy has arranged a hard dollar private placement of up to \$3.2 million driven by several new strategic investors in Canada and Europe. The financing comprises up to 16,410,256 shares at 19.5 cents per share with no warrants. It is expected to be fully subscribed and will close on or about July 8, 2022, subject to final approval by the CSE. Funds will be used for exploration at Foremore and general corporate purposes.

“We’re delighted at securing new investors to add to an already strong retail following as we enter an exciting new period in the young history of Sassy,” stated Mark Scott. “We have carefully managed our share structure over the past two years, allowing us to take advantage of a special opportunity like we have now to ignite our business and market efforts at the right time in the gold cycle.”

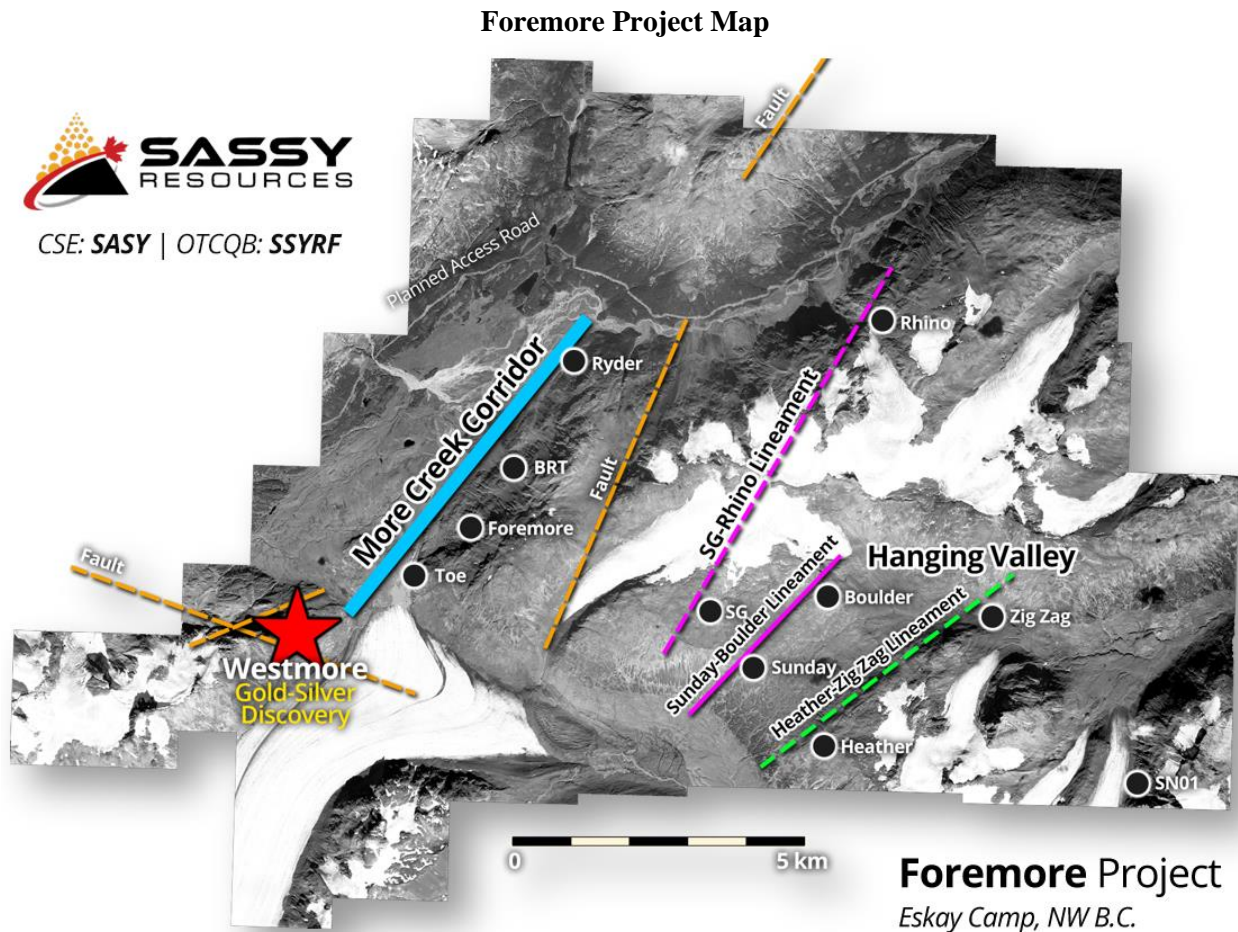

Foremore Drilling

Drilling at Foremore will commence during the second half of July and will initially focus on the **4 Amigos Vein** where four of the last five drill holes intersected visible gold including **86.4 g/t Au** and **41.6 g/t Ag** over 0.7 m within a core length of 1.4 m grading **43.2 g/t Au** and **20.8 g/t Ag** starting just 8.7 meters downhole in WM21-015 (refer to March 3, 2022 news release).

4 Amigos is one of multiple vein structures at Westmore carrying high-grade gold.

Gold occurs in quartz veins within the Westmore intrusive and surrounding volcanic rock, elevating the potential of this exciting new target displaying classic Eskay Camp signatures.

Mineralization at Westmore extends to a depth of at least 400 meters and remains open in multiple directions.
