The Company is in the business of acquisition and exploration of mineral properties, and is in one operating segment, namely mineral exploration in Mexico.

These unaudited condensed interim financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

On October 1, 2020, the Company's shares started trading on the Canadian Securities Exchange (the "CSE") under the trading symbol PRIZ. On July 27, 2022, the Company commenced trading on the OTCQB ® under the symbol PMOMF. The Company's common shares continue to trade on the CSE under the symbol PRIZ.

The Company has incurred losses since inception, and had a working capital of \$4,051,214 as at March 31, 2023 (December 31, 2022 - \$2,506,981). Continued operations of the Company are dependent on the Company's ability to obtain private and/or public equity financing or to receive continued financial support from its controlling shareholders and other investors. There can be no assurance the Company will be successful in achieving these goals and, accordingly, there is a material uncertainty casting significant doubt about the Company's ability to continue as a going concern.

These unaudited condensed interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern, and these adjustments could be material.

#### 3. Significant accounting policies

The accounting policies followed for the preparation of these unaudited condensed interim financial statements are consistent with those described in the December 31, 2022, annual financial statements, except as noted below.

##### Share appreciation right ("SAR")

Under the long-term incentive plan (the "LTIP"), selected employees are granted SARs where each SAR entitling the recipient to receive a payment in common shares equal to the current market price less the grant price of the SAR as determined by the Board at the time of the grant for each SAR. The fair value is measured at the grant date and recognized over the period during which the SARs vest. The fair value of the SARs granted is measured using the Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense (share-based payments) is adjusted to reflect the actual number of SARs that are expected to vest.

##### Restricted stock unit ("RSU")

Under the LTIP, selected employees are granted RSUs where each RSU has a value equal to one Prismo common share. RSUs are measured at fair value on the grant date. The fair value of RSUs are recognized as a charge to share-based payments as an office and administrative expense over the vesting period with a corresponding increase in equity.
