NEWS RELEASE

EYEFI GROUP TECHNOLOGIES INC. - NEW LISTING ON THE CSE

December 4, 2020 – Toronto, Ontario, Canada. – EYEFI Group Technologies Inc. (CSE: EGTI) (“EYEFI” or the “Company”).

The Company is pleased to announce today the listing of its common shares on the CSE.

Through EYEFI’s innovative range of spatial, cloud, mobile, Industrial Internet of Things (IIoT) sensor and IP licensing products and services, EYEFI is going about fundamentally changing the intelligence gathering and situational awareness capabilities of people, devices, platforms and systems.

The Company’s culture is well-founded on its core mission to innovate and solve real-world problems for customers, particularly those in emergency management and incident response, by adapting EYEFI’s proprietary technology.

EYEFI has contracts with Fujitsu Australia, Telstra Corporation Limited, VicRoads, Melbourne Water, and has deployed its technology within Australia and across several major New Zealand councils, such as Wellington, Dunedin, Clutha, Mackenzie, New Plymouth and Whakatane.

“Our public listing on the CSE is a major accomplishment for the team and shareholders, in creating shareholder value and allowing investors to participate in our continued success. We can now accelerate our product development plans, expand our business partnerships here in Australia, New Zealand, Canada and the United States, and continue our agenda in becoming a leading provider of intelligence gathering and situational awareness technology to government and industry customers,” stated Simon Langdon, CEO and founder, EYEFI Group Technologies Inc.

The current issued share capital of the Company is 23,005,600 fully paid shares. There are 640,000 outstanding options to acquire 640,000 shares at an exercise price of \$0.10 per share for two years from the first day of trading on the CSE.

About EYEFI in detail:

EYEFI is connecting the world's people and devices with the world around them, in real-time and in ways not previously possible.

EYEFI is a software and electronics engineering company that has developed, patented and commercialized an innovative spatial technology; spatial, predictive, approximation and radial convolution (SPARC) and an associated product suite, that turns sensors, cameras and smartphones (fixed, mobile, airborne, portable or handheld) into geo-target co-ordinate acquisition devices.

EYEFI has also developed Industrial Internet of Things (IIoT) sensor hardware and associated cloud software, as a second pillar within its product offering. EYEFI Cloud is a next generation cloud platform that provides a secure and centralized environment where customers can manage their EYEFI product deployments and applications.

EYEFI Cloud incorporates “software capability plugins” that enable its products to be used in different real-world applications, such as the smart waste plugin for waste bins, and smart drain plugin for storm

water pits, and an automated incident management plugin for emergency management and incident response.

EYEfi is rolling out the smart waste and smart bin technology in Australia and New Zealand through its Channel Partners, such as Fujitsu.

The Company has a proven business model of delivering innovative products and technology that solve real-world problems for its customers, with sustained profitability over time. Revenue growth has been achieved through strong growth from clients in industries related to monitoring assets and infrastructure, emergency management and incidence response.
