1. Nature of operations and going concern

Madison Metals Inc. ("Madison Metals" or the "Company") is a company incorporated under the provisions of the British Columbia Business Corporations Act on October 11, 2019 in order to complete the Plan of Arrangement (as defined in note 3). The Plan of Arrangement was completed on February 27, 2020.

The Company is a reporting British Columbia registered corporation that was set up receive the Madison Mine Project from Broadway Gold Mining Ltd. ("Broadway"). The shares of the Company are not listed or posted for trading on any stock exchange. Its registered and head office is located at 82 Richmond Street East, 4th Floor, Toronto, Ontario, M5C 1P1.

On June 26, 2020, the Company sold the Madison Mine Project to American Pacific Mining Corp. ("APM").

These unaudited condensed interim consolidated financial statements were prepared on a going concern basis of presentation, which assumes that the Company will continue operations for the foreseeable future and be able to realize the carrying value of its assets and discharge its liabilities and commitments in the normal course of business.

As at August 31, 2021, the Company had not yet achieved profitable operations and expects to incur further losses in the development of its business, all of which constitutes a material uncertainty which casts significant doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to raise future equity financing to fund its operations and advance the development of its business.

These unaudited condensed interim consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. These adjustments could be material. Management is actively pursuing funding options, being financing and alternative funding options, required to meet the Company's requirements on an ongoing basis. To meet the challenges of the current climate in the financial markets, the Company is minimizing its expenditures.

In March 2020, the COVID-19 outbreak was declared a global pandemic by the World Health Organization. The situation is dynamic and the ultimate duration and magnitude of the impact on the economy, capital markets and the Company's financial position cannot be reasonably estimated at this time. The Company is monitoring developments and will adapt its business plans accordingly. The actual and threatened spread of COVID-19 globally could adversely impact the Company's ability to carry out its plans and raise capital.

10. Financial risk management

The Company's financial assets consist of marketable securities. The Company has classified it marketable securities as FVTPL.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 inputs that are not based on observable market data.

The following table sets forth the Company's financial assets measured at fair value by levels within the fair value hierarchy:

August 31, 2021	Level 1		Level 2		Level 3		Total	
Marketable securities	\$ 65,250	\$	-	\$	-	\$	65,250	
November 30, 2020	Level 1		Level 2 Level 3		Level 3	Total		
Marketable securities	\$ 748,700	\$	-	\$	106,223	\$	854,923	

The Company is exposed to varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes, inclusive of counterparty limits, controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations when they become due. The Company ensures, as far as reasonably possible, it will have sufficient capital in order to meet short-term business requirements, after taking into account cash flows from operations and the Company's holdings of cash and cash equivalents. The Company believes that these sources will be sufficient to cover the likely short-term cash requirements.

Credit risk

Credit risk is the risk of a loss in a counterparty to a financial instrument that fails to meet its contractual obligations. The Company's exposure to credit risk is limited to its marketable securities. The Company limits its exposure to credit risk by holding its marketable securities in deposits with high credit quality Canadian financial institutions.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to foreign currency risk is minimal.

Notes to Condensed Interim Consolidated Financial Statements Three and Nine Months Ended August 31, 2021 (Expressed in Canadian Dollars) Unaudited

11. Capital management

The Company manages its capital structure and makes adjustment to it based on the funds available to the Company in order to support the operations. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital and cash.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended August 31, 2021.

12. Proposed transaction

On June 30, 2021, the Company entered into a binding letter of intent with 2160083 Ontario Inc.
